NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

CANADA

INDIAN RESIDENTIAL SCHOOL QUARTERLY RETURN

I HEREBY CERTIFY that the within Return is a true and faithful statement of the attendance and tuition at the Shubenacadie Indian R.es. School for the Quarter ended September 30 1945

Principal J. W. Brown

Dated October 1 1945

I have carefully examined the within Return and hereby certify that it is correctly made out in accordance with the instructions of the Department.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

Indian Agent

Dated at Shubenacadie N. S.

this 10th October 1946

NOTE

Principals will please be guided by the instructions printed on the last page.

FORM No. I. A. 403
Reqn. No. 2330

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

CANADA

INDIAN RESIDENTIAL SCHOOL QUARTERLY RETURN

I HEREBY CERTIFY that the within Return is a true and faithful statement of the attendance and tuition at the Shubenacadie Indian Res. School for the Quarter ended June 30 1947.

Principal J. M. Brown

Dated July 7th 1947

I have carefully examined the within Return and hereby certify that it is correctly made out in accordance with the instructions of the Department.

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

NOTES ON THE PREPARATION OF THIS RETURN

1. Fill in all the columns of this Return, giving full particulars in the case of each pupil, as called for under the various headings thereof.

2. The columns of the Return should be correctly added and the totals placed at the foot thereof.

3. When, owing to the number of pupils, all the names cannot be included on one sheet of the Return, use another sheet, paging it No. 2, and carry forward all totals, placing them in the proper columns.

4. The Returns must embrace only the quarterly periods ending 31st March, 30th June, 30th September and 31st December, respectively, and should be prepared and forwarded immediately thereafter.

5. No Quarterly Grant will be paid until Returns have been received by the Department.

6. *The total number of days in quarter* means every day in the quarter, including Saturdays, Sundays and holidays.

7. *The aggregate number of days pupils in residence during quarter* means the total number of days in residence of all pupils entered on the Return and is ascertained by adding the column under the heading "Total number of days pupils in residence during quarter".

8. *The average attendance of pupils during quarter* is ascertained by dividing the "Aggregate number of days pupils in residence during quarter" by the "Total number of days in quarter".

9. *The amount per capita grant due for quarter* is ascertained by multiplying the "Average attendance of pupils during quarter" by the amount of the quarterly per capita grant. In no case, however, will payment be made for any average attendance in excess of the number of pupils for which grant is allowed.

SPECIAL NOTE

A new number must be given to each pupil upon entrance to the school. On this Return the names of the boys and the girls must be arranged consecutively according to numbers.

Ottawa,
May 3, 1940.

Dear Father Mackey:

With reference to your telegram of May 3 I may say that a cheque for approximately 80% of your earnings for the March quarter is going forward to you this week. It may not be possible to pay the balance until about the end of May.

I was sorry I did not have another opportunity of seeing you but after I left you Sunday afternoon I did not get back to the hotel until about 11 o'clock at night. I certainly enjoyed my visit with you and will look forward to seeing you again in the not too distant future.

Yours truly,

Philip Phelan,
Chief, Training Division.

Ottawa,
March 21, 1941.

Reverend Sir:

Under separate cover you are being forwarded a cheque for $2000.00 being an advance on the March quarter per capita earnings of the Shubenacadie Residential School.

Yours truly,

Philip Phelan,
Chief, Training Division.

Rev. J.P. Mackey,
Principal,
Indian Residential School,
Shubenacadie, N.S.

Indian Residential School,
Shubenacadie, N.S.
May 1st, 1942

The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch
Ottawa

No. 51 - 0 - 13

Dear Sir:-

In checking up with the bank this morning, we find that there was a mistake in the last Quarterly Return of $2.18

You will notice that cheque No. 332, March 21st, to Johnson & Son, Ltd., is $109.44. This should read $107.26, a difference of $2.18

The trouble was, that, when issuing the cheque we deducted the 2% but when we entered it in the book, we took the figure on the invoice. To make matters worse, this cheque was not returned to the Bank on the morning of March 31st. When we got the Bank Book on May 1st, this item shows as on March 31st.

This item was for house equipment, so to keep matters straight we have deducted the $2.18 from equipment costs, and then from the totals, all the way through to the end of March. The Bank Statement attached to the Quarterly Report will show that the Bank Balance on March 31st was $4991.18. Deducting cheque No. 332 for $107.26 and cheque No. 337 for $20.61, will give true balance of $4863.31.

Yours very truly,

Rev. J. P. Mackey

Ottawa,
May 5, 1942.

Dear Father Mackey:

I have your letter of the 1st instant, explaining a mistake of $2.18 in the March quarter financial statement of the Shubenacadie Indian Residential School.

Yours truly,

Philip Phelan,
Chief, Training Division.

Rev. J.P. Mackey,
Principal,
Indian Residential School,
Shubenacadie, N.S.

Ottawa,
December 20, 1943.

Dear Sir:

I have your letter of the 17th instant, regarding the change in principalship at the Shubenacadie Residential School. I regret that you have not been previously notified regarding this.

The Department has approved the appointment of Reverend J.W. Brown as Principal and consequently cheques drawn on the school account by him should be honoured in place of Reverend J.P. Mackey, who has found it necessary to resign owing to ill health.

Yours truly,

Acting Director.

File: 51-0-3

Ottawa, 7th September, 1945.

Dear Father Brown:

I have just received a copy of the Field Auditor's Report on the Shubenacadie Indian Residential School. It is noted that under the heading "Expenditures" the items of clothing, food, fuel, house equipment and farm and garden, show a substantial increase from the year 1943-44.

While the financial condition of the Shubenacadie School at the present time is satisfactory, I would like to have an explanation of the reason for the increase in the items just mentioned.

Yours sincerely,

Philip Phelan,
Chief, Training Division.

Rev. J.W. Brown,
Principal,
Indian Residential School,
Shubenacadie, N.S.

Poor copy

On the FOOD, we have followed the same menus, with shortages and substitutes here and there. We remark, however, that the total for the two years of 1943-44 and 1944-45 combined, is over a Thousand Dollars less than the total for the two previous years.

On FUEL it was necessary for us to import Hard American Coal last year, instead of the usual Welsh hard coal that we had heretofore used. The increased cost per ton, plus the freight and duty, made that much higher.

Generally, while there was a large increase for one year on House Equipment and Farm, the total for the two years is practically the same as the total for the two previous years.

The purchase of an Electrical bread and meat cutter, or slicer, at $310.00 was a necessary and most useful unit added to the kitchen efficiency.

No Canadian household has escaped increased costs during war years and we cannot hope to do better here.

We trust that we have xplained matters to your satisfaction, and if there are any further details you wish, please let us know, and we shall gladly send them.

Sincerely yours,

REVEREND J.W. BROWN

Indian Residential School

Shubenacadie, Nova Scotia

October 18, 1945.

OCT 20 1945
RECEIVED

Dear Mr. Phelan:-

Your letter of September 7th at hand. We are sorry for the delay in answering, but for the past month, we were quite busy with the pump situation.

In reply to your inquiry as to the cause of increased expenditures for 1944-45, over preceding years, May I submit the following table of costs for the last four years.

	CLOTHING	FOOD	FUEL, Etc.	HOUSE EQUIPMENT	FARM
1941-42	2860.68	4877.92	3764.29	2035.32	3791.80
1942-43	2229.94	5116.03	3322.38	1692.37	3785.43
1943-44	532.99	2549.59	3804.13	1193.26	1793.83
1944-45	2043.40	5735.18	4701.50	2707.82	5006.79

The above shows that generally the two years of 1943-44 and 1944-45 combined are not much more costly, and that is the only way to make comparisons.

1943-45 was not a normal year as to costs. We could not secure required amount of clothing, boots, or underwear. Hence we were living from our house supplies, in stock, which are very much depleted at this time. We had only a cost of $532.99 for clothing in that year, while a pair of boots costs $3.00. When we have a chance to purchase needed clothing, then you will have increased costs. All our purchases for house, children, or farm, were more costly during the last year. Dominion ststistics are at hand at Ottawa to account for part of the increase.

One item alone, woolen goods for winter skirts, trousers, and out door wear, it was impossible to get. When we did procure some last year, it was quite an item. It was only by the most careful use of much material given us by the Military, through Mr. Rice, that our devoted Sisters cut and patched to make things go, and save costs.

Mr. ?. Phalen,
Dept. of Indian Affairs,
Ottawa

Dear Sir:

Father J. W. Brown has asked us to sell a Dominion of Canada bond fully registered in the name of the Shubenacadie Indian Residential School, maturing November 1, 1956, for $5,000.

Before we can sell this bond, we require the enclosed resolution or one of a similar effect, completed by authorized parties of the Dept. of Indian Affairs, giving Father Brown the necessary authority to complete the transaction. The proceeds of the sale are to be placed to the credit of the current account at this branch in the name of the Shubenacadie Indian Residential School.

We understand you are familiar with the transactions and we would appreciate your having the resolution completed and returned to us as soon as possible.

Yours truly,

Manager

Indian Affairs. (RG 10, Volume 6054, file 265-3, part 2)

Ottawa, December 20, 1945.

Dear Sir:

I have your letter of the 12th instant, in reference to Victory Bond #L 2 V2579 for $5,000.00, maturing November 1, 1956.

Extensive repairs were required at the Shubenacadie Indian Residential School this year, and as the amount necessary was not included in our appropriation, the Principal of the Shubenacadie School, Reverend J. W. Brown, was authorized to proceed with the work needed and pay for it from school funds. It is for this reason that he desires to sell the Bond mentioned.

As the bond is registered in the name of the Shubenacadie Indian Residential School, the Director of the Indian Affairs Branch and myself consider that the only signature required is that of Father Brown, who is the signing officer for the Shubenacadie School account.

Yours very truly,

Philip Phelan,
Chief, Training Division.

The Manager,
Royal Bank of Canada,
Shubenacadie, N.S.

Dear Father Brown:

With reference to your telegram of the 11th instant, I find that cheque 78364 for $6,761.63, in payment of the December quarter per capita allowance of the Shubenacadie Residential School, was mailed from here on February 8 and, no doubt, has reached you by this time.

Yours sincerely,

Philip Phelan,
Chief, Training Division.

February 28, 1948.

Dear Father Brown:-

Authority has been granted for increasing the per capita allowance of Indian Residential Schools by 17%, effective October 1st, 1947.

In view of the above authority the extra amount due the Shubenacadie Residential School for the quarter ended December 31st, 1947 is $1,328.40. A cheque for this amount will go forward next week.

Yours sincerely,

Philip Phelan
Chief, Training Division.

Rev. J.W. Brown,
Principal,
Shubenacadie Indian Res. School,
Shubenacadie, N.S.

Re: Indian Residential School,
SHUBENACADIE, N. S.

I have been advised by Sister Mary Charles, Superior at the captionally noted School, that their finances are at a very low ebb.

It is understood that a Grant is given this School quarterly, and it has been the custom for an advance to be made within the three month period. On checking over the Financial Statement from this School which was forwarded to you on June 29th/48, I noted that the Bank Balance was five dollars ($5.00), so it can be readily seen that an advance is urgently required.

It would be greatly appreciated if an advance of $1,000.00 could be made with the least possible delay, as wages have to be met for the current month.

(H. C. RICE) Superintendent,
Shubenacadie Indian Agency.

Re: INDIAN RESIDENTIAL SCHOOL,
Shubenacadie, N. S.

Reference to your telegram of July 6th last, respecting the financial condition of the captionally noted School.

The Principal, Rev. J. W. Brown advises me that it was an oversight on his part, that the financial statement did not bear his signature.

I have gone over his books very carefully and I cannot find one instance where there was not good judgement used in the purchase of equipment, supplies, etc. The present financial condition of this School can be attributed to the increase costs of living which has gone up from 50% to 60% within the last year; whereas, the per-capata grant of this school was only increased by 17½%. Wages have been increased at this Institution by approximately $100.00 by month and the management have stocked up considerable fuel, feed, etc., which will be carried in to the next Academic year.

The wages for the month of May has been paid, but no salaries have been paid for the month of June.

I would strongly recommend that this Institution be given an advance grant to meet their current obligations.

(H. C. RICE) Superintendent,
Shubenacadie Indian Agency.

November 30, 1948.

Rt. Rev. J.P. Mackey,
Principal,
Shubenacadie Indian Res. School,
Shubenacadie, N.S.

Dear Msgr. Mackey:

I occurred to me that it might assist you in your financing if we forwarded you an advance on the December quarter earnings of the Shubenacadie Residential School.

I am, therefore, arranging to have a cheque for $4,500.00 forwarded to you.

Unless something unforeseen intervenes, I will leave here on Sunday afternoon, December 5th and will reach Shubenacadie on the Ocean Limited on Monday evening, December 6th. I am looking forward to seeing you again.

Yours sincerely,

Philip Phelan
Chief, Education Division.

Mr. Bernard F. Neary
Supt. of Indian Education
Dept. of Mines and Resources
Indian Affairs Branch
Ottawa, Ontario.

Dear Sir,

We had hoped that the sum of money from the increased per capita grant would have reached us by this date. If this money is not coming very soon, may we have an advance on the quarter? At the present time we have on hand sixty-three dollars and one cent ($63.01), not sufficient to pay for the light and power in order to take advantage of the ten percent (10%) discount.

We are very grateful for the increase in the per capita grant and we hope with a few more pupils to be able to meet our obligations.

If it is to be an advance on the quarter, could you make it not less than three thousand dollars?

Very truly yours,

J. P. Mackey.

Rt. Rev. J. P. Mackey.

P.S. Cheque in this morning's mail, thanks a lot. J.P.M.

265-3 (E.1)

11th April, 1949.

Rt. Rev. Msgr. J.P. Mackey,
Principal,
Shubenacadie Indian Residential School,
Shubenacadie, Nova Scotia.

Dear Msgr. Mackey:

I have just reviewed your financial statement for the quarter ended March 31st, 1949, for the Shubenacadie Residential School.

It is noted that under the heading "Buildings and Repairs" there is an expenditure of $103.49, and under the heading "House Equipment" there is an expenditure of $304.62. Might I suggest that in future if repairs are required or new equipment is needed, you write to us before incurring the expenditure.

In the case of repairs you would only have to state what is required and give an estimate of the cost. In the case of equipment you would have to list the articles needed, and if they come within the range of the items which we allow, purchase will be made through the Departmental Purchasing Agent. A description of the article, catalogue number, the name of the firm and the cost at which they can be secured should also be supplied. By following this suggestion we could probably save you a considerable amount of money during the course of a year.

As you are aware, we do not always supply articles which you might enter under the heading of equipment,

but are actually replacement of expendable articles. However, purchase of equipment of a more or less permanent nature will be favourably considered.

I trust that everything is going well at the school, andthat you are enjoying good health. Best wishes for Easter, I remain,

Yours sincerely,

Philip Phelan,
Chief, Education Division

Re: Teachers - Residential School.

Msgr. Mackey is very anxious to know how much is being taken off his per capita grant on account of the teachers receiving their salary through from Ottawa.

Will you kindly advise at your earliest convenience.

Shubenacadie Indian Residential School

Reference your 51-2-32-265 of January 10

The per capita rate at this school will remain at the same amount namely $265 per pupil.

There has recently been an increase in per capita rates for various residential schools but such adjustments were not made for schools in which the Department is experimenting with the payment of teachers.

Vote No. 517

School No. 265

Allot. No. 16-805

E. R. No.

NOTE: The Minister approved increasing the Per Capita rate for this school from $265. to $270. effective from April 1, 1948. When the Department took over payment of salaries of teachers from September 1, 1949, it was mutually agreed that the Per Capita would be at the rate of $265. from that date. However, representations have been made to the effect that we should have made the adjustment at the rate approved by the Minister for the period April 1, 1948 to August 31, 1949 during which the Department was not paying the teachers salaries.

This voucher represents the adjustment that should be allowed and has been computed at the rate of $1.25 a quarter (265-270) for the period April 1, 1948 to August 31, 1949. See memorandum dated August 18, 1949 on file 1-1-3 for Minister's approval.

Rev. J.P. Mackey,
Principal,
Shubenacadie Indian Res., School,
Shubenacadie, N.S.,

The Minister has approved an increase in the Per Capita Grant for your school from $265. to $270. effective from April 1, 1948.

In view of the fact that the Department has commenced paying the teachers salaries in the school from September 1, 1949, the grant will be reduced to $265. from that date.

We are asking Treasury to pay you $1,004.62 to cover the increase for the period April 1, 1948 to August 31, 1949.

Bernard F. Neary,
Supt. of Indian Education.

March 29, 1928.

MEMORANDUM: Dr. Scott.

Tenders are now being invited for the proposed new Indian Residential School at Shubenacadie,- the tenders close at noon of the 30th day of April. If a satisfactory tender is received and a contract awarded we will require the services of a competent Inspector of Construction.

As it takes time for the Civil Service Commission to make the appointment I would recommend that arrangements be made now so that the Inspector's services will be available as soon as the contract is awarded.

Memorandum.

March 30, 1928.

Honourable Charles Stewart.

Tenders are now being invited for the proposed new Indian Residential School at Shubenacadie, N.S. and when the contract is awarded we will require the services of a competent Inspector for the work during the construction of the building. We would propose to pay the man employed at the rate of $6.00 per day. As the position is one which comes under the jurisdiction of the Civil Service Commission, it will have to be advertised by them. I would propose to ask them to advertise the position without delay but would like to have a suggestion as to who should be employed. I telephoned Mr. Illsley, M.P., this morning with regard to the matter but was unable to get him as he had left for home.

Deputy Superintendent General.

GOVERNMENT OF CANADA

REQUISITION FOR TEMPORARY EMPLOYMENT

TO THE CIVIL SERVICE COMMISSION:

You are hereby notified that, because of a temporary pressure of work in this department, the employment of extra assistance is necessary. You are requested to authorize the employment of some person to fill the temporary position described below:

DESCRIPTION OF POSITION:

Title of position: Inspector of Construction

Department: Indian Affairs Branch: Indian Agencies Division: IA5

Place of work: Shubenacadie Reserve, Hants Co., (City) N.S. (Province) Salary rate: $6.00 a day Appropriation: Vote for Indian Education.

Date appointee should report for duty: May 15, 1928 Probable length of employment: 6 months

Officer to whom appointee should report: D. B. (Name) Lawlor, Esq., Indian Agent, (City) Shubenacadie, (Address) N.S.

SPECIAL QUALIFICATION REQUIREMENTS FOR POSITION:

THE APPOINTEE SHOULD POSSESS THE FOLLOWING SPECIAL QUALIFICATIONS AS TO:

Education: as per classification

Experience or technical proficiency: do.

Place of residence: Sex: Man (Man, woman or either)

Other qualifications:

EXPLANATION OF NEED FOR ASSISTANCE:

Reason extra assistance is needed: The building of a new school.

Last outgoing incumbent: Name:

Organization Unit Symbol and Position No.: Salary rate:

Reason for leaving (place date after the circumstance that applies):

Dismissed: (Date) Died: (Date) Resigned: (Date)

Appointed to another Position: (Date)

Date: April 2, 1928. Signed: (Signature of Deputy Head) Acting

NOTES AND INSTRUCTIONS:

1. File this requisition with the Civil Service Commission as soon as the need for extra assistance is recognized. No letter of transmittal need accompany this requisition. If more space is required for describing the work, for stating the special qualifications, or for any other purpose, attach an extra sheet of paper.
2. When the position to be filled is a new one, that is, one not previously occupied, this form must be accompanied by Form C. S. 100 (Requisition for classification of new position.)
3. File a separate requisition with the Civil Service Commission for each vacancy in a temporary position. For permanent or seasonal places use the special requisition forms provided.
4. Give the position the classification title. If the position is a new one give it a tentative title which, as nearly as may be, is brief and descriptive of the work to be done.
5. The Civil Service Act, 1918:

23. (1) When from a temporary pressure of work, extra assistance is required the Commission may, on the written report of the deputy head that such extra assistance is required, authorize the employment of such number of temporary officers, clerks, or employees as are required to carry on the work. 1906, S. 94, amended.

(3) Temporary employment in the Civil Service shall only be authorized for such time, not exceeding six months, as the Commission deems necessary, and the period for which the employment is authorized shall be mentioned in the certificate of qualification issued by the Commission.

THIS SPACE RESERVED FOR THE USE OF THE CIVIL SERVICE COMMISSION

Dear Sir:

Re Indian Residential School.
Shubenacadie, N.S.

With reference to the erection of this Building, you will undoubtedly require Supervision of Construction of this work.

I shall appreciate your consideration in this matter, together with a proposal, for the Construction and Supervising Engineering required.

My experience in Building, and General Construction work is wide and, I believe, thorough in its entirety, otherwise I would not submit this letter for your approval.

If there is any information that you require, I shall be pleased indeed to furnish it, together with first class references if necessary.

Yours very truly,

D. F. MacIsaac

CIVIL SERVICE OF CANADA

POSITION VACANT

Applications are invited from residents of the Province of NOVA SCOTIA

and locality possessing the necessary qualifications for the position of

INSPECTOR OF CONSTRUCTION, (Temporary), Shubenacadie Reserve, Hants Co., N. S.

Department of Indian Affairs.

Salary $6.00 per day.

Qualifications required Primary school education; at least two years of supervisory experience in construction work; ability to read and interpret plans and specifications; familiarity with materials and methods of construction; tact and good judgment; integrity. The probable duration of employment will be six months. The appointee for this position should report on or about May 15, 1928.

An eligible list, which will be valid for one year for appointments of this nature, may be established as a result of this competition.

Applications must be in the handwriting of the persons applying (or if otherwise, the reason therefor to be given) and on forms supplied by the Commission, which may be obtained from the office at which this notice is displayed, or from the Secretary, Civil Service Commission, Ottawa, and are to be received by

The Secretary, Civil Service Commission, Ottawa, Ont.

not later than

Length of residence in the locality must be stated. Applicants must describe the position as indicated above and must not vary description in making application.

According to law, preference is given among candidates possessing the necessary qualifications first to persons who are in receipt of a pension on account of disabilities received as a result of war service, who by reason of such service are unable to continue their pre-war occupation, and who have not been successfully re-established, and secondly, to persons who have been on active service overseas or on the high seas. Candidates must be British subjects and must have resided in Canada at least three years.

Under the provisions of the Civil Service Superannuation Act, 1924, a deduction of five per cent is made from the salary of every permanent employee entering the Service as a contribution to the Superannuation Fund.

Civil Service Commission, Ottawa, Canada. **W. FORAN, Secretary**

(THIS CERTIFICATE IS NOT TO BE DETACHED)

The person to whom this poster was addressed will please sign the following certificate and return the ENTIRE poster to the Secretary, Civil Service Commission, Ottawa, immediately after it has been displayed for the required period.

Duncan C. Scott, Esq.
Deputy Superintendent General,
Dept. of Indian Affairs, Canada,
OTTAWA.

Dear Sir:

I am pleased to acknowledge, and thank you for your letter of May 4th. enclosing a copy of Poster, advertising the position, Inspector of Construction, Shubenacadie Indian School, Nova Scotia.

Inspectorship only, would not be of interest, or importance to me. Consequently, I am submitting a proposal to the Secretary of Civil Service, for the complete, Engineering, Supervision, Tests, etc. in connection with this work.

Herewith, for your information, a copy of my proposal to the Civil Service Department, which is fully explanatory.

I am very grateful indeed, for your prompt and attentive consideration of my inquiry in regard to the Construction Work under view at this time.

Yours very truly,

Construction Engineer.

Dear Mr. Foran,-

I beg to request that you will take the necessary action for extension of temporary certificate in favour of Mr. James William Crowell as Inspector of Construction, Shubenacadie Indian residential school, as it is necessary to retain his services for a further period of about two months. His present certificate expired on the 29th ultimo. I inclose requisition herewith.

Incl.

Yours very truly,

Duncan C. Scott

Dr. Scott for direction please

Mr. Russell T. Fernier,
Superintendent of Indian Education,
Ottawa, Canada.

Dear Sir:

You asked me for names of firms who should be asked to quote prices on bed-room, dining-room and living room furniture for the Shubenacadie institution. Please ask A. J. Reid of Shubenacadie and Fred Herman of Windsor to quote on these articles.

You also asked me for the name of a Shubenacadie firm from which to buy kitchen and household utensils, cutlery and dishes. Please buy these from A. J. Reid of Shubenacadie.

You also ask me to give the name of a dry-goods firm in Shubenacadie. I am not sure, but I think that Mr. Lawlor, the Indian Agent at Shubenacadie, runs a drygoods store, and if so I would appreciate it if drygoods are bought from him.

I will advise you later about the other matters concerning which you spoke to me.

Yours truly,

J. L. Ilsley.

Memorandum:

DR. SCOTT.

We wish to report that, on the 20th and 21st instant, we were in Halifax for the purpose of meeting the Roman Catholic Church authorities, concerning the proposed Indian residential school at Shubenacadie and to look into building materials and sources of supply.

We met the committee appointed by His Grace the Archbishop of Halifax, and, after conveying the greetings of the Honourable the Superintendent General and yourself, we explained the Department's proposal. Rev. Father C. E. McManus, of St. Mary's Cathedral, Halifax, Chairman of the committee, gave assurances of their eagerness to cooperate and appeared quite willing to have the proposed institution come under our regular scheme for schools of this class. After going somewhat into details concerning the management and financing of an Indian residential school, we discussed the service that can be given to the Indian children who might be enrolled there. A set of plans and literature concerning Indian residential schools were left with Father McManus.

It is proposed to secure the Sisters of Charity for the do estic and classroom activity, and we visited their Mother House on the Bedford Road, near Halifax. Their institution and the Sisters we met made a very favourable impression and they, too, seemed quite eager to go into Indian work. We left with them, also, a set of plans and literature concerning residential schools. The Mother General of the Order is at present in Western Canada and she and her staff arranged to visit the Blood Indian Residential School, to get firsthand information concerning its conduct.

Memorandum:

DR. SCOTT.

On Tuesday, the 19th instant, we arrived at Shubenacadie, N. S., to examine properties there for the proposed Indian residential school. J. L. Ilsley, LL.B., of Kentville, M. P. for Hants-Kings, met us there and assisted until a final selection was made. At the outset, we had a preliminary look at the various sites that had been brought to your attention by letter, and, without much hesitation, we soon confined our interest to the Etter and Gay farms, which were carefully examined. Certain local persons with some influence were desirous that the Dewis property be included in the final examination, but Mr. Ilsley and ourselves could not agree that it was suitable enough to be worthy of comparison with the other two.

It was considered advisable to proceed to Halifax for the 20th and 21st, for the purpose of meeting the church authorities and to look into building materials and sources of supply. The final selection of a site was postponed until Friday, the 22nd. On that date the Etter and Gay farms were examined with considerable care. While the first named property appeared to possess more possibilities as a productive farm - a much wider choice of acreage being available for purchase - from every other angle the Gay property was more suitable.

The Gay property is situate one-half mile [illegible] the station at Shubenacadie - immediately on the [illegible] of the village. The site is reached by a good road leading directly from the village - a distinct advantage over other properties, in that it is not necessary to cross the railroad when travelling to and from Shubenacadie. [illegible] is pointed out that this railroad is the main line of the C. N. R., over which there is heavy traffic, the importance of this to the staff and children will be understood. The farm consists of approximately 65 acres of cultivated upland, 50 acres of woodland - 10 of which have already been cleared sufficiently for pasture, and 17 acres of marsh which produces hay perenially without attention. The properties surrounding it appear to be clean and well cultivated. We consider this Gay farm, which consists of [illegible] acres, more or less, large enough for the needs of the proposed institution for some time to come. The land appears to be clean and productive and is in one block. It should be mentioned that a fresh water lake, suitable for bathing, boating and fishing, just touches the northern boundary of the Gay farm.

On this property is an ideal building site. It commands a view of the countryside in all directions and the building will be seen from the railroad and [illegible]

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

five roads running in and out of Shubenacadie. The site selected also provides ample opportunity for excellent drainage and water supply, the Shubenacadie river being less than 100 yards from the spot for the building. Electric current and telephone connection are available.

We wish to point out that it was impossible to locate a building site on the Etter property which was at all close to the railroad or main highway, and the drainage facilities were not at all comparable with those of the Gay property. This also applies with more force to the Dewis property, but, in addition, the Dewis property's only possible site for the building was immediately over disfiguring gravel pits and generally rough ground. It was represented to us that a siding which was close to the Dewis property would be a big advantage. However, this feature was not worthy of serious thought as all materials would have to be unloaded from the cars into a vehicle and hauled up a difficult grade to the building. The Gay property, without railroad to cross and only a few hundred yards farther from a railroad station, had the distinct advantage of being near a post office and business community. We were warned by certain interested parties that the road leading to the Gay property, which happens to be the main road to Maitland, was flooded at certain seasons of the year. We made several enquiries from independent sources in this connection and we learned that the road was flooded for an hour or two a day in the spring of certain years only, but that it was not impassable even when flooded.

Mr. S. J. Etter wanted $13,500 for his farm, which consists of 270 acres. A lot of the value of this property is tied up in the buildings, the most important of which would have to be removed in the event of an Indian residential school being erected there. Mr. George Gay, in his written offer to Mr. Indian Agent Lawlor, asked $9,000 for his 130 acres, but we were able to secure from him an option on the property at $7,000, provided he be allowed to harvest this year's crop. He promised to do the fall ploughing and otherwise prepare the fields for next year's farming operations.

We wish to recommend that the farm of George Gay be surveyed at an early date, with a view to determining not only the exact size of the property but also the best building site. If everything is found as has been represented to us and the title is satisfactory, we believe it advisable to arrange the purchase. In our opinion it is easily the best property near Shubenacadie for an Indian residential school. When title is being searched, it should be ascertained what privileges the owners have in connection with the lake that touches the property and if there is a right of way around its southern extremity.

Some time ago, approximately one-eighth of an acre of this farm was sold for the site of a residence. Three

or four years ago the purchaser, Mr. Allan S. Etter, erected a residence, which would make a very suitable home for the farm instructor and other male members of the staff of the proposed school. This residence and lot, which is situate on the entrance road to the property, can be purchased for $4,000, which sum is less than would be required to erect a suitable farmer's residence. We strongly recommend that this property, also, be purchased.

Dear Father McManus,-

When the Architect of the Department was in Halifax in July he left with the Reverend Sisters of Charity a copy of a plan of an Indian Residential School, which it was thought would be suitable, with minor changes, for the proposed new building at Shubenacadie. The Sisters promised to look this plan over and return it to the Department at an early date, with their comments and suggestions. To date I have not received this plan, and as we wish to get next year's work under way, I would appreciate it if you would see that same is returned to me as soon as possible.

Yours very truly,

Deputy Superintendent General.

7. If the Indian Department considers it a necessity to have the boys taught Manual-training, there seems to be no provision made for this useful work.

8. A Domestic-Science room for the girls would be equally beneficial if it were thought desirable. Bringing the girls and boys to the general kitchen would be helpful to them and to the work during some parts of the day, but the real scientific work cannot be given at this period.

9. There seems to be no provision made in the basement for male help. This will be necessary for the boiler-room, etc., etc.

10. No provision is made for cold-storage which is a real necessity. If the building is far into the country, it might be difficult to get meat and other provisions often. Besides it is necessary to have food that is left over from one meal to the other cared for in cold storage.

The above suggestions, if acceptable, would help very much with the success of the work. We regret that there should be any delay in returning your plans and in submitting our suggestions. Should there be any further information required from us, we shall be very much pleased to comply with your inquiries.

Hoping that the work will progress satisfactorily, we are,

Very sincerely yours,

Sisters of Charity

Jen Mother M. Beechmans.

P.S. The plans are going forward to your department today by insured mail.

MOUNT ST. VINCENT ACADEMY
HALIFAX, NOVA SCOTIA

DEPT. OF INDIAN AFFAIRS
NOV 28 1927
RECORDS

For Off

November 24, 1927.

The Deputy Superintendent General,
Department of Indian Affairs,
Ottawa, Canada.

Dear Sir:-

During the early part of the Summer, your Architect brought the plans of the building to be erected for the accommodation of the Indians at Shubenacadie, with the request that we study them and make such suggestions as would be acceptable to the work. We regret that we have delayed in returning the plans to your department until now.

Our General Superior being absent during the greater part of the Summer, must be our excuse for keeping the plans so long. We are enclosing a list of the suggestions that might be acceptable for the better government of the work in this residential school. It is well in the beginning of this undertaking to have the conveniences that we think necessary in order to make the work more satisfactory.

Let us state here the points under consideration:---

1. Would it not be well to have two (2) doors at least, in each of the dormitories on the top story?

2. The wash-tables in the middle of these dormitories would seem to be unsanitary. They certainly would not be helpful to the discipline of the dormitory. Might these wash-tables be placed in the center of the toilet-rooms. In this case, these rooms would have to be made larger, or would it be desirable to cut off from the end of each dormitory, lavatories for this purpose? This would permit the children to be trained to better advantage.

3. Would it not be advisable to have fire-escapes from the upper dormitories instead of from the staff-rooms?

4. It is desirable to have closets on the girls' and Boys' side of each floor for brushes, brooms, etc.

5. The children will have unused clothing, as they must have at least some changes. There does not seem to be much provision made for the storing of this clothing.

6. In the basement in each of the recreation-rooms some provision should be made for the childrens' boots and rubbers. Perhaps for these small cubicles might be made along the side of the wall and these could be used for seats also.

Dear Father Mackay.-

I wish to confirm our recent conversation with reference to the conduct of the proposed Indian residential school at Shubenacadie, N.S. I should be grateful if you could arrange to take up residence there on or about the first of May, at which time the Department will be prepared to provide a temporary supply of live stock and agricultural implements. A reasonable amount of furnishings will be allowed for the residence. You will then be in a position to supervise the farming and gardening activity and to arrange for a root cellar and other improvements that may be found necessary. Further, it will be of much advantage to you to be at Shubenacadie when the new main building is being erected. The Department undertakes to meet all reasonable expenses in connection with getting the school started.

I believe it advisable for you to make yourself known to Mr. Indian Agent Lawlor, of Shubenacadie, who will be in a position to advise you concerning the keeping of accounts and forwarding vouchers that will be satisfactory to the Department. When the school is in operation, Mr. Lawlor will be instructed to make a visit once a month so that he can forward a report to the Department. It is not my present intention to hold him responsible, in any way, for the conduct of the institution, but I know that he will assist if, at any time, you approach him. When materials are to be purchased or labour engaged, the Department will send you the authority direct and wishes you to be responsible for every phase of the school activity.

I trust that you will be able to make satisfactory arrangements with the Sisters of Charity, who have so kindly offered to co-operate. Please give my best wishes to His Grace.

Yours very truly.

DEPT. OF INDIAN AFFAIRS
MAR 31 1928

O t t a w a,
February 18, 1928.

Ref. No. I. A. 44.

Dear Mr. Orr,-

With further reference to yours of the 20th of December, already acknowledged, in which request is made for labour conditions for use in connection with the proposed erection of a new Indian Residential School at Shubenacadie, Nova Scotia, I beg to advise you that the Department of Labour recommends the use of the General Fair Wages Clause in this instance, in the terms herein enclosed.

The General Fair Wage Clause calls for the observance of the rates of wages and hours of labour of the different classes of workmen required which are generally accepted as current from time to time during the continuance of the contract, for competent workmen in the district in which the work is being performed, and if there be no current rates or hours in the district, then fair and reasonable rates and hours. I understand from you that it is desired to complete the specification for this work and the labour conditions in question are being furnished accordingly. Before tenders are taken, however, we should like to have an opportunity of preparing a schedule of wages rates and working hours based on the conditions current at that time, in order that the same may be communicated for purposes of information to any contracting firms who are desirous of tendering for the work in question. I shall be pleased, therefore, if you will give us word shortly before the time that tenders are called for this school building, in order that a schedule may be furnished to you for the above purpose.

Yours truly,

Gerald H. Brown,
Assistant Deputy Minister of Labour.

General Clause

All mechanics, labourers, or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed for the character or class of work in which they are respectively engaged, and if there be no current rates in such district, then fair and reasonable rates, and shall work such hours as are customary in the trade in the district where the work is carried on, or if there be no custom of the trade as respects hours in the district, then fair and reasonable hours, unless for the protection of life and property, or for other cause shown to the satisfaction of the Minister of Labour, longer hours of service are required. The Minister of Labour may at any time and from time to time determine for the purposes of this contract, what are the current or fair and reasonable rates of wages, and the current or fair and reasonable hours, and may from time to time rescind, revoke, amend or vary any such decision, provided that his determination and any amendment or variation shall not be operative prior to the period of three months immediately preceding the date thereof. Where there are special circumstances which in the judgment of the Minister of Labour make it expedient that he should do so, he may, in the manner and subject to the provisions hereinabove set forth, decide what are the current or fair and reasonable rates of wages for overtime, and what is the proper classification of any work for the purposes of wages and hours. Immediately upon receipt of notice of any decision of the Minister of Labour hereunder the contractor shall adjust the wages and hours and classification of work so as to give effect to such decision. In case the contractor shall fail so to do, or to pay to any employee or employees for any services performed or for any hours of labour, wages according to the rates fixed therefor by the Minister of Labour, the Minister of Labour may authorize and direct the Minister to pay any such wages at the rates so fixed and to deduct the amount thereof from any moneys owing by the Government to the contractor and any such payment shall for all purposes as between the contractor and the Government be deemed and taken to be payment to the contractor, and the contractor shall be bound in every particular by any such authority, direction and payment as aforesaid. The powers of the Minister of Labour hereunder shall not be exercised as to any employee or employees where it is established to his satisfaction that an agreement in writing exists and is in effect between the contractor and the class of employees to which such employee or employees belong or the authorized representatives of such class of employees fixing rates of wages, overtime conditions and hours of labour.

Shubenacadie N.S. June 6th 1927

A.J.Boyd Esq.
Superintendent Indian A fairs N.S.
Cannes. C.B.

Dear Mr Boyd:-

I was pleased to learn that through your effort there is a likelihood of an institution, for Indians being established here, and regret that I did not at the time know of your visit.

I do not wish to butt in anywhere, but I presume that the first thing in your mind is a suitable location, at a reasonable price, for the popularity of the movement will depend much on the location.

I need not say to you, that Shubenacadie Village, situate on the C.N.Ry, and on the main highway from Halifax to Truro, exactly in the centre of the Province, the best farming community in the province, with excellent connection, by Rail, Main highway, StagesTelegraph and Telephone with all parts must be a desirable location. and the Indian Reserve of some 1800 acres is only 5 miles distant.

As a lifelong resident of the place, and for many years past Appraiser for the Canada Permanent Mortgage Corporation I have perhaps a better knowledge of the farms here, and their values than others could have. AND I have no axe to grind.

I do know however if you can secure a suitable location and build this institution near our Town, and close to Ry Depot. Post Office, Tel and Tel offices Churches etc that it would mean much to the appearance and popularity of the Institution, and to the future of this Town.

I can well believe that a location on the main highway with a good elevation, ample water supply and opportunity for sewerage and with a good view would be the ideal, and several such can be obtained here, within ½ mile of the Ry Depot and Post Office.

While I repeat, That I have no axe to grind, and my first thought is the Best interests of the institution and this Town and community, I beg to say that I have one of the finest farms in the Province, within sight of the Town, less than ½ mile from Ry Depot, on the main highway, at a good elevation overlooking the Shubenacadie River and in full view from the Railway, most excellent situation, splendid soil, about two weeks earlier than most farms, ample water supply for an institution and sewerage easilly available, 32 acres of the renowned Shubenacadie River marsh, the most prolific and easilly cultivated of farm lands and yielding a continual annual crop of hay without cultivation, small orchard, a splendid flat for an institutional athletic grounds, a large barn capable of housing 50 head of cattle and storing 150 tons hay and located where in my judgement it would not interefere with your other buildings.

I only bought farm last year. It had been rather neglected, but cut 120 Tons Hay and some grain crop but I

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

expect in two years to be making it produce 200 tons hay besides other crops.

The whole farm contains around 400 acres, but I would sell the front or cultivated portion say 150 to 200 acres and retain the rear and woodlands for myself.

Now all this does not sound as though I have no axe to grind: But the fact remains that I am not anxious to sell it.

Besides there are a number of other places near the town, which can be bought and one or two of them at low prices. S.J. Etter. George Gay. Fred Etter, Joseph Flemming, all have good locations and are worth your while looking over, to get the best for the money.

My farm could easily be made one of the show places of the country, the view of and from the farm cannot be excelled.

The marsh alone is valued $ 200. per acre or $ 6400. but if you would not want the marsh I will keep it, and sell the upland portion, or any part of that.

While as I have said I am not anxious to sell, I am XXX anxious that you get a property that will suit you entirely and within ½ mile of our town, as I know that would mean a great deal to the future of this community.

Yours truly,

Robert Sass.

Re Farm at Shubenacadie N.S. recently visited by Department of Indian affairs.

Mr D.C. Scott
Deputy Minister of Indian affairs
Ottawa.

Dear Sir—

This property is situated at Dennis Siding, 1½ miles from Shubenacadie on the truro road.

The farm comprises 75 acres, in one block 65 of which have been under the plow. It has been run as a dairy farm for forty years and is in a good state of cultivation. The soil is loam with clay sub-soil and is easily worked.

The buildings consist of House with nine rooms finished throughout, with furnace in cellar and water in house, but no bathroom. Barn 28x48, Garage. Poultry house. Ice house, Feed room, Fuel house and work shop.

Water is supplied from two surface wells for hard water and one driven well 190 feet deep with six inch casing. I do not for soft water

know exactly what acreage the Dept. requires then I can give a price of $2500 for a frontage including buildings and thirty acres of land or $4500 for the farm as described.

Should more land be required there is a piece of thirty acres immediately adjoining which could be acquired at a correspondingly low price.

This farm is enclosed by a wire fence.

Should you wish further information I will be glad to furnish it. and hoping to hear from you

I Remain

Yours truly

At.....Shubenacadie.,...Nova...Scotia.

.....June..17.,..... *19.27.*

Sir:

Your esteemed favor of the 13th instant to hand, and am pleased to know you enjoyed your journey and trust that you will come again to Nova Scotia.

In reference to the report on the farms you asked for at Shubenacadie, I would say, that I interviewed Mr. E. M. Dewis and Mr. Stewart Etter, and am enclosing a letter from Mr. Dewis, in which he gives a description of his farm, and price wanted.

I might say that I visited the farm with Mr. Dewis and roughly checked up his statements and which I believe are correct. I might say that this is the farm directly opposite the small way-station known as Dewis' Siding. The farm is completely fenced with wire fencing. Nothing in the nature of a crop has been put in this season for the reason that Mr. Dewis lost his largest barn last Fall and has not been living on the farm this season.

In reference to Mr. S. Etter's farm, I would say that I looked over same with him, and am also enclosing his letter giving description and price. To his description

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

I would add the following:

"The frontage faces the main highway and railway, and is approximately sixty rods wide, then widens out to about one hundred and twenty rods and runs straight back to the Shubenacadie River. The farm is entirely fenced all around.

The buildings consist of:

1 Two storey Dwelling size 24x23 with Ell attached 24x22, modern improvements,

1 Implement Shed 85x25,

1 Barn 40x60. Basement stable.

All buildings are in good repair and built within the last few years. Four wells supply water for this farm.

The above dexcriptions cover the two properties asked for, and I would beg to say that if further information on the said properties is required, to please command me and I will do all possible to supply same. I am taking the liberty to inform you that since the object of your visit has become known to the farmers here, that several of them are willing to dispose of their farmshhere so that if the farms reported on do not meet with your approval, there are

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

several to choose from.

I would say that during our conversation, you stressed the point that the farm you selected would have to be able to supply quantities of water and I presume you meant soft water.

I am taking the liberty of enclosing a description of a farm property here that for water supply, elevation and drainage cannot be duplicated in this section. This is known as the George Gay Property, located on the Main Road to Maitland. A building on this property would show well from the Main Trunk Road, the Village of Shubenacadie and the Railroad.

Trusting that my report may meet with your approval, and assuring you of my best attention at all times.

Your obedient servant,

D. B. Rawlon

Ottawa, June 18, 1927.

Dear Mr. Illsley,-

I have to acknowledge the receipt of your letter of the 11th instant, dealing with the site for the proposed Indian residential school in Nova Scotia.

As you are no doubt aware, I visited Shubenacadie and the Indian reserve in that vicinity and looked over one or two farms. I decided that it would not be in the interests of the scheme to locate the building on the Shubenacadie reserve. I had an interview with the Indian Agent at Shubenacadie, Mr.D.B.Lawlor, and I directed him to obtain information with reference to farms that might be for sale in the vicinity of Shubenacadie and to make a report. My Deputy for Indian Affairs reminded Mr. Lawlor that we were awaiting his report, and I trust that it will reach me in a few days. If you have any recommendations to make, I should be glad to receive them, and before coming to any definite decision in the purchase, I will communicate with you.

Yours faithfully,

(C Stewart)

Ottawa.

Dear Sir:-

I was duly in receipt of yours of the 14th inst,
As an old resident of this place,knowing howmuch it would mean to us to have this institution located here,if I can be of any service to you in the way of information I will be pleased to do anything possible.

Further I believe it would mean much to the success and popularity of the movement to have it located at this centre of the Province,on the C.N.R and National Highway and as is possible,near Ry Depot,Post and Tel Office.

I might add that for a number of years I have been appraiser for The Canada Permanent Mortgage Corporation,a concern that does not make many mistakes,and I know something of farms and farm values.

If I knew just what you want as to size etc I might be able to give you some information.

I assume you do not want expensive buildings,but a good location,good soil and ample water supply for such an institution.

As stated in my letter to The Hon Minister,I feel rather handicapped in boosting Shubenacadie,being an owner and possible seller,and my boosting might be considered self interest,aside from any self interest I am anxious to see it located here,because for central location,convenience and agricultural lands Shubenacadie is the cream of the Province.

Added to this the large Indian Reserve id here.

I feel certain that Hon Mr Ralston would confirm anything good I might say of Shubenacadie but of course in his busy life he would overlook details that might be of interest to you,and which I might be able to supply therefore I repeat if I can be of service to you I will be pleased.

While I am satisfied I have the most desirable farm and location in the Province I will not be prejudiced in any imformation you may ask for.

My desire is to have the institution located here.

I have an enquiry from U.S for my farm today and have quoted them,but I quoted a much higher price than I will quote you. For personal reasons I am going to sell,and only wish I could have yourself visit the farm.

Yours truly,

Robert Laws.

Shubenacadie N.S. June 23rd 1927

Duncan C.Scott Esq.

Deputy Supt General of Indian Affairs.

Ottawa.

Dear Sir:-

Mr D.B.Lawlor, local Indian Agent has waited on me and inspected my farm.

In the absence of definite knowledge as to your requirements, I gave him a rough sketch and description showing a number of different proposals, for sale, and have told him further, that I will subdivide farm in any other way that will meet your wishes.

While Mr Lawlor perhaps would not consider himself competent to declare emphatically on the quality of the farm I know he was favourably impressed.

He certainly was with regard to the location, building s sites, and particularly the water supply and facilities for the sewerage which I pointed out to him, and which are noted on the description I gave him for forwarding.

He at least was surprised, when after inspecting some others, I showed him A REAL FARM.

I pointed out to him that the soil was different from any other he had seen being a deep sandy loam, free from stones, easilly cultivated and very productive.

This was easilly demonstrated on the ploughed grounds and growing crops.

I might repeat that for a number of years I have been appraiser for The Canada Permanent Mortgage Corporation, and know something of farms and farm values, I have appraised many of the farms in this district, and you can believe that when I bought a year ago I bought what I knew to be the best one.

I intended keeping it but continued sickness of members of my family make it advisable for me to sell.

While the matter of your choice of the several offers I have made, is immaterial to me, if you will permit me to suggest, as a practical man, your best purchase is lots No 1 and 2--90 acres at $ 9.500 inasmuch as the Barn on these lots, is not old, is an up to date plan and with slight repair and alteration would be A 1 and could not be replaced for $ 4500.

I have no hesitation in saying this would be the best 90 acre farm in Nova Scotia.

If you wish to add the Marsh lot No 4 -34½acres at $ 3000. or a total of $ 12.500 you would have 125 acre farm, without any any superior in Canada.

This Marsh land is valued at not less than $ 150. per acre I would not sell it separately for less than $ 4500. I am offering to you in combination with other lots at $ 3000.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

It is the finest of agricultural land, suitable for any crop by cultivation and yielding an annual hay crop without any cultivation, or fertilization and has been doing so to my personal knowledge for upwards of 50 years.

Generally, let me say, without making any comparison with other farms available.

You do not have to cross a Railway track (which must be objectionable) to get to my farm.

Its frontage is on the main Provincial highway.

The Soil is a deep loam, free from stone, easilly cultivated and very productive.

Its location cannot be excelled. It is in the exact centre of the Province, within ½ mile of Railway Depot, Post and Telegraph Office, Schools Churches, Public Hall, County Exhibition and Athletic grounds.

It has ample water supply and opportunity for inexpensive sewerage, to the River, excellent building sites and the view of and from the farm cannot be excelled.

The prices quoted are less than actual value, You may buy cheaper farms but not of this size, location or quality.

Looking to the future of the Institution, in view of the location, quality and facilities, initial expenditure of a thousand or two dollars extra is nothing.

The large Indian Reserve is within 5 miles.

Last year notwithstanding neglect of former owner tnis farm gave me 120 tons hay besides other crops, the growing crop on it today is worth upwards of $ 1200.

Within two years if I keep it I will make it yield much more.

Finally I am offering a square deal. I am not enhancing values in any of the different proposals I have made. on the other hand I am offering at very low figures.

My cards are on the table and while from personal reasons I am anxious to sell, I am not altogether governed by self interest but as an old resident of the community, who has always taken part in movements for its benefit, I am putting forward the proposal that I know to be best for the community, and for the future success and popularity of your Institution.

I leave the matter in your hands.

Yours truly,

Robert Sass.

POOR COPY

Farm of Robert Gass, at Shubenacadie, N.S.

Located-½ mile from Ry Depot, Post and Telegraph Office.

Frontage on National Highway, leading from Halifax to Truro Overlooking highway, C.N.Railway and Shubenacadie River, all three of which run paralel past front of farm.

Do not have to cross a Railway to get to farm, the frontage being on the highway.

Good elevation gradually sloping back from highway and could be made a show place.

Finest of agricultural land, a deep loam free from stones. and from nature of soil from one to two weeks earlier than any other farm in the community.

A portion of the land is already underdrained.

The pasture land East of the brook as shown on sketch herewith, is cleared and ready for cultivation.

The view of and from the farm is unnexcelled.

Has small orchard of about 70 apple trees.

Large barn capable of housing 50 head of cattle and 150 tons hay It is up to date in plan, was built about 8 years ago and with some repair could be utilized, as it is located where it would not interefere with other buildings.

The farm is an old landmark, and has for many years been known all over the countryside as " The Parker Farm " one of the best in the Province.

Old farm house originally built in 1817 was rebuilt by me 1926

The rough sketch does not do justice to the location.

Ample water supply. At A.B. and C. are three excellent wells while at D there is a hollow and spring, where a dam 15 ft long and 5 ft high would conserve enough water for institution, the hollow is already utilized and pumped to the barn underground pipe.

At E with a dam on the brook 20 ft long and 5 ft high any XXXXX quantity could be retained and pumped to the institution, or could pump direct from Lake.

Direct sewerage to river could be easilly obtained where marked on sketch, going through highway and railway culverts already there.

River being tidal water, sewerage is permitted.

One of the greatest fertilizers is the mud from the banks of the river which is obtainable in unlimited quantity.

The straight lines show present boundaries of farm but as I apprehend you do not wish rough land or wilderness, the dotted lines will show you the portion I propose to sell you.

I will retain the rough land on the Northern side which will give me access to Wildernes and woodlands in rear.

My proposal is that I will erect new post and 4 wire fence along the dotted lines of such portion as you may purchase. and the cost of this is included in the price I quote you.

You will understand that in offering you by these dotted lines I am offering you the cultivated portion of my farm, now carrying a valuable crop, and I will in the absence of definite information [redacted] to

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

as to your exact requirements, but understanding you want about 100 acres of cultivated land or land ready for cultivation, I will subdivide my farm in any way you wish.

The acreage suggested in the lots marked in red dots is only estimated but will be properly surveyed out on sale and fence erected by me on the surveyed lines.

Just here I beg to say that anywhere on lots 2 and 3 would be a desirable building site for your institution, being well elevated.

If you do not desire the hill in rear which I use for pasturage and which idx ready for the plough, I will sell you 100 acres off the front from O on the North side to O on the South side in a direct line leaving the upper courses of the brook andythe dam site on your lands and the lower courses of brook on the pasture lands I retain the fence crossing the brook below your dam site.

This would be all cultivated land except some bush along the brook XXXXXXXXXXXXat the North Eastern corner and a few acres of pasture in the valley at South Eastern corner.

My prices(fenced) are as follows

Lots No 2 and 3 without buildings, 100 acres $ 7.500X.

Lots No 1&2 XXXX with buildings and orchard about 90 acres $ XX.500X. $ 9.5000

Lots No 1.2.and 3 with buildings and orchard about 125 acres $ 10.500X.

Lots 1.2 and 4 includes marsh and Buildings about 124 acres $ 12.500X.

Lots 1.2.3.and 4. about 159 acres $ 13.500X.

Or upland frontage O to O 100 acres including buildings and orchard $ 11.000.
and if you wish Marsh Lot No 4
in addition add $ 3000. or a total of $ 14.000

If you do not want marsh I will be glad to retain it.

Here again I would point out that on Lot No 1 marked X on the sketch is one of the finest building sites in N.S. and one I intended keeping for myself but continued illnes in members of family has decided me to sell. It could be made the show place of the country.

Again Note- The growing crop on this farm is worth $ 1000. if purchased immediately you secure the crop on the portion purchased. Harvesting hay crop should begin about July 10th.
Yesterday I had an U.S. enquiry for this farm and I quoted $ 16.000. Inspector of Mortgage Corporation has valued it $ 15.000and I am offering to you at $ 13.500 to induce location of institution here.

To D.B.Lawlor.

INDIAN OFFICE

At Shubenacadie, N.S. June 22/1927 19.....

Sir.-

Enclosed please find a report on the farm of Mr. Robert Gass as requested. This report was prepared by Mr. Gass, and I have checked same, by inspecting his property to day, and I Find everything as described. In addition I have to report that this farm has not been extensively cultivated for several years up to last year, but during this last two years a large amount of farming has been done on this property, and the farm is now in great heart and is growing a splendid crop of grain, hay and vegetables this season. This land is splendidly adapted for the growing of vegetables, the soil being more sandy than the farm lands on this side of the river, dries out quicker.and consequently can be worked earlier in the season.

A splendid location for building sites are obtainable on any of plans submitted by Mr. Gass, and if none of the plans submitted are acceptable to the Department, Mr. Gass will divide the farm in any manner you would select, at the same average price as submitted in his report. If any further information is required, please command me, and I will obtain same.

July 11, 1927.

Dear Mr. Ilsley:

I am directed by the Honourable Mr. Stewart, who is at present in Western Canada, to refer to your letter of the 11th ultimo and his reply of the 18th, concerning the selection of a site for an Indian residential school in Nova Scotia. I am pleased to state that the Roman Catholic ecclesiastical authorities who will be associated with us in the conduct of the institution are very favourable to the scheme, and I have directed that Mr. Russell Ferrier, Superintendent of Indian Education, and Mr. R. Gurney Orr, Department Architect, go to Nova Scotia for the purpose of completing the arrangements. They purpose being at Shubenacadie on Tuesday the 19th instant to look over various properties there, and I know Mr. Stewart would be very grateful if you would take an interest in the selection of a site. Please let me know by telegram if you can meet our officials in Shubenacadie on the date mentioned.

What is required is a cultivated farm with at least 50 acres of good soil and sufficient pasture for a herd of 20 milch cows. Our officials will be in Shubenacadie at 10.15 A. M. on the 19th and will immediately get in touch with D. B. Lawlor, the Department's local representative there.

Yours very truly,

Duncan C. Scott

Deputy Superintendent General.

Re Shubenacadie.

Dear Sir:

If a survey of the Gay property is required for the purpose of ascertaining acreage, elevations or for any other purpose, I recommend Mr. R. W. McKenzie of Enfield, Hants County, whose office is in 12 and 13 Queen Building, Halifax, as a thoroughly competent and satisfactory surveyor and engineer. He is thoroughly familiar with the location of boundaries and also with what is required in connection with building.

Personal

Kentville, N.S., July 23, 1927.

Hon. Charles Stewart,
Minister of Indian Affairs,
Ottawa, Canada.

Dear Sir,-

Mr. Ferrier and Mr. Orr came to Shubenacadie last Tuesday and I met them there. I visited the four proposed sites with them. They went to Halifax without making a definite selection and returned yesterday and selected the Gay property. This selection is satisfactory to me.

I did not in any way influence or try to influence the decision of Mr. Ferrier and Mr. Orr believing that they should get the best site available in view of the large amount of money to be spent for construction. Mr. Ferrier, speaking to me by phone last night, said that some arrangement was made with Gay and his son to work on or look after the property next summer. Gay and his son are Conservatives and I am inclined to think that any such arrangement would be undesirable from the political standpoint and should not be confirmed by yourself. The payment of government money to Conservatives is resented by Liberal workers in this province, and it occurred to me shortly after Mr. Ferrier told me this had been arranged it might mean trouble. I found Mr. Ferrier and Mr. Orr very reasonable and their modus operandi very satisfactory in every way, and I am not in any way complaining. I trust, however, that any arrangement they made to employ either Gay or his son is merely tentative, as I am sure it was. My present feeling is that no agreement to employ the Gays should be entered into. The selection of the Gay site is acceptable to several of the leading Liberals, as they are interest in the property as mortgagees, creditors or otherwise.

The selection of the Gay property was bitterly resented by Hon.B.B.Fulmer, the leading man in our party in the district, who called me up last night and indulged in much menacing talk about the support I would lose next election. I am satisfied that he is practically alone in his dissatisfaction with the site. The site that he offered was according to Mr. Ferrier and Mr. Orr entirely unsuitable and I agreed with them. Fulmer will criticize

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

me and talk a lot because we are buying from a Tory. However, I am satisfied and I would not on any account alter the selection now. I would like, however, to be consulted in detail about any supplementary purchases of property that take place in the vicinity and about any proposed employment of Gay and his son. I do not want to give Fulmer a real ground for grievance.

I would appreciate it if you would advise me promptly as to the government's intentions in respect of the matters I have mentioned in this letter.

Yours truly,

J.L.Ilsley

Dear Mr. Ilsley,-

The Honourable Mr. Stewart, Superintendent General of Indian Affairs, is leaving for the West tonight and has not had time to reply to your letter of July 23rd. He therefore asked me to do so. He approved of the purchase of the Gay property and instructions will go forward to Mr. R.W.McKenzie to carry out the necessary survey. When we receive a description of the property a lawyer will be instructed to search the title, and in due course the purchase will be completed. I note what you say about the employment of Mr. Gay, and I beg to assure you that we will meet your wishes and he will not be employed.

Yours very truly,

Duncan C. Scott

DEPARTMENT OF LABOUR
CANADA

Ottawa,
March 24, 1928.

DEPT. OF INDIAN AFFAIRS
MAR 31 1928
RECORDS

Ref. No. I. A. 44.

Dear Sir,-

Labour Conditions, Indian Residential
School Contract, Shubenacadie, N. S.

On the 18th ultimo a General Fair Wage Clause was furnished to your Department for inclusion in the specification for the above-mentioned work. This clause calls for the observance of the rates of wages and hours of labour of the different classes of workmen required which are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there be no current rates or hours in the district, then fair and reasonable rates and hours. A schedule has been prepared setting forth the wages rates and hours which are applicable under these conditions at the present time, and it is desired by the Minister of Labour that your Department will communicate this latter information to contracting firms who are desirous of tendering for the work in question. It is generally understood that wages rates and working hours are subject to change from time to time in different parts of the country and the requirement of the fair wage clause is that the contractor shall observe such rates and hours as may be current in the district from time to time during the continuance of the work.

In order that no misunderstanding may occur, it should be made as clear as possible to firms tendering on the work that the schedule of wages rates and hours herewith comprises merely those rates and hours which are applicable under the terms of contract on March 24, 1928.

Yours truly,

Gerald H. Brown,
Assistant Deputy Minister of Labour.

ROYAL ARMS

SEALED TENDERS addressed to the undersigned and endorsed on the envelop "TENDER FOR SHUBENACADIE INDIAN RESIDENTIAL SCHOOL AT SHUBENACADIE, N. S." will be received up to noon of the 30th day of April, 1928, for the erection of the above mentioned building.

Plans and specifications may be seen at the office of the Indian Agent at Shubenacadie, N. S. at the Post Office, at Halifax, Truro, Kentville, Windsor, St. John and Moncton, and the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canda for ten percent of the amount of the tender, payable to the order of the undersigned, (War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and cheque if required to make up an odd amount,) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

TORONTO, CANADA. April 10th. 1928.

Department of Indian Affairs,
Att'n; Mr. Gurney Orr, Architect,
OTTAWA, Ont.

Dear Mr. Orr;- Re; Indian School, Shubenacadie, N.S.

We are in receipt of a communication under the letterhead of Acadia Construction Co. Ltd., Moncton, N.B. signed by D. Lorne Reid, 26 Halls St. Moncton, N.B., asking us to quote prices f.o.b. Halifax on one 36"x54" Wood Washer with motor, one 30"x42" Junior Drying Tumbler with motor and one 26" extractor with motor.

We understand this machinery is for the Indian School at Shubenacadie, N.S.
We have not quoted these people as, in the first place, their specifications are too brief, and they do not give us information regarding the voltage, etc. We also recall that the numerous installations made in a good many Indian Schools in the West have been Group Driven equipment, in other words, one motor to drive all three machines.

Would you kindly give us some information regarding your requirements in this matter? We would very much appreciate hearing from you.

Could you advise us if D. Lorne Reid of Moncton is one of the parties through which your Department is receiving tenders? We would also appreciate the names of any of the other construction companies that have been invited to tender on this work.

We sincerely hope that we are not troubling you to a too great extent, but you will appreciate our anxiety to furnish your Department proper quotations through the proper and responsible contractors.

Thanking you in anticipation, we are,

Yours very truly,

The Canadian Laundry Machinery Co., Limited.

Gentlemen,-

Replying to your letter of the 10th instant, with reference to the laundry machinery required for the proposed Indian Residential School at Shubenacadie, N. S. I am enclosing herewith, for your information, a copy of the sheet from the specifications covering the laundry machinery. I am also enclosing a copy of the advertisement which is appearing in the leading newspapers of the Maritime Provinces inviting tenders for this building. I have no way of telling what firms will be submitting tenders for the work.

Yours very truly,

R. GUNNY ORR.
Architect for the Department.

April 11th, 1928.

Mr. R. Geurney Orr
Architect, Dept. of Indian Affairs,
Ottawa, Ontario.

Dear Mr. Orr:-

It is with a great deal of satisfaction that we find "Bluenose" facing brick and "Scotia" common brick specified in the contract of the Indian Residential School at Shubenacadie, and it is our desire to assure you the greatest co-operation possible in seeing that the very best quality of brick we can manufacture are supplied for this building.

We realise that when the contract is let our dealings will be with the contractor, but we would ask that should pressure be brought to bear by competitors to change your specification, that it be realised the Nova Scotia Clay Works plant is only nine miles away from your building site, which will assure you of obtaining the bricks in the most perfect order possible.

Could you advise me of the approximate quantity you will require so that I may govern my manufacturing programme to have them ready when required?

Yours very truly,

AMHERST, N. S., April 13/28

Dear Sir:

AGREEMENTS ARE CONTINGENT UPON STRIKES, ACCIDENTS, DELAYS OF CARRIERS AND OTHER UNAVOIDABLE REASONS OVER WHICH WE HAVE NO CONTROL.

We understand the Department of Labor is calling for tenders for a new Indian School to be constructed at Shubenacadie, N.S. tenders closing on April 30th.

We applied for a set of plans at Halifax, but found that both sets there were in use. As there are many contractors in Nova Scotia who, undoubtedly, will put in a bid on this job, we fear that with the short time now before the closing of tenders, we will be unable to see a set of plans and take off our quantities etc. We write to ask if it would be possible for you to send us to Amherst, a complete set of plans for this building and we, of course, would be more than willing to pay for them.

Would you be good enough to wire us collect, whether or not, we may expect a set of plans by first express?

Yours truly,

Sir! Having seen the planned Plans etc for the new Indian School at Shubenacadie and that it may serve or interest you I beg to submit or inform you on the following - Where deeds speak for themselves.

You will, of course, have received many tenders on this job - including from "The McDonald Construction Co Ltd" of Halifax. This Firm is noted for their very satisfactory and high Class workmanship, and herein quote Contracts which they have completed — records within the past year viz:

Halifax Exhibition Bldgs and Forum,		$450,000.
St Patrick's Boys Home,	Halifax	200.000.
" School	"	375.000.
St Joseph's	"	" 275.000.
Wood Bros (Dry Goods Store)	"	285.000.

I am in no way interested in this company and only know personally one member of same.

Incidentally I observe that the floors are of wood, why not Mashillon with Concrete Cover or filling? this serves for fireproof and better wear.

Yours &c
Dan'l Chisholm

April 18, 1928.

Dear Sirs,-

Replying to your letter of the 14th instant, with reference to the proposed new Indian Residential School at Shubenacadie, N. S., I am today sending you under separate cover, blue print copies of the plans and specifications for this school.

When you have obtained the desired information please return the plans and specifications to this office.

Yours very truly,

R. CURNEY ORR.
Architect for the Department.

Canadian Welding Works, Ltd.,

VITA GLASS
Is a Superior *Health Transmission* Glass

This folder contains scientific authority and proof

An Open Letter:

WHEN one begins the manufacture of a window glass which transmits the vital ultra-violet health rays of sunlight, he has stepped from the sale of ordinary glass into the sale of *health* through window glass. It is not enough for him, therefore, to make general claims about the transmission of his glass without ample proof, for from then on he is morally responsible for every transmission and health claim he makes, inasmuch as people buy his glass for one purpose—to improve their health.

It becomes him, therefore, to do three things:

1—To make a glass which transmits enough of the *vital* ultra-violet health rays (from 2900 to 3200 A. U. wave length) for health and healing purposes.

2—To state what percentage of the health rays within the above lengths his glass will transmit, show transmission charts, quote authorities, give results of actual scientific and practical tests besides laboratory transmission tests, and give a statement covering the uniform transmission of his glass.

3—To be sure that his stock glass, made in quantities for sale, is as good in transmission as the small batches made up for laboratory test work prior to entering a quantity production schedule.

Not only does the Vitaglass Corporation govern its sales policy and the character of its product by this standard because of its moral responsibility to its customer, who is the public, but it feels that its distributors, who must share the responsibility for any health product they sell, value the assurance that when they sell VITA glass they know that the product—every pane of it—is made according to this high standard and that VITA glass will do what is claimed for it. Although it has been the practice of the Vitaglass Corporation since its beginning to show proof of its claims, it is assembling here some more scientific evidence to add to the knowledge of VITA glass distributors, so that when they sell VITA glass they will know they have sold a glass which transmits sufficient health rays for health and healing purposes.

There are two kinds of ultra-violet rays in natural sunlight. First, there are the longer ultra-violet rays—a portion of which comes through ordinary glass—sometimes known as the photographic ultra-violet rays, because they affect a sensitive photographic plate. These longer rays do not have much health-giving properties, if any. Then there are the shorter, vital ultra-violet *health* rays, technically known as those between 2900 and 3200 A. U.

This folder gives authoritative evidence of the presence of these shorter rays in sunlight, of their health value and of their transmission through VITA glass in sufficient quantities for health and healing purposes.

VITA glass is distributed through the regular glass channels. It is shipped from Bonded Stock cut to size, labeled, and indelibly etched with the name VITA in the lower left hand corner.

DATA OBTAINED FROM BUREAU OF STANDARDS CHART, JULY 25, 1927

Curves obtained from Bureau of Standards transmission chart, dated July 25, 1927, and issued in connection with their Letter Circular 235 of September 1, 1927.

"ULTRA-VIOLET ABSORBED BY WINDOW GLASS—By direct radiometric measurements made during the noon hours in April to June, 1927, the total amount of these short wavelength ultra-violet solar rays of wavelengths less than 3100A transmitted by these materials, when new, was found to be approximately:

Fused Quartz and Glass No. 1	92 per cent
Vitaglass	50 "
Glass No. 2	20 "
Glass No. 3	5 "
Glass No. 4	1 "
Ordinary Window Glass Nos. 2, 4, 6	0 to 5 per cent"

Every batch of Vita glass must pass this factory test

The chart at the right shows a photographic record which is made of the transmission qualities of every small batch (Journey) of VITA glass. If any batch of VITA glass fails to meet our high transmission standards, it is destroyed.

VITA glass is a scientific health product used widely by invalids and also in hospitals. Hence every precaution is taken in order to make certain that each pane of VITA glass will transmit a sufficient volume of the vital range of ultra-violet rays for health purposes.

In the manufacture of ultra-violet ray transmission glass there is no certainty that each batch will be uniform. Thus it is necessary that each batch be tested. This allows the Vitaglass Corporation to give a transmission guarantee covering the health value of every pane of VITA glass.

Authorities state that there is health benefit from *vital ultra-violet in Winter sunlight*

The vital ultra-violet health rays are present in natural light practically all the year around in sufficient quantities for health. The following authorities and tests show that there are sufficient vital ultra-violet rays in winter time, as well as other times of the year, for health purposes:

AUTHORITIES:	QUOTATIONS:
The Council on Physical Therapy of the American Medical Association, in a report on Window Glass Substitutes, in the Journal of the A. M. A., May 14, 1927, states:	"A comparatively small amount of exposure to sunlight, even during winter months, at the latitude of Boston, has a decidedly beneficial effect."
Tisdall & Brown, Nutritional Research Laboratories, University of Toronto, in Proceedings Society Experimental Biology & Medicine, 1927, state:	"The effective solar rays (for rickets) range from 3130 to 2900 Angstroem Units in length and constitute very small percentage of the total solar radiation. The sun's rays in December in latitude of city of Toronto produce definite antirachitic effect on rats fed on rickets producing diet."
E. H. & W. K. Russell, M.D., English Physicians, authors of "Ultra-Violet Radiation & Heliotherapy" (Sun Treatment), state:	"The time of day chosen for sunbaths varies with the seasons and should be when the temperature of the surrounding air is favorable. In winter sometime between 10 A. M. and 3 P. M. will generally suffice."
Dr. A. Rollier, the Father of Heliotherapy, in "Heliotherapy" (Sun Treatment), says:	"On an average I recommend three to four hours in winter and two to three hours in summer."
Dr. D. T. MacDougal, Carnegie Institute of Washington, in the "Scientific American," July, 1927,—	In this article the measurements of Dr. Edison Pettit are quoted. There is a variation of the intensity of effective ultra-violet light from day to day and year to year, but these measurements show that the percentage of effective ultra-violet in sunlight reached the highest points in the fall and winter months.
Dr. Norman Edwin Titus, well-known physician, New York, states:	"North light, according to experiments and actual knowledge, is rich in actinic ultra-violet. It is used in the exposure of patients for treatment and used most successfully. While it is true that the extreme short ultra-violet rays are only present to a slight degree, nevertheless, the health rays which extend from 3100 to 3300 A. U. are strongly present. European authorities lay great stress on treatment with skyshine as well as sunshine. "There is no doubt in my mind that provision should be made in installing VITA glass, to also bring this north light into buildings. North windows are important and ultra-violet rays that are in the light should certainly be utilized."

mits the *vital ultra-violet health rays in actual use*

lume of ultra-violet which is transmitted, the best ctual use. ¶ Practical use of VITA glass glazed in olet rays of sunlight which bring health indoors.

AUTHORITIES:	QUOTATIONS:
Miss Nevins, Superintendent, Junior League Shelter, New York City. (March 19, 1927. Installed Feb. 17, 1927) states:	"The children are showing benefits from the installation. One of them is quite tanned and all the children are more free from colds and seem better in every way."
E. K. Nelson, Ridley Park, Pa. (April 4, 1927. Installed Dec. 3, 1926) states:	"The general condition of my health has improved since the installation of VITA glass."
J. K. Browning, Cincinnati, Ohio, (Feb. 28, 1927. Installed Feb. 1, 1927) states:	"I have been able to expose him (his son) under VITA glass and the results have been rather startling. His color is coming back and his general physical condition is greatly improved."
Dr. A. Keightley, New York City, states:	" . . . fifteen minutes of relaxation by my VITA glass has the same tonic effect as an hour's nap."
Prof. Irving Fisher, Yale University, New Haven, Conn. (April 28, 1927. Installed Oct. 23, 1926) states:	"I have found the installation of VITA glass entirely satisfactory. . . . The rays seem to have made possible quicker recovery, especially from colds."
Brown's Physical Training Farms (May 1. Installed Feb. 16, 1927) Garrison-on-Hudson, N. Y., states:	"All my guests agree that my sun parlor with VITA glass is one of the best improvements ever made at Brownsdale."
Parke, Davis & Co., leading Medical Chemists and Manufacturers, Detroit, Mich. (June 22, 1927. Installed Jan. 27, 1927) state:	"Repeated observations show conclusively that the plants under VITA glass show the decided stimulating effect of the rays which come through this glass."
C. W. Saleeby, M.D., F.Z.S., F.R.S.E., Greville-place, London; Liverpool Evening Express, June 23, 1927, states:	"Some weeks ago two boxes, each containing six lettuce, were sown on the same day, one beneath ordinary glass, the other beneath the special glass which admits the sun's ultra-violet rays. The weight at the end of six weeks of the six grown under ordinary glass was 8½ lbs.; of the six grown under VITA glass, 9¾ lbs.; that is to say, the ultra-violet rays, and any others of value which VITA glass may transmit, have added 1¼ lbs. to the weight of six lettuce in six weeks."
Extracted portion of a letter from the headmistress of a large private school in New Jersey. (May 10, 1927. Glass installed April 9, 1927):	"An intimate friend, to whom I made a present of the VITA glass, put the two panes in her bedroom windows, facing east and south, on April 9th. She is a semi-invalid from arthritis and reveals each spring a great loss of vitality because of three or four months of confinement during the winter. Two weeks after she put the VITA glass in, she manifested great gain in physical vigor and in general toning-up and, after a month, her face and hands are tanned as if she had been out of doors in the sunshine for that same length of time. She is again taking up tasks and recreations that she has not been able to do for a long period."

Authorities state that the vital, health-giving portion of the sun's ultra-violet is located in *the range of rays between 2900 and 3200 A. U. wave length*

It is a proven fact scientifically that the ultra-violet rays in light that have a wave length shorter than 3200 A. U. do not pass through ordinary window glass, except occasionally and then only in negligible quantity, and that a volume of those ultra-violet rays of wave length longer than 3200 A. U. do pass through ordinary glass up to 3900 A. U. where the visible light in the sun's spectrum begins. It is a fact, accepted by scientists and physicians generally, that ordinary glass shuts out the health and vital part of natural light. Therefore, that health part of light (the part of sunlight that causes tanning) must lie in the ultra-violet rays shorter than 3200 A. U. wave length. This is substantiated specifically by authorities as follows:

AUTHORITIES:	QUOTATIONS:
W. W. Coblentz, of the Bureau of Standards, in an article entitled "Sources and Properties of Thermal Radiation," read before the American Electrotherapeutic Association, May 16, 1927, states:	"The range of 2900 to 3200 has been called the 'Vital Range.' Perhaps it is owing to the fact that window glass is opaque to rays shorter than about 3200 A. U. and that sunlight, filtered through window glass, is deprived of most of its germicidal power. This is, no doubt, the region of the solar spectrum that has the greatest therapeutic action, especially at sea level."
Bundesen, Lemon, Falk & Coade. H. N. Bundesen, M.D., Commissioner of Health, Chicago,—Journal of the A. M. A., July 16, 1927, in an article "Ultra-Violet Radiation from Sunlight" states:	"These investigators (Hess & Weinstock) report that the spectrum line at 3020 A. U. possesses marked anti-rachitic potency; the 3130 line only very slight specific power."
E. H. & W. K. Russell, M.D., English Physicians, Authors of "Ultra-Violet Radiation and Actinotherapy" state:	"The rays which are most potent in producing pigmentation are those between 2900 and 3300 Angstroem Units, which are the shortest wave lengths in the solar spectrum. Wave lengths shorter than 3300 are absorbed by glass* and it is known that pigmentation does not take place if sunlight passes through glass,* so the longer waves do not cause this effect." (* This refers to common window glass.)
Dr. H. Goodman, a well-known New York Physician practising light treatment, in a lecture before the American Medical Association, May, 1927, states:	"Vital ultra-violet (from 3200 to 2900 A. U.) which does not pass through ordinary glass. . . . "
Dr. Edgar Mayer, a leading authority on Tuberculosis, Saranac Lake, N. Y., in his book "Clinical Application of Sunlight" says:	"Pigmentation is probably best produced by the ultra-violet rays from 3000 to 3200 A. U."
Dr. Janet Clark, of the Johns Hopkins University, in an article entitled "The Physiological Action of Light" Physiological Reviews, Vol. II, No. 2, April, 1922, states:	"The most effective rays in sunlight seem therefore to be between 2900 and 3200 A. U."

Why windows should have VITA Glass *Panes*

VITA GLASS window panes bring indoors the invisible ultra-violet healing and health-giving rays of sunlight.

Ordinary window glass keeps out the vital health rays of sunlight.

North Light and Indirect Light and Skyshine, as well as Direct Sunlight contain Ultra-violet Rays.

Doctors tell us:—

That the Vital Ultra-violet Rays of Natural Daylight Do the Following Five Things:

1. Increase the number of red corpuscles in the blood. Increase resistance to and aid in curing colds, influenza, tuberculosis, and other diseases.
2. Aid the blood to absorb phosphorus, calcium and iron — materials which build and strengthen bones, teeth. Prevent rickets.
3. Tan the skin and are good for many skin diseases.
4. Aid in convalescence: Aid in building the body to stand the strains and shocks of life. Increase mental and physical vitality.
5. Kill bacteria and germs.

These rays of sunlight make for better health and longer life. Ordinary glass keeps them out—VITA glass lets them in. (VITA glass transmits up to 70% of the Vital*Ultra-violet Health Rays, whereas 40% are considered sufficient for Health and Healing Purposes.)

Scientific School Test in England showed growth of children in room with ordinary glass windows, for nine months, was less than 50% of normal growth of children in room glazed with VITA glass.

Chick Test in late winter 1927 under auspices of American Medical Association showed that chicks reared behind ordinary glass grew less than 50% of normal growth of chicks grown behind VITA glass.

In each scientific test, growth in rooms with windows of ordinary glass was retarded over 50%.

Places and Purposes for Which VITA GLASS Should Be and Is Used:

1. Schools and nurseries—To aid children in normal growth of mind and body. To help ward off epidemics.
2. Houses and Apartments—Brings strength to mothers in confinement. Lengthens and strengthens life of elderly people. Improves general health of family.
3. Offices and Factories—Improves morale; lessens sickness; decreases absences; increases efficiency.
4. Hospitals and Sanitaria—Aids in convalescence. Has germicidal effect. Effective against and in curing colds, influenza and tuberculosis.
5. Sun porches—An enclosed sun porch glazed with ordinary glass makes it a light porch; glazed with VITA glass makes it a health and lighter porch.
6. General—Buildings housing fancy stock, flowers, etc.

Reason for all this: With VITA glass window panes and good ventilation, outdoor health benefits come indoors without inclement exposure.

Physical Characteristics of VITA Glass

Looks and is handled and glazed like ordinary glass. Comes in Clear 19-22 oz.; Cathedral (diffuse) 1/8, 3/16, 1/4"; Wire Cathedral 1/4"; Rolled Sheet (semi-transparent) 1/8". May be glazed in any size suitable to thickness.

VITA glass is carried in Bonded Stocks.

Each pane of VITA glass is cut to size as ordered by you, etched and labeled with name VITA and is shipped freight prepaid and risk of breakage assumed for you direct to the railroad terminal designated on your order. Each pane of VITA glass is guaranteed to transmit ultra-violet in daylight to the extreme limit of the sun's spectrum.

VITA Glass Produces Good Health

VITA glass brings that outdoor health feeling indoors and turns windows into avenues of health as well as avenues of light.

For this reason VITA glass in the glass field has had unprecedented newspaper and magazine publicity.

Will you not tell others that VITA glass windows bring outdoor health indoors, increase vitality, aid in preventing costly diseases.

Doctors will certify to the health value of Ultra-violet Rays of Daylight which do this.

VITAL ULTRA VIOLET SUNRAYS- THEIR MEANING TO HEALTH...

An "outdoor" life has always been known to be a healthy one. For many years people have attributed this to "fresh air" and exercise. And in part, of course, this is true. But a main ingredient in outdoor healthfulness, perhaps *the* main ingredient, is, as physicians for years have been coming to realize, *sunlight*.

Experiments prove that sunlight stimulates growth by causing the body to absorb more calcium and phosphorus—both necessary for bone formation and sound teeth. It enriches the quality of the blood by stimulating formation of hemoglobin, the oxygen carrier. It is of enormous importance in increasing better general health and resistance to disease. It has been found to be one of the best germicides in the world. "Cold" germs and tuberculosis germs die faster in sunlight than in strong antiseptic solutions.

It was found also that direct rays of the sun would cure certain serious illnesses—tubercular cases of the surgical type, for example. Sunlight aided the cure of rickets in children, and it was found that children who were kept much in the sunlight did not develop rickets *even though their diet was deficient in vitamins.*

But a remarkable fact developed. Sunlight, when filtered through ordinary window or plate glass *is robbed of its beneficial properties.* Why? Science sought an answer and discovered that the health value of sunlight was not contained in the light rays but in the invisible ultra-violet rays. And of these ultra-violet rays only a small band, the actinic or vital rays, are health giving. *These vital rays are unable to penetrate window glass.*

ORDINARY GLASS KEEPS THEM OUT— A GREAT NEW DISCOVERY— VITA GLASS—LETS THEM THROUGH!

Then it became obvious that one of the great reasons that indoor people were pale, apparently bloodless and deficient in stamina, was lack of sunlight. For if you sit at an ordinary window flooded with sunlight you might just as well be in a windowless room as far as the sun's health action is concerned. You get light but the window glass keeps out the vital health rays as effectively as would a dungeon wall!

During the past decade scientists everywhere have been searching for a substitute for window or plate glass, which would be as transparent and useful and at the same time transmit the essential health-sustaining ultra-violet rays.

The discovery has been made in VITA glass, the invention of a distinguished English research scientist, Prof. F. E. Lamplough, M.A., Cambridge. VITA glass is manufactured solely by Chance Bros. & Co., Ltd., of Birmingham, England.

VITA glass is available in clear glass, designed for use in ordinary windows and sold at a price which makes it available to everyone. It transmits fom 50 to 65% of the available vital ultra-violet rays whether the day is clear or cloudy. Physicians say this is amply sufficient for health and healing purposes.

It is also available in cathedral (diffuse) type for solaria, skylights and other uses where clear vision is not desired.

INDIRECT LIGHT ALSO CONTAINS VITAL HEALTH RAYS

VITA glass is not limited to use in direct sunshine only. Reflected sunlight, cloud shine, sky shine all contain ultra-violet radiation. According to the Weather Bureau of the U.S. Department of Agriculture, light from these sources is rich in ultra-violet radiation and fully as valuable as direct sunlight. The test at Smethwick (see below) was made in an atmosphere worse than any city in the United States, with very little direct sunshine at all. The results indicate the presence of ultra-violet rays under adverse conditions, and also prove their value.

The transmission of VITA glass in direct sunlight is over 50 per cent of the available ultra-violet radiation. Indirect radiation is transmitted to an even greater per cent of the amount present because reflection is to a larger extent eliminated. This has been proved by experiment.

It must be emphasized that indirect light contains a large amount of radiation. One of the most eminent

authorities on heliotherapy writes in a private communication: "Blue sky and bright clouds are a source of ultra-violet light, and more of these rays come from skyshine than from the high sun directly, and far more than from the sun low in the heavens. VITA glass lets the ultra-violet of the sun through nearly as well as silica." (Fused silica panes (quartz) cost about $100 per square foot.)

All of this means that under most conditions daylight contains some of the valuable ultra-violet radiation, and that wherever present it is efficiently transmitted by VITA glass.

TESTS OF WORLD-WIDE IMPORTANCE TO HEALTH

Before presenting VITA glass to the Canadian public, it has been experimented with and used in England for over two years and results have been remarkable. In a school in Smethwick, England, a test conducted by Dr. J. Bell Ferguson, Medical Health Officer, showed in the ten months' period when a careful record was kept, the following result:

Average gain in weight of pupils in control class (under ordinary glass)	**2.83 lb.**
VITA glass class	**6.11 lb.**
Gain in average height control class	**1.22 in.**
VITA glass class	**1.86 in.**
Average gain in hemoglobin (red corpuscles) control class	**7.53 per cent**
VITA glass class	**16.14 per cent**

These classes were chosen by the school authorities as being representative, and the results obtained have caused the installation of VITA glass in the Smethwick schools. Other schools are following suit. Here is an extract from an article which was printed in the Nottingham *Evening News*, issued Oct. 16, 1926:

"After two years' experience of the glass, I am a convert," says Mrs. Kirk, Headmistress of the Leenside Infants' School. "There can be no gainsaying the fact that the health of the fifty children in the room fitted with VITA glass has been wonderfully improved. After a year's school work in this particular room, both boys and girls emerge looking the picture of health!"

WHAT AUTHORITIES SAY . . .

Sir Henry Gauvain, a leading authority in the field of the sunlight treatment of tuberculosis, recently stated before the New York Electrotherapeutic Society:

"In VITA glass we have a very useful artificial means of getting ultra-violet light under various circumstances. I use it in my own private work to get a satisfactory result. I have found it of extreme value. Those of you who have large hospitals or large clinics know that if you are giving your patient sun treatment and showers come up it is a most awful nuisance to the patient to be suddenly rushed in. The patient thinks about it a great deal, and if he gets wet it is very annoying. I found this VITA glass very useful. I had a sliding roof made in sections, and when the showers come, down comes the roof. The patient can then still be exposed. Of course, VITA glass does not let in as much light as if there were nothing in between the light. It is very useful because you can get some of the rays through and you can go on exposing for quite a long time."

Let us look for a moment to one of the effects of VITA glass in the London Zoo. Here is an extract from a London newspaper concerning it:

"Animals have lived through the winter which have never before survived a winter in the gardens. Animals have bred which have never before done so while in the Zoo, and all the animals which used to mope so dreadfully are quite happy."

VITA glass is already specified or used in a number of hospitals, sanatoria and schools in Great Britain, the United States and Canada. A partial list may be found on the back cover of this booklet.

WHERE VITA GLASS SHOULD BE USED

In the Medical Field.

Hospitals, sanatoria, preventoria, infirmaries, hotels, and health resorts.

Educational Field.

Particularly in public and private schools including Montessori schools and kindergartens.

The Private House and Apartments.

If not in the whole dwelling, then at least in the Children's rooms, sun porch, skylight, the room to be designated as a health-room and used when any one is sick, a room to which elderly people or others are confined more or less.

Office Buildings.

In offices, where one or many gather to spend the daylight hours in work, where healthy bodies and energetic minds are needed to cope efficiently with the daily tasks, where subnormal health reacts to the disadvantage not only of the business but the dependents who remain at home.

Miscellaneous.

Day nurseries for children, solaria, hotels, office buildings, factories, roof gardens, swimming pools and gymnasiums (exposed to the light), zoos, green houses.

STARVED FOR SUNLIGHT . . . .

With the growth of the cities and the multiplication of indoor workers millions of people are starving for sunlight. It is probable that you who read this booklet are among them.

You need be no longer. Nor need any member of your family. At all seasons, in any weather, no matter whether your occupations confine you indoors or not, you may have the benefit of the available ultra-violet rays in your own home at little cost. Do not underestimate their importance to your health and well-being.

Even when you are out of doors in the sunlight and air, you are usually clothed so that only your face and hands are exposed to the beneficial action of the vital rays. With VITA glass in your home you not only obtain the benefit of being out in the sun, but you may also expose yourself to the health-giving rays as lightly clothed as you please—a benefit not usually to be obtained save at the seashore in a bathing suit.

Glaze at least a few of the windows in your home with VITA glass without delay. It will bring the quickening energy and glowing health of the sun to you who have so long been cut off from it by the deceptive clarity of the old window and plate glass.

HOW YOU CAN GET VITA GLASS— ITS SURPRISINGLY LOW COST

Simply take the measurement of your window panes (unless you are certain of your accuracy it will be best to have a glazier do it), and send in your order to B. & S. H. Thompson & Co. Ltd. 906 McGill Building, Montreal, or 1609 Royal Bank Building, Toronto.

VITA Glass is sold in Canada at $2.00 per square foot for Clear and $1.75 per square foot for Cathedral qualities plus 5 cents per square foot for cutting panes up to 3 square feet in area, and 10 cents per square foot for cutting panes above 3 square feet in area. Packing is charged at the rate of $1.00 per 50 square feet or fraction thereof. There is also sales tax of 4% to be added.

This price is ex our Warehouse at Montreal. Freight and forwarding expenses are extra.

A substance which has been used in the past to transmit ultra-violet is fused quartz. Although fused quartz, like VITA glass, retains its transmission qualities, it can only be supplied in small panes and costs approximately $100 a square foot. VITA glass, which has the transparency of window glass and can be supplied in any size panes for ordinary glazing purposes, is sold for one-fiftieth of the cost of fused quartz.

The clear glass is installed where transparency is desired. The obscure, which is called *Cathedral*, is installed where privacy or a decorative feature is desired; in upper sashes and side panes of larger buildings, for decorative as well as health purposes; in casement windows calling for an artistic glass; and in skylights.

The clear glass is about 2mm. thick, approximately 22 oz. to the square foot. The Cathedral is from 2½ to 3mm. thick, approximately 24 to 26 oz. to the square foot. The Cathedral is useful where clear vision is not needed or desired and for roofs, skylights, etc., where there is likely to be more strain from snow, etc.

Each piece of VITA glass is sold under the guarantee that it will transmit the vital ultra-violet rays of daylight to the extreme limit of the sun's spectrum. VITA glass is etched with the trade mark VITA on each pane set inconspicuously in a corner.

May we suggest that as soon as your desire for VITA glass prompts you, you place your order.

VITA Glass can be obtained in Canada by application to

DEPARTMENT OF COMMERCE
BUREAU OF STANDARDS
WASHINGTON

Letter Circular 235 (Third Revision)

January 14, 1928.

THE ULTRA-VIOLET TRANSMISSION OF VARIOUS NEW GLASSES AND WINDOW GLASS SUBSTITUTES AS COMPARED WITH THAT OF COMMON WINDOW GLASS;

This letter circular is issued in response to numerous inquiries for information on the transmissive properties of new glasses and organic substitutes for window glass for use in solariums, sun parlors, schools, homes, office buildings, animal houses, and greenhouses.

The visible rays of light are comprised between the approximate wave length of 760 $\mu\mu$ in the red and 400 $\mu\mu$ in the violet. Wave lengths longer than 760 $\mu\mu$ are called infra-red, and those shorter than 400 $\mu\mu$, ultra-violet. Though the average eye is not sensitive to wave lengths shorter than 400 $\mu\mu$ such rays actually exist in the light of the sun, extending down to a wave length a little more or a little less than 300 $\mu\mu$, depending on the time of day, season of year, latitude, altitude and clearness of atmosphere.

Since ordinary window glass shuts out the ultra-violet rays below about 310 $\mu\mu$, much attention has been given of late to the production of special glasses, transparent to the shortest wave lengths which the atmosphere permits the sun to furnish us. This letter circular gives the results of ultra-violet transmission tests which have been made at the Bureau of Standards upon a number of such special glasses and common window glass.

TOTAL TRANSMISSION OF VARIOUS GLASSES FOR THOSE ULTRA-VIOLET SOLAR RAYS TO WHICH COMMON WINDOW GLASS IS OPAQUE

Using a filter method, direct measurements with sunlight as source, have been made during the noon hours of especially clear days from April to December, 1927.

These measurements covered the solar spectral region to which common window glass is opaque (below about 310 $\mu\mu$). Table 1 gives for that region the total transmission found for the following specimens:

TABLE 1--Total Transmissions of Various Glasses, when new, for the Ultra-violet Solar Rays to which common Window Glass is Opaque.

Trade Name	Per Cent. Transmission
Fused quartz	92
Corex	92
Helioglass (Vioray [1])	50
Vita glass	50
Cel-o-glass([2])	20
Quartz-lite	5
Flexoglass([3])	1
Common Window Glass	0 to 5

Ultra-violet Spectral Transmission of Various Window Glasses When New.

(1) Vioray is the foreign trade name for Helioglass.

(2) This consists of a fine wire screen whose interstices are covered with cellulose acetate.

(3) This is a loosely woven fabric usually covered with paraffin.

SPECIAL TRANSMISSION OF VARIOUS GLASSES FOR THE ULTRA-VIOLET RAYS

A second and more reliable method of measuring the relative transparency of a specimen of glass to ultra-violet light is to determine its spectral transmission curve, wave length by wave length. Curves of this description are shown in the accompanying illustration. These curves were obtained by means of an artificial source of light (quartz mercury arc) giving a line spectrum richer in ultra-violet than the solar spectrum.

By means of these spectral transmission curves an estimate of the relative transmissions of the various specimens for rays shut out by common window glass, may be obtained by reading from the curves the values of the transmission at 302 $\mu\mu$—the wave length of an intense mercury line, of convenient value for making such tests. Table 2 gives transmission values for this wave length. These are our most recent findings for new specimens.

Quartz-lite	16	1.9	0.5
Common Window Glass	14	3.3	0.0

SOLARIZATION

Helioglass, Vitaglass and Cel-o-glass have been found to decrease in transmission at 302 $\mu\mu$ and neighboring wave lengths (295 to 310 $\mu\mu$) by exposure to ultra-violet radiation from the sun, quartz mercury arc, and carbon arc. The rate of change is much more rapid with the arc than with the sun and varies also with the different glasses.

Vitaglass has been on the market the longest, hence concerning this glass we are able to give the most information on solarization. A sample which had been in a hospital window in Rhode Island for a year was found to have a transmission of 25 per cent. at 302 $\mu\mu$ (for thickness = 2.3 mm). Further exposure to the quartz mercury arc reduced the transmission but little, showing that solarization was complete.

Exposure in Washington of a sample (t = 2.35 mm) of Vitaglass directly to the sun for 123 hours (between 9 a.m. and 3 p.m. during June, July, and August) decreased the transmission from 47 to 35 per cent. Our tests show that the greatest decrease in transmission occurs during the first few weeks exposure. The average transmission of Vitaglass at 302 $\mu\mu$ after complete degeneration by the mercury arc is about 25 per cent. for a thickness of 2.3 mm.

Helioglass has not been on the market for a sufficient length of time to obtain a complete solarization test. Two samples each of Helioglass and Vitaglass, exposed simultaneously to the sun in October to December, were found to have decreased in transmission at about the same rate. The average transmission of Helioglass at 302 $\mu\mu$, after complete degeneration by the mercury arc is about 30 per cent. for a thickness of 2.3 mm.

Corex glass appears to undergo no appreciable change in transmission when exposed to solar radiation. For example, a sample of cathedral finish Corex which had been in a greenhouse roof in New York for 14 months was found to have, as nearly as could be measured on that kind of surface, the same transmission as a new sample. It was then polished plane and found to have a transmission of 89.5 per cent. at 302 $\mu\mu$, while the average transmission for new samples as given in Table 2, is 89.

On the other hand, exposure to a quartz mercury arc causes a very marked decrease in the transmission.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

Cel-o-glass (cellulose acetate) becomes opaque at 302 $\mu\mu$, and shorter wave lengths, after 25 hours exposure to the quartz mercury arc. A sample that was exposed to the sun for 400 hours during the months of April to October, decreased but little in transparency at 302 $\mu\mu$. On the other hand, samples that transmitted 30 per cent. at 302 $\mu\mu$, when new, transmitted only 5 to 10 per cent. at this wave length after being exposed on the side of a building continuously day and night for 8 months, April to December, showing that the change in transparency may be owing to the varying conditions of the weather.

Quartz-lite is not appreciably affected by sunlight. Exposure to the quartz mercury arc decreases its transmission slightly (measured at 313 $\mu\mu$).

Common Window Glass is also slightly decreased in transmission by exposure to the quartz mercury arc but changes inappreciably in sunlight.

THICKNESS

The thinner the glass, the greater in general will be its transparency to ultra-violet rays. Considerations of strength, however, set a limit to an indefinite reduction in thickness. Commercial samples have been submitted for test with a thickness of less than 1 mm (1/25 inch). In installing such glass, attention should be given to the proper size of sash to meet safety requirements.

What VITA Glass Looks Like

VITA glass is a real glass containing an ultra-violet transmission formula worked into glass form. And in appearance is like ordinary glass.

VITA glass in your windows admits not only the health rays of sunlight but also 4% more light than ordinary glass.

VITA glass comes in two forms—clear and cathedral. The clear is transparent like ordinary glass—the cathedral is an obscure glass, to be used where clear vision is not desired.

Cathedral may be had in various thicknesses; also in wire cathedral.

In standard stock thickness, panes up to six square feet in clear and up to eight square feet in cathedral may be glazed. Window panes larger than that should be divided, have a muntin put in. Cathedral may be glazed in larger pane sizes, according to thickness specified.

Why INDOOR LIFE *taxes* YOUR VITALITY

Instinctively, we all crave the exhilaration of outdoor life. When tired, we experience, outdoors in the sunlight, a physical and mental stimulation. We feel refreshed invigorated.

But inside, even in cheery, sunbathed rooms we sense a lack of some vital quality. Medical science now tells us exactly what it is we miss—the ultra-violet rays, the life rays of the sun. And the reason these rays do not reach us indoors is simply because ordinary plate and window glass lock them out. Light enters but the sun's vital energy does not.

Ordinary glass thus places a burdensome tax upon our health.

It is estimated that we spend on an average 90% of our daylight hours behind glass. We live behind glass. We ride behind glass. We work behind glass. And, naturally, we pay its costly price.

Little wonder, then, that instinctively we desire to get outdoors into the fullness of the sunlight. To meet this desire, science has developed a new kind of window glass called VITA glass which brings the vital elements of sunlight indoors. It is made so available to you that there is no reason why you should not take advantage of its health benefits. It brings the health value of outdoor sunlight indoors. Thus you can end this daily indoor tax upon your health.

With VITA glass windows you will feel better, look better, work better, for it brings the sun's health rays to you without exposure to unpleasant elements.

VITA glass is endorsed by leading physicians. Has been tested and passed upon by the Council on Physical Therapy of the American Medical Association.

Make Every Window an Avenue of Health with VITA Glass

VITA glass will pour the healing, healthful, energizing rays of the sun through your windows. It transmits over 60% of the sun's *vital** ultra-violet energy—much more than sufficient for health and healing purposes.

The energy received every day, at home or at work, will lighten daily tasks—leave you fresher at night. Lassitude and fatigue will disappear. Irritability will be lessened. Physical and mental activity will be increased. You can now take a healthful sun bath indoors.

Now there will be less need for mothers to force ill-tasting cod-liver oil into the mouths of infants. With VITA glass in the nursery windows, a child is practically out-of-doors, yet sheltered from dust and dirt, wind and storm. Rickets is prevented and the blood enriched so that growth is normal and healthy.

Now Healthful Germ-Free Homes

Not only do the ultra-violet rays build health, they protect health. Science claims that they form the most powerful germicide known. Where hours of boiling will not destroy certain bacilli, a few minutes' exposure to the ultra-violet rays of sunlight will. Consider what a factor this is toward protecting the health, especially of children in the home.

Less Absences Due to Illness

Absences from offices average 8½ days per person each year. In your offices, VITA glass brings greater health to all your employees. Helps them build up greater resistance to common colds and other minor illnesses. As health increases, costly and annoying absences decrease.

It is estimated that the cost of replacing ordinary glass with VITA glass is more than paid for in actual payroll savings and in increased production.

Careful Tests Made

VITA glass is not an untried product. It is not experimental. Rigid tests have proven its ability to transmit the ultra-violet energy in sufficient volume for all health purposes. No longer need mankind be deprived of the body's need for growth.

Note These Tests

Tests prove that chicks under VITA glass grew 220% as rapidly as under ordinary glass. Under VITA glass, the children in the Smethwick School test grew, likewise, 216% as rapidly as under ordinary glass. This simply means that growth was normal and healthy. That under ordinary glass a tax was placed on the health of both children and chicks and growth was retarded 50%.

Used in Many Hospitals

As further evidence of the health value of VITA glass, note that though it has been available in the United States only since September 1926, it has already been installed or ordered for scores of hospitals and sanatoria as well as for schools, hotels, homes, apartments, factories, and office buildings.

North Light is Valuable Source of Ultra-Violet Rays

Authorities have proven that skyshine and cloudshine are excellent reflectors of ultra-violet. That is the reason why we sometimes receive a severe sunburn at the seashore or on the golf links on a cloudy day. Direct sunlight is not necessary.

The ultra-violet energy of the sun is present in about the same proportion as visible light. Thus every window, not only windows with southern exposure, can be made a continued source of health.

VITA Glass is Not Costly

VITA glass, naturally, costs more than ordinary glass. But ordinary glass costs you more because of loss of health and vitality. Yet in no other way can most of us gain the same healthful results of the sun's ultra-violet energy at the same negligible cost, every day, year after year. You have undoubtedly paid many times over the cost of installing VITA glass in your office or home. Paid for it in ill health and lessened efficiency.

Consider its cost only by comparison with other less certain and more expensive means of gaining the benefits of natural sunlight and you will agree that VITA glass will, on that score alone, save you valuable time and money every year.

VITA glass is not expensive. Everyone can afford it. If not for every window in the home or office, then at least for the more important ones. Find out exactly the cost of installing VITA glass in place of ordinary window glass in your home or office. Use the order form enclosed for your convenience.

* (2910 *to* 3200 *Angstroem units*)

DOCTORS TELL US

that the vital ultra-violet rays (the life rays) of the sun, do the following:

Kill bacteria and germs. It is these rays that make sunlight the greatest of all disinfectants.

Tan the skin.

Help the normal skin and assist the cure of certain skin diseases.

Increase the hemoglobin and red cells in the blood.

Help the body to absorb and retain phosphorus, lime and iron.

Assist in the prevention and hasten the cure of rickets.

Aid in convalescence.

Increase resistance to disease.

Build up and maintain a robust, sturdy vitality.

Ordinary glass keeps out these rays—VITA glass lets them come indoors.

Vita Glass

THE HEALTH WINDOW GLASS

VITA glass is endorsed by leading physicians. Has been tested and passed upon by the Council on Physical Therapy of the American Medical Association.

DEPT. OF INDIAN AFFAIRS
APR 25 1928
RECORDS

Superintendent General D.C. Scott,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sir:

Our Halifax Depot have quoted for the glass requirements in connection with the residential school Shubenacadia, and the question has been raised it would be possible to have VITA sheet glass used in certain parts of the building, if not all.

We feel sure you will have heard of this wonderful glass but, in case you have not, we take the liberty of writing you in a general way and enclosing to you literature which will give you some important facts in connection with this healthful glass.

It will no doubt interest you to know that we are manufacturing "Lamplough Vita Glass" at our factories in England and are carrying stocks at all our Depots throughout Canada.

Briefly we would state: the Ultra Violet Rays of the sun will not pass through common window glass nor as much of the Infra-Red, or heat rays. The former rays contribute largely to good health while the latter are beneficial on account of their warmth. There are several makes of glass which it is claimed function in the same way but VITA glass is the original. It has been subjected to a series of tests over the last three years and has been proved to fulfil all that is claimed of it.

With regard to prices, the figures are as follows:

VITA Sheet Glass $1.00 per foot up to one thousand feet.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

VITA Cathedral Glass .95¢ per foot up to one thousand feet.
" Plate Glass $3.50 per foot up to one thousand feet.
F.O.B. Our Warehouse.

If your order is less in value than $10.00 an extra of .75¢ will be charged for packing.

We trust that, as a result of our taking this matter up with you, you may be able to introduce VITA glass which has given great satisfaction. We would cite as an illustration of this the Smethwick school, which you will be able to read about in the literature we are mailing to you.

Yours very truly,

PILKINGTON BROTHERS (CANADA) LIMITED.

Dept. of Indian Affairs,

Ottawa, Canada.

Sirs:

I saw an announcement in the paper last week , that you were building a school for the Indians at Shubenacadie, N.S. - to be supplied with water from ~~artesians~~ artesian wells. I have a well drilling rig working in that vicinity, and well equipped to do this work, and would like very much to get this Contract.

Will this well be included in the Building Contract, or will it be let separately? If included in the Building Contract, would you be kind enough to wire me collect the name of the successful Tenderer when the Contract is awarded, so I could get in touch with him immediately

If the Contract is let direct from your department, I can furnish you with references, as regards my ability to do this work.

Yours very truly,

O.V.Kennedy

and addressed to the Deputy Superintendent General of Indian Affairs at Ottawa, Ont.

" TENDERS MUST BE IN THE HANDS OF DEPUTY SUPERINTENDENT GENERAL BY 12 O'CLOCK NOON OF DATE FIXED FOR THEIR RECEPTION. CARE SHOULD THEREFORE BE TAKEN TO MAIL SAME IN PROPER TIME."

The *signatures* of persons tendering *must be in their respective handwritings.*

In the case of firms, the signature, post office address and occupation of each member of the firm must be given.

SIGNATURES, OCCUPATIONS AND POST OFFICE ADDRESS OF PERSONS TENDERING:

RHODES, CURRY LIMITED

A. Curry
President & General Manager

Dated at Amherst, N.S., this Twenty-Eighth day of April 1928

NOTE.—The security cheque or War Bonds will be forfeited if the person or persons tendering refuse to enter into a contract when called upon to do so, or fail to complete the work contracted for. The Department does not bind itself to accept the lowest or any tender. No conditional tender which is not in accordance with the above will be considered.

NOTE.—Amount of deposit security should be indicated in space provided above.

MEMORANDUM: Dr. Scott.

Plans and specifications were prepared and tenders invited for the proposed new Indian Residential School at Shubenacadie. The tenders closed at noon today and in response the following have been received.

Rhodes Curry, Ltd., Amherst, N. S.....$153,000.00

Acadia Construction Co. Ltd., Moncton, N, B....$153,790.50

A. S. MacMillan, Halifax, N. S.....$176,570.00

The McDonald Construction Co. Ltd.,Halifax.....$176,744.00

Standard Construction Co. Ltd.,Halifax.....$181,513.52

As the tender of Rhodes Curry, Ltd. is the lowest and a fair and reasonable price for the work, I beg to recommend that it be accepted.

Funds are provided for this building in the vote for Indian Education.

His Excellency

The Governor General in Council.

The undersigned begs to report that the same being necessary, tenders were called for the construction of the proposed new Indian Residential School at Shubenacadie, in the Province of Nova Scotia, the same to be receivable by noon on the 30th day of April, 1928, and that the following tenders were received, together with the required deposit security.

Rhodes Curry, Limited, Amherst, N.S.....$153,000.00

Acadia Construction Co., Ltd., Moncton, N.B..$153,790.50

A.S.MacMillan, Halifax, N.S.....$176,570.00

The McDonald Construction Co., Ltd., Halifax.$176,744.00

Standard Construction Co., Ltd., Halifax.....$181,513.52

The Architect of the Department of Indian Affairs has reported that the lowest of the above tenders, namely, that of Rhodes Curry Limited, Amherst, is fair and reasonable, and the undersigned has the honour to recommend that it be accepted pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act. Funds for this purpose are provided for in the Vote for Indian Education.

PRIVY COUNCIL CANADA

Certified to be a true copy of a Minute of a Meeting of the Committee of the Privy Council, approved by His Excellency the Governor General on the 7 th MAY 1928

The Deputy of

The Committee of the Privy Council have had before them a report, dated 30th April, 1928, from the Superintendent General of Indian Affairs, submitting that, the same being necessary, tenders were called for the construction of the proposed new Indian Residential School at Shubenacadie, in the Province of Nova Scotia, to be receivable by noon of the 30th day of April, 1928, and that the following tenders were received, together with the required deposit security:

Rhodes Curry Ltd., Amherst, N.S.....	$153,000.
Acadia Construction Co. Ltd., Moncton, N.B...	$153,790.50
A. S. MacMillan, Halifax, N.S.....	$176,570.
The McDonald Construction Co. Ltd., Halifax..	$176,744.
Standard Construction Co. Ltd., Halifax.....	$181,513.52

The Minister recommends that the lowest of the above tenders, namely, that of Rhodes Curry, Limited, Amherst, be accepted, pursuant to the requirements of subsection 2 of section 36 of the Public Works Act, the Architect of the Department of Indian Affairs having reported that it is fair and reasonable. Funds for this purpose are provided for in the Vote for Indian Education.

Approved 9.

The Committee advise that the requisite authority be granted accordingly.

Sealed tenders addressed to the undersigned and endorsed on the envelope "Tender for Shubenacadie Indian Residential School at Shubenacadie N. S.", will be received up to noon of the 30th day of April, 1928, for the erection of the above mentioned building.

Plans and specifications may be seen at the office of the Indian Agent at Shubenacadie, N. S., at the Post Office at Halifax, Truro, Kentville, Windsor, St. John and Moncton, and the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten per cent of the amount of the tender, payable to the order of the undersigned. (War Bonds of the Dominion or Canadian National Rilway Bonds will also be accepted as security, or Bonds and cheque if required to make up an odd amount,) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

AGREEMENTS ARE CONTINGENT UPON STRIKES, ACCIDENTS, DELAYS OF CARRIERS AND OTHER UNAVOIDABLE REASONS OVER WHICH WE HAVE NO CONTROL.

Dear Sir:

Our Bankers have informed us that our certified cheque which we sent you with our tender for the Shubenacadie School has been cashed by your Department.

We would like to know if this is customary with your Department and what rate of interest you will allow us on the cheque, if any.

We have an arrangement with our Bankers, whereby our certified cheques are held by the party to whom they are made, until the satisfactory completion of the contract, and in that way we get a reduced rate of interest from the Bank, but if the cheques are cashed, it is necessary for us to pay the full rate of interest.

Heretofore, our certified cheques have not been cashed, but simply held as security.

An early reply will greatly oblige.

Yours very truly

Dear Sirs,-

With reference to the boilers specified for the new Indian Residential School at Shubenacadie, you will note that the portable type, return tubular are required. I understand that the Robb Engineering Co. of Amherst are manufacturers of boilers. Will you please submit to the Department for consideration a design of a boiler of the return tubular type, manufactured by them, the same to have the capacity as called for by the specifications.

Yours very truly,

Deputy Superintendent General.

SEALED Tenders addressed to the undersigned [illegible] on the envelope, "Tend[illegible] Shubenacadie Indian Residential School, Shubenacadie, N. S.", will be received up to NOON, of the 20TH day of APRIL, 1928, for the erection of the above mentioned building.

Plans and specifications may be seen at the office of the Indian Agent at Shubenacadie, N. S., at the Post Office at Halifax, Truro, Kentville, Windsor, St. John and Moncton, and the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered Bank of Canada, for ten per cent. of the amount of the tender, payable to the order of the undersigned. (War Bonds of the Dominion or Canadian National Railway bonds will also be accepted as security, or bonds and cheque if required to make up an odd amount,) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

Sir,-

As already advised you have been appointed Inspector of Construction for the new Indian Residential School at Shubenacadie, N. S., and it will be your duty to see that the building is erected in accordance with the plans and specifications.

The contract has been awarded to Messrs. Rhodes, Currie Ltd., of Amherst, N. S., at their tendered price of $153,000. You will notice by the specifications that payment is to be made on the contract at the rate of 90% of the value of the labour and material in the building, and it will be your duty to issue the necessary progress certificates for payment on this work. These should be forwarded to the Department in duplicate. I would ask you to make a fortnightly report to the Department covering the progress of the work.

I am today advising the contractors that all correspondence relating to their contract should be forwarded to the Department through you. I am sending you under separate cover, stationery and envelopes.

Your obedient servant,

H. F. MacKenzie.
Acting, Asst. Deputy and Secretary.

ALL AGREEMENTS AND CONTRACTS ENTERED INTO AND ALL ORDERS TAKEN ARE ACCEPTED CONTINGENT ON STRIKES, FIRES, DELAYS OF CARRIERS AND OTHER CAUSES BEYOND OUR CONTROL.

Dear Sir:- Re:Shubenacadie Residential School.

On behalf of Rhodes Curry, from whom I have the sub-contract for the Structural Steel and Cast Iron work, beg to submit for your approval details of same.

Where the size of columns is not shown I have worked out the necessary sizes to take the super-imposed loads.

Regarding the beams in the wings, these are shown in some places as 15" - 32# I Beams, and as this weight of 15" Beam is not rolled, I had to check up further, and noting that 3"x 10" spruce joists at 16" centres are good for a total load of 130# per sq. ft. on the spans such as on your building, also further noting that a 12" - 32# I Beam at the spans and spacing as on your building will take a total load of 125# per sq. ft. of floor, and furthermore that this loading is approximately the standard for this type of building, concluded that you intended to use the 12" - 32# Beam and that the 15" was a slip on the part of your draughtsman when tracing.

As they have already begun work on the job and will be needing the steel very shortly, would appreciate it very much if you would wire me should these details meet with your approval, as I have to order the steel from the Mills and we are so far away down here that it takes a long time to obtain deliveries. The columns of course will be cast and machined in Halifax, so that if there are any changes which you might want made on the columns, which would not affect the length of the beams, would appreciate if you would wire through your approval of the beam portion so that I might get same ordered.

Trusting the details submitted may meet with your approval.

Yours very truly,

W.H. Noonan

WHN/S.
Encls.

P.S. As the tracings did not blueprint very well I am enclosing the original and one blueprint and if O.K. would be glad to have the blueprint back with your approval. W.H.N.

Ottawa, Canada.

Dear Sir:

I have been informed that you are the proper party to get in touch with regarding water supply for the new Indian School, which is being built at Shubenacadie. I am in the well drilling business, and am well equipped to put down a well for you, if you are going to obtain water from drilled wells. I have a drilling rig operating now in Cumberland Co., and also one in Halifax Co., So I could put a machine on the job at a short notice if you wished the work done.

You will probably find my name on file at the Dept., as an applicant for the job; But would count it a favor if you would let me know when any decision was made as to the water supply.

Yours very truly,

Sealed tenders addressed to the undersigned and endorsed on the envelope "Tender for [redacted]adie Indian Residential School [redacted]ubenacadie, N. S.", will be received up to noon of the 30th day of April, 1928, for the erection of the above mentioned building.

Plans and specifications may be seen at the office of the Indian Agent at Shubenacadie, N. S., at the Post Office at Halifax, Truro, Kentville, Windsor, St. John and Moncton, and the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten per cent of the amount of the tender, payable to the order of the undersigned. (War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and Cheque if required to make up an odd amount,) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

Sir :-

I inclosed please find result of water examination of sample which I have submitted to the Pathological Institute Halifax for analysis.
This water was taken from the lake on Aug 9th.
Ben the 4th & 5th of Aug. we had a very heavy rain, which would cause a lot of drainage into this lake, however this condition would obtain after every rain

Hoping this will be satisfactory

Ottawa, August 1, 1928.

Dear Miss Wickwire,-

Replying to your letter of the 30th ultimo, with reference to the new Indian Residential School at Shubenacadie, N. S. I would say that the contract for this building, which includes the heating, has been awarded to the Rhodes, Currie Ltd. of Amherst, and they were advised some time ago that the Department would accept a boiler of the capacity mentioned in the specifications similar to that manufactured in Nova Scotia. It would not be practicable to communicate with the I. Matherson & Co. of New Glasgow, as the Department is not purchasing this boiler direct.

Yours very truly,

(W. J. F. Pratt)
Private Secretary.

Dear Sir;

I am sending under separate cover a copy of the first floor plan with some changes suggested by the Sisters of Charity for their quarters on that floor. You will readily see that the toilet accommodations on that floor were for the boys and girls who would occupy the dormitories . The plan will show you the other changes much better than I could explain them.

Should you see your way clear to make these changes ,and I hope that you will ,please let us know as soon as you can.The sooner ,the less expensive it would be.

Yours very truly,

Rev. J. P. MacKenzie

Mr. A.F. MacKenzie,

Sir:-

I am in receipt of a letter from Messrs Rhodes Curry Ltd. re. water supply.
They would like to know if it is the intention of the Department to install permanent water supply this fall.
Will you kindly let us know as regards this matter so if we have to install temporary supply for heating boilers etc. the work can be done before extreme cold weather sets in

AGREEMENTS ARE CONTINGENT UPON STRIKES, ACCIDENTS, DELAYS OF CARRIERS AND OTHER UNAVOIDABLE REASONS OVER WHICH WE HAVE NO CONTROL.

Dear Sir:

Re changes in Dormitory,etc.- first floor. We herewith beg to submit unit prices for this work as below. Our original price was $1580.00. When we submitted that price we intended to connect to the drain inside of the building,but the Plumber informs us that it is not practicable to do so and we will have to make a separate drain,which will necessitate cutting thru concrete wall and connecting outside. This will add $50.00 to our original tender,making it $1630.00. If this work is to be done we would like to know as soon as possible so as to arrange for drainage.

Unit Prices

Rooms	#1,2,3,4.	If basin is installed in one room only	$160.00
		Each additional basin in rooms #1,2,3,4	82.00
"	#5	Basin	106.60
"	6	"	124.50
"	7	Bathroom	351.00
"	7	Basin only	113.10
"	8	Basin	107.10
Heating:		If Rooms #1,2,3 are changed as proposed	18
		Cost of one partition with base	
		" of one door	3

DEPARTMENT OF LABOUR
CANADA

O t t a w a,
October 24, 1928.

Ref. No. I. A. 44.

Re: Indian Residential School,
Shubenacadie, N. S.

Dear Sir,-

Referring to my letter of March 24th in the above matter, forwarding a fair wages clause for inclusion in the specification for the above-mentioned work, one of the officers of the Department of Labour was in Shubenacadie in the early part of this month and visited the Indian school now under construction. As far as he could see, the labour conditions were not posted on the work as required under the contract. From enquiries made by our officer he was, moreover, doubtful if the rates of wages which were furnished to your Department in March last as being applicable under the terms of contract were being observed in all cases.

We should be pleased if you would direct the attention of the contractors to the requirement that the labour conditions should be posted on the work and I would ask also that you would be good enough to ascertain the rates of wages which are being paid to common labourers, carpenters and others employed on the work. In doing so, it would perhaps be desirable to direct the contractors' attention to rates which were set out in the statement of current rates and hours which were communicated to them at the time tenders were taken.

Yours truly,

Gerald H. Brown,
Assistant Deputy Minister of Labour.

Dear Sir:

I have written several letters regarding water supply,Indian School,Shubenacadie,but have not received any reply to my letters. I understand your Inspector,Mr. Crowell has also written.

It is very necessary that a water supply be put into that building before the ground freezes. We will need it for testing the plumbing,also for water supply for the boilers during the winter.

We will appreciate an answer stating just what your intentions are regarding water supply for that building.

Yours very truly

Dear Mr. Currie,-

I beg to acknowledge receipt of your letter of the 2nd instant, with reference to the water supply system for the new Indian Residential School at Shubenacadie, N. S.

It is the intention to use the small lake as a source of water supply for this building, and to install an elevated tank at a convenient location to the rear of the building to supply the necessary pressure.

It is necessary to have a survey made for the pipe line, in order to determine the levels and Mr. R. W. MacKenzie, C. E. of Halifax has been today written to with a request to make the necessary plans for the pipe line.

Yours very truly.

R. GUERNEY CRR.
Architect for the Department.

Nov. 6, 1928.

Sir,-

With reference to the new Shubenacadie Indian Residential School being erected at Shubenacadie, it is the intention to utilise the small lake on the property as a source of water supply for the building, and I would ask you to please make a survey for the necessary pipe line. An elevated water tank is to be erected on some convenient location at the rear of the building to supply the necessary pressure for the Institution. I would like to locate the pump house as close to the school as possible, but this, of course, will be governed by the elevation of the school building above the lake. When preparing your plan will you please indicate on same your suggestions for the location of the pump house and the elevated tank. The pipe line should be located so as to make the minimum amount of excavation.

We have had the water in the lake analyzed and it is fit for drinking purposes. Mr. Crowell, the Inspector of Construction on this building, has been written to-day and asked to give you whatever assistance you will require in carrying out your survey.

Your obedient servant,

J.D. McLean.

Dear Sir:

Father MacKie and Mr. Crowell, the Inspector at Shubenacadie School asked me to submit to you patterns of steel ceiling for the different rooms.

As the ceilings are quite low I presume you would prefer a small pattern. That was the suggestion of the Inspector, also Father MacKie, so I picked out two patterns and am submitting same for your approval.

We intend to use the moulding as shown on design #2132 - also use a plain border filler in the large rooms.

Please make your choice from these two patterns marked in red ink and return them to us, as we have cut them out of the Metallic Roofing Co's. catalogue.

We would like to have your decision as soon as possible so as to get the material ordered.

Yours very truly

Dear Mr. Scott:

I have a letter from Robert Gass of Shubenacadie of which I enclse a copy. I wish you would very carefully consider this proposal. If, without any or much additional expenses, your pipe could be made available for fire protection, it would be a splendid thing for the Village. The Militia Department here in Kentville permits private property owners to tap their main, with the town's consent, and I would like it very much if something could be done for the town of Shubenacadie in this way at the time the pipe is laid to the institution. Of course, nothing should be done to prejudice the water supply or sewage system of the institution, and your engineers would know whether the proposed extension to the town for fire protection would prejudice these things. I would appreciate it very much if you would look into

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

it at once and let me know what view the Department takes.

Yours truly,

J. D. Ansley.

Shubenacadie Nov. 23rd,1928.

J. L. Ilsley, Esq., M.P.
Kentville, N.S.

Dear Mr. Ilsley:-

The Engineers were here yesterday, and surveyed at the Indian Farm for the water supply for the institution, and are taking it from the Lake just adjoining and partly on the farm. They are making plans of course only sufficient for the Institutioj, a pumping station with say a 4 inch pipe which would be adequate for that according to the Engineers.

It would be a great thing if they could be induced to make this large enough (say a six inch pipe) to supply water for the village here for fireprotection and other services. Not being an incorporated town, but a part of the municipality, the village is not now in a position to make any definite proposals, and would have to call a citizens meeting and so on, and it would take a little time to get shaped up. It would not be a terribly extravagant thing for the Dept. to put in a plant adequate for all future needs of the institution and the village as well. It would certainly be a most popular move for you if you could bring this about or even to delay the plans and work until negotiations could be had looking forward to this.

Better get in touch with Ottawa at once and at least get them to consider the matter, and perhaps you could get some proposal from them that we could put before a citizens meeting, which would at least show that you were trying to do something for the community at every opportunity, and if nothing ever came of it you would have credit for the move.

Yours truly,

(Sgd) Robert Gass.

December 12, 1928.

Dear Mr. Ilsley,-

I have given most careful attention to your letter of the 30th ultimo with inclosure from Mr. Robert Gass, in which you deal with the proposal to add to our water supply system at the Shubenacadie school in order to accommodate the town and provide for them a fire protection system. I doubt very much the advisability of the Department becoming involved in a scheme of that kind. We would have to provide a pumping plant much larger than would be required for the school including a larger elevated storage tank. The cost of installation would be correspondingly increased; this increase could hardly be charged to public funds and would have to be met in some way by the town and the town would also be put to considerable expense in laying a pipe line from the elevated tank to the town, with hydrants and the necessary hose and equipment. We would have been glad to consider this proposed plan but taking into consideration the cost of installation and the cost of operation it seems to me wise to say that we do not consider the plan favourably.

Yours sincerely,

DC

Duncan Campbell Scott

R. J. Ferrier Esq.
Ottawa.

Dear Sir:

I am informed that the Dept., intend to erect a barn on the farm at Shubenacadie.

At the time you were here arranging the purchase of the farm property from me, you intimated that the Dept. would probably allow me to tear down and remove one of the present barns when it was no longer needed.

Would you be kind enough to tell me if such is the case? If so when could the barn be torn down? I could make use of the lumber, and I would thank you for the information.

Yours very sincerely,

George Gay.

Dear Sirs:-

We are writing you with regard to Lightning Protection for the Indian School at Shubenacadie. N.S.

We were referred to by the Priest in charge to your Department. He informs us no insurance is carried on this building, but it is a building that would be subject to a reduced rate of insurance if the Dodd System of Lightning Protection were installed. Inasmuch as you do not carry insurance we believe you will be all the more interested in providing damage by Lightning as well as other fire.

We would be glad to go into the cost and method of installation with you through the priest Father Mackey or direct if you wish.

Trusting that we may be favored with an early reply, we remain,

Yours truly,

DODD & STRUTHERS.

Indian Residential School.
Shubenacadie N.S. Jan 12th/29

Sir

I have been asked by the plumbing contractor if it is the intention of the Dept. to use the automatic flushing range closet as specified, he says this type of closet is very hard on water supply, and he would suggest the use of an individual seat flushing closet.

I should also like to know about the construction of frame or partition to carry wash basins in lavatory rooms in basement

Contractors have been talking of putting up a frame of wood and covering with vertical sheathing to floor. I take exception to this as being unsanitary & not in keeping with the rest of basement which has no wood. I think a better method would be to cover frame with metal lath, coat with cement ~~mortar~~ mortar + scratch. put on 2nd or straightening coat, and finish coat of Keene Cement trowelled to a good surface, the colored base can be carried around the floor line the same as all the basement rooms

A letter will clear this up in plenty of time

Jan. 16, 1929.

Sir,-

Replying to your letter of the 12th instant, with reference to the new Shubenacadie School, I beg to say that it is desired that the automatic flushing range closets be installed as specified. I may say for your information that the Department has experienced considerable trouble where the individual seat flushing closet was used due to the rough usage given to plumbing fixtures by the children in the Institution.

With reference to the supports for the wash basins in the boys' and girls' wash rooms in the basement it is desired that a fixture similar to Standard Sanitary Plate P. 6095E, size 16 x 20 be installed and referring to this plate you will see that it includes painted metal brackets which are secured to the floor as supports for the basins.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

AGREEMENTS ARE CONTINGENT UPON STRIKES, ACCIDENTS, DELAYS OF CARRIERS AND OTHER UNAVOIDABLE REASONS OVER WHICH WE HAVE NO CONTROL.

Dear Sir:

Re hardwood flooring, Indian School, Shubenacadie. May say when we were estimating this job we figured on using No.1 grade hardwood flooring, which we presumed was your intention to have used in a building of that sort, for School purposes. The grading rule for No.1 is as follows:

> "No.1 - 25/32 inch and thicker, will admit of tight, sound knots and slight imperfections in dressing, but must lay without waste. Standard lengths in all widths in this grade shall be trimmed 1½ to 16 feet; the proportion of lengths 1½ to 3½ feet inclusive shall be what the stock will produce up to 40 percent".

This makes a real good floor. The wearing qualities are just the same as the clear grade. When it is laid it is hard to tell the difference.

Your Inspector interprets the specification as calling for Clear. We did not interpret the specification that way and consequently we figured on using No.1 grade, and if we are forced to use the Clear grade it will cost $300.00 more than we figured, and you really will get no better floor.

I have used a lot of the No.1 grade in my own house and find it makes a first class job. We have also used it in Schools and other Institutions.

We intend placing the order for this flooring right away and would like to have your decision at your earliest convenience.

Presume you are as familiar with the grading of hardwood flooring as we are. May say the sound knots in No.1 are very few. May find an occasional pencil knot in a board.

Yours very truly

OTTAWA, Ont.
Feb. 11, 1929.

Dear Mr. Curry,-

Replying to your letter of the 9th instant with reference to the hardwood flooring specified for the Indian School at Shubenacadie, the specifications call for 'first grade' birch or maple and this is the flooring that you will be expected to install.

You probably know that on January 1st, 1928, there was a change made in the classification grading of hardwood flooring. After this date clear flooring was to be known as first grade. First grade flooring shall have one face practically clear but colour no defect. Green or dark streaks not over 1/8" wide or 3" long or its equivalent and small defects which can be readily removed by the ordinary method of scraping after the floor has been laid, permitted.

This grade must have one face free from all shake and check. Lengths 2 to 16 feet but not over 15 percent under 3½ feet.

I am sending a copy of this letter to the Inspector of Construction.

Yours very truly,

R. GURNEY ORR.
Architect for the Department.

Dear Sir:-

It has been reported that some extensions may be made to your plant at Shubenacadie in the near future, and are take the liberty of calling your attention to the use of a Smooth Face Interlock as a finished product for outer walls on such out-buildings as you may require. This building unit presents a very favorable appearance when laid up and has been used with great satisfaction in the Maritimes during the past six years.

At any time, should you wish to make use of our Service Department, we would be very glad to give you estimates on the cost of your walls laid up from any plans which you could care to submit to us.

Trusting that we may have the privilege of serving your best interests during the coming year, we remain,

Yours very truly,

Dear Sirs:

Re Plumbing Indian School, Shubenacadie

Mr. Crowell, the Resident Inspector, has ordered us to supply 28 - P6095T Lavatories for boys and girls washrooms in basement, instead of the Plate P482 originally specified.

The difference in price will be $130.00 and before making the change we would like to have it authorized by the Department so there will be no mistake.

For your further information, we may say we have ordered all the plumbing fixtures shipped with the exception of these 28 basins, asking the shippers to hold them back pending the decision of the Department.

Kindly take this up with the proper person and advise us at your earliest convenience, as it will take sometime to get the fixture they now ask for, and we do not wish to be the cause of any delay on this job.

Mr. T. Gurney Orr
Chief Architect,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

Please find enclosed a copy of a letter received from the people who are doing the plumbing in the Indian School Shubenacadie. Your specification calls for all basins to be of the same type. There are 28 of them in the centre of the floor space, in the two wash rooms in basement.

It would be difficult to use the basin which is specified without having a partition thru the centre. There would be no way of supporting that partition except from the outside walls.

Please let us know if we will order the lavatories put in as asked for your Inspector, Mr. Crowell, at an additional cost of $130.00.

An immediate reply will oblige.

Yours very truly,

Sir ÷

Please find enclosed Rhodes Curry's bills for Main Sewer drain to river $14.95.00 also for drain from root cellar + boiler room $506.17 making a total of $2,001.17 these drains have been completed.

Perhaps I should have included this amount for payment with the last certificate, however I am sending it separate from building contract and trust that it will meet with your approval

Shubenacadie, N.S.

Feb. I4th. I929.

Dear Sir:

A corner basin with hot and cold water in each sacristy would be a very great convenience. Every church or chapel usually have running water in the sacristy. I have made inquiries about the cost, every piece of pipe, elbows etc. in detail, and the total cost is $ I00.02.

May we have them?

Yours very truly,

Rev. L. P. Mackay

P.S. Should the above not be allowed, would I be going beyound my limits to have them installed at my personal expense?

OTTAWA.
Feb. 26, 1929.

Sir,-

A request has been received from the Reverend Father Mackey for the installation of a lavatory basin in the Sacristy of the Chapel in the new School. You may arrange with the contractors to have one installed.

With reference to the accounts submitted for the installing of drainage for the school these should have been included in the last certificate as extras. I am returning the accounts herewith, and would ask you to kindly include the amount in your next certificate. If the contractors wish payment at an earlier date you might issue another certificate, which will be number 10.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

March 18, 1929.

Dear Father Mackey,-

Replying to your letter of the 11th instant, I would say that the choice of colours for the interior painting of the new Shubenacadie School will be left to you and the Reverend Sisters. For the woodwork I would suggest that the same be finished in a medium dark oak.

There will be required throughout the building in the various rooms some cupboards, lockers, tables, etc. I would ask you to please consult with the Reverend Sisters and send me a list of what they would like to have. Please list these articles according to floors and the rooms in which they are to be installed. It is also customary to have the tables for the pupils' dining room built, also benches for the tables. Please let me know the size the Sisters would like to have these tables.

As soon as you can let me have this information I will prepare the necessary detailed drawings and obtain a price for their installation.

Yours very truly,

R. GURNEY ORR.
Architect for the Department.

AMHERST, N. S., March 13/29

AGREEMENTS ARE CONTINGENT UPON STRIKES, ACCIDENTS, DELAYS OF CARRIERS AND OTHER UNAVOIDABLE REASONS OVER WHICH WE HAVE NO CONTROL.

Dear Sir:

Re Completion of Indian School
Shubenacadie

On account of being delayed by non-delivery of material, it will be impossible for us to have this building completed by the time specified.

The order for granite trimmings was placed in June 1928 and was supposed to have been delivered not later than November 1st. We did not get the last of the granite trimmings until sometime in January, which caused a long delay -also caused us a lot of extra expense.

We are now being delayed on account of the non-delivery of flooring. We had No.1 flooring engaged, supposing that was the grade required, but as you have insisted on using clear grade, we had to cancel the order for No.1 and place the order elsewhere for clear, and we cannot get delivery until the last of this month.

On account of this, and other minor delays, we will be obliged to ask for about Two months extension of time. We are doing everything we possibly can to have the building finished at the earliest possible date.

Yours very truly

A. S. Curry

Memorandum,

Mr. Orr:-

I desire to call your attention to the certificate hereunder for $10,191.17 in favour of Rhodes Curry Limited who have the contract for the erection of the Indian Residential School at Shubenacadie, Nova Scotia. I wish to point out that this certificate contains extras for drainage to the extent of $2,001.17 and the accounts which are attached covering these extras do not give details as to how this amount is arrived at which is customary and which is required by the Auditor General's Office. If, however, you obtain the Deputy's approval to pass the account as it now stands, it will be paid.

Ottawa, April 3rd, 1929.

Sir:-

Regarding the finish of cement floors. The contractors are using Truscon Art-Roc in the cement for the finish coat.

Some time ago I wrote this firm for data, re- the laying of these floors, and I note they call for a cleaning + waxing after the floor is thoroughly dry with a wax the same color as floor.

Your specification calls for a topping of Color-mix as per the specification of the Master Builder Co, and they say. —

Following the completion of all work, the surface of the floor shall be cleaned by washing with linseed oil soap, and follow with a waxing using Master Builder's Colorwax the same color as the floor.

Now the way I see it, the waxing is called for both in the material specified + in the material they are using in order to make a dust-proof, + water-proof, + lustrous surface.

Unless otherwise instructed I will try + have your specification carried out.

Kindly let me know if this is what is intended for these floors.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

I would also like to know regarding a corridor on 1st Floor with the rooms "Boys Infirmary", Nurses Room, Infirmary, + Bath opening off, also a passage from 1st Floor corridor to chapel balcony.

I think these places are intended for Burlap as your specification says, Burlap shall be provided in all corridors passages etc + that surely covers these places.

But the contractors say no. Would you kindly let me know as regards these matters so what you intended can be carried out

Would you also send me a few payment certificates

Attention J. D. McLean, Esq.,
Assistant Deputy and Secretary,

Re Water Supply Indian College

Shubenacadie, N. S.

Dear Sir:-

Replying to your letter of Nov. 6th with reference to survey for Pipe Line in connection with the proposed water supply for the College building, I would say that I have made a preliminary survey and think it advisable before going further, to submit the following as to existing conditions, in order that the decision as to location be made with full knowledge as to the situation.

I am sending you under separate cover a Blue Line Print of that portion of the property lying between the Shubenacadie - Maitland Main Public Road and the River, on which is shown, roughly, two alternative locations.

Your letter conveys the impression that the proposed pipe line is to enter the Lake where the shore is within the boundaries of the college property.

Under ordinary conditions I would have assumed that this had been decided upon and have disregarded the second location which, as will be noted, involves crossing a part of the adjoining farm owned by the Brothers Snide. It has also occurred to me that, owing to the fact that my Plan of the College property shows only a small portion of the Lake, a mistaken idea may have been formed as to its size, and location with

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

reference to the College property. For this reason, I have thought it advisable to submit this memo and await further instructions before making the final location.

The location marked "A" - "B" - "C" as shown, is entirely upon, and takes the water from that portion of the Lake which is within the boundaries of, the College Property.

The distance by this line is 1900 feet, assuming an approximately direct line and reasonable distance from the shore to point of intake. This last should be determined by soundings for the depth of water and observation of the effect on the water of drainage entering from the main road which passes near the Lake at this point.

The rise of the ground from the water level at this point is such that the pump house must be located practically at the shore, see point "A" on Plan. The tank will require to be at the point marked "B" distant about 1000 feet from "A" at which point the elevation is about three feet above the floor of Boiler Room, which is 29 feet above the lake level as on the date of survey, which may be regarded as ordinary high water. The pipe from A to B can be straight with a practically uniform grade. The ground is clear and there is no rock.

From "B" to the building the ground first falls to an elevation of approximately 18 feet above the Lake Level, then rises to the building.

If this line is adopted it will probably not be considered advisable to place the Tank near the building as suggested in your letter, as to do so would necessitate either pumping over the ridge and through the hollow or carrying the pipe line at a considerably greater length around the southern side of the hill in a curve. (See the dotted line "C - D" ~~"A"~~).

In any case, with this line the Pump house must be at the lake.

Having no information as to the estimated daily consumption, capacity of tank, or size of the pipe to be used, I am not able to say anything as to what protection from frost will be required for the tank.

If this is to be a consideration it can, of course, be more conveniently provided for if the tank is located as your letter suggests, in the rear of the buildings and near the Boiler Room. It should, however, be mentioned that owing to the steep slope and somewhat "springy" nature of the original surface here which has been built up with the loose clay and earth excavated from the foundation of the building,

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

it will be necessary to pay greater attention to the foundation for the tank if placed at that point than if located elsewhere.

As has been made clear, the adoption of this route, while having the advantage of being entirely upon the property of the College, and absence of curve in the pipe line, has the disadvantage of requiring the Pump House to be at the Lake, and the tank at about 900 feet from the College Building. There is also the question as to whether the water at this point of intake will be found as pure as if taken further from the road, as at the point "F".

The alternative route marked "C"-"E" "F" as proposed involves crossing the Snide farm, for a distance, between the College Property boundary and the Lake shore, of 425 feet. This line which leaves the lake at or near the point marked "F" passes over an approximately level surface, through and along the margin of a swamp with a gradual rise which reaches and elevation above the Lake level of 14 feet at point "E", 1100 feet from the Lake, at which point the Pump House can be located.

From "E" to the building at "C", the distance as measured on the survey tangents is 718 feet to the corner of the Boiler Room at the rear of the building at or near which the Tank will be located.

This line is open and the excavation cost, while slightly greater than that on line "A"-"B"-"C", owing to the necessity for greater depth where it crosses two small ridges, will not be materially greater, and may possibly be offset by the somewhat shorter pipe line called for.

As shown, the line is not straight but the curve, if thought objectional, can be eliminated by alteration in direction at the pump.

Without knowing the size and type of pipe which will be used, I am unable to estimate to what extent the friction through the 1100 feet will affect the lift.

I have spoken to Mr. Snide as to the pipe line crossing his property and he has expressed himself as not opposed to it or in any way inclined to put obstacles in the way. He mentioned as a reasonable compensation $100.00, but afterward told me he was not disposed to "Bargain" and would accept any reasonable compensation. I am of the opinion that he will accept $50.00.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

As will be apparent the advantages of this location are slightly shorter distance and its being possible to locate the Pump House within 700 feet of the College and the Tank as close as may be required, also the, probably, more desirable point of intake.

The disadvantage being that it is in part on the adjoining property.

I have not thought it necessary at this stage to make more than a preliminary survey, or to prepare a profile of the two routes. If you will advise me as to which location has been selected I will at once complete the Survey and forward plan showing details.

I remain,

Yours very truly,

R. W. MacKenzie

approuvé DES

ABRIL 23, 1929.

MEMORANDUM: DR. SCOTT.

I beg to report that on the 10th and 11th of this month I made an inspection of the new Indian Residential School at Shubenacadie, N. S. While there I gathered the information necessary to lay out the water supply system for the building and I beg to submit the following particulars.

Adjoining the School property is a small lake indicated on the plan as Snide Lake and located approximately 2000 feet N. E. of the School building. An analysis of the water from this lake was made in the laboratory of the Provincial Department of Health at Halifax and found to be satisfactory for domestic purposes. The possibility of using a well as a source of supply was considered, but it was found on inquiry that well water in the vicinity of Shubenacadie was hard and unpalatable. Snide Lake is, therefore, recommended as a source of supply.

Before the most economical system could be decided upon it was necessary to ascertain if a continuous supply of electric power would be available at the School. On inquiring it was found that the local Electric Light Co. has [redacted] been taken over by the Avon River Power Co. and they will be in a position to supply a continuous 24 hour service after July 1st of this year. With continuous electric power available a water supply system incorporating a pneumatic tank and automatic power pumps is recommended.

The layout of the proposed water supply system provides for a pump house, located approximately 700 feet to the rear of the School building and 1100 feet from the Lake. At this point the elevation of the pump house will be 14 feet above the water level of the lake and 15 feet below the basement level of the School. The suction pipe will be 5" galvanized steel and the force main 4" galvanized steel pipe. The pumping equipment

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

will consist of a Fairbanks Morse No 4340 self-oiling, Typhoon power pump, belted to a ball-bearing motor, both mounted on steel base. This pump has a working pressure of 65 pounds and a capacity of 5000 gallons per hour.

For fire protection a Fairbanks Morse Centrifugal pump No 3264, 4" with direct connected motor will be provided. The pump house will be 14' x 18' of brick construction and will house the pumps and a 4' x 16' pneumatic tank. The building will be heated by a stove.

The system contemplated will provide an ample supply of good water for all domestic purposes and an adequate fire protection.

I would recommend that the installation be carried out by day labour under the supervision of Mr. Crowell, who has acted as Inspector of Construction on the work. Mr. Crowell is competent to supervise this work and the day labour basis will be the most economical way of having the system installed. All materials required will be purchased by the Department.

The following is an estimate of the cost,-

Trenching, laying pipe and back filling	$3,000.00
Pipe and fittings,	$3,000.00
Pump house and equipment,-	
Pump house	$1,500.00
Pumps	$1,025.00
Automatic motor starter and pressure regulator	$ 200.00
Installation	$ 200.00
Pressure tank and equipment	$1,000.00
Electric pole line to pump house	$ 800.00
Miscellaneous	$ 500.00
Total	$11,225.00

Dear Sir:

We offer to furnish and install in boiler room of Indian School one ten horse power riveted steel tubular boiler for a working pressure of 100 pounds complete with smoke hood and smoke pipe of 12 gauge steel plate, Penberthy injector, steel supply tank, gauge cocks and glass steam gauge, safety valve, etc. for the sum of five hundred, eighty-eight (588.00) dollars.

We enclose detail specification of boiler which covers all points of construction. Delivery can be had in two weeks from date of receiving order.

This price includes pipe, fittings, valves and labor necessary to make proper connections to high pressure steam line leading to laundry.

Thanking you for the inquiry and hoping to receive the order for the work, we are,

Yours truly,

POOR COPY

June 12, 1919.

Sir,-

I beg to refer to your letter of the 16th of November last with reference to the water supply for the new Indian Residential School at Shubenacadie, N. S. The Department intends to proceed with the installation of this water supply system by day labour, under the supervision of Mr. Crowell. Plans are now being prepared here for the pump house, etc. and I would ask you to please lay out the pipe line from the Lake to the School, as indicated on C. E. F. on the plans submitted with your letter. The point F to be located where you consider the best point for the intake. I would also ask you to kindly have a short agreement signed by Mr. Wilde allowing the installation of the pipe line across his property. It is thought that a compensation of $50.00 for this privilege should be ample.

For your information I would say that it is the intention to erect the pump house at point E shown on your plan. The pipe from the lake to the pump house will be 5" and from the pump house to the School 4".

In view of the fact that there will be a regular supply of electric current available at the School after July 1, it is the intention to install a pneumatic tank with automatic pumps. The tank will be located in the pump house. As it is desired to have this work started as soon as possible I would appreciate it if you would lay this line at your earliest convenience.

Will you please advise me what your fees would be for making one inspection a week of the water supply system during its installation.

Your obedient servant,

D. C. Scott.
Assistant Deputy and Secretary.

Sir,-

I beg to advise you th t it is the intention of the Department po proceed with the installation of the water supply system for the new Shubenacadie School by day labour under your supervisi on.

I am today writing to Mr. McKenzie asking him to lay out the pipe line for you from the Lake to the School, the pump house and pipes to be located approximately as discussed with you when the Architect visited the school last. As soon as Mr. McKenzie has located the pipe line you may proceed at once with the necessary excavation, and if you will advise the Department when the work is commenced an accountable cheque will be sent you with which to pay the labour. In the course of a few days a plan of the pump house will be sent you, also the name of the firm from whom you may purchase the necessary pipe. You might consult with Mr. McKenzie when he is making the survey for the pipe line as to the best system to adopt in carrying the pipe to a suitable depth in the lake, so as to ensure a satisfactory intake. Before you instal the portion of the pipe in the lake I would ask you to please advise me how you propose to carry out this part of the work.

I would ask you to also advise me if you think it necessary to have Mr. McKenzie visit the work once a week to check up your levels and pipe line, etc.

For your information I am enclosing herewith a copy of a letter which is today being sent to Mr. McKenzie.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

OTTAWA

Shubenacadie Indian Residential School

Architect

Shubenacadie, N.S.

June 17th. 1929.

Dear Sir:

Concerning the barn. This is the situation here. Anticipating that you would start the barn by the first of June I permitted Wallace Gay to take the larger barn and at the same time the one in need of most repairs. The result is that now we are pressed for space. With about 75 ton of hay, 12 acres of oats, 3 to 4 acres of pota-toes, about 1500 bushels of turnips, and many of the smaller veget-tables, ready in from a month to three months, we will have no place to store them unless the barn is under way very soon. Speaking to Mr. Crowell he said that he could supervise the laying of the water line and look after the barn at the same time.

I admit that I should not have allowed Gay to take the barn, but at the same time that barn would be of no use unless there were con-siderable repairs made on it.

We expect to start haying about the 20th. of July, so will you please do the very best you can to provide a place to store it.

Yours very truly,

F. P. Mackey

June 20, 1929.

MEMORANDUM: Approved Dr. Scott.

A barn will be required for the new Shubenacadie Indian Residential School. On my last visit to the School I discussed with the Reverend Principal the accommodation required in the barn. He has since forwarded a plan which will meet the requirements, and which can be built for approximately $6,500.00. Mr. Crowell, Inspector of Construction, is at present supervising the installation of the water supply system, and I beg to recommend for your consideration that the barn be erected by day labour, as Mr. Crowell will be able to look after the erection of this building while the other work is in progress.

Ottawa, Canada.

Dear Sir:-

Your letter of June 12th to hand this morning.

I note instructions in the matter of the Pipe line for the proposed water supply at the Indian College, Shubenacadie, and will arrange to attend to the work between the middle and last of the present week.

Replying to your question as to my charge for inspection one day per week during the instalation of the System, I would say that I do not see how I could charge less than $10.00 per service, as there is likely to be a sufficient amount of work in the nature of checking Grades, Etc, to take up practically the entire day.

I would furnish my own Car to and from Shubenacadie free of charge.

I remain,

Yours very truly,

R. W. McKenzie

June

Sir,-

I am enclosing herewith three blu
copies of a plan for the pump house for the water supp
system at the Shubenacadie School. You will note tha
building is to be constructed with a concrete foundation
8" brick walls and frame roof shingled. The bricks are
to be the same as those used in the School. The inside
of the pump house will be finished by white-washing the walls
and painting the v-joint ceiling.

I am enclosing also a blue print showing the
layout of the pumps and piping and the tanks. In a day or
so I will send you a detailed drawing showing the exact size
of the concrete bases for the pumps with the bolts indicated,
required for bolting the frame to the concrete. As it will b
necessary to have electric power to operate the pumps will yo
please arrange to have a power line installed from the schoo
to the pump house. All electric wiring inside the pump h
should be in metal conduit.

Attached hereto is a detailed list showing
the pumps, tanks and all fittings required inside the pump h
Arrangements are being made for the purchase of the equipmen
shown on this list, and this equipment will be addressed to
at Shubenacadie. You will remember some time ago I advis
we would give you the name of the firm from whom to buy th
I may say that it has been decided to invite prices for all
required from here, and as soon as the order has been placed
be advised.

When you are ready to proceed with the ins
of the pumps Messrs. Power Bros. of Lunenburg may be employe
out the installation.

July 2nd. 1929.

Dear Sir:

In reply to your letter of June 26th. concerning the taking over of the building, I beg to say: Mr. Crowell and I went over the building this morning and there are at least five places where dampness shows. Also the matter of the floors in the basement, and base. As far as I know the only treatment given the floor in the basement was an application of linseed and some other oil mixed with the linseed. The coloring on the base can be rubbed off with your hand.

Both these matters were brought to the attention of the Supt. for Rhodes Curry many times.

I understand that Mr. Crowell is writing Rhodes Curry as to w what he considers should be done before they can get a clearance of the building.

Yours very truly,

J. P. Mackey

Architect

Sir +

In conversation to-day with Mr McKenzie regarding the intake for water at the lake he says the pipe had better enter the lake 4'0" below the water at the water's edge and carry below the lake bottom untill there is 4' of water over the pipe, this will be about 30' from the shore, it can then lie on lake bottom untill it is about 50' from the shore line, the depth here is 7'6" it can then turn up perpendicular 3'6" so the intake will be 3'6" above lake bottom + have 4' of water over it.

Re intake I will want some kind of a large strainer of brass or bronze threaded to screw on top of vertical end of pipe.

Kindly let me know if this is satisfactory or I will install what ever you send according to your instructions.

JUL 12 1929

July 8th, 1929.

Department of Indian Affairs,
Ottawa, Canada.

Attention:- R. F. McKenzie.

Acting Asst. Deputy & Secretary.

Dear Sir:-

I am in receipt of your letter of July 3rd, and note instructions.

I have already given Mr. Crowell line and grade stakes for that section of the pipe line between the Pump house and Lake, also line stakes on the pressure section; I will give him grade stakes on this section by the time he is ready for them.

With regard to this section, the line crosses a rather pronounced hollow over which I want if possible to carry the pipe on the surface for a short distance.

This will I think be quite feasable as the hollow in question should be filled in the natural course of Farm improvement, and I think this can be done at less than the cost of sinking the pipe as is, of course, necessary on the remaining portion of the line.

I enclose herewith copy of the agreement to be signed by Messrs. Snide. This is for your approval.

I have not as yet submitted it to Mr. Snide, but in discussing the matter a few days since he suggested the clause providing for payment for damage should it be found necessary at some future time, when the land was under crop, to open the line or use the right of way in such manner as to cause additional damage.

I have included that dondition as it seems to me to be not unreasonable.

You will note also that I have mentioned the width of the strip or right of way over which the privilege is given as ten feet which should be ample for all purposes.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

I have also endeavoured to generally phrase the agreement so as to be capable of being interpreted as a perpetual Lease, otherwise I think it would be necessary to carry a termination clause which in this case would be undesirable.

Will you kindly return this if it covers the situation, or otherwise prepare one which I will submit for signature.

I remain,

Yours very truly,

R.L.W. McKenzie

Shubenacadie N. S. July 12/29

Sir:

Re. concrete floors + bases, these were formed on the wall before the walls were plastered and when the putty coat was applied to the walls above the base in the trowelling of it the lime putty water ran down over the base, and to get rid of these stains they mixed some of the dirt-rock color in water and used it as a color wash to cover over these stains, with a result that this color rubs off very easy, if you rub your hand over the base it is covered with this color and there is a streak across the base where the color has been rubbed off. The only finish the floors have received was a coat of linseed oil + gasoline mixed, with a the floors are all mottled in color, where they got a heavy coat they are one color, where the coat was thin they are lighter, and in doing the floors every strip seems to be a different shade, and where one strip of work joins another + so received 2 coats on the lap the true color of the floor shows up. Your specification says these floors shall be finished in accordance with the Masters Builders specification or approved equal. you can see by refering to this specification or to my letter of March 30th. that they say

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

this work must be waxed with a wax the same color as the floor, it is a part of the laying of these floors, as you will see by refering to the Art-roe specipication. You will see by his letter he says we have given a first class job & before that he says. We did not figure on doing that class of work and if we are compelled to wax that floor the same as a first-class it will cost us a lot of money. He seems to think this is a 2nd or perhaps a 3rd class job and this necessary waxing is not necessary, as this school is only for Indians he told and when he wanted to lay 2nd grade Hardwood flooring. The leaks in the roof are around the outside walls and the roofer is here today attending to them

There is a concrete slat or platform outside shop-entrance door-way, it shows on the plan the same as other entrances which have this slab put in. We should also have door-stops put on the base, to keep the door knobs from putting a hole in the plaster walls

and untill this work is done I cannot say he has completed the contract to my satisfaction

Yours obedient-servant
J.W. Worrell

Mr Crowell
Inspector of Construction
Indian School.
Shubenacadie N.S.

Dear Mr Crowell

We are in receipt of yours of 2nd inst.
Note what you say regarding finishing of Indian School
I have been confined to my house with a bad cold
all this week hence the delay in answering.
I was under the impression that we had done every
thing in connection with School building that was
called for in the specification and shown on plan
I do not know what more we can do to the
basement floors other than what has been done
I never supposed for a moment that a floor of
that kind would be waxed. In fact in the
Masters Builders specification the waxing is a waxing
is a separate process and can be specified by the
Architect if so desired. We did not figure on doing
that class of work and if we are compelled to wax
that floor the same as a first class job in a private
residence it will cost us a lot of money that we did
not figure on. As I have already explained to you,
the contract was taken at a very fine figure
and owing to the delays which were caused.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

beyond our control, there is no profit in the contract for us.
We want to do what is right, but I think any builder will bear me out in saying that we have no right in doing anything further to the basement floors.
I consider we have given a first class job in that respect. Re. the leaks in the roof, I am writing McDonohue and trust he will go to Shubenacadie at once and try + make everything satisfactory. We would make the building tight no matter if it had been taken over or not.

Regarding the platform you speak of in the rear of the building. Was this taken up with Mr Dunn? I do not understand why this was this was left off if it was supposed to be put there. I will take the matter up with him - or would you kindly have it done and send us the bill. I do not imagine it will amount to much.

As you know we have some 20.000^{00} tied up in the building, besides our certified cheque and it is quite necessary that we get relieved of our obligation as soon as possible so as to get our money.
If you can do anything to expedite the taking over the building. I assure you it will be a great obligement to us.

Yours Very Truly
A. S. Curry

Rhodes Curry Ltd

Dear Sirs:-

We are in receipt of a letter from the Dept of Indian Affairs saying you would like to have the building taken over and the final payment made.

If you will please finish the cement floors & bases, put a cement slab as shown on the plan outside the shop entrance door way and there are about a dozen leaks in the roof that were pretty bad the last raine.

If you will kindly do this we will say your contract is finished and the final payment payment can then be made

Gentlemen:

We attach our proposal for Pipe and wish to refer to the specification reading 20' Lengths. You, of course, understand that this Pipe is regularly supplied in random lengths averaging about 20' and if favored with your valued order we would supply as near as possible to the quantity specified, possibly the amount would vary slightly either way.

Yours very truly,
for AUSTEN BROS. LIMITED

July 18, 1929.

Sir,-

Prices were obtained for the piping required for the water supply system at the Shubenacadie School. The lowest quotation received was from A. L. Melvin, 6 Cunard St., Halifax, who quoted a price of $1,356.00 for 1200' Standard Lap Welded Galv. Steel pipe in 20' lengths with all necessary galvanized steel copplings required, which figures out at $1.13 per foot, also a price of $598.60 for 730' of 4" Standard Lap Welded Galvanized Steel pipe in 20' lengths with all necessary galvanized steel couplings required, which figures out at 82¢ per foot. Since the line has been surveyed it may be that the amount of piping above mentioned may be incorrect. I would ask you, therefore, to order from A. L. Melvin the exact amount of piping you require in accordance with the above description. You should also order whatever piping is required to connect up the water supply system with the barn. Whatever further fittings are required you can have supplied by Power Bros., who have been instructed to do the plumbing work required for this installation.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

July 19, 1929.

Sir,-

With reference to the acceptance of the building from the Rhodes Curry Co. Ltd., it would appear that we are holding back rather a large amount for the amount of work required to complete the contract, and I would suggest that you issue a further certificate holding back an amount you think sufficient to cover the work that has not yet been completed to your satisfaction.

With reference to my letter of June 28th in which I enclosed a list of the pumping equipment, I beg to say that an order has today been placed with the Canadian Fairbanks Morse Co. for this equipment and they have been asked to ship this addressed to you, also to forward the accounts in duplicate which I would ask you to please certify to and return to the Department.

I am enclosing herewith a blue print showing the exact sizes of the bases for the pumps.

Your obedient servant,

J. D. McLean.
Acting, Asst. Deputy and Secretary.

DEPT. OF INDIAN AFFAIRS
JUL 19 1929
RECORDS

Shubenacadie Indian Residential School.

Shubenacadie, N.S.
July 17th. 1929.

Dear Sir:

Enclosed you will please find time sheets for water inst--allation from June 26th. to July 13th. There has been other expenses for material in connection with the pump house, including lumber, gravel, buckets, etc. The freight on the gravel has been paid, that accounts for the checque number being 1,2,4, not 1,2,3,. All ploughing carting etc. has been done by the farm horses, but not charged . If you wish that to be charged against the water installation it can easily be done as we have the time of such work. Again the checque for paying the men did not come till July 6th. and as the men were asking for their money before that I advanced the money to Mr. Crowell covering the amount of the checques No. 1 and 2. The balance as you will see is $ 388.95, which will not be sufficient to cover the wages for the next week and the cost of material, so will you please let us have some more money. I have opened a second account at the bank for this work, so I hope I won't get things mixed up. When I have the receipts for the material purchased I will forward two copies to you. I have only one receipt for freight bills, will it be necessary to have three copies ?.

Please let me have a supply of envelopes of all sizes and color.

Yours very truly,
Rev. L. P. Mackay

August 12th. 1929.

Dear Sir:

Enclosed you will please find time sheets for passed three weeks.Owing to heavy rains we have had some cave-ins. The pipe fitters made a start on Saturday,so we hope to move right along now. The wall and floor of pump house are finished and we expect to have the brick here in a day or so. It would be very convein--ent if we could have the tanks and pumps put in place before the brick walls are up.

Yours very truly,

J. P. MacKay

the pipe installed from the strainers in the lake through the deep cut and now working through the bog and will have this in tonight.

I have the wall of pump house ready for the brick-work, the rough concrete floor has been poured. I have also installed pipe tunnels under the wall footings and wells from these through the floor of concrete for both suction and discharge.

I would like to receive the pressure tanks before erecting the brick-work as they could be rolled in over the wall very easily, but as I have been promised that order of brick will be ready for delivery the last of the week I will go on with the erection of the walls and tanks will have to be taken in through the door, end on which will mean a little extra work.

Avon River Power Co have surveyed out a pole line to school, and pump house but at this date they have not started installation so I am writing them so as to make sure of power when pumps are ready for operation

Hoping this will be satisfactory

Sir÷

With regard to progress on water installation. I have had the trench for pipe line excavated from the pump house out into the lake since July 26th On July 27th & again on Aug 4th we had two very heavy rains and as this trench carried all the drainage of a large area to the lake we have had some extra work to clean out the earth that has caved in on the lower end next to the lake where the average depth is about 7' 6"

This 300' of trench I had to excavate to the required depth in order to drain the swamp that lies just above it.

The trench through this swamp is about 250' in length in making this cut we ran across a lot of sunken trees that had to be cut out but after getting down to the depth we struck a good clay bottom under the bog.

From this swamp to the pump house is a nice even grade which we have excavated to a minimum depth of 5' to be sure we are safe from frost

The trench from the pump house to the boiler room of School is about 80% excavated.

The pipe fitters are on the job and have

Dear Mr. Crowell:-

I read your letter of the 15th instant with reference to the water supply system at the Shubenacadie School, and I am pleased to hear that good progress is being made.

As you have already been advised the order was placed some time ago for the pumps and tanks, and I had hoped that they would be delivered in time so that you could install them before the brick walls were built.

I expect to visit Shubenacadie in the early part of September.

Yours very truly,

R.G.Orr.

Sir ÷

Regarding progress on water installation I beg to say that excavation for the pipe has been finished, and the pipe is all installed as far as risers to pumps + tanks, as these have not arrived pipe fitters have gone home and will have to make another trip here, to finish piping in pump house when tanks + pumps arrive.

I have started excavation for foundation of the barn, if you will please return plans + specification of material so that I can get frame stock etc on the job in plenty of time so that there will be no delay.

Shubenacadie Indian Residential School.

Shubenacadie, N.S.

August 23rd. 1929.

Dear Sir:

Beg to inform you that we have made a start on the barn. We expect to have a big crew on Monday next.

Enclosed you will find a quotation from Beatty Bros. for the equipement necessary for this barn. As you have many of the barns at other Indian Schools equiped from Beatty Bros, you will know whether this quotation is a reasonable one. Really the only barn material we have in hand is the hay-fork and a few pulleys and about an hundred feet of rope.

To have the best results much of this material should be put in place during the course of construction of the barn and for that reason I hope you will be able to give this matter you immediate attention.

Yours very truly,

Rev. J. P. MacKay

Mr. J.D. MacLean,
Asst. Deputy & Secretary
Dept. of Indian Affairs
Ottawa.

Please see under

Ottawa, August 29th. 1929.

Reverend Sir,-

Replying to your letter of the 23rd instant with reference to the new barn being built at the Shubenacadie Indian Residential School, you may accept Beatty Bros. quotation for the equipment necessary for this barn. With reference to the plan of the barn, you could obtain another copy of this from Beatty Bros. as the Department wishes to retain the copy sent here for record in this office.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

Sir:-

I return herewith one copy of your labour return for the week ending August 31st in connection with the water supply system at the Shubenacadie Residential school, and beg to call your attention to the payment of $36.75 made to Mr. S. Crowell for hauling bricks with motor truck. Kindly amend the return to show how this amount is arrived at. How long was Mr. Crowell employed at this work, and what was the rate of pay allowed him? This information is necessary to meet the requirements of the Department and the Auditor General.

Labour return for the week ending August 31st in connection with the erection of the barn is also enclosed. The charge of $10.00 by Mr. Crowell for the use of his motor truck should also be amended to show the rate of pay allowed him.

Your obedient servant,

A.F. MacKenzie,
Acting Asst. Deputy and Secretary.

Sept 3rd, 1929.

The Dept. Indian Affairs,
Ottawa, Canada.

Attention J. D. McLean, Esq.
Asst. Depty. & Secty.

Dear Sir:-

Reference to progress on the pipe line for water supply to the Indian College at Shubenacadie, N. S.

I wrote you some ten days since but through an oversight the letter was not mailed during my absence, of upwards of a week, from the Office. The letter referred to was in substance as follows:-

Mr. Crowell has at the time of last inspection had almost completed the laying of the Pipe and had the foundation and floor of the Pump House in, and walls about two feet above the floor.

Some trouble and consequent delay was caused due to the walls of the excavation caving, but this was not of a serious nature and once the pipe was on the ground caused no delay.

I thought it advisable to ask Mr. Crowell to leave the Pipe uncovered for a short time in order that we might note whether there was any tendency to sink or rest unevenly or in such a way as to cause undue strain, owing to soft bottom in sections of the trench.

This will not in any way inconvenience or impede Mr. Crowell as he had intended, (properly I think) to defer covering in the pipe until after the Pump had been installed and the system thoroughly tested.

This should be in about a week or ten days and when done and the Pipe covered I will forward you a Plan showing location and Profile of the pipe line.

I take this opportunity to say that I think Mr. Crowell, appears to be most capable and reliable and is doing the work both efficiently and economically and is taking every care to ensure its being satisfactory in so far as the installation is concerned.

POOR COPY

With reference to the agreement for the Right to cross the lands of Messrs. Snide.

I left copy of the agreement with the Rev. Father Mackie to be submitted to and discussed with the Snide Brothers but woing to their having been busy in connection with Farm work I have only now been informed that the agreement is satisfactorily and will be executed upon payment off the consideration, Viz:-$50.00

Will you forward this amt. to me or to Father Mackie, or remit direct to Messrs. Snide.

I would suggest that as the parties granting the concession on both elderly men it would be advisable to complete the matter with as little delay as possible.

I remain,

Yours very truly,

R.W. McKenzie

RECORDS

Sir:-

I return herewith one copy of your labour return for the week ending August 31st in connection with the water supply system at the Shubenacadie Residential school, and beg to call your attention to the payment of $36.75 made to Mr. S. Crowell for hauling bricks with motor truck. Kindly amend the return to show how this amount is arrived at. How long was Mr. Crowell employed at this work, and what was the rate of pay allowed him? This information is necessary to meet the requirements of the Department and the Auditor General.

Labour return for the week ending August 31st in connection with the erection of the barn is also enclosed. The charge of $10.00 by Mr. Crowell for the use of his motor truck should also be amended to show the rate of pay allowed him.

Your obedient servant,

A.F. MacKenzie,
Acting Asst. Deputy and Secretary.

Sir,

Replying to your telegram of the 19th instant, with reference to payments on your contract at the Shubenacadie School, I beg to advise you that the Architect of the Department has just returned from Nova Scotia, and has reported that the floors in the basement of the Shubenacadie School have not been properly laid, and I would ask you to please advise me what you propose to do to put these floors in proper condition, as called for in the specifications for the building. In the meantime I am returning your deposit security.

Your obedient servant,

J. D. McLean.

Shubenacadie Indian Residential School.

DEPT. OF
SEP 30 1929
RECORDS

Shubenacadie, N.S.

Sept. 26th. 1929.

Dear Sir:

Enclosed please find time sheets for week ending Sept; 2Ist. on Water Installation and Barn. On Water Installation I have made a mistake and issued two checques No. IO. The first was $II3.20 for labor, and the other No. IO was $ 27.6I freight on the pumps.

You will also find enclosed a freight bill for$ 59.36 for ~~gravel~~ tanks. At the time the ~~gravel~~ tanks came there was not sufficient money in the Water Installation account to pay it,so I took it from the School account;but that amount will be placed back in the School account at the time the bank books are balanced ;the end of this month. So the real balance at the end of this month for Water Installation will be $ 655.09 less $ 59.36 -----$ 595.73.

Yours very truly,

Rev. J. P. Mackay

AGREEMENTS ARE CONTINGENT UPON STRIKES, ACCIDENTS, DELAYS OF CARRIERS AND OTHER UNAVOIDABLE REASONS OVER WHICH WE HAVE NO CONTROL.

Dear Sir:

We are in receipt of yours of the 24th.inst. stating you are returning our deposit security,which we presume we will receive in a day or so.

Also note what you say regarding basement floors, Indian School,Shubenacadie. Very sorry indeed that Mr.Orr did not let us know when he expected to be at the building so we could have met him in person and had everything made satisfactory.

We tried to give you a first class floor in the basement and our Superintendent was under the impression that he put the floor in according to specification.

I wish you would let us know just what the Architect wants and if it is embodied in our contract for this building,to do additional work to the floor we will be only too glad to do so,but we are under the impression that we gave you a first class building,and we put in several things not called for,but if there is more work to be done,which our Company is called upon to do we would like to get it cleaned up so as to get the balance due us on this contract.

We will appreciate a letter from Mr. Orr stating just what he expects us to do.

Yours very truly

Dear Sir:

Concerning the enclosed invoices. They include material for the School, pump-house, and barn. Those for the pump-house are marked W.I. (water installation) those for the School are marked S, and those for the Barn are not marked at all. So

Water Installation	$	103.02
Barn	$	172.07
School	$	12.65
	$	287.74

If this is not satisfactory please send them back and I will return them to Dimock& Armstrong and have them made out as they should be.

Yours very truly,

INDIAN EDUCATION

Shubenacadie Indian Residential School.

Shubenacadie, N.S,

October 8th. 1929.

Dear Sir :

In the matter of the boys and girls washing rooms ,where we have two rows of basins ,seven in each, would you consider installing liquid soap apparatus? Since there is no provision for soap basins as they are at the present,and the matter of economy for the future I think it should be a good thing.

For the toilets it will be necessary to have a supply of odorizes?

The agent representing G.H. Wood & Company Ltd. 353 St. Nicholis Street, Montreal. was here last week and gave the following quotation .

The tank, piping, and taps for the battery of basins $ 91.00 each.(possible reduction)

31 odorizes @ .75 each

4 cases of blocks for odorizes 8 in a case, @ $ 12.50 a case

The odorizes at first were $ 1.50 but by the time we got through a considerable reduction was made.

Perhaps if you took the matter up with the firm you could obtain better prices.

Yours very truly,

Rev. J. P. McKay

Rev. Sir,-

Replying to your letter of the 8th instant, with reference to the boys' and girls' wash rooms, I beg to say that if you consider the liquid soap to be the most economical system you may have same installed.

A telegram was sent you yesterday with reference to the agreement for the pipe line through the Snide property and when forwarding the agrement to the Department a voucher should also be submitted in duplicate for the $50.00 paid to Snide for this right of way.

Your obedient servant,

J. D. McLean.
Asst. Deputy & Secretary.

Shubenacadie, N.S.
October I7th. I929.

Dear Sir:

Enclosed please find time sheets for water Installation and Barn, for week ending October I2th.

Will you please let us have more time sheets, we only have six on hand, sufficient for this week.

With the weekly wages running well over the hundred mark and an occasional heavy freight bill a thousand dollars does not seem to go far. Our balance of $ 409.68 will not go much over two weeks, so will you let us have more money by that time.

Yours very truly,

Rev. J. P. MacKay

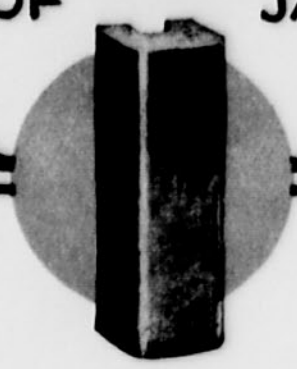
MANUFACTURERS OF LIMITED SANITARY PRODUCTS



353 St. Nicholas Street,
Montreal, Que.
October 18th, 1929.

Deputy Minister,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sirs:-

Captain H.P. Davies also had the pleasure of quoting the Reverend Father MacKay of the Indian School in Shubenacadie, N.S., in connection with the disinfecting and air purifying of the lavatories of this School.

We find that you would require thirty one of our Junior Oval Fixtures, finished in Oxidized Copper. We are pleased to quote you at $1.50 each less 50%, or 75¢ net.

ZEF-IR CEDAR JUNIOR OVAL BLOCS

are without a doubt the finest air purifying medium ever yet devised. They are manufactured from concentrated, highly volatile chemicals and will do their work efficiently and satisfactorily. These Blocs are packed in sets of eight and are priced at $12.50 a set. To refill the thirty one Fixtures you will require four sets containing thirty two Blocs.

Hoping to receive your instructions in this regard we are,

Yours very truly,

Original ZEF

Feat

"ZEF-IR" Blocs are an indispensable adjunct to the ventilating system of any building.

They do not merely overcome one odor with another. They actually correct the condition of the air by breaking up the carbon dioxide (foul gases) into free oxygen again, thus conserving health.

For this reason "ZEF-IR" Blocs are ideally suited for use in industrial plants, office buildings, hospitals, etc., in fact wherever conditions demand continuous purification of the air.

Standard Equipment
in Modern Buildings!

"Zef-ir" Blocs give off invisible vapors which quickly penetrate every corner of the room and so rapidly and pleasingly neutralize all noxious odors.

"Necessary Sanitary Equipment for Every Public Washroom."

"ZEF-IR" Blocs are made in four odors, Cedar, Lilac, Rose and Oriental Bouquet. They are all very effective and pleasant.

There is an element of psychological appeal that is often overlooked in the theatre, exclusive shop, or waiting room. That is the appeal to the sense of smell. "ZEF-IR" caters to that sense—by an indefinable fragrance in the atmosphere, supplying the final touch of distinctiveness.

Please the 5th Sense!
"Purify the Air"

Proprietors of Hotels, Theatres and Public Buildings will instantly appreciate the appeal to the fifth sense of "ZEF-IR" Blocs. They purify the air effectively and pleasantly.

Zef-ir Blocs are guaranteed to *Last!*

Most Unique, Effective and Original Air Sweetener Known— Really Purifies Air

Compact Outfits Last One Year

THERE is real satisfaction in solving your air purifying problem with "ZEF-IR" Blocs. Each outfit contains a wall case and six Blocs, that will last the full period claimed.

"Zef-ir" Crystals

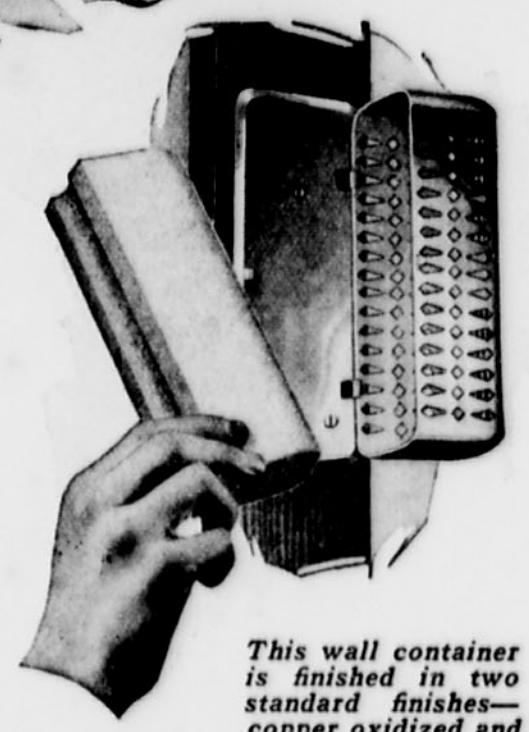
"ZEF-IR" Crystals may be sprinkled in inaccessible corners and apertures. Theatres find them especially helpful in reconditioning the air in auditoriums.

Handy Shaker top Cans

Three standard odors, Lilac, Rose and Oriental Bouquet

"Zef-ir" Blockettes

"ZEF-IR" Blockettes or urinal cakes are indispensable for keeping toilets sanitary and free from offensive odors. They are purposely made insoluble in water so that the constant flow of water against them will not dissolve the Blockettes.



This wall container is finished in two standard finishes— copper oxidized and nickel.

Neat Wall Cases

OUR new Aristocrat Wall Case is very attractive.

As the illustration at the left shows, the front of the case is hinged and swings to one side when the Bloc is being placed in the case. A perfected locking arrangement then holds the case firmly closed and prevents tampering.

Cedar Moth Blocs

"ZEF-IR" Cedar Moth Blocs have certain characteristics which makes them highly effective against moths. Cedar has long been known as a moth repellent in itself, and combined with other effective ingredients — our Cedar Moth Blocs, positively destroys moths and their larvae.

The gases they liberate are five times heavier than air and penetrate to the most remote part of piled or stored textiles.

The Blocs do not impart any odors that cling to the goods.

LIMITED

OWNING AND OPERATING

LIQUID SOAP
AND
SANITARY PRODUCTS
COMPANY

DEPT. OF INDIAN AFFAIRS
OCT 30 1929
RECEIVED

353 St. Nicholas Street,
Montreal, Que.
October 18th, 1929.

Deputy Minister,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

Our representative, Captain H.P. Davies, had the pleasure of interviewing the Reverend Father MacKay at the Indian School of Shubenacadie, N.S., in connection with the proposed installation of

LIQUID SOAP EQUIPMENT

in the lavatories of that school.

We find that this school is equipped with two lavatories each having fourteen wash basins. The complete cost of Liquid Soap Valves, Tanks, etc., to be supplied with this installation would be $185.00. This is a very close figure and we sincerely hope we will receive your order covering this service.

Lik-wiD Brand Liquid Toilet Soap can be supplied at the price of $1.50 per gallon in drum lots of fifty gallons, f.o.b. Montreal.

Liquid Soap is, without a doubt, the finest service ever devised for the prevention of the spread of contagious diseases. It will also serve to keep your lavatories clean and orderly and is without a doubt, much more economical than the ordinary common bar of soap.

Yours very truly,

G. H. WOOD & COMPANY LIMITED

Gentlemen:

I have your letter of the 18th instant, with reference to the proposed installation of liquid soap and disinfecting equipment in the lavatories of the Shubenacadie Indian Residential School. I may say that this has been left with Rev. Father Mackey. If he considers this necessary, he will correspond with you.

Your obedient servant,

J. D. McLEAN

J. D. McLean,
Asst. Deputy & Secretary.

Ottawa, October 23, 1929.

Reverend Sir:

With further reference to your letter of the 8th instant and to my reply of the 16th, concerning liquid soap and disinfecting equipment for the lavatories of the Shubenacadie Indian Residential School, I have to inform you that G. H. Wood & Company have written the Department direct. I have referred them back to you. If you are considering the installation of this equipment, I believe you should have their quotation, as forwarded to the Department. They have quoted on liquid soap valves, tanks, etc., installed on all wash basins, for $185, and 75¢ net on the junior oval fixture, finished in oxidized copper. The soap itself and the deodorant, on which they quote $1.50 per gallon and $12.50 per set of 8, respectively, will have to be purchased from school funds, as they are considered current expenses. This is all provided you are satisfied that this installation is advisable.

Your obedient servant,

J. D. McLEAN

Reverend Sir:

I have your letter of the 17th instant, enclosing time sheets in connection with the water installation and the barn at the Shubenacadie Indian Residential School. Labour return forms have been directed to you, under separate cover. There is also going forward an accountable cheque for $1,000, with which to pay labour in these connections and also for the shelving, lockers, etc.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

November 4, 1929.

Memorandum:

ACCOUNTANT.

I have compared the Beatty Brothers account with their quotation of April 30th, last. I find that it is correct and have therefore initialled it for payment. The quotation read $1471.52. There was an extra stall supplied, at a cost of $11.25, less 15% discount, or net $9.56. There was also an extra foot Bull pen Siding at $4.80, less 10%, or net $4.32. The total extras with discounts amount to $13.88, or a total of ~~$1485.40~~ 1482.60, which is the amount of the account.

This agreement made and entered into this 22nd day of ~~July~~ October in the year 1929 between Daniel Snide and Alexander Snide of Shubenacadie in the County of Hants and Province of Nova Scotia, Farmers, and joint owners and occupants of the Farm and Lands commonly known as the Snide Farm, and hereinafter called Snide Brothers, of the one part, and the Department of Indian Affairs of the Government of the Dominion of Canada hereinafter called the Department of Indian Affairs of the other part,

Witnesseth:- that for and in consideration of the sum of fifty Dollars paid by the said Department of Indian Affairs to the said Snide Brothers, the receipt of which is hereby acknowledged, and other consideration hereinafter referred to, the said Snide Brothers have agreed to and do hereby grant to the said Department of Indian Affairs the right and privilege of constructing and maintaining a pipe line, for the purpose of supplying water to the Indian College, across the lands of the said Snide Brothers from"Snide's Lake" so called, to the boundary of the said lands on and along the line of the present excavation for a width of five feet measured each direction from the center of the said Pipe line and to extend into or under the waters of the said Lake to such a distance as shall be considered necessary or required for the purpose of obtaining a suitable or sufficient supply of water.

Together with the right to the said Department of Indian Affairs their Servants, Agents, Tennants, or successors in title to enter upon and cross over the said lands for the purpose of constructing, repairing, maintaining or renewing or inspecting the said Pipe line as may be required, and to re-open or uncover the said Pipe line and in connection therewith to make such further excavation or openings as may be required, upon and subject to the condition that all such openings or excavation shall be filled in as soon as reasonably possible and the damage if any done to Grain, Hay, or other crops on the said lands due to or as the result of such use of the said lands shall be paid for by the said Department of Indian Affairs, the amount to be as agreed upon between the said Snide Brothers and the said Department of Indian Affairs or their agents or representatives and in the event of failure of the said parties to agree upon the amount of such damage the decision shall be left to three Arbitrators one of whom shall be chosen by the said Snide Brothers, one by the said Department of Indian Affairs, and the third by the two first chosen and the decision so arrived at shall be final.

In witness whereof the parties to this agreement have hereunto their Hands and Seals set and affixed this day and year first above written.

Nov. 19, 1929.

Sirs,-

Replying to your letter of the 31st ultimo with further reference to the balance due on your contract you are no doubt aware that the floors in the basement are not up to the standard of the workmanship shown in the rest of the building. It appears that these floors have been improperly laid and it is felt that if the workmen entrusted with this work had taken more time the result would not have been so unsatisfactory. If the floors had been laid in accordance with the specifications the result would have been a hard smooth surface and I am sure you will agree if you examine these floors that such is not the case. In the meantime I am instructing Mr. Crowell to issue a further certificate and suggesting that he hold back a thousand dollars until the floors have been put in proper shape.

Your obedient servant,

A. F. MacKenzie.
Acting, Assistant Deputy and Secretary.

Sir,-

The Rhodes Curry Co. have written recently asking for the final payment on their contract. For your information I am enclosing herewith a copy of a letter which is today being addressed to them, and I would suggest that you issue a further certificate on their contract retaining $1,000 as suggested in the enclosed letter.

Your obedient servant,

A. F. MacKenzie.
Acting, Assistant Deputy and Secretary.

DEPT. OF INDIAN AFFAIRS
NOV 20 1929
RECORDS

Dear Sir:

We wrote you on September 27th., also on October 31st. re balance due us on Indian School, Shubenacadie. To date we have not received any reply. We would very much appreciate an answer to our correspondence, also a cheque for amount due us.

You will note in our letter of September 27th. we asked a question re basement floor. As we have already stated, we feel that we have fulfilled the specification to the letter. We would like to know what you expect us to do to make the floor satisfactory.

It is very important that we get the balance due us on above work as we need it to finance our business.

An early reply will greatly oblige.

Yours very truly

A. S. Curry

Indian Residential School.

Shubenacadie, N.S.

November 15th. 1929.

Dear Sir:

After paying the wages of the men for the week ending Nov.9th. the balance in the bank for the Barn and interior fittings is $ 383.87, sufficient for about two weeks, so at the end of that time will you please send more money.

The Barn should be finnished in four weeks at the outside and then we hope to move a bit faster with the work in the school.

It has been well nigh impossible to get carpenters to come here, that accounts for the few we have.

Have been making inqiuries about cows and I believe it is a hopeless proposition to buy any kind of a decent cow at a reasonable price. The prices in the locality are more extreme than they were a year ago. Could you purchase them through the Dept. of Agriculture and ship them down here?

Yours very truly,

Rev. J. P. Mackay

Rev. Sir,-

With reference to the account submitted recently in favour of Power Bros. Limited amounting to $1,027.16, I beg to say that a cheque is being forwarded to them for this amount less $77.80, which covers two items, one for express and freight - $45.80, and one for board expenses, - $32.00. This balance will be paid if you obtain from Power Bros. and forward to the Department receipts for the express and freight also receipts for the board expenses.

A further advance of $500.00 is being sent you for the payment of labour.

Your obedient servant,

A. F. MacKenzie.
Acting, Assistant Deputy & Secretary.

Indian Residential School.

Shubenacadie, N.S.

Dec. 2nd. 1929.

Dear Sir:

Enclosed please find time sheets for week ending Nov. 23rd. amounting to $ 269.80. The checque for that amount usually would be issued on the following tuesday, Nov. 26th. But at that time we only had a balance of $ 158.80. So I used my personal account in order to pay the men. I received your checque for $ 500.00 this morning. After depositing the $ 500.00 and issuing a checque for $ 269.80 the balance is as shewn on the time sheet, viz. $ 388.00. Enclosed also is freight bill for $ 1.16.

For the week ending Nov. 30th. the time sheets call for $ 234.60 which will be paid to the men tomorrow. A freight bill of $ 4.12 for material for clothes closets etc. will only leave a balance of $ 148.12. which will not be sufficient to pay the men for this week.

The end of this week will practically see the Barn finnished, but there remains considerable work in the school. So will you please let me have some more money.

Yours very truly,

Rev. J. P. Mackey

Shubenacadie, N.S.

December IIth. 1929.

Dear Sir:

Enclosed please find time sheets for Water Installation, for week ending December 7th.

As I stated last week we have not sufficient money to pay for the work on the Barn. The balance in the bank is $ 149.28 The time sheets this past week call for $ 161.70. So I again paid the men from my personal account. So please let us have more money. otherwise it is the poor-house or jail for

Yours truly,

Rev. J. J. McAcheren

Re: Gravel Supplied to Indian School
- at Shubenacadie, N.S.

Dear Sirs:

At the instance of Rev. Father MacKay, the Department of Highways of Nova Scotia, supplied seven carloads of crushed gravel, from their crushing plant at Debert, Colchester County. This gravel was used in connection with fixing up the road, leading to, and around the school.

Father MacKay promised that he would arrange through your Department to pay for these carloads.

We attach, hereto, bill, amounting to $418.80, covering our cost of the gravel at the plant, plus freight charges from Debert to Shubenacadie.

Kindly let us have your cheque at the earliest possible date, as we wish to include this amount in the accounts of our year. We would be very glad if you would have cheque reach us before the 15th instant.

Yours truly,

R Watt

Chief Accountant

Indian Residential School.

Shubenacadie, N.S.

January 4th. I930.

Dear Sir:

Enclosed please find duplicate copies of invoices for gravel from the Dept. of Highways , N.S.

In the first place I beg to inform you that they bill for seven cars whereas nine car-loads were used. The first five car-loads were looked after by the Dept. of Highways as to unloading ,spreading etc. Those five car-loads took them up near the school,and that was as far as they were prepared to go. The other four car-loads were looked after by us. The freight was prepaid,and for a time I had the freight receipts but the Dept; of Highways asked for them so I sent them on. I kept a copy and the four first mentioned on their list are the ones I looked after, the freight charges on them are correct.

From the appearance of things I think that the Dept; of Highways will take it upon themselves to look after the labor in connection with the unloading etc. for Mr.Black, Minister of Highways gave me to understand that the work on the road proper would be done on that basis.

Yours very truly,

Rev. J. O'Mackey

Ottawa, January 17th, 1930.

Sir:-

Your voucher for $170.00 in favour of Mr. J.W. Crowell for the month of December has been received at the Department. This voucher is made up as follows:-

25 days @ $6.00 per day	$150.00
To cash paid for board as per receipt	20.00
	$170.00

The payment of $20.00 for board during the month of December would give the impression that Mr. Crowell was only twenty days at Shubenacadie, and when you take Sundays into consideration, it is not understood how he is entitled to twenty-five days' pay. Payment of the voucher is withheld pending your report.

Your obedient servant,

A.F. MacKenzie,
Acting Asst. Deputy and Secretary.

D.B. Lawlor, Esq.,

RECORDS

Mr. J. D. McLean,
Assistant Deputy and Secretary,
Department of Indian Affairs,
Ottawa, Ontario.

Dear Sir:

Rhodes, Curry Limited, Contractors of this Town, who built the new school for the Indians at Shubenacadie, have consulted me in reference to an amount of $1,000 which is being withheld from them on account of an adverse report that has been filed with the Department by J. W. Crowell, the Inspector appointed, I presume, by the Government to inspect this particular work.

A perusal of the correspondence would indicate that the floors in the basement and some other parts of the building were not in the condition called for by the Specifications. At first I was inclined to believe there was some faulty construction but on going into the matter fully with the Contractors I find the complaint of Mr. Crowell is that the surface of these floors was not waxed. I quote from the Specifications as follows:

"Finish of Concrete Floors - All concrete floors in basement and bathrooms and toilets on all other floors shall be finished with a topping of colormix in accordance with the specifications of the Master Builders Company or approved equal. The floors when finished shall be absolutely dust proof and water proof and trowelled to a hard smooth surface. The fllors shall be finished in red and to the thickness of ¾"."

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 2).

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

I respectfully call your attention to the fact that under the Master Builders Company if the floors constructed as set out in the above Specifications are to be waxed, that is to be so specified by the architect. No such specification is to be found, and if that is the only complaint of Mr. Crowell and it is not a part of the contract I do not see how the Department is justified in withholding the money.

This would be an extra in my opinion. If the Department wished the floors waxed it would cost in the vicinity of $1,200.

If there is any doubt about this contention I wish you would look into it and advise me as to the attitude of the Department.

Thanking you in anticipation, I am,

Yours very truly,

JAH/AT.

Sir,-

Replying to your letter of the 17th instant, with reference to the balance due Rhodes Curry Co. on their contract for the Shubenacadie School, I beg to say that the Department is not insisting on the floors being waxed but expects the contractors to put these floors in a proper condition, as called for by the specifications. The specifications stipulate that the floors are to be trowelled to a hard, smooth surface. This has not been done, and if you will examine these floors you will find that they have either been laid by inexperienced workmen or sufficient time was not taken to peoperly trowel the surface. Some time ago the Rhodes Curry Co. were advised that the Department expected them to put these floors in a proper condition.

Your obedient servant,

A. F. MacKenzie.

Deaf Father Mackey,-

I am returning herewith two accounts which were submitted by you sometime ago. You neglected to sign them and also if you will notice the total amount does not appear to be correct, also the allowance for 500 lineal feet of spruce hook strip as the charge above in the account is $17.50. Please have these corrected and return them signed.

Yours very truly,

R. GURNEY ORR.

Architect for the Department.

Shubenacadie Feb. 24th/30

Sir÷

Replying to your letter of the 18th with regard to the work at the school that is being carried on by day labor, I beg to say that the following work has been completed:

Installation of water from lake to the school & barn.
Pump house has been built, pressure tanks & pumps installed, and the entire system is now giving good service.
Barn has been completed including installation of water, lighting & drain from root cellar.
We have built wardrobes in the dormitories with accommodation for 56 pupils. 2 large dish cupboards for the dining room & one each for sisters dining room, kitchen & mens dining room.
20 tables, linoleum covered tops for the dining rooms, and 30 benches. A large table for the sisters dining room. 2 large tables for the reading room
1 large table for the sisters community room.
Stationery Cabinet for school supplies
Shelving in the store-room & laundry
A Cabinet for bread, a large zinc covered table for the kitchen & small one for the bakery.
We have also installed the Altar Railing. Pews for the chapel, sewing room tables & counter. It will take about 6 weeks to finish this work

Feb. 27th. 1930.

Dear Mr. Orr:

No doubt you are aware that Mr. Crowell has a letter from the Secretary thathis time as Inspector of work here expires the last of this month. You are the only one who knows the arrangements made when you were here last September. His letter will explain just what has been done and what work remains to be done on the interior of the building. I need not tell you that he has been working right along and at the same time figuring out the plans you left with us ,giving me the amount and the kind of material most suitable to the work. Of course there were times when I thought that the work was not knewi going fast enough,but I honestly think that we can shew value for the money expended. If you do not feel that you would like to have his time extended again then I suppose I can keep him on the pay-roll here.We reallyneed a small combination ice and milk house,an implement shed ,hen-house,and a place for pigs,and a root cellar as the one in the building is not at all satisfactory.I would like to have Crowell till those things are finished,although it looks queer to have a foreman for two men,but as was understood when you were here he is a working foreman.

Hoping that you will drop me a line sone and let me know what you think is the best solution.

With kind regards to yourself and Mrs. Orr.

Dear Father Mackey,-

Replying to your letter of the 27th inst. with reference to the further employment of Mr. Crowell and the erection of outbuildings mentioned in your letter, I would say that at the present time the funds are almost completely exhausted and I would ask you, therefore, to submit an estimate of the cost of each of the buildings you recommend as being required, also please indicate the type and size of each building which you propose to erect. When this information has been received instructions will be sent you.

I would like to see Mr. Crowell's report on the work to date as early as possible.

Yours very truly,

R. GURNEY ORR.
Architect for the Department.

EXTRACT FROM LETTER OF REV. J. P. MACKEY, PRINCIPAL, SHUBENACADIE INDIAN RESIDENTIAL SCHOOL, DATED FEBRUARY 21st, 1930.

DEPT. OF INDIAN AFFAIRS
FEB 27 1930
RECORDS

- - - - - - - - - - - - - - -

Original on 51-0-10.

I beg to let you know about what work remains to be done in the school. In the two dormitories in the wings we have yet to build 16 lockers of four sections each, 8 in each dormitory, allowing for the accommodation of thirty-two pupils in each. Also shelving in the linen store room and a cabinet of small size in the pharmacy room. Doors and windows will have to have some attention as they are not working as they should. Between the window sills and the granite is the place where the rain seems to be getting in and in order to save the plaster it will be necessary to have that matter attended to. While we are taking a long time to do these things, nevertheless we are doing the best we can.

March 3rd. I930.

Dear Sir:

Concerning the enclosed accounts. Whem we received the bills the prices seemed to be rather high, so they allowed $ 2.50 on the hook-strip, but they did not really deduct it, so I did it myself, and for good measure took another hundred off.

On the other account an allowance of $ 48.00 because we were going to ship them back if they did not make that allowance for what we considered poor workmanship.

I have signed my name to them and trust they will go through.

Yours very truly,

Rev. J. P. McKay

March 14, 1930.

Rev. Sir,-

With reference to the cupboards, etc. which are still to be completed in the Shubenacadie School, it is desired that Mr. Fred Robinson of Shubenacadie be employed to complete this work.

As already advised Mr. Crowell's certificate expired on the 28th day of February, and it will be, therefore, impossible to employ him further on this work. I would ask you to convey to Mr. Crowell the thanks of the Department for the very efficient way he has carried out his duties as Inspector of Construction.

In order to pay Mr. Crowell for his services in March you might include his name on your pay list as foreman.

As already advised when you submit details of the additional outbuildings required instructions will be sent you regarding the building of same.

Your obedient servant,

A. F. MacKenzie.

Re Indian College Water Supply.
Shubenacadie, Nova Scotia.

Dear Sir:-

I enclose herewith account covering services during the past summer in connection with location and Inspection of Water Supply Pipe, and Pumping Station for the Indian College at Shubenacadie, Nova Scotia.

You will note that the Inspections were not at regular intervals as it was found necessary under the conditions existing to time my visits according to the progress of the work and the state of the weather, which was unusually dry when the excavation was made thus rendering it possible to cut to perpendicular walls.

Before the pipe was in place heavy Rains had fallen causing the Banks of the cut to cave in and choking the outlet from the swamp and affecting the character of the bottom on which the pipe rests, and (possibly) the grade in /places/ sufficiently to cause under strain in the joints.

I had intended furnishing you with a plan showing the location of the line as finally located and a Profile, but as this will call for an additional three or four days work and you may not consider it necessary I have decided not to prepare either unless instructed to do so.

May I ask you to let me have a cheque for the amount of the account as soon as may be convenient and oblige me very much.

I remain,

Yours very truly,

R. W. McKenzie

Ottawa, March 15th, 1930.

Reverend Sir:-

The labour return of $45.60, which you submitted for the week ended February 15th shows a balance of $131.14. Your previous return for the week ended February 8th showed a balance of $187.54.

The return of $45.60 had an express receipt for 80¢ attached which would make a total of $46.40. This would leave a balance of $141.14 on hand instead of $131.14. You can combine with this, the balance of $124.23 you showed one hand as per your return for the week ended Dec. 14th, 1929, "water installation". Any unexpended balance on March 31st should be refunded to the Department.

Yours truly,

F.H. Paget.

DEP... INDIAN AFFAIRS
MAR 24 1930
RECORDS

Dear Sir:

In reply to your letter of March 15th, inst. Beg to inform you that I have transferred $ 124.21 from the Water Installationaccount to the Barn & Interior Fittings account, and closed out the Water account at the Bank.

Concerning the Barn & Interior Fittings, total received from the Department was $ 4500.00, plus $ 124.21 from the Water account. This will all be expended by tomorrowand there will be $ 54.36 due to J.W. Crowell, since I was to pay him from this account from the first of March. to 21st inclusive. 18 working days at $6.00 = $108.00

In the School account, at the present moment there is something over an hundred dollars in the Bank, but outstanding bills are well over the thousand mark. So I will issue a check for the full amount in the Bank in part payment forone of the many outstanding accounts. So the end of March will shew no cash on hand. Will send you a statement in a day or so covering Dec. Jan. Feb. and March.

I suppose it will be alright to pay J.W. Crowell when I receive a grant for the remainder of the work sometime in April.

Yours very truly,

Rev. J. P. MacKay

RECORDS

Indian Residential School.

Shubenacadie, N.S.

March 24th. 1930.

No. 510--15

Dear Sir:

With regard to your letter of March 14th, inst. beg to inform you that we kept Crowell and Stevens on till they had finnished up the work they had underway. This work was as time sheets will show, was finnished on friday the 21st. inst.

The remainder of the interior work only includes the shel--ving of the linen room and one of the store rooms on the third floor, also the stand for rubbers etc just inside the recreation rooms, and a few odds and ends. But as there is no money in the bank for this work I think that you would advise not doing any work till after the first of April. So I will make arrangements with Mr. Robinson to make a start about that date. I hope his work will be as satisfactory as that done by Crowell and Stevens but I am afraid.

In the meantime I hope that you will send me money about the first of the month to pay for this work.

Yours very truly,

Rev. J. P. McKay

Mr. A. F. Mackenzie,
Acting Asst. Deputy & Secretary

Re Indian College.
Shubenacadie, N.S.

Dear Sir,

May I ask that, if convenient, the cheque for acct. in above matter rendered about March 1st, be arranged for so that I may receive it as nearly on or about the 10th inst. as possible.

I have some obligations to meet on and near that date.

I remain,

Yours very truly,

R W McKenzie

Gentlemen:

ALL ORDERS ARE ACCEPTED AND CONTRACTS MADE SUBJECT TO DELAYS RESULTING FROM FIRES, STRIKES AND OTHER CAUSES BEYOND OUR CONTROL. WE RESERVE THE RIGHT TO CORRECT STENOGRAPHIC ERRORS

We enclose statement of account for stock supplied to the Indian Residential School at Shubenacadie, N. S.

You will notice that the first two invoices on this statement are December of last year and are now three months old. These invoices were O. K'd. by the management of the School.

Kindly let us know when we may expect a check to cover this amount.

Yours truly,

March 26th. 1930.

Dear Sir:

Concerning the enclosed bills of Arthur & Conn, as you will note I have held them here for a month, waiting for them to send itemized accounts for their freight and board expenses etc.

I objected to the items of repair on Feb 1st. and Feb. 12th. on the grounds that if the job were done as it should have been there would be no call for repairs so soon.

Perhaps if he received their money for the material and the labor then they would realize the situation and produce the itemized accounts of what remains.

While I am signing these in the usual way I know that you will understand that I do not recommend full payment.

Yours very truly,

Mr. A.F. MacKenzie,
Acting Asst. Deputy & Secretary

March 28th. 1930.

Dear Sir:'

It is not safe for me to go to the kitchen today, a mad cook is not a pleasant animal. Rice pudding and apple pies in the oven for three hours and not cooked is to say the least a bit provoking.

The kitchen range is a McLary and I don't think the trouble is there. With the wind in a certain direction the stove ~~will~~ has no draught. The only solution is to build the chimney five to ten feet higher. If you ever had trouble of this kind in your home you will realize that the sooner the difficulty is adjusted the better for all concerned. There has been complaints from that quarter for some time, today was the limit.

Will you please let me know if I may go ahead and have the work done.

Yours very truly,

J. P. Mackey

MAR 29 1930
BRANCH

Dear Sir:

Concerning the outbuildings which we think are needed;-

Hen House

Enclosed faded plan. We would like to add ten feet in order that we might have space for feed-room.

SCHOOLS BRANCH
APR 1 1930

Dairy

A dairy house to suit twenty-five cows, with acc accomodations for cleaning milk cans. Under the same roof we would have the ice house. From what they have at the other schools you will know better than I could tell you what is really required.

Implement Shed.

About eighty feet long by twenty five feet, which would allow for work shop and blacksmith shop at one end. Where machinery which would not be used during the winter is stored we would propose hinged doors, otherwise doors on rollers. A goo d deal of the lumber could be had from the old barn, which I think is to be torn down, As for the roof we would like high enough to give us space to store in winter the screens and in summer the double windows. We have not space to store these things in the school.

Root Cellar

Taking down the old farm house we thought that the cellar could be converted into a root-cellar without any great expense. A coating of cement on the inside of the stone wall and raising the foundation a foot or two above ground, a cement floorwith a drain of tile pipe. The pr present drain has been blocked up for some time. A double roof with straw or shavings in between would we think give us something as near frost proof as anthing we can think of.

Store house

We hope that tha day is not far distant when we will buy our flour and feed by the carload. So we think that there should be a building about the size and form of a box-car built in order that we would have a place to store flour and feed.

As to the cost of these buildings frankly I don3t know and with Crowell gone I have no one that I could ask with any confidence.

Pig house

Something for about twenty-five hogs, about fifty feet by twenty-five alley way down centre and pens oneither side, also space at one end for a slaughter house. I should not mention the enclosed sketch but it is to try and give you an idea of about where we think the buildings should be placed.

Ottawa, April 1, 1930.

Reverend Sir:

I have your letter of the 24th ultimo, with reference to outbuildings at the Shubenacadie Indian Residential School. I note that a henhouse, a dairy, a utility building (implement shed, workshops and store room), a root cellar, a storehouse and a hogpen are required. Only limited funds are available for improvements at your school this year, and I should be glad if you would list these in order of their urgency, so that the Department can make a decision as to what shall be done this summer.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy & Secretary.

Shubenacadie, N.S.

No. 51-0-5

April 11th. 1930.

SCHOOLS BRANCH
APR 15

Dear Sir:

With reference to your letter of April 1st. inst. The building we need most is the Root Cellar, as we have had considerable loss in potatoes and carrotes this year. Secondly the Implement shed. At the present time we have a certain amount of feed which could be used for hogs, and at the same time it would be very convenient to have a dairy. So I cannot say which is more urgent. As regards the Store house, I suppose we could continue buying flour and cow feed in small quantities. We would like to give the children, at least the ones who are not strong, eggs and milk, but if the hen house cannot be built this year, then we can only do the best that we can.

Yours very truly,

A.F. MacKenzie,
Acting Asst. Deputy & Secretary
Dept. of Indian Affairs, Ottawa.

Rev. Sir,-

Referring to your letter of the 11th instant, with further reference to the outbuildings at the Shubenacadie School, will you please advise me the approximate size of the root cellar contemplated, also the type of construction and the location where you would suggest this root cellar should be built. Please advise also the approximate size of the implement shed required.

Your obedient servant,

A. F. MacKenzie.
Acting, Asst. Deputy & Secretary.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

May 5th, 1930.

MEMORANDUM: Mr. Ferrier.

Re:- Shubenacadie Residential School.

MAIN BUILDING:

Father Mackey reports that, with a driving rain storm, there is a considerable leakage of water on every floor on the front of the building. This damages the plaster on all the floors and seeps through to the basement. The sub-contractor on the roof (James Donohough of Halifax) examined the roof and it was decided that it was not the fault of the roof. Father Mackey further states that he has heard of similar complaints at other buildings throughout the Province where "blue-nose" brick was used.

BARN:

Father Mackey stated that practically all the barns in Nova Scotia have lightning rods. He wished this matter to be brought to your attention and, if the Department considers this equipment necessary on the barn at the Shubenacadie School, Father Mackey has secured a quotation from Ettinger Bros. of $126.40 for the complete installation.

PUMP AND PUMP HOUSE:

The pump is not working properly and Mr. McKenzie, who surveyed the place, intends to visit Shubenacadie about May 5th and give Father Mackey some information regarding it. Following Mr. McKenzie's visit, Father Mackey will write the Department and I considered that, on receipt of this letter, it might be advisable to write the makers of the pump, viz., Canadian Fairbanks-Morse Co., who might be able to give some expert advice regarding its operation. The local agent of the Canadian Fairbanks-Morse Co. was unable to advise Father Mackey exactly what action to take to remedy the difficulty.

BASEMENT FLOOR IN MAIN BUILDING:

Father Mackey states that this floor still requires some attention. He further stated that he understood that a certain amount had been withheld from the contractor with a view to having this condition of the floor remedied. If so, the contractor has not yet taken any action.

Ottawa, May 7, 1930.

Reverend Sir:

Mr. Phelan's report concerning the Shubenacadie Indian Residential School is now on file, and I wish to refer to one or two questions arising therefrom. The Department Architect, on receipt of a letter from you, concerning the pump, will discuss the question with a representative of the Canadian Fairbanks-Morse Company. Mr. Orr has given considerable thought to the basement floor and has done and is doing everything possible to have the contractor remedy the condition. It is not the policy of the Department to install lightning rods on the barns at Indian residential schools. The report concerning water coming in at the front of the building during a driving rain has been noted.

R.A.H.
W.M.

Your obedient servant,

A. F. MacKenzie.

Letter of April 24/30 Mr K

51-0-5 This letter may be considered Father Mackey's reply & off. letter of Apr 24/30 RP

Implement Shed,-(west side of barn,) including blacksmith shop and repair shed.

95 'long by 25 ' wide by 15 ' high.

concrete butments and cement floor in blacks,ith shop,-(15 x 25)

Robinson quotes price of $1135.00

Root cellar,- on side of hill facing river.

36 by 23 with clearance of 8 feet,-

3 walls cement.

Top,- reinforced concrete.
Front(exposed wall) with interlocking tile inside cement.

Robinson quotes,-.....$935.00

Under old house there is a cellar,-

Length inside,-23 feet.
Width " ,-22 "
Height " ,- 6 "

Thickness of wall(course rock).....20 "

Father Mackey thinks this much cheaper. RPB

---

4 buildings to be torn down,-old house, old barn, old implement shed and old ice house.

Father Mackey stated school staff could pull these down but owing to present rush of spring work would not be able to handle until fall. As an alternative,- Father Mackey could easily get someone to pull them down for the lumber but in this event it would be necessary to secure a deposit of $25 from party undertaking work to ensure buildings being demolished to satisfaction of Principal.

This seems best RPB.

Attention Mr. Orr

ACCOUNTANTS
MAY 27
REGISTRY

Dear Sir:

Practically for the past month I have been waiting for infor--mation from Mr. MacKenzie, Surveyor of lands, for the exact dist-ance from the lake to the pump-house, and the rise from the lake to that point. If I had that information then I intended writing Fairbanks- Morse , giving them whatever other details I could give and asking for a solution why the bigger pump is not working as it should. We have already burned out one set of brushes, made a test without the load, read what instructions were given, came to the conclusion that either there was not enough electric current or the pump was over loaded. Had the current tested a few days ago and we are certainly getting 220 volts. So my humble opinion is that the five horse power for the 5000 gallion under the pull that it has here is not enough. The smaller pump of three horse power and 2500 capacity works well.

If you have the information that I have been looking for I wish you would take the matter up with Fairbanks - Morse.

Yours very truly,

Rev. J. O'Mackay

June 18, 1930.

Sir,-

As advised today by telegram you should arrange immediately for the building by day labour of an implement shed, including blacksmith shop and repair shed, the building to be approximately 95 feet long, 25 feet wide. It is noted that the cost will be approximately $1,200.

You may also proceed with the building of a root cellar, and it is thought that the most economical way of providing this accommodation is to utilize the cellar under the old house.

The buildings which are to be demolished should be torn down before the work is commenced on the implement shed and root cellar, in order to use any of the materials that may be worked into the new buildings.

Mr. Fred Robinson of Shubenacadie may be employed as working foreman for this work, and you should arrange with him for the employment of whatever labour is required. Time sheets should be forwarded to the Department in duplicate in the regular way, also all accounts for materials should be forwarded in duplicate certified to by you. An accountable cheque for the payment of labour on this work will be sent you on application.

Your obedient servant,

A. F. MacKenzie.

Dear Sir:

Refering to your telegram of yesterday concerning the root-cellar and the implement shed. I got in touch with Fred Robinson and the work will start today.

There is a balance of $ 147.00 from the work on the interior of the School and I suppose that this will be used for this work. In a great part the lumber for the implement shed can be obtained by taking down the old barn. This we intend doing after the root-cellar is under way, unless you order otherwise.

AGREEMENTS ARE CONTINGENT UPON STRIKES, ACCIDENTS, DELAYS OF CARRIERS AND OTHER UNAVOIDABLE REASONS OVER WHICH WE HAVE NO CONTROL.

Dear Mr. Orr:

I have visited the School Building at Shubenacadie. I took Mr. Dunne, our Superintendent along with me, and examined the floors thoroughly. I must say I was very much surprised that fault could be found with floors such as we put in that building.

Father MacKey pointed out the bad places - there was only one - about four feet square in the Girls Play Room and one about the same size in the Dining Room.

The steps have been worn some, mostly on account of the children's boots. I noticed in the Boys section of the building, even the steel nosings have been worn.

It is almost impossible to keep any kind of a concrete floor in shape without some treatment. I would advise you to authorize putting on two coats of Hippo oil. I do not know of anything better for floors. We would be willing to rub down the rough places with fine carborundum and would do anything in reason to assist, but must say in all the buildings I have been in for the last year or so, I have not seen a better concrete floor than what we have put in that building.

I do not think it fair to hold up $1000.00 of our money for a small item like that, and I trust you will see your way clear to authorize the payment of the balance due us. I assure you we would appreciate receiving this payment, very much.

Yours very truly

RECORDS

Dear Sir:

In reply to your letter of the I0th. inst, concerning the visit of Mr. Curry there and here. He and Mr. Dunn the Supt. of construction for this building, were here. With one or two rough spots they thought that we have a very good job on the floors. The steps of the stairway they admitted have not stood up as they should. The leaks in the front of the building to a certain extent are caused by the brick, but also possibly some of the water is coming in under the window sill. They said they would go over the windows with a cemment puddy,or some like substance. They strongly recommended at least two or better three coats of Hippo oil for the floors. From other sources I have had the same recommendation.

You said that you were enclosing a copy of Mr. Curry's letter but it was not there.

Yours very truly,

Rev. J. P. Mackey

RECORDS

Shubenacadie, N.S.

August 9th. 1930.

Root-cellar & Implement Shed

Dear Sir:

Enclosed please find time sheets for the week ending August 2nd. When I paid the men last Monday I had not sufficient funds, and this morning I paid Fred Robinson his thirty-six dollars by check. I received the check for three hundred last evening. This being the end of the week the wages due ,which will be paid monday the IIth. amounts to $ I70.40. leaving a balance of about $ I00.00.

There are only seven men working now, foremen, two carpenters, and four laborers. These laborers are doing rough carpenter work at the rate of forty cents an hour. During the election campaign and the uncertainity that has come as a result of the change you will readilly understand that it has not been to the benefit of the work in hand. Since the telegram the other day I think that things are moving along a little better.

DEPT. OF INDIAN AFFAIRS
AUG 27 1930
RECORDS

Indian Residential School.

Shubenacadie, N.S.
August 25th. 1930.

Dear Sir:

Enclosed please find time sheets for the week ending August 23rd. Note that balance is $ 86.37

As intimated in a previous letter I am not satisfied that the work has been going on as it should, especially for the last month. The foreman himself says that they will be through on the 28th. inst. He does not mean by that that the work will be complet-ed. But that the workers of the party in power will take over the work. I had a note from Mr. Foster some time ago saying that he had recommended another foreman. Mr. Foster is thedefeated candidate in this constituency.

The money I have on hand will pay for three days this week, and I propose to lay them off then and wait to see what will be the outcome of all the talk. I don't think that any other crowd of men could do any less than the present crew. I am disgusted with them.

Yoursvery truly,

Rev. J. O. MacKay

Indian Residential School.

Shubenacadie, N.S.

Sept. 3rd. 1930.

No. 51-0-5

Dear Sir:

Once again I would like to call your attention to the chimneys of the School, especially the kitchen chimney. For the past week with prevailing southerly winds the kitchen has been filled with gas, and it was almost impossible to provide the meals,as under those conditions there is scarcely any draught. The estimate we submitted was high because it means taking out the granite,and placing it higher. If that were not done it would certainly give a queer appearance to the chimneys.

I do wish that you would have something done about it.

Yours very truly,

A.F. MacKenzie, Esq.
Acting Asst. Deputy & Secretary
Dept. of Indian Affairs, Ottawa.

Reverend Sir:-

Replying to your letter of the 3rd instant with reference to the kitchen chimney, I beg to say that you may arrange to have this chimney increased in height in order to benefit the draught of the kitchen range. When the work is completed, vouchers in duplicate should be forwarded to the department, duly certified by you in the regular way.

Your obedient servant,

A.F.MacKenzie.
Secretary.

No. 51-o-12

Dear Sir:

A fire distroyed the Barn of St. Patrick's Homea few days ago, which reminds me that while we have an hydrant near the barn we have no hose connection for it.

As a protectio for the present buildings we would require about three hundred feet of three inch hose. When the other buildings are completed we would need at lea st two hundred feet more.

May I obtain quotations for three hundred feet with nozzle.

Yours very truly,.

Rev. J. P. McAchy

1- Applied for documents under. Sent

Ottawa, October 8, 1930.

Rev. Sir:

I have your letter of the 3rd instant, requesting authority to be supplied with 300 feet of 3" hose, with nozzle, for fire protection for the barn and out buildings at the Shubenacadie Indian Residential School.

In this connection I have to say that you may arrange for the purchase, to the best advantage and at the lowest possible cost, of the quantity of fire hose mentioned, also a nozzle. It is thought, however, that it would not be necessary to obtain hose of as large a diameter as mentioned by you, viz., 3". Would not 1½" be sufficient? However, the Department will leave this matter in your hands to obtain the hose of a size which you consider advisable. In arranging for the purchase, you should follow the general instructions which have already been sent you. Care should be taken to see that the hose is kept in a good serviceable condition, is tested from time to time and thoroughly dried after use. Please obtain an account, in duplicate, from the firm from whom the purchase is made. This you should certify in the usual manner and forward to the Department for payment.

Will it be necessary to obtain a reel on which to wind the hose when not in use?

Your obedient servant,

A. F. MacKenzie,
Secretary.

the truth. Furthermore we have (3300) volts on the heavy wires coming on the property and a transformer not more than 150 feet from the pump house, and the pump house and barn are the only connections from this transformer. We also beg to say that on the lines of the Avon River Power co. there are many electrically driven machines, instance, The Nova Scotia Clay Works, and mill machinery. They have had no trouble with the power.

Para. 9. We have detached pump from motor, in the presence of your representatives from Halifax, motor ran perfectly, but as soon as pump was connectedthe motor would not attain sufficient speed to throw out the brushes. Therefore from the instructions which came with pumps we came to the conclusion that the motor was over-loaded or not ~~not~~ stong enough.

Para. 10. Smaller pump was installed only for an emergency and the bigger pump was to do the heavy part of the pumping. It was only in case of fire that we intended to work them together. We did try them together and while the bigger pump would run, yet the result was the same as if the smaller one was working alone.

We might say in conclusion, that any answers we have given to your questions, and anything we have said in this letter, is to the best of our knowledge the truth. We are not trying to make trouble for anyone, but we do believe that we have a just cause for complaint, and respectfully ask your assistance.

Yours very truly,

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 3)

Indian Residential School

Shubenacadie, N.S.

August 22nd. 1930.

The Canadian Fairbanks- Morse Co. Ltd.

Halifax, N.S.

Dear Sir:

With reference to the copy of the letter you sent me on August 20th. inst. I wish to point out that the suction pipe is not 2½ in. but five inches. In the five 90 degree elbows, the first one is in the lake, ten feet below water line, and the pipe from lake for a distance of fifty feet is lower than low water mark. After entering pump house the suction pipe is reduced to three inches, connection from the five inch pipe to the larger pump. Three inch is the size of the suction entrance to this pump. For the smaller pump reduction is to two and one-half inch, and the connection is from the five inch pipe and not from the three. So in all the suction line we have about two feet and a half of two and a half inch pipe. As you will readily understand the party who wrote this letter was misinformed.

Refer to the last sentence of para. 6. We may say that the pumps are regulated to cut in at 45lbs. pressure and out at 65 lbs. Yet this pump will not function at 45lbs .

Para. 8. Before consulting with your representatives at Halifax, we had a man from the Avon River power Co. come and test the voltage with a voltmeter. We have no reason to assume that he did not tell the

THE CANADIAN FAIRBANKS-MORSE COMPANY LIMITED

SHEET No. 3. TO Rev. J. P. Mackay. DATE August 20th. 1930.

You say that the smaller pump is connected into the same suction line as the larger outfit. This is always considered very bad practice; we have never yet seen two pumps working on a common suction line and both give good satisfaction. Of course, if they never use both together, it will be alright to use one suction line. It is reasonable to expect the smaller outfit to perform fairly well with the 2½" suction line because of its smaller capacity. You do not say whether or not they ever tried to operate both pumps at the same time.

We feel that the installation, in as far as the suction line is concerned is very bad, and in itself would make it evident that the pump would never work. Then on top of that, we are not at all convinced that the voltage on the electric circuit is all that is stated from the Rev. Mr. Mackay's replies to our questions.

Unless you can get some definite information in reply to our questions, we cannot go any further in the way of recommendations."

Yours very truly,

THE CANADIAN FAIRBANKS-MORSE COMPANY LIMITED.

By R. W. Preston

RWG*AIR.

POOR COPY

pump work satisfactorily it will require about a 5" suction line. This 5" suction line would reduce your total friction and static suction lift to something about 20 feet. Even with a 4" suction line you would have too great a suction lift to enable the pump to deliver full capacity.

V We have discussed the suction conditions. We think there is only one real way to ascertain what the pump is doing in as far as the discharge is concerned, and that is to place a pressure gauge in the discharge line and determine accurately the pressure against which the pump is working. You must be sure to get a gauge that is correctly calibrated, as we find many of the gauges about the country are out 10 to 15 lbs. In fact it would be very useful information to put a vacuum gauge on the suction right next to the pump and see what vacuum is being produced and also know what pressure the pump is developing. I think that you will find that the pump is delivering against a pressure at least 10 lbs. higher than the ultimate pressure in the tank. We assume that the statement that the pump delivers against 65 lbs. means that the pressure in the tank is 65 lbs.

VI If you find that the pump is delivering, immediately at its discharge, 75 lbs. or more, it is possible that you are overloading the 5 H.P. motor. We can only guess at this point, until you get somebody to put gauges on this pump and let us get some real information.

VII We note the Rev. Mackey states that the voltage is 220 when the motor is running. This looks like a guess. Does he get that from a voltmeter or does he only assume? The same is true with regard to cycles. We have never yet seen a current that was 100% perfect, as indicated by Mr. Mackey's replies Nos. 9 and 10.

VIII Now in connection with Mr. Mackey's statement that the motor is too light for the pump. If you are only delivering against 65 lbs. pressure at the pump the motor is not too light for the job. If you are delivering against higher pressures it is quote possible that it is too light. But until you have definitely established that you are delivering against pressures in excess of 65 lbs. we cannot see that the motor is overloaded. When the motor left here it was in first class condition. It may be that something has occurred which has disturbed its starting arrangement. If you will make a few minor tests you can see whether or not the motor is in good order. If you have no voltmeter, and cannot get a volt reading, when the motor is running, one way to get a general idea of whether or not the voltage is up to 220, is to disconnect the motor from the pump and just run the motor light and see if it comes up to speed. If it does not come up to speed when running light, you know perfectly well that the voltage is not up to 220 even with the current required to run the motor light. A motor should run at the full 1200 R.P.M. when light, if the voltage is up to 220. If the voltage is below 220 and the motor runs slow, even when running light, you can be sure that when the motor is working to 3/4 or full load, that the conditions will be infinitely worse.

179 LOWER WATER STREET
HALIFAX, N.S.

August 20th., 1930.

Rev. J. P. Mackey,
Indian Residential School,
SHUBENACADIE, N. S.

Dear Sir;-

On receipt of your letter of the 5th. instant enclosing questionnaire we forwarded same along to our Montreal office. We are this morning in receipt of the following letter from them regarding your pumping outfit.

I

"Your letter of the 9th., instant received, and we have read same, and also noted the answers to our questions that the Rev. Mr. Mackey has given us.

II

We note, in the first instance, that the 2½" suction line is 1145 ft. long, that it has five 90 deg. elbows, and that the static lift is 15 feet. The five elbows are equivalent to 55 feet of linear pipe, therefore, the length of the suction is equivalent to 1205 feet. With the pump pumping to capacity, namely 83 gallons per minute, the friction will be equivalent to 100 feet, and with the 15 feet static lift the total suction lift would be 115 feet. Now, this is an impossible condition, and the pump will never pump to full capacity. The 2½" suction line will not give more than 1200 to 1500 gallons per hour through the 1145 feet with 5 elbows and 15 feet static lift. That is to say, with the full vacuum that it is reasonable to expect, this is the maximum amount of water that it can be depended upon to discharge. This condition will cause a Self Oiling Typhoon pump to hammer badly.

III

We had exactly the same condition in the building next door to us with a 5000 gallon Typhoon operated by a Fairbanks Morse 7½ H.P. motor operating against a pressure of 100 lbs. The pump hammered and banged and made such terrific noise that we had to do something. We tried two things, and found that both worked. We slowed the pump down so that it would pump only the capacity that the suction line would deliver under normal suction conditions. The pump worked smoothly. However, we did not have enough water, so we enlarged the suction pipe and speeded up the pump, and it worked perfectly.

our only 5 H.P.

IV

From past experience we are inclined to believe that most of your trouble is due to the suction being far too small. In order that the

Dear Sir;-

The writer has been in communication with our Montreal office in connection with your pumping outfits which Mr. Graham and myself were up to see sometime ago. We are very sorry that we have kept you waiting so long but was unable to give you any definite report until such time as we received information from our Head office. We are therefore, going to ask you if not too much trouble to try and give us a drawing of the pumping outfits as they are now installed also to answer to the best of your knowledge the questions which we are forwarding along with this letter as this seems to be the information required by our Head Office.

Trusting you will be able to forward this information in the course of a few days and we can than forward same along to our Head office in Montreal.

Yours very truly,

THE CANADIAN FAIRBANKS-MORSE COMPANY LIMITED.

Oct. 12th. 1930.

Dear Sir:

I am enclosing correspondence with the Fairbanks Morse Co. concerning the pumps.I have gone as far as I can and the office in Halifax say that the matter will have to be taken up with the Branch office where the pumps were bought.As you will note I had two men from the office in Halifax up here. They sent in a report and then I was asked to answer a number of questions. The letter enclo-sed is their reply to those answers. A representative from the Mont-real office was in Halifax when I happened along and he said that he would come up that day and look it over. He never came. I cannot say how many times I have taken the matter up with the Halifax branch,and I feel now that I can do no more. I wantedthem to take out the big pump and put in another small one ,but the pair in Halifax have washed their hands of the whole affair. The little pump has been doing all the work and doing it well but should it ever go wrong we would be in one terrible mess.

Will you please see what can be done.

Yours very truly,

(Sgd) J.P. Mackey

BERKEL PRODUCTS CO., LIMITED

Manufacturers of "The World's Best" Meat and Bread Slicers

FACTORY AND GENERAL OFFICE
125 YORK STREET
TORONTO 2, ONTARIO

Truro, N. S., Oct. 28, 1930.

Mr. Feirier,
Dept. of Indian Affairs,
Booth Building,
Ottawa, Ont.

Dear Sir:

On my way from Halifax, I called in to see Rev. J. P. Mackey of the Indian School at Shubenacadie. My work through the Provinces is visiting such Institutions as yours and checking over on their Kitchen Equipment, etc., and I find that there are two items which I am sure will be both a time and financial saving to this Institution, namely, the Potato Peeler and Bread Slicer.

The Berkel Products are known throughout Canada, the States, and the Old Country as makers of the World's Best Machines. We do considerable Government work in Institutions and I hope within a few days to have the pleasure of showing the Rev. Mr. Mackey an actual demonstration of our equipment when he comes through to Halifax. I would appreciate, if any action is taken by your Department in the purchase of such equipment, anything you can do. Although not knowing you personally, I have just recently come from Ottawa and had my office in the same building and am a personal friend of Mr. George A. ~~Connolly~~ Conley of your Department.

Yours truly,

Thos. D. Irwin

Sir,-

I have your letter of the 28th ultimo relative to the supplying of a Potato Peeler and a Bread Slicer for the use of the Shubenacadie Indian Residential School. In this connection, I have to say that it is not the policy of the Department to supply this type of equipment to Indian residential schools. We will, therefore, be unable to consider the placing of an order for these machines.

Your obedient servant,

Russell T. Ferrier.
Supt. of Indian Education.

Ottawa, November 7, 1930.

Gentlemen:

I have your letter of the 1st instant, relative to the recharges for the various Indian residential schools as mentioned therein.

Thermene fire Extinguishers for

In reply I have to request that you will arrange to ship, charges prepaid, the following number of recharges for Thermene extinguishers to each of the addresses as mentioned below:

9 Recharges - Rev. J. P. Mackey,
Indian Residential School,
Shubenacadie, N.S.,

and forward your account, in triplicate, with receipt for any charges prepaid, to Rev. Father Mackey.

9 Recharges - E. W. Byers, Esq.,
Cecilia Jeffrey Indian Res. School,
Kenora, Ont.,

and forward your account, in triplicate, with receipt for any charges prepaid, to Frank Edwards, Esq., Indian Agent, Kenora, Ont.

6 Recharges - Rev. S. R. McVitty,
Mount Elgin Indian Res. School,
Muncey, Ont.,

and forward your account, in triplicate, with receipt for any charges prepaid, to Rev. Mr. McVitty.

9 Recharges - Rev. G. H. Raley,
Coqualeetza Indian Res. School,
Sardis, B.C.,

and forward your account, in triplicate, with receipt for any charges prepaid, to Rev. Mr. Raley.

The above are being informed of the order placed with you, and requested, upon receipt of the recharges, to certify the accounts and send them to the Department, when payment will be made.

I may add that it is not the intention of the Department at the present time to order refills for the Thermene extinguishers supplied the following: 3 - G. H. Sims, Esq., Sault Ste. Marie, Ont., and 3 - Crosby Girls' Home, Port Simpson.

Your early attention to the above will oblige,

Yours very truly,

Sgd. F. H. Paget

Ottawa, November 8, 1930.

Rev. Sir:

In April, 1929, the Department supplied 9 Thermene fire extinguishers for the use of the Shubenacadie Indian Residential School. It is now necessary that new charges be placed in these extinguishers, and the Department is today placing an order with the Pyrene Mfg. Co. of Canada Ltd., Toronto, to forward, addressed to you, refills for 9 extinguishers of the Thermene type.

The above firm have been requested to forward their account to you in triplicate. When you receive the recharges, you should certify the account in the usual manner and forward it to the Department in duplicate, retaining one copy on file in your office.

You should see that these recharges are installed in the extinguishers and that the extinguishers are placed in good condition and ready for immediate use.

Your obedient servant,

T. R. L. MacInnes,
Acting Secretary.

Dear Sir:

Edward McLeod the carpenter - engineer here, informs me that some time this fall he is going to take unto himself a wife. Such a step was mentioned to members of the Department about a year ago, and the question of providing a house was considered. Situated as we are, we are quite a distance from the village, and since the fire there are practically no houses to rent in the village. I don't know but it is possible that the young lady wants to know where they are to live, and perhaps a number of other things.

Something of this kind must have come up in the other schools, will you please let me know what is the policy of the Department, and if it is the policy of the Dept. to house the help on the School premises, what promise can I give McLeod.

Reverend Sir:

I have your letter of the 19th instant, with reference to the carpenter engineer at the Shubenacadie Indian Residential School. Occasionally, when a valued male employee at one of our institutions wished to marry, the Department has provided a separate cottage for him. At other times, space has been found in the main building for a young married couple who are without children. In other cases, a married employee has had to find quarters elsewhere than at the school. I regret, at the present time, that there are no funds for the purpose of erecting a cottage; but, if you can find space in the main building for Mr. McLeod and his wife, there would be no objection. In this event, the wife should have sufficient duties at the school to pay for at least her board and room.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Out-Buildings

Dear Sir:

We have no pig-house, hen-house, dairy, ice-house, or manure shed. You have all the information I could give on the matter.

If we could keep about twenty-five pigs it would mean that we could save much of what is now wasted. The size of the house we think should be 50ft. by 25ft. This would include a space for butchering.

Will you please let us know if there is any possibility of having some or one of these buildings this year.

Mr. T. H. McWilliam, Mgr.,
Montreal House.

Dear Mr. McWilliam;

I am taking the liberty of enclosing herewith file of correspondence regarding some Pumps sold by Montreal House through the Department of Indian Affairs for the Indian Residential School at Shubenacadie, N. S.

I am calling your personal attention to the fact that we do not seem to be making much progress toward the cleaning up of what seems to be a very complicated situation as you will note that my letter of July 10th to Mr. Wilson has not been replied to. May I also draw your attention to Father Mackey's letter of August 3rd? I met this gentleman in our Halifax Office in the early Spring. He told me the whole story and I thoroughly believe that there is some problem connected with this installation which should be gone into by an expert on the ground. Whether this is a matter for you or the Ottawa Officials to determine is for you to decide.

Meantime, I would like to say that in talking with Father Mackey last Spring I told him definitely that, before Fall, this problem would be cleaned up because from what I have seen and heard from our own service men, who have visited this installation, as well as what Mr. Kemp has told me, and as outlined in the enclosed correspondence, there is a condition there which requires immediate action.

You will note that a 5000 gallon Unit cannot be used and that Father Mackey has recommended its replacement with a 2500 gallon Unit for the reason that he already has one Unit of this capacity which works satisfactorily. The entire water supply for a very large community is dependent upon this one pump. I understood Father Mackey to say that last winter he carried water for several months and they are almost entirely without fire protection as well.

It would seem to be a matter for concerted action on the part of the Department's Engineer as well as yourselves. In any case, the good name of our equipment is involved. Father Mackey is an unusually fine type of man and is not making any unusual demands, therefore we believe it is something that you should have thoroughly investigated and the necessary steps taken. As this is a transaction originating and carried through by Montreal House, I do not see why Saint John House should be involved in the discussion beyond giving all the assistance possible in submitting information to Montreal - and this you will note by the correspondence we have endeavored to do _ but if Montreal refuse to correct the trouble I have given my word of honor to Father Mackey that the necessary changes will be made and it will then become a question of carrying out my promise irrespective of outside consideration.

Mr. Wilson maintains that the two Pumps can operate off the same suction line and that sort of thing. No doubt they were recommended to the Departments If the installation was not made according to our own requirements, then perhaps the Department will bear the expense.

As this correspondence has been going on for so long and one Pump has been out of commission entirely during that period, will you not kindly relieve me of the onus of taking steps ourselves which may in the long run be more expensive to the Company than if it were handled by the people who originated this transaction.

May 28th, 1931

Reverend Father Mackey,
Indian Residential School,
Shubenacadie, N.S.

Reverend and Dear Sir:-

The writer has just arrived in Montreal, and finds that the new sprocket and extra section of chain for the 5000 gallon pump have not yet been shipped to you, but they will go forward within the next couple of days.

As your mechanical man will have told you, we found the pump was operating considerably too fast, which might easily account for all of the trouble you have experienced, as this condition imposes a heavy overload on the motor. After the sprocket has been changed we trust the performance of this unit will be completely satisfying, and we look forward to hearing from you. In case the motor should still fail to start when the rotor or rotating member is in a certain position, will you kindly communicate with Mr. R.W. Graham of our Halifax Office, who understands the procedure we wish followed in that unlikely event.

Yours very respectfully,

E.A. Kemp

August 7, 1931.

Mr. T. H. McWilliam,Mgr.

Following are the pertinent facts of this matter:

Our 5000 gal. Typhoon Pump actually has a displacement of 5.364 gals. per hr.

The original chain drive, of which no record was kept, operated the pump at 285 r.p.m., the maximum being 215 according to factory rating. At a speed of 285, neglecting slip, and assuming a combined efficiency of 65% for the pump and the drive chain, 5-3/4 H.P. motor would be absorbed.

It was not possible to obtain sprocket with more than 114 teeth and such a sprocket was supplied after my visit. The Pump was then not operating as slowly as I recommended, but is running at 191 R.P.M. requiring 6 H.P.

Considering that the maximum horsepower demand occurs only during the final two or three minutes in pumping up the tanks - they are hydro-pneumatic tanks - a 5 H.P. motor should not be seriously overloaded. That is to say the job ought to be O. K. now, particularly as the above H.P. calculations neglect slip of the pump.

Father Mackey's statement quoted by the Halifax Office to the effect that "it does not deliver as much water as the 2500 gallon unit " would indicate that either the suction line is partially obstructed or there is something wrong with the Pump. Unfortunately, there is no specific information as to the speed the pump is running , and the statement of Father Mackey, quoted above, is unlikely to be based on actual measurement of the water delivered.

It would be an expensive matter to install a 2500 gal. pump in place of the 5,000 gallon. If it is really necessary to still further reduce the capacity a Flex-Mor Drive, ratio 6.96;1 would give a speed of 165 R.P.M. Still, neglecting slip, 148 R.P.M. would require just 5 H.P. with an efficiency of 65% and with the tank at maximum pressure further assuming that the pump pressure exceed the tank pressure by 5#. The Flex-Mor drive would cost about $70.00 at Montreal.

I suspect that either the pump is not just right or the suction line is partially obstructed, so that only the capacity of the smaller pump, 2500 gallons per hour, can passs

If I am going to be in Halifax during the next month or six weeks, or so, I believe the best way to take care of this would be to have you ship to me at Shubenacadie, or our Halifax Office, the following:

2 Chain Tongs for 5" & 6" pipe
2 large Stillsons
1 Vacuum Gauge
1 Pressure Gauge of known accuracy
1 Breast Drill with drill to suit pressure gauge and vacuum gauge conn.
1 Tap for the same 1- speed indicator

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

This is not exactly a jon for a plumber and our mechanics at Halifax are not equipped to handle the pipe. A vacuum gauge applied to both pumps in turn would tell a great deal about the condition of the suction. As the job now stands, and with the information we have, there is no apparent reason for the complaint that the pump is not delivering its capacity and that the motor is apparently overloaded - two contradicting conditions.

Dept. of Indian Affairs

Pumping Outfit - Shubenacadie, N. S.

Mr. T. H. McWilliam, Mgr.,
Montreal House,

Dear Mr. McWilliam:

I regret very much that the contents of your letter of August 13th re above contain no hope for immediate action in connection with this matter which involves the sale of equipment by Montreal House to the Dept. of Indian Affairs at Shubenacadie, N. S.

In the very first part of Mr. Kemp's report attached to your letter he mentions the fact that the original installation, which you made, was an impossible one requiring a 5 H.P. Motor to develop 8-3/4 H.P. at the Pump.

We note you consider the best thing to do would be to leave this until Mr. Kemp goes to Halifax. I do not know when we are going to call on Mr. Kemp to go to Halifax and, certainly, we would not bring him down here at our expense in order to go into this matter.

I think Father Mackey is entitled to some definite action on the part of this Company and the onus naturally falls upon yourselves with whom this transaction originated. Won't you please do something of a definite nature at once? In my letter to you of August 4th I told you that I had verbally promised Father Mackey that he could depend upon this trouble being corrected during the Summer and, if Montreal House refuses to assume its own responsibility in this matter, then it will be for us to do so on the understanding that whatever expenses are incurred in making this equipment operate satisfactorily will be charged back to Montreal.

Yours very truly,

C. F. M. Co. Ltd.,
SAINT JOHN, N. B.

Replying to your favor of the 15th re the above file and subject. This was not answered sooner due to the fact that the writer was absent from the City.

In the first place we want to make ourselves perfectly clear, namely, that if Saint John House incurs expenses without authorization from us, we will not be responsible for same.

Mr. Kemp advises that he examined the outfit and same was all right and no doubt the suction line is blocked or there is some impediment which prevents the pump from working. Naturally, we are not responsible for this nor should we be called upon to bear the expense of righting same. This should be made clear to Father Mackey, Head of the School.

If the Pump is defective we will naturally supply a new one free of charge but if there is trouble with the installation the expense should be borne by themselves.

The Engineering Dept. of the Dept. of Indian Affairs, ordered the outfit and got what they ordered. We would suggest that you put it up to Father Mackey that the Pump can be returned and it will be examined. If found defective, we will supply a new one but we certainly should not be called upon to bear any expense if it is the fault of the installation.

THE C. F. M. CO. LTD.

Dear Father Mackey:

With further reference to your letter of the 3rd instant - I am enclosing herewith copy of Mr. Kemp's report submitted to our Montreal Office together with copy of my letter of Aug. 15th to them and their reply of August 26th.

I have suggested that this matter might be taken up with the Dept. of Indian Affairs at Ottawa but the attitude that they take is that the onus is upon you to see that an Engineer from the Department checks up the installation and ascertains whether the trouble is due to a defect in the Pump, for which our Company will be responsible, or whether it is due to a stoppage in the line, probably at the ~~suction valve~~, foot valve, or some other point where foreign matter and other obstacles could lodge.

Assuring you that we are anxious to clean this matter up, and awaiting your reply regarding the possibility of enlisting the assistance of your Principals, we remain,

Yours very truly,

THE CANADIAN FAIRBANKS-MORSE COMPANY LTD.

Pumps

DEPT. OF INDIAN AFFAIRS
SEP 8 1931
RECORDS

B2

Dear Sir:

Enclosed you will find correspondence concerning the pumps. From the very beginning we have had trouble with the larger one, and the latest thing done by the C.F.B. Co .Ltd. was to put a bigger wheel on in order to slow down the pumping. This worked for about a week, but at the same time the bigger pump was not producing as much was as the smaller one . Now it is not working at all.

Their suggestion is that the Dept. of Indian Affairs,since the equipement asked for was supplied to them,send an engineer to look over the pumps,and if the defect is in the pump,and not in the installation then they will make the necessary repairs.

To us here it is just this, that the five horse power motor, is not of sufficient power to run a 5000, gal. capacity pump. The pump is alright but the power is not there.

The techinal side of the matter is beyound us.

Yours very truly,

Rev. S. P. Mackay

Dear Mr. McWilliam,-

I am today in receipt of a letter from Rev. Father Mackey, Principal of the Shubenacadie Indian Residential School, with further reference to the unsatisfactory condition of the large pump installed at this school. He enclosed copy of the correspondence between your Manager in St. John and the Montreal office.

I may say with reference to the large pump that it has never given good satisfaction. You mention that the suction line might be blocked. This could not have been the case when the pump was installed and at the time of installation it was not working to capacity. Without this pump the conditions at this school are serious, as they depend on the large pump for fire protection.

In one of your letters to your St. John Manager you state that the department received what they ordered. If you will look back over your correspondence you will find that your Engineer from Montreal submitted a recommendation to me for the equipment required. I specified this equipment and the order was placed in accordance with his recommendations. He also furnished a plan showing the layout of the pumps and all connections and the installation was made in strict accordance with this plan.

I am compelled to take some immediate action to rectify the existing unsatisfactory condition, and before doing so I would be glad to hear from you. A reply by return mail would be appreciated. I may say that when I specified this equipment I felt that I was providing for a pumping installation that would give entire satisfaction for many years.

Yours very truly,

T. H. McWilliam, Esq.,

Mr. R. Gurney Orr,
Architect, Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:

We have your favour of the 12th inst. in connection with pumping equipment for the Shubenacadie Indian Residential School and note your remarks re same.

We attach herewith copy of report which Mr. Gerin, our Sales Engineer, has just handed to the writer re this pumping equipment and we might advise for your information that our Mr. Kemp, Pump Engineer, left for Nova Scotia last night. He will check over this installation while he is down there and as soon as he sends in his report we will advise you further in connection with same.

We are, however, convinced in our own minds that it is not the fault of the pump and we invariably find that these complaints which are lodged against pumping equipment are the result of faulty installation or some obstruction in the suction line.

However, Mr. Kemp will install a gauge on the suction line to see if there is not some stoppage of water there and in the meantime, we will just wait for his report which we should have before very long.

Regretting that you are having this trouble, we remain,

Yours very truly,

THE CANADIAN FAIRBANKS MORSE CO. LTD.

MONTREAL, P.Q. September 14, 1931.

File:- Dept. of Indian Affairs,

Subject:- Pumping Station at Shubenacadie, N.S.

Mr. T. H. McWilliam,
Manager, H O U S E.

Confirming the different conversations we have had in the last few weeks regarding the pumping station at the above school. I have looked over the recommendations that were made at the time and the different reports that were brought in by our own men, and sent in by the customer, and I cannot see what can be causing any trouble at the station besides the suction line.

The pump is a positive displacement pump and its capacity cannot be altered by anything but the change in its speed. Mr. Kemp reports the speed has been brought up to exactly what it should be. (I natumally assume that customer has opened the pump to check up if any of the valves or leather cups were in proper shape. It might happen that a suction valve would be broken, although this very seldom happens).

We have had on several occasions trouble with the suction line on some of our installations and have in some cases found that some of the metal used for galvanizing it partially clogged the pipe. In this case it is not probable that this metal would clog the pipe as it is too large, but it may have got under the flap of the foot valve or check valve and may prevent it from opening properly. Again there may be some dirt getting in this pipe line, which also would prevent these valves from opening properly.

There is no reason that I know of why this 5,000 gallon pump should not pump its full capacity when pumping through 5" pipe as installed. I believe that if the customer would install a suction gauge on his line, he would know right away what is causing the trouble.

M. Gerin,
Sales Engineer.

OCT 16 1931
RECORDS

Mr. R. Gurney Orr,
Architect, Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:

With further reference to your favour to us under date of September 12th and our letter to you under date of September 15th covering the pumping plant at the Shubenacadie Indian Residential School.

As advised you in our previous letter we sent an engineer to look over this plant and he reports that the pumps are working satisfactorily and found nothing whatever wrong with them, nor did he find anything to indicate that the large pump had ever failed to deliver its capacity, provided, of course, that the motor was run up to speed.

What little trouble they have had was discovered in the magnetic switch. The bracket of the solenoid actuating the contact fingers was loose on the panel, two nuts having fallen off behind the panel. Sometimes the solenoid would remain in its place and at other times fall forward, resulting in a weak contact of the fingers. As soon as these nuts were put on and secured tightly everything operated satisfactorily.

Our engineer left the outfits running to the complete satisfaction of Father Mackey.

Yours very truly,

SCHOOLS BRANCH
DEC 29 1931

Dear Sir:

Will you please do something this year towards an house for Edward McLeod, the carpenter-engineer at the School. This matter was mentioned last year and some hope was given then that possibly this year something could be done. There is only one house vacant in the village and the rent asked for it is at the lowest twnty-five dollars a month. The matter of providing living accommodations in the School and providing work for the woman is not practical here.

If we had $ 2500.00 and were permitted to use the help we have here, I think that we could erect a building in keeping with the other buildings on the property.

I do hope that you will include this item in your estimates for this year and help us out of a very trying situation .

Yours very truly,

Rev. J. P. MacKay

Ottawa, December 30, 1931.

Reverend Sir:

I have your letter of the 24th instant, with reference to the need for a residence for the carpenter-engineer at the Shubenacadie Indian Residential School. I regret that this request did not reach the Department in time for consideration when the Main Estimates for the coming fiscal year were being prepared. I may say that Parliament is being requested to provide $3,500 for the erection of a henhouse, a hogpen and a dairy and for the provision of a mangle at your school. If the residence for Mr. McLeod is more urgent than these improvements, it would not be difficult to make the funds available for that purpose. Upon your return from your holiday, please give this some thought and let the Department have your recommendation.

Your obedient servant,

T. R. L. MacInnes,
Acting Secretary.

Dear Sir:

In reply to your letter of Dec. 30th.1931. I sincerely hope that your estimate of $ 3500.00 for buildings in conection with the School has passed.

If when the time comes for building we could employ Alfred Myrei,who was foreman in October 1930,we feel that the house,hogpen and dairy could be constructed with that amount of money. But if we have to employ all outside help, from past experience,I think the total sum would not complete the house.

We have quite a number of big boys who would be a great help and would profit not a little for the practical experience. If you think that the matter could be worked that way,will you please let us know,so that we may plan to get the best results.

Dear Sir:

We have just about reached the time when we are in a position to meet our bills and the prospect of a ten per-cent reduction is to say the least not inviting. As far as I am concerned and the engineer and farmer it will mean a reduction in wages,but with the Sisters receiving only three hundred a year,with ten days allowed for their retreat,to reduce their income seems absurd.

As far as the building of a cottage is concerned,ifyou cannot allow us something on it,we will have to make the attempt ourselves. I need not remind you that many things were promised at the beginning ,and that for the past year there has not been any money spent by the Department for this school, except medical, stationary and the grant. We realize the need for economy,but a cottage will be built later and I believe it could be built at the present time for much less money. Sincerely hope that you will be able to help us.

Yours very truly,

Rev. J. P. Mackay

Dear Sir:

I would not think of building a cottage for the carpenter-engineer without your approval. But I did think, that if we had some help, say to the extent of $ 1500.00, it would be possible for us to add to that from the Grant, $500.00 to $ 1000.00 and build a cottage similar to the one here. Provided further, that we could hire one first class carpenter, and do the work ourselves. I am hopeful that the outstanding accounts at the close of this month will not be more than $500.00. Since the 10% reduction does not go into effect till the first of April, then we should have about seven thousand comung to us. From that amount I was hoping that we could manage to use from five hundred to a thousand on the house. If necessary I would give half of my years salary to see the house built.

If it is impossible for us to have the cottage, and there is available one thousa nd, I would rather see that amount expended on a dairy and hog-house than on a mangle.

AUG 2 1932
RECORDS

Dear Sir:

In previous letters the matter of leaks in the School here has been mentioned. Rhodes Curry Co. had promised to remedy the trouble about the windows,but the work was never done. From the beginning every south-east rain storm has played havoc with the plaster on the front of the building. It becomes necessary under those conditions tp place basins and towels to catch the water which drips from the tops of the windows. The condition of the p plaster is very bad,so much so, that some of it is down and it is only a matter of a few more storms till much more of it will be down. We had hoped to paint all the first floor this summer,but only did half of it,as we considered it a waste of time and material to paint the rooms on the front of the house.

The enclosed letter will explain itself,and if this work is done we hope it will be the means of saving considreable expense for repairs at a later date.

Will you please let me know if you will have this work done before the cold weather sets in.

Yours very truly,

MEMORANDUM

Mr. Buskard.

There is available in our Appropriation for Indian Education for repairs and the erection of outbuildings at the Shubenacadie Indian Residential School the amount of $1000. It is intended to expend from this amount the sum of $875 in the erection of a pig house and dairy building; also to carry out repairs to the main school building to the amount of $125. It will be necessary to purchase certain materials and to engage the services of a competent carpenter. The balance of the labour will be performed by the staff of the school. I shall be pleased to be informed of the firms from whom quotations should be received for supplying lumber and other materials required in the erection of the pig house and dairy, and the name of the carpenter who should be engaged to oversee the work.

The repairs required to the main building are caulking under the windows in order to overcome the damage which has occurred by rain penetrating around the windows and damaging the interior plaster on the walls. The Principal obtained a quotation from the Compressed Air Caulking Company, 8 Faulkner St., Truro, of $125, which includes materials and labour. Would it be satisfactory to engage this firm to do the work?

The Shubenacadie Indian Residential School is in the federal district of Hants-Kings.

Dear Colonel Ralston,-

With reference to the letter received by you from Wm. Stairs, Sons & Morrow, Ltd. regarding the boiler specified for the new Indian Residential School at Shubenacadie, I would say that the specifications provide for a return tubular boiler of the portable type, and there is no reason why a boiler of this type cannot be manufactured by the Robb Engineering Co. of Amherst. A letter is today being addressed to the general contractors, Messrs. Rhodes, Currie Ltd., asking them to submit a design of a boiler of the required capacity that can be manufactured by the Robb Engineering Co.

Yours faithfully,

DCL

Indian Residential School.

Shubenacadie, N.S.

November 28th. 1929.

Dear Dr. Scott:

When you told me at Yarmouth, that should I have any difficulty or misunderstanding concerning any letter from any member of your Department, that I might drop a personal line to you, I had hoped that such a course would not be necessary. However the enclosed letter has upset me more than a little.

In the first place I would like you to know that I have never met Mr. Maxner, nor do I know anything about him. You will readily understand then that anything I say will not inany way concern him personally.

In the special duties of Mr. Maxner it seems to me that I am placed as a junior clerk, and that my name to any report sent to the Department means nothing, unless the correctness and honesty of that report is certified by Mr. Maxner. Being what I am, ~~my~~ in the past, my name alone has been sufficient to satisfy any party of the correctness or truthfulness of any matter. To make out a report for the Department I must await the signature of Mr. Maxner before it can be accepted. That I honestly think is uncalled for. If I cannot explain in a satisfactiry manner any expenditure incurred to the Department, and have my word accepted as final, then I should not be here. Again I am at a loss to know just what is meant by general inspection. The letter as a whole seems to intimate that while I will be on the ground to see to the immediate wants of the school, nevertheless Mr. Maxner will have the final word.

That Dr. Scott is what I understand from the enclosed letter. It places me in a position which up to the present I did not think possible.

Mr. Maxner is coming here tomorrow, that is why I am writing you today. Trusting that you will grant me an early reply, and hoping that you are enjoying good health,

Yours Sincerely,
L. P. Mackay

Dear Father Mackey:

I have your personal letter, concerning Mr. Maxner's duties, and I feel that you have misunderstood the official communication, which I am returning. You will note that Mr. Maxner assumes no responsibility for the financial management or the general conduct of the school. In other words, you are responsible.

At Indian residential schools where the Department alone is financially responsible, it is the practice to have the principal prepare a quarterly fiscal statement, listing the receipts and expenditures. A local officer of the Department compares this list with the receipted accounts and paid cheques and certifies to its correctness. He also makes a general inspection of the school. Once every year or so, there will be a regular audit of the books of the school. This and Mr. Maxner's certificate on your financial statement will be necessary to your own satisfaction.

In the expenditure of public money, there are examinations and audits that may seem unnecessary to you at the present time, but which you will welcome as you become familiar with government regulations. Every payment I make is scrutinized by the Auditor General's Department and a receipt or other supporting paper is demanded.

Perhaps Mr. Maxner's visit has already cleared the air, for I hope he has a clear conception of his relations to you and to the school. You have the entire confidence of the Department, and you must not allow yourself to be disturbed by regulations that are associated with public business.

Yours very truly,

Duncan C. Scott

Deputy Superintendent General.

Dear Mr. Ilsley:

It is now necessary to secure a milch herd for the Shubenacadie Indian Residential School, and I believe the most satisfactory method is to place the selection and purchase in the hands of the Dominion Live Stock Branch of the Department of Agriculture. If you concur, I propose to ask the Chief of the Cattle Division to instruct his local representative, Mr. C. A. Archibald, of Truro, to look after this for us. I do not wish to limit the selection to herds in Hants County, if better satisfaction can be secured elsewhere; but Mr. Archibald could be instructed to give the preference to dealers in your constituency. May I suggest that your reply be by telegram.

Dec. 23, 1929.

MEMORANDUM: Mr. Pratt.

With reference to the heating boilers in the Shubenacadie School the specifications for this building provide that the contractors will furnish, deliver and erect two portable, smokeless firebox boilers of approved make, each boiler to have a steam capacity for heating 4000 square feet of direct radiation.

On May 22nd of this year a letter was written to the contractors advising that it was understood that the Nodo Engineering Co. of Amherst were manufacturers of boilers and asking the contractors to submit to the Department for consideration a design of a boiler by this firm, the boiler to be in accordance with the specifications for the building. The Rhodes Curry Co. did not submit a design as requested as evidently they had previously arranged for the purchase of the boilers. Under the specifications the contractors were entitled to install whatever make of boiler they desired, providing it had the capacity called for in the specifications. The boiler was included, of course, in the general contract and was not purchased direct by the Department.

MEMORANDUM: Dr. Scott.

With reference to the attached memorandum regarding the balance which is being held back on the Rhodes Curry contract for the Shubenacadie School, I beg to say that the Department is not insisting that these floors be waxed, but Rhodes Curry Co. have been advised that the floors have not been laid according to the specifications and are not satisfactory.

On my last inspection of this building I examined these floors and it would appear that they have been laid either by inexperienced workmen or sufficient time has not been taken to trowel them to a hard smooth surface, as called for in the specifications. They are at present in many places very rough.

CANADA

Location

AUGUST 11, 1930.

MEMORANDUM:

Dr. Scott.

On June 18th the Reverend Father Mackay was authorized to proceed by day labour with the building of an implement shed including a blacksmith shop and repair shed, approximately 95 feet long and 25 feet wide at an estimated cost of approximately $1,200.00.

He was also authorized to proceed with the building of a root cellar utilizing the cellar under the old house as part of the new root cellar.

The old farm buildings remaining on the property were to be demolished and as much of the material as possible used in the construction of the implement shed and root cellar.

He was instructed to employ Mr. Fred Robinson of Shubenacadie as working foreman and to arrange for whatever additional labour was required.

Memorandum:

Mr. Buskard

With reference to your memorandum of the 29th ultimo, which is relative to Mr. de Witt Foster's letter, I may say that the implement shed with work shop and the root cellar at the Shubenacadie Indian Residential School are now under construction. The appropriation for this school will be exhausted when these two buildings are finished and painted, and we will have to make provision in next year's Estimates for the construction of a hen house, dairy and hog pen, as they will be necessary. You will remember that we changed the foreman on this work, appointing Mr. Alfred Meyers, Mr. de Witt Foster's nominee.

L.A.D.
Ottawa, September 14, 1932.

Sir:

Replying to your letter of the 8th ultimo, regarding the out buildings and improvements required at the Shubenacadie Indian Residential School, from the funds which are available, I have to say that the Department will approve of you arranging for the erection of a pig house and a dairy of the dimensions as mentioned in your letter, also for the caulking around the windows and doors of the main school building, in order to overcome the damage which has occurred by rain penetrating and damaging the interior plaster on the walls.

You should make the purchase of the lumber and hardware required in the erection of the pig house and dairy building from the following:

ENCUMB. HEQ'N. No. 65

Lumber ... Mr. O. J. O'Brien, Shubenacadie,
Hardware ... Mr. Watson Smith, " .

You may also engage the services of Mr. James Bell, of Shubenacadie, as foreman-carpenter, to oversee the work of the staff and boys in the construction of these buildings. The amount available for the work is $875, and all costs should be kept within this sum.

Regarding the repairs to the main school building, you may arrange with the Compressed Air Caulking Company, 8 Faulkner St., Truro, to carry out this work. This should consist of caulking around the windows and doors, also the tops and bottoms of stone sills, on the front of the building only, at the price quoted by them, viz., $125, which is to include materials and labour.

ENCUMB. HEQ'N. No. 64

Please forward itemized accounts, in triplicate, properly certified, covering the cost of lumber and materials purchased for the erection of the pig house and dairy building, also a certified account, in triplicate, for the services of the foreman-carpenter. This account should show in detail the number of days he was employed and the rate paid per day. You should also forward an account from the Compressed Air Caulking Company, which should show in detail the work performed, and this should also be certified by yourself.

I shall be pleased if you will arrange to have the work in the erection of the pig house and dairy building, and caulking of the front of the main building, carried out at an early date.

Your obedient servant,

T. R. L. MacInnes,
Acting Secretary.

No. 5I-O-5

SCHOOLS BRANCH
OCT 28 1932

Dear Sir:

Enclosed you will find triplicate invoices for the material and extra labor on the hog-house and dairy. There will be one more bill for lumber from Ed. Carr, our friend Mr. O J Obrien who lives sixteen miles from here, brought the first order of lumber, but could not make the hill, broke through a neighbors bridge, and decided he would not come again.

The total so far amounts to $ ~~563.20~~ 668.77. We will be able to complete the buildings and put a Farmers Boiler in the hog-house but we will not have sufficient funds to install the necessary equipement in the Dairy, especially if we have to have a new upright boiler costing $ 215.00 . We have been trying to locate a second hand one ata reasonable price. With the exception of the Dairy equipement the work will probably be completed this week.

Gravel and some odds & ends outstanding.

Yours very truly,

Rev J. O'Mackey

Shubenacadie, N.S.

No. 51-0-5

December 2nd. 1932.

DEPT. OF INDIAN AFFAIRS
DEC 5 1932
RECORDS

Dear Sir:

Enclosed please find the bills winding up the Hog-house and Dairy-ice -house,also pictures of them and the situation in relation to the barn and implement shed. We are sorry that the amount allowed for the work was exceeded by $ 29.37,but even at thatI think we did fairly well.The total for outside help was $ 56.00 for a carpenter and $ 3.40 for an electrician.

The only equipement in the Hog-house costing any money is a Farmer boiler $ 20.00. In the Dairy we have a good three horse power upright boiler,a large sink for washing cans and milk pails, a hand basin for cleaning up before milking for the boys, a cream separator, and a small cooling room where the milk is kept .

We are very grateful to the Dept. for allowing us to put up these buildings,and with little exception giving us a free hand. I might say that this way of doing things gives us a lot less worry, and at the same time saves the Dept. condidrable money. You will find no item for paint yet both buildings have had two coats. Twenty-one pigs in the hog-house.at the present time.

Yours very truly,

The Secretary,
Dept. of Indian Affairs,
Ottawa.

Shubenacadie Indian Residential School.

Shubenacadie, N.S.

No. 51-0-5

January 9th. 1933.

Dear Sir:

I want to bring to your attention again thematter of a house for the carpenter-engineer. The farmer has a residence on the property,and the question of a house for the carpenter-engineer was spoken of just shortly after the School opened,three years ago.It has been mentioned every year since. The ability of the male help speaks for itself in that there has been no changes since the School opened.

I realize that in the interests of economy expenditure is curtailed,but at the same time I think that we could build the house at much lesser cost this year than at any other time. As in the building of the dairy-ice-house and hog-house,we could do a good share of the work ourselves. The plastering and electric wiring would be the only things requiring outside help.

The farmers house cost the Dept. four thousand dollars,I think we could build one of the same size for half that amount. We have not bothered you very muchnexcept for buildings,and I do hope that in this matter you will do the best you can for us. Please let me know if there is any possibility of having it done this coming summer.

The Secretary,
Dept. of Indian Affairs

Yours very truly,

Shubneacadie, N.S.
January 23rd. 1933

Dear Mr. Phelan:

Many thanks for your letter of the 14th. inst. In the meantime I have been scouting around trying to find the amount and cost of things. The amount of lumber exclusive for finnished floors and other inside work would come to 14000 ft. I can buy that here at $ 16. per thousand, amounting to $ 194.00. This O'Brion mentioned in the official letter of Sept; 14th. lives eighteen miles from here and would not land lumber here at that cost. He practically said last fall that he did not want any more business unless he could get his price of $ 20. per thousand. Hot air furnace would cost in the vicinty of $ 150.00. If I were allowed I could buy the water and bath room fixtures in Halifax at much less cost than I can through Watson Smith. If it were not for his extra high charges we would have been within bounds for the dairy and hog-house.

The plastering and electric work would be about the only things requiring outside help. Please let me know what the next step is in order to get this house under way.

Cheque arrived and I am alright for another while, Thanks.

194 00
150 00

Sincerely,

J. P. Mackey

EXTRACT FROM MR. PHELAN'S REPORT ON HIS INSPECTION OF THE SHUBENACADIE INDIAN RESIDENTIAL SCHOOL, JUNE 6-10, 1933.

- - - - - -

Original on File 51-0-6.

There is a house on the school property which is now used by the farmer but another house is very necessary for the assistant farmer. The sum of $1,000 was included in our appropriation for the current fiscal year for necessary repairs at this school and I would recommend that Father Mackey be authorized to expend this amount in the erection of a house for the assistant farmer. A considerable amount of the work will be done by the staff and the older boys and Father Mackey considers that the amount mentioned will enable him to build a suitable house. I may add that Mr. McLeod, for whom the house is being built, not only assists on the farm but does all the minor repairs in connection with the heating plant and the plumbing. In this way, he saves the school a considerable expenditure each year and is a valuable member of the staff.

FUTURE REQUIREMENTS: (1) As pointed out above, the house for the assistant farmer is necessary at the present time and, as funds are available, I trust that you will see fit to authorize Father Mackey to proceed in this matter.

(2) To complete the equipment in the laundry, a mangle is required, but there is no necessity for supplying this at the present time.

(3) There is still considerable seepage of water through the bricks on the south side of the building. Methods of improving this condition have previously been considered but, as yet, no satisfactory results have been obtained. Similar conditions exist in other buildings in Nova Scotia where the same kind of brick was used. When in Halifax, I learned that the Imperial Oil Company had been having the same trouble with a large building that they had erected but had been successful in treating the bricks in such a manner as to prevent water seeping through. Father Mackey intends to see the Manager of this company with a view to ascertaining what they used and he will then write the Department.

(4) There is an ample supply of water from the lake and the water works system has been working very satisfactorily. The water is rather hard and it has been found that the steam and hot water pipes are corroding rather quickly. When the school was erected, the heating contractor stated that the pipes should last from ten to twelve years but pipes in the laundry had to be replaced within two years. I feel that this is a matter that should receive attention and I would suggest that the water be analysed with a view to determining what could be done to overcome the corrosion of the hot water pipes.

(5) No hens are kept at this school as there is no suitable building. At the present time, eggs can be purchased quite reasonably and there is no immediate necessity for the erection of a hen house. However, this could be kept in mind and, when funds are available, an appropriation of approximately $250 might be made for this purpose. A manure shed, with granolithic floor, might also be erected at some future date.

June 22, 1933.

Dear Father Mackey,-

I spoke to the Deputy Minister yesterday with reference to the building of a house for the Assistant Farmer, and I think he is favorable to the project.

Will you kindly send me a rough sketch of what you propose building. You must keep in mind, however, that the cost of the building must not exceed $1,000.00. You might also let me know how you propose building this house, and what labour will be required, also the most convenient place to purchase the materials. When this information is received you will be further advised.

I note that you are having trouble with rain seeping through the brick work on the south side of the building, and that you are investigating other buildings having the same trouble. I will be glad to hear from you as to what is being done in similar cases to overcome this seepage.

Yours very truly,

R. Gurney Orr.
Architect for the Department.

No. 51-0-6

Dear Sir:

In reply to your letter of the 22nd. inst. I think the only houde we could possibly build is one like the farmer occupies at the present time. That is 24ft, by 28,with the roof over the ver--anda. The one drive-way would be sufficient for both houses. The post would be I2ft. with upstair windows built out from roof.

With the possible exception of outside help for plastering and electric wiring,the carp-eng. here and the boys will do the work. The amount allowed for the house will possibly not be sufficient to buy the material,for we do not want to put up a shack almost in front of the School. For that reason we figure on saving on the labor and using all available money on good material.

As for the convenient place for buying the necessary material, by all means the cheapest consistent with quality. Wm. Stairs,son & Morrow for all hardware, Spencer Bros. and Turner for windows ,doors flooring,and framing. Cemment where the best price,same for roofing and side shingles,and for sand and gravel. Brick at Millers ,tile from L.E. Shaw &r N.S. Clay Works.

Hoping that we will have good news from you soon.

Kind regards to you and Mrs. Orr.

Yours ,

Wm. J. Wallace

Dear Father Mackey,-

I have your letter of the 26th with reference to the building of a house for the farmer. I am sorry to bother you again, but I will have to ask you to give me more particulars regarding the firms you suggested in the last paragraph of your letter. Please give me the full name of the firm and the address, as it is necessary to find out if the firms are on the approved list before the purchases can be authorised.

Yours very truly,

R. Gurney Orr.
Architect for the Department.

Dear Mr. Orr:

In reply to your letter of the 8th. inst.

Stairs Son & Morrow ,Halifax, certainly on the list.

Spencer Bros, & Turner, nearest firm for doors etc. Truro. The Indian Agent is getting his material there for the two houses being built on the Reserve here.

L. E. Shaw, Co. Lantz Siding. is a strong member of the party in this province, and for Miller I don't know except his brick are cheaper and that we purchased from him the brick for the pump house. His home is Elmsdale, Hants County. The amount for cement and gravel will not come to one hundred dollars.

Yours very truly,

J. P. Mackey

Memorandum: Mr. Bushard.

It is proposed to erect a small house for the Farmer at the Shubenacadie Indian Residential School. The School staff will supply the labour and the Department will furnish the materials.

Reverend Father Mackey, Principal, has suggested that the materials be purchased from the following firms, as being the most conveniently located and having the quality of materials required,-

Hardware: William Stairs, Son and Morrow, Halifax.

Lumber and Millwork: Spencer Bros. and Turner, Truro.

Tile and Brick: Nova Scotia Clay Works, Elmsdale, Hants County.

Will you please advise if it will be satisfactory to make the purchases from the above mentioned firms.

A. Stewart

AUG 4
1933

August 3rd, 1933.

Mr. Williams.

Re your memorandum of July 14th, your file No. 51-0-5, in connection with the erection of a small house for the farmer at the Shubenacadie Indian Residential School, the necessary hardware may be purchased from Watson Smith, of Shubenacadie, and the lumber, millwork, tile and brick from the two firms mentioned in your memorandum.

Private Secretary.

E.R.

Ottawa, August 4, 1933.

Reverend Sir:

With reference to your letter of the 10th ultimo and previous correspondence, regarding the erection of a house for the Assistant Farmer at the Shubenacadie Indian Residential School, I have to say that you may arrange for the purchase, from the following firms, of the materials required:-

HARDWARE: - Watson Smith, Shubenacadie.

LUMBER and MILLWORK: - Spencer Brothers and Turner, Truro.

TILE and BRICK: - Nova Scotia Clay Works, Elmsdale, Hants County.

ENCUMB. REQ'N. No. 839

You should obtain itemized accounts, in triplicate, covering the cost of all materials. These accounts, you should certify in the usual manner and forward to the Department for payment.

The services of the school staff should be utilized as far as possible for the labour in erecting the building. It is noted that some outside assistance will be required for the plastering and electric wiring. You might let me have an estimate of the amount of wages for these, and an accountable cheque will be sent you to pay the outside labour.

The total amount available to cover the cost of materials and labour is $1,000, and this amount should not be exceeded. I enclose an encumbrance certificate, authorizing the funds for the purpose of erecting the cottage, to the above mentioned amount. You should state on each copy of the accounts that the expenditure was authorized by E. R. No. 839.

Encl.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Ottawa, 26th August, 1933.

Dear Sir,-

I re-enclose herewith the account, dated 10th August, amounting to $330.00, which you submitted recently from Spencer Bros., and Turner Limited, Truro, for lumber furnished for use in connection with the Indian Residential School, Shubenacadie. Kindly have the said account amended so as to show prices and total for cash item . This is necessary before the account can be audited, with a view to payment.

I may add that at all times accounts submitted to the Department should give full details with regard to charges.

Yours faithfully.

N.C. Allen.
Representative of the Treasury.

Ottawa, August 28th, 1933.

Reverend Sir,-

In official letter of the 4th instant, you were requested to purchase materials required for the house for the assistant farmer from certain firms.

The Department is now in receipt of an account for $126.95, in favour of A. J. Reid & Sons, also an account for $40.00 in favour of James B. Miller. Neither of these firms was mentioned in our letter. Please advise why purchase was made from Reid & Sons and J. B. Miller instead of the firms mentioned in official letter of the 4th instant.

Your obedient servant,

A. F. MacKenzie.
Secretary.

August 3Ist. I933

SCHOOLS BRANCH
SEP 4 1933

Dear Sir:

In reply to your letter of August 28th. inst. concerning the accounts of A. J. Reid & Sons and James B.Miller.

A. J. Reid & Sons are the only firm in the vicinity who deal in cement and roofing shingles. In the past theses items have been put through Watson Smith. The latter would telephone A.J. Reid & Sons asking them to deliver to the School the amount of cement etc, I had the price from Reids and it was always increased at least ten percent,just for the bother of a telephone call. The figure I have from Mr. Smith for a furnace and kitchen range is $ 215.00,that is over one-fifth of the total allowed for the house. In view of that I thought that he was being treated fairly,and if we were to build the houseat all then we had to make the money go as far as possible.

As for Mr. Miller in comparison with Shaw's Limited. The latter price on brick for outside purposes was $ 25.00 per thousand Mr. Miller's $ I5.66 ,the stock brick was the same at $ IO.00. Before giving the order to Mr, Miller I made inquiries from some members of the local patronage committee and was assured that Mr. Miller was in very good standing and that there would be no complaint if we bought the few brick we needed from him.

Yours very truly. J. P. Mackey

Dear Sir:-

With the exception of one account to come from Chatham & Conn, the enclosed accounts complete the accounts for the residence for the Carpenter. Engineer. The only equipment a furnace and kitchen range. Would it be possible to allow extra cost for that equipment, apart from building allowance. When I have more time I will wish you more fully.

Yours very truly

Rev J. P. Mackay

Shubenacadie Indian Residential School.

Shubenacadie, N.S.

November IIth. I933.

No. 5I-0-5

Dear Sir:

With reference to the house of the carpenter-engineer, for which I000.00 dollars was authorized by E.R. No. 839, under date of August 4th. I933. As intimated in a note along with accounts sent to you a few days ago, there remains one other account, that of Arthur & Conn, for completion of wiring and electrical fixtures.

So far we have exceeded the amount alloted by $ I06.37. But in those accounts are included amounts which you may have intended to be outside of the $ I000.00 allotement, viz, electrical work, plas- tering, and the two items of necessary house equipment, the furnace and the kitchen stove. These items amount to about $ 300.00. If it was your intention that these items should not be included then we would have sufficient to complete the house. You cannot help but be aware of the fact that there has been no accounts sent to you for paint, shingles for sides, bath room equipment, gravel and sand. We have used up every ounce of white lead and yet the painting is not finnished. The house is the same in every respect as the farmers residence which was bought by the Dept. at a cost of $ 4000.00, including one-half acre of land. I suppose it was rediculous for us to expect to build one for $ I000.00. However the house is occupied but there are a few things incomplete. Will you please let us know what we may expect concerning the material to complete the house.

Yours very truly,

Rev. J. P. Mackey

Ottawa, November 29, 1933.

Rev. Sir:

With reference to your letter of the 11th instant, enclosing accounts for the expenditure incurred in connection with the erection of a residence for the carpenter-engineer at the Shubenacadie Indian Residential School, it is noted that you have forwarded an account for $157.00 in favour of Edward Kerr, Milford Station, N.S.

Mr. Kerr's name was not mentioned in official letter of August 4th, and I would appreciate your advising why the lumber was purchased from him.

Your obedient servant,

A. F. MacKenzie,
Secretary.

No. 51-0-5

Dear Sir:

In reply to your letter of Nov. 29th. I beg to say, that during the building of the hog-house and dairy-ice house about a year ago, we were instructed to purchase lumber from a Mr. O'brien, who lives at Maitland, twenty miles from here. We followed those instructions but Mr. O'Brien would only bring one load, as it did not, he said, pay him for the long haul. The same would apply to Spencer Bros. & Turner from whom we bought all finnished product.

We had from School property about seven thousand feet, milled for us at Kerr's mill. So the cost for the greater part was for 2x4, and 2x6. So we went to the mill yard and chose the pieces we wanted, thereby saving a good deal of waste. Under like circumstances in the past his accounts have been accepted. The mill is only a quarter of a mile from the School, and to me it does seem a bit queer to twenty miles for the same product and pay more for it.

Yours very truly,

Rev. J. P. Mackey

Ottawa, December 13th, 1933.

Reverend Sir,-

I have your letter of the 8th instant, enclosing account of Arthur & Conn for electric wiring and fixtures in connection with the new residence for the carpenter-engineer at the Shubenacadie Indian Residential School. A cheque in payment of this account will be issued in due course.

The expenditure to date amounts to, approximately, $1,167.29. E. R. No. 839 authorized an expenditure of $1,000., and it has been decided to allow a sum not exceeding $400. additional. This latter amount is covered by E. R. No. 1167.

You may, therefore, proceed with the completion of the house, keeping in mind that the total expenditure must not exceed $1,400.

Your obedient servant,

A. F. MacKenzie.
Secretary.

January 22nd. 1934.

SCHOOLS BRANCH
JAN 25 1934

Dear Sir:

During one of the many cold spells, a small pipe which controls the cut-out for the pumps was frozen, with the result that the pressure of water went higher than usual. The pipe is not more than teh feet from a large hall burner, which was attended between five and six, the top of the hot water boiler was broken to pieces before seven thirty, P. M. For the past two years we have had considerable trouble with the heater and connecting pipes on account of the corrosion. During a visit by Mr. Phelan we had repairs to make and shewed him a three inch pipe which was so corroded that there was only about an inch space left for the water to pass through. We went into the question of using certain chemicals to remedy this condition but the cost was pro-hibitive.

Correct A.P

We had to purchase a new hot water heater, and since all the pipe connections are three inch, it would be necessary to have all pipes threaded in Truro or Halifax, and run the risk of mistaken measurements etc. So in order to do the work ourselves we had to have dies, vice, pipe-cutters, and three foot wrench.

If I am not mistaken this is the first time we have asked the Dept. to pay a repair bill, but I think that this matter should be in the class of major repairs and not minor. Hopint that this will receive favourable consideration.

The Secretary,
Dept. of Indian Affairs,
Ottawa.

Yours very truly,

Rev. J. P. MacKay

February 19th. 1934.

No 51-0-5

Dear Sir:

Lawrence Parker the assistant farmer occupies a rented house about two hundred yards from the School. The owner of the house wants to live in it on the first of May and has told Mr. Parker that he must vacate it by that time. As I have made known to you in previous letters ,there is no house that could possibly be rented within a reasonable distance of the School, i.e. from one to two miles. The duties of the assistant farmer calls for him to be at the barn for morning milking not later than five fifteen. To do that I think you will admit that he should live near the School..

I realize that last year you built a house for the carpenginee r,and that we are asking a lot to have another built this year. But if you can possibly do it I earnestly hope you will,,as then the housing problem for the male help,who are all married men will be settled for all time.

Hoping that you will give this matter your favourable condideration ,and that we will hear from you soon.

Yours very truly,

Rev. J. P. Mackay

Ottawa, February 22, 1934.

Reverend Sir:

I beg to acknowledge receipt of your letter of the 19th instant, in which you point out the necessity for the erection of a dwelling house for the assistant farmer at the Shubenacadie Indian Residential School.

No provision for this purpose has been made in the Appropriation for the fiscal year 1934-35, and it is extremely doubtful if the Department will be able to provide the necessary funds. However, you might again bring this matter to our attention about July first, next.

Your obedient servant,

A. F. MacKenzie,
Secretary.

July 19th. 1934.

No. 51-0-5

SCHOOLS BRANCH
JUL

Dear Sir:

On February 19th.1934 I wrote you concerning a dwell--ing house for the assistant -farmer, Mr. Parker. Your reply to t at letter on the 22nd. said that we might bring this matter to your attention again about the first of July. At the present time Mr. Parker is living in a small house almost two miles distant from the School and I do not ask him to be present for the morning milking. As has happened a morning now and then Mr. Cooper is unable to be present for morning milking and that leaves the barn work for the boys alone. Needless to say that things do not go well. As I said im the first letter if we had a dwelling for Mr. Parker then the housing problemn for the male help would be settled for all time.

Hoping that you will be able to have the house built in time for accupation this winter.

Yours very truly,

Rev. J. S. Mackay

Reverend Sir:

I beg to acknowledge receipt of your letter of the 19th instant, with reference to the necessity for building a residence on the Shubenacadie School property for the Assistant Farmer.

I regret that there are no funds available for the erection of this building during the current fiscal year. A note has been made of your request, and, if possible, funds for the purpose will be provided in the Estimates for the fiscal year 1935-36.

Your obedient servant,

Thos. McGookin

Rev. Sir:

I beg to acknowledge receipt of your letter of the 12th instant, with reference to the residence for the assistant farmer at the Shubenacadie Indian Residential School.

Provision has been made in our Appropriation for the current fiscal year for an expenditure of $1,000 for a residence for the assistant farmer and $300 for general repairs at the Shubenacadie Indian Residential School.

Please let me know the approximate cost of the materials that will be required for the assistant farmer's residence. Separate estimates should be given of the hardware, lumber, cement, window frames, etc.

If outside labour is required, you should let me know the number of men needed and their trade. In the event of outside labour being required, you might state the wages per day that will have to be paid.

On receipt of your reply, the matter will be submitted to the Honourable the Superintendent General and, following this, the necessary instructions will be given.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Shubenacadie Indian Residential School.

Shubenacadie, N.S.
April 22nd. 1935.

No. 51-0-5

Dear Sir:

In reply to your letter of the 16th. inst. with regard to the construction of a cottage for the Assistant Farmer; In regard to the style it will be the same as the houses on the property.

For the cost of material and those from whom it might be bought may I suggest the following:

Watson Smith, Shubenacadie, furnace $ 136.00 kitchen range $ 50.00, 85 bags cemment at 75, II thousand roofing shingles at $ 6.50, II thousand side shingles at $ 2.50, odd fitings for water pipe etc. Approx. $ 360.00

Spencer Bros. & Turner, Truro, Windows, doors, casings, flooring, spouting, stairs, inside finnish of D.Fir, and outside of clear pine. About. $ 400.00

Edward Kerr, Shubenacadie, for rough lumber, lumber yard about quarter mile from school, not on list, nearest on list about twenty miles distant. Cost $ 200.00

Stairs Son & Morrow, Halifax, wholesale house, water piping sewarge piping, nails shovels white lead and oil, set tubs, brick, Agents for N.S. Clay Works, L. E. Shaw. Possibly $ 200.00

Arthur & Conn, Halifax, electric wiring and fixtures $ 100.00

W.H. Burgess, Truro, plastering, $ 130.00

Prices are those taken from invoices for house built two years ago, so there may be some variation.

On account of the necessary farm work, the farmer and assistant will not be able to give very much time to the work, and it also should be taken into consideration the fact that when the last house was built we had about a dozen big boys, who were a great help with the excavation. Therefore we should like to employ at least two men to help with the excavation and cemment work. The rate of wages, thirty-five cents an hour.

Yours very truly.
Rev. J. P. McCarthy

MEMORANDUM:

The Honourable the Superintendent General,-

It is proposed to erect a small house for the use of the assistant farmer at the Indian Residential School at Shubenacadie, (Federal District of Hants-Kings), N. S. The greater part of the rough labour will be supplied by the school staff - all materials to be supplied by the Department.

Reverend Father Mackey, the Principal, has suggested that the materials be purchased from the following firms, as being the most conveniently located and having the quality of materials required:-

Watson Smith, Shubenacadie, N. S.:-

Furnace, kitchen range, cement, shingles, approximate cost = $360.

Spencer Brothers & Turner, Truro, N.S.:-

Windows, doors, casings, flooring, stairs and inside finish - approximate cost - 400.

Edward Kerr, Shubenacadie, N. S.:-

Rough lumber - approximate cost - 200.

Stairs Son & Morrow, Halifax, N.S.:-

water & sewage piping, brick, nails, etc., approximate cost - 200.

Arthur & Conn, Halifax, N.S.:-

Electric wiring and fixtures - approximate cost - 100.

W. H. Burgess, Truro, N. S.

Plastering - approximate cost - 130.

It will be necessary also, to employ two men to help with the excavation and cement work. The Principal states the rate of wages will be thirty-five cents an hour.

Will you please advise if it will be satisfactory to make the purchase of materials from the above mentioned firms or what other firms should be asked to quote and also advise regarding the labour to help with the excavation and cement work. The sum of $1,300 is available in the Appropriation for Indian Education for the current fiscal year for the erection of the house for the assistant farmer and for general repairs at this school.

Deputy Superintendent General.

Ottawa, June 7, 1935.

Reverend Sir:

With reference to your letter of April 22nd, last, regarding the erection of a cottage for the assistant farmer at the Shubenacadie Indian Residential School, I have to say that you may arrange to proceed with the work. The building should be of the same style and type as the houses on the school property. Purchase of the materials should be from the following firms:-

Watson Smith, Shubenacadie, N. S.:-

Furnace, kitchen range, cement, shingles, water & sewerage piping, brick, nails, etc.

Spencer Brothers & Turner, Truro, N. S.:-

Windows, doors, casings, flooring, stairs & inside finishes.

McCuskor Brown, Shubenacadie, N. S. :-

Rough lumber.

E.R. 3345

H. T. Archibald, Truro, N. S. :-

Electric wiring and fixtures.

W. H. Burgess, Truro, N. S.:-

Plastering.

Regarding the outside labour required for the excavation and cement work, I have to say that you may engage the services of Wm. Scott and Frank Austin, Shubenacadie, paying them the regular scale of wages for similar work in the locality.

You should obtain itemized accounts, in triplicate, covering the cost of all materials. These, accounts, you should attach to proper voucher forms, certify in the usual manner and forward to the Department. Cheques will then be forwarded to the firms from whom the materials are purchased.

The services of the school staff should be utilized as far as possible, for the labour in erecting the building

- and where

and, where necessary, for the hauling of supplies.

Proper time sheets should be kept by you, covering the services of the two men mentioned above, to assist in the excavation and cement work. These returns should give full details as to the days or hours employed and the rate paid.

It is noted, you estimate the total expenditure will be approximately $1,390. If possible, the cost of the cottage, complete, should be kept within this amount.

The work should be carried out under your supervision.

Your obedient servant,

T. R. L. MacInnes

Dear Sir:

Beg to let you know that we made a start on the cottage for the assistant-farmer yesterday. William Scott,who was to be one of the laborers hasa job which will give him steady work for months and so would not consider the few weeks work here. In his place is Wendaell Densmore,who is acceptable to the powers that be.

Since there has been no money advanced for wages I suppose I am to send on the time sheets to the Department and payment will be made directly to the men.

Yours very truly,

Shubenacadie, N.S.

Jan. 27th. 1926.

DEPT. OF INDIAN AFFAIRS
JAN 29 1926
RECORDS

No. 51-0-5

Dear Sir:

On account of building the house for the assistant farmer last summer it was impossible to attend to some repairs in the School. I refer especially to the boys recreation, wash and bath rooms. The walls to within six inches of the floor are the ordinary plaster, and it has been impossible for us to keep them looking half decent. The plaster in many places is broken and even the cork board back of the plaster has been torn away. The only solution I can see is to take the plaster and cork board out and replace them by rough faced brick.

Last year we were informed that there was an amount of $ 300. for repairs. As it was not used for that purpose I wonder if it would be available for this year. The brick would cost about thirty-five dol[illegible] a thousand and I would judge that we would need about six thou[illegible]. There would be no extra labor.

Will you please ley us know if we may figure on doing these repairs in the late spring or early summer.

Yours very truly,

Rev. J. P. Mackay

Ottawa, February 3, 1936.

Reverend Sir:

I have your letter of the 27th ultimo, regarding the repairs required to the boys' recreation room, wash room and bath rooms at the Shubenacadie Indian Residential School and requesting that authority be granted for an expenditure of $300 in supplying the material required to carry out the repairs.

In this connection it is noted you recommend that the plaster and cork board be removed and replaced by rough faced brick. If brick were installed, would you not consider that, owing to the rough surface, it would be dangerous to the pupils in their play? In any event, the Department will have no funds during the balance of the present fiscal year to authorize the purchase of the brick or other material for the purpose.

You might again draw this matter to the attention of the Department about the end of April, next, at which time we will be aware what funds, if any, will be available for carrying out the repairs at your school. While our Estimates for the current fiscal year contained an item of $300 for repairing ... $1,000, only, to erect the residence for the ...istant Farmer, I would point out that, as the cost of the ...idence has over $1,400, all funds provided for your school ... year have been utilized.

Yours truly,

A. F. MacKenzie,
Secretary.

EXTRACT FROM REPORT DATED MARCH 19, 1936, FROM DR. THOS. ROBERTSON, WHO IS INVESTIGATING CONDITIONS AMONG THE INDIANS IN THE MARITIME PROVINCES.

"I beg to submit the following report on my visit to the Shubenacadie Indian School: -

x x x x x

Rooms. Classrooms, dining rooms, kitchen, dormitories, locker rooms, lockers, wash rooms, recreation rooms, halls, storage rooms, etc. etc., all scrupulously clean and orderly with the exception of the walls of the boys' recreation room and the walls of the rooms on the south and east side of the building which through no fault of the school officials are I might say a disgrace in a building of this kind and certainly not a good example of the white man's standard of living to keep before the eyes of those Indian children.

Boys' Recreation Room. In this room the plaster extends to the floor. Consequently is all broken to a height of some four feet. To repair those walls with plaster would only be a waste of money. The plaster should be replaced with tile or brick work to a height of at least four and a half or five feet from the floor. When this work is being done provision should be made to allow the firm attachment of a clothes' rail on the wall

Walls of Rooms & Building. Apparently the brick used in this building permits the passage of water through them. Indications of this can be seen on all walls of the building but as the prevailing wind and rain storms are from the south and east it is on the south and east walls that the effect is most apparent. On the inside walls the plaster is either badly stained, off, or falling off in many places in every room and while not an expert, am satisfied can see signs of deterioration in the walls from the outside. As this condition has existed ever since the building was erected, it is in my opinion that unless immediate steps are taken either by paint or some other method that will prevent this seepage of water, irreparable damage will be done the building and a heavy expenditure incurred in the near future. "

EX'L.

Ottawa, April 2nd, 1936.

Reverend Sir,-

The Department is in receipt of Dr. Thos. Robertson's report with reference to his visit to the Shubenacadie Indian Residential School, in which he refers to the condition of the walls of the boys' recreation room and, also, the walls of the rooms in the south and east side of the school. I may say that he distinctly points out that this condition is not due to any laxity on the part of the school officials.

In the current year's appropriation, there has been provided the sum of $400 for repairs and improvements at the Shubenacadie Indian Residential School. Please let me have your report, stating in what manner you consider this amount should be spent. You should give an estimate of the cost of the material and the cost of the labour for the work which you recommend. As soon as your report is received, the Department will give it immediate consideration. It should be definitely understood, however, that no work must be done until you receive explicit instructions from the Department.

Yours truly,

A. F. MacKenzie.
Secretary.

EXD.

Reverend Sir,-

With reference to your letter of the 15th ultimo, you may arrange with Mr. W. H. Burgess to repair the plaster on the front and eastern side of the Shubenacadie Indian Residential School. It is noted that the cost of this work will be $185.00.

In writing you on April 20th, the Department neglected to give you the names of persons from whom you should secure quotations. In future, you should request us to supply you with this information before having any outside firm quote on work required.

Yours truly,

R. A. Hoey.
Supt. of Welfare & Training.

Borden, P.E.I.
March 19, 1936.

Dr. H.W.McGill,
Deputy Supt. General of Indian Affairs,
Ottawa.

Dear Sir

I beg to submit the following report on my visit to the Shubenacadie Indian School.

Pupils — Neat and clean in dress and appearance. Apparently happy and well nourished.

Rooms — Class rooms, dining rooms, kitchen, Dormitories, locker rooms, lockers, wash rooms, recreation rooms, halls, storage rooms, etc. etc., all scrupulously clean and orderly with the exception of the walls of the boys recreation room and the walls of the rooms on the south and east side of the building which through no fault of the school officials are I might say a disgrace in a building of this kind and certainly not a good example of the white mans standard of living to keep before the eyes of those Indian Children.

Boys Recreation Room — In this room the plaster extends to the floor consequently is all broken to a height of some four feet. To repair those walls with plaster would only be a waste of money. The plaster should be replaced with tile or brick work to a height of at least four and a half or five feet from the floor.

When this work is being done provision should be made to allow the firm attachment of a clothes' rail on the wall.

Walls of rooms & Building — Apparently the brick used in this building permit the passage of water through them. Indications of this can be seen on all walls of the building but as the prevailing wind and rain storms are from the south and east it is on the south and east walls that the effect is most apparent. On the inside walls the plaster is either badly stained, off or falling off in many placed in every room and while not an expert, am satisfied can see signs of deterioration in the walls from the outside. As this condition has existed ever since the building was erected, it is

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

is my opinion that unless immediate steps are taken either by paint or some other method that will prevent this seepage of water, irreparable damage will be done the building and a heavy expenditure incurred in the near future.

Farm, Farm Buildings, Stock & Machinery

All good in splendid shape and well cared for. It is my opinion that a further economy could be effected in the administration of this school were it possible to increase the farm by another one hundred and fifty acres at a reasonable figure and would recommend that this matter be looked into.

Automobile

In bad condition and unsafe for driving without a thorough overhauling. I have no hesitation in the interests of economy of recommending the turning in of this machine, as it can only be a bill of expense from now on.

Father Mackie & staff

Father Mackie is a man of splended executive ability and intensely interested in his work. He has gathered about him a staff apparently imbued with the same high ideals. I believe Father Mackie's advice and assistance will be invaluable in the drafting of any scheme for the better administration of Indian Affairs in the Maritimes.

Faithfully Yours,

(Sgd) Thos. Robertson

Dear Sir:

I beg to report that on March 17th I visited Shubenacadie Indian Reserve, Owing to flooded conditions of reserve could not get the information required and will have to return at a later date.

Mr. Wallace the Agent at that point asked my assistance in preparing his reports but when I attempted to do so found the former Agent had turned over to Mr. Wallace no records or information of any kind and that Mr. Wallace himself possessed very little of the required information.

As Mr. Wallace cannot secure this information without visiting practically every home on the reserve and as the roads will prohibit this for **probably** two weeks, I assisted in the filling in of what information he had advised the forwarding of them and at the earliest possible moment the securing of the information and the forwarding of a complete report. I pointed out to Mr. Wallace the necessity of holding down expenditures, advised him to check carefully all applications for relief pointing out that he being a new man the Indians would no doubt try to take advantage of him.

While I am satisfied Mr. Wallace is honest and will carry on the work to the best of his ability, yet he is timid, fearful of getting entangled with the law, lacks initiative, aggressiveness and in my opinion not at all suited for the position.

Yours very truly,

(Sgd) Thos. Robertson.

Dear Sir

I beg to report that on March 18th I arrived in Truro called on Mr. Fox, Indian Agent and with him visited the Reserve and school at that point.

We visited a great many of the Indian homes and I must say was very favorably impressed by the cleanliness and general activities in the homes.

While there are quite a number of old people as well as sick who are unable to support themselves on this reserve, among those who are able there seems to be a strong desire to support themselves and while I was there all were busy. That in the past white men have been engaged to build roads and do repairs on the reserve, is resented by the Indians and in my opinion justly so. There is no excuse for it, it only anta-gonizes the Indian and increases the cost of relief.

If there is no regulations making it obligatory for Agents to engage Indians (whenever possible) for all work on reserves, I believe there should be and that the regulation should be stricly enforced.

On our visit to the school we found fourteen pupils present out of an enrolment of 20. Several were at home sick with colds. The Teacher reported regular attendance.

The children appeared clean, attentive and fairly well nourished. The school room was in my opinion not so clean or neat as it should be, neither was the teacher so neat and tidy in her appearance. I drew this to the Agnt's

attention

attention and he agreed to speak to her.

Mr. Fox has had previous experience in social work, I understand. He has made a good start here, he wishes to help the Indian but realizes and also tells them they must help themselves. I shall be much disappointed if Fox does not make a big improvement at Truro.

Would advise keeping an eye on this now as a suitable person as a full time Agent should such appointment be made.

Yours very truly,

(Sgd) Thos. Robertson

Re grocery supplies. In my opinion these prices should be cut at least 10%. Talked with the Agent, he agreed. Think a letter from Dept. to him drawing his attention to necessity of securing better prices might assist him getting it adjusted.

DEPT. OF INDIAN AFFAIRS
MAY 7 1936
RECORDS

Dear Sir:

About the middle od April , received a letter from you concerning repairs. I was at the hospital at the time and now I cannot find the letter. There was an appropriation of $400.00 for repairs. I do not think that you intend this amount for the repairs necessary on the southern and eastern exposures,which were mentioned by Dr. Roberson in his report.

In a letter of Jan. 27th. I referred to necessary repairs in the boys recreation room,wash and bath rooms. My idea was to remove plaster and cork board for about five feet from the floor and replace with rough faced brick.To repair the plaster seems to me ,would be a waste of money.

I am not certain but the work could be done at a cost of between three and four hundred dollars.

Yours very truly,

The Secretary,
Dept. of Indian Affairs,
Ottawa.

May 12th. 1936.

No. 51-0-5

Dear Sir:

In reply to your letter of April 2nd. concerning the $ 400.00 available for repairs this year.

As regards the necessary repairs to the plaster and possibly the wood work on the south and east sides. The fact that the water comes in during a driving rain storm was reported to the Department before the building was actually occupied. This report was made by the Inspector, the late Mr. Wm.Crowell of Windsor N.S. The contractors ,at the time placed the blame on the sub-contractors who did the roofing. But the latter proved to the satisfaction of the former,by taking up part of the roofing ,that the leaks did not originate there. In company with the inspector I made the trip between the ceiling of the top floor and the roof to the front of the building about an hour after ~~thi~~ a heavy driving rain storm had started. We found that the water was not coming from the roof but through the wall. With the aid of flash-lights we saw the water running down the inside of the wall. The caulking done in in 1933 ,around the windows helped but did not illiminate the trouble. I was told that after a few years the pores would fill up and the building would become tight.(But it still has its sprees).

There are other buildings in the province which have the same trouble and I have talked the matter over with the superintendents of these buildings. None occupy such an exposed position as the building here and hence the trouble is not so extensive. The Capitol Theatre, Halifax, Famous players Corporation, built more recently than this school have had trouble of the nature. After spending considerable money a firm from Montreal,did a job for them that ended the trouble. (I will stop here till I get the name of that firm)

Monday May 18th.

The name of the firm is the Western Waterproofing Company, St. Catherine Street, Montreal. They have done a satisfactory job on the Capitol Theatre ,Halifax,and they guarantee their work.

As for the necessary repairs to the boys recreation room , toilet and wash rooms. Brick from the floor up five feet seems to me to be the only solution,as it would be a waste of money to repair the plaster.The work as I see it would require about six thousand brick at thirty dollars a thousand . About twenty bags of cementat seventy five cents a bag,with a few loads of good sand. The work itself could be done by the carpenter engineer. We would have to hire a truck for the brick and the sand,as the distance is too great for horses.

Yours very truly,

The Secretary,
Dept. of Indian Affairs
Ottawa.

August 13, 1936.

Memorandum:

Doctor McGill.

I beg to report that on Wednesday of last week I made an inspection of the Shubenacadie Indian Residential School. This building was erected in 1929 and reports have been received by the Department during the last year or so that the building was being damaged during periods of heavy rain.

The survey of the interior of the building showed clearly that rain was penetrating the south wall of the building and doing considerable damage to the plaster and interior finish. The prevailing winds are from the south-east and it appears that the south wall is the only one that is noticeably affected.

I might say that when this school was erected the interior of all the exterior walls was water-proofed with a composition of tar and asphalt. This was applied direct to the hollow building tiles which were used in connection with the face brick in the construction of the outside walls. The face brick used in the building is extremely hard and it is practically impossible for water to penetrate same. The examination shows, however, that in spite of these precautions the rain is being forced through the wall during a driving rain from the south-east.

With a view to determining the best way of remedying the existing condition I inspected several of the large buildings recently erected in Halifax and in all cases I found that they are experiencing the same trouble. The Nova Scotia Hotel, erected a few years ago by the Canadian National Railway, spent about two years endeavouring to eliminate the trouble on their south wall. The results were all unsatisfactory until the entire outside surface of the wall was waterproofed by the Western Waterproofing Company, who have a

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 4)

ARCHIVES PUBLIQUES
CANADA

POOR COPY

patented process for this class of work.

The Bell Telephone Co., the Capital Theatre, the Nova Scotia Light, Heat and Power Co., Bank of Montreal, Moir's Factory and other large buildings in Halifax have been waterproofed by the Western Waterproofing Company and the results have been entirely satisfactory, eliminating in all cases the penetration of rain through the walls.

It is extremely important that immediate attention be given to the waterproofing of the Shubenacadie School in order to safeguard the building, and I would recommend that arrangements be made immediately with the Western Waterproofing Co. to carry out this work. They guarantee their work for five years and have been strongly recommended to me by those who have employed them for this work.

The estimated cost is $2,000 and I have been advised that funds are available in the Vote for Indian Education to cover the cost.

Attached to my memorandum are five photos taken at the Shubenacadie School,-

No 1. - A general view of the front of the building, which is the southern exposure and the wall requiring waterproofing.

No 2. - A detail of the front entrance.

NOs 3 and 4. - Interior details of one of the classrooms on the south wall showing the damage to the plaster around the windows.

No 5. - A view taken from the steps of the School which shows the three bungalows built and occupied by male members of the staff of the school.

Mr. Gurney Orr,
Dept. of Indian Affairs,
Ottawa.

Dear Mr. Orr:-

Hope you had a good trip back to Ottawa. The night you left a heavy shower of rain levelled the beautiful field of oats we had in front of the school. The next day I looked into the matter of the floor in the driveway of the barn and found it completely rotted. You could take a screw driver and push it through almost all of the joists. We will have to replace it before we can thrash what grain we have or put in our roots. I am writing to the Secretary asking if the Department could obtain three rails for us. A fellow in the village had three rails; he would not sell them but said we could have them since we need them immediately, but he expects us to replace them for him, as he plans on doing a similar job on his barn in the near future. The Department, I hope, will help us out because I could not get them from the railroad authorities.

I am sorry that you could not get into the root cellar and see the conditions there. For the job, we will require 25 pieces, 15' x 3" x 12", and with 3" flooring making a single floor, will run into about 1750 ft. All told the cost will be heavy. Do you think there is any chance that the Department would pay for material, including about five bags cement? The lumber will cost between twenty and twenty-two dollars a thousand.

Yours very truly,

J.P. Mackey

INTER-DEPARTMENTAL CORRESPONDENCE

PRINTED IN CANADA

Shubenacadie, N.S. August 29th, 1956.

YOUR FILE	SUBJECT	OUR FILE

Rev. J. P. MacKay,
Indian Residential School,
Shubenacadie, N.S.

The following letter was received from our Superintendent Mr. W. R. Fitzmaurice, Halifax, N.S. dated August 27th. His File 4030-242

" On the 18th inst three 33-ft 80# Rails were delivered to Father J.McKay - Principal of the Indian School at Shubenacadie under Order S-9005.

The weight of this rail 2640 lbs @ .02# per lb amounts $52.80.

Will you please arrange collection and forward to me"

Yours truly,
A.R. Campbell
Agent, C.N.R.

September 2nd, 1936.

The Secretary,
Department of Indian Affairs,
Ottawa

No. 51 - 0 - 5

Dear Sir:-

Concerning your letter of August 18, 1936, with regard to obtaining three discarded rails for the repairs to driveway floor in the barn:

Before receiving your letter I noticed that in the railroad yard here was a flat car partially loaded with old rails, etc. Thinking the time opportune I got in touch with the track master for this section at Halifax. He informed that he would consult the authorities at Divisional headquarters at Moncton. Within a couple of hours I had word from the Station Agent here that I was to get the rails from the car in the yard. We did that afternoon.

I was under the impression that like some others I know that we would have the loan of the rails. I know others who got rails and never paid anything for them. However, the Station Agent showed me a letter of which the enclosed are copies, and it looks as if the rails are going to cost plenty. Will you please let me know if the matter will be cared for by the Department or will it be paid from school funds.

Yours very truly,

Rev. J. P. Mackay

Ottawa, September 14, 1936.

Dear Sir:

Reverend J. P. Mackey, Principal of the Shubenacadie Indian Residential School, Shubenacadie, N.S., a government-owned institution, obtained three discarded rails which he required for use in repairing the driveway floor in the barn at the school. He forwards to the Department the following report regarding the matter:-

> "I noticed that in the railroad yard here was a flat car partially loaded with old rails, etc. Thinking the time opportune, I got in touch with the track master for this section at Halifax. He informed that he would consult the authorities at Divisional headquarters at Moncton. Within a couple of hours I had word from the Station Agent here that I was to get the rails from the car in the yard. We did that afternoon."

Father Mackey was under the impression that the rails would be turned over to him without cost. He forwards a communication he received from the Agent at Shubenacadie - copy enclosed - billing him for the rails. As this school is government property, it is thought it would be possible for the authorities of the Canadian National Railway to transfer the rails without charge therefor, and I submit the same for your consideration. In the event that it will not be possible to comply with the request that no charge be made, I shall be pleased if you will forward an account, in triplicate, covering the cost of the three discarded rails.

Yours truly,

A. F. MacKenzie,
Secretary.

Ottawa, September 14, 1936.

Reverend Sir:

I have your letter of the 2nd instant, enclosing communication you received from the Station Agent, Shubenacadie, N. S., claiming payment for three discarded rails supplied you for use in repairing the driveway floor in the barn at the Shubenacadie Indian Residential School. It is thought that the Canadian National Railway Company might turn over these rails to the school without charge therefor, and we are communicating with the Superintendent, Eastern Division, Moncton, N. B., placing the matter before him for his consideration. When we hear from him, you will be further advised.

Yours truly,

A. F. MacKenzie,
Secretary.

Re: School - Shubenacadie

Dear Sir:

We have examined the walls of your School at Shubenacadie and find that there is considerable leaking all over this building but particularly on the southeast exposure. There are a considerable number of settlement cracks but think we are safe in assuming that these are not progressive. The main leaks appear to be along the cleavage lines between the brick and the mortar. A number of bricks will have to be replaced which were broken due to settlement. We can quote you on this job a unit of .... twenty cents ($0.20) per square foot solid area, plus .. one hundred & fifty dollars ($150.00) for moving on and off the job. If the whole building is waterproofed this moving sum could be absorbed.

This price includes the supplying of brick where necessary and all costs in connection with the job. We could commence work immediately on receipt of order, and complete the whole building within one month.

METHOD OF PROCEDURE

We would repoint the building where necessary, replace disintegrated or broken brick, thoroughly clean the surfaces and waterproof by scrubbing into the surfaces our Resto-Crete material. This material consists of finely ground cast iron, cement and certain expanding chemicals which on setting fill the pores thus rendering the areas waterproof

GUARANTEE

We would guarantee the areas treated to be free from water penetration for a period of five (5) years from date of completion, contingent upon roofs, roof flashings and caulking being in good shape and properly maintained by others during the term of said guarantee, and also contingent upon there being no further settlemant taking place.

Dear Father Mackey,-

With reference to the repairs required to the interior of the Boys' Recreation Room at the Shubenacadie School you may arrange to have the interior of the Recreation Room walls bricked up as we discussed on my recent visit to the school.

The work is to be carried out under the direction and supervision of your Engineer and James Thompson of Elmdale and Addison Miller of Shubenacadie are to be employed as bricklayers.

The brick required is to be purchased from the Nova Scotia Clay Works near Elmdale.

If you require funds for the payment of labour these will be sent to you on application.

Yours very truly,

R. Gurney Orr.
Architect for the Department.

Dear Father Mackey,-

For your information I am enclosing a copy of a letter which is today being sent to the Western Waterproofing Company, from which you will note that they have been authorized to proceed at once with the waterproofing of the front wall of the school.

There are not sufficient funds available at present to waterproof all of the remaining walls, but after they commence work on the front wall you can have them examine the remaining walls and it might be possible to find funds to waterproof the portions where leaks have occurred.

I will be glad to have you drop me a line and let me know when they commence work.

Re: Indian Residential School - Shubenacadie, N.S.

Dear Sir:

Yours of the 7th instant received, we have a report from our Superintendent at Shubenacadie and estimate for an additional five hundred dollars ($500.00) we could complete all the parts where bad leaks occur. This would be at our same unit rate as previously quoted.

Our men will finish at Shubenacadie early next week so it will be necessary to have this further order in our hands not later than Tuesday, Oct.13th.

Our Superintendent reports that these other areas are suffering very considerable damage and that the brick is beginning to spall, and that it will only be a matter of a few years when very extensive repairs will be necessary. We think you will be well advised in having these additional areas protected.

Re: Indian Residential School - Shubenacadie,N.S.

Dear Sir:

Regarding the extra work which we said we thought would cure the trouble at the above school, the actual area of this east wall, which is the worst, is 2790 sq.ft. We decided that we would take this at 2500 sq.ft.

In addition to this Father MacKay pointed out to our foreman that the remaining parapets of the school and the parapets of the Chapel have some very bad leaks in them and are suffering very considerable damage. We dislike very much to leave a job partly finished. We would therefore like to waterproof the joints of these parapets so as to leave the job at least in a safe condition. The cost of this parapet work would amount to about $300.00. You have allowed us $150.00 for travelling expenses on the job, we would be willing to absorb this $150.00 if you would add an additional $150.00 to allow us to take care of the remaining parapets of the school and the parapet walls of the Chapel.

After this work is completed, we believe that your school will be in fairly good shape and it will certainly help a lot on the Chapel, and perhaps cure any serious trouble.

Yours very truly,

November 12, 1936.

Mr. J. D. Sutherland,
Ass't. Supt. of Education,
Department of Indian Affairs,
Ottawa.

Dear Mr. Sutherland:-

You will recall that during your very pleasant visit to our Institution last summer, you made the magnanimous offer of approving the purchase of a hot water sterilizer for the third floor. Hot water in the taps is quite rare for the summer months, and care of the sick means travelling over two flights of stairs for even a cup of hot water.

In coming for treatment Doctors have to bring their own instrument sterilizer and I felt that you might consider the approval of the model shown in the accompanying cut.

Father Mackey would not approve the purchase until he has the written assurance that you are backing the proposal. I guess Father thinks that I was trying to impose on your good nature during his absence.

The No. 2411 at $133.00 would be ideal for us. so if you give your consent will you please return cut, with your approval.

Trusting that all goes well with you, and that we shall have the pleasure of a visit next year, I am

Sincerely yours,

Sister Mary Charles

Re: Indian Residential School
Shubenacadie, Nova Scotia

Dear Mr.Orr:

We are sending a corrected invoice on our work completed in Shubenacadie. After all the heavy rains recently there was apparently no trouble from leakages on the walls which were not waterproofed, however, the rear of this School, also the east wall of Chapel, certainly should be waterproofed next spring. The caulking which we did in the joints of the coping has given considerable protection - there was undoubtedly a great deal of water coming through these joints.

We trust that you will be completely satisfied with our work and that we may have the pleasure of working with you in the future.

Yours very truly,

WESTERN WATERPROOFING COMPANY

Dear Father Mackey,-

I am enclosing herewith the account for the water-proofing of the Shubenacadie Indian Residential School recently carried out.

If the work has been satisfactorily performed I would ask you to please certify to this account and return it to me.

I would be glad to have a line from you as to the progress that is being made in the boys' recreation room and also the results of the water-proofing.

Yours very truly,

R. Gurney Orr.
Architect for the Department.

Re: Indian Residential School, and Chapel
Shubenacadie, Nova Scotia

Dear Sir:

Following our letter of the 18th instant recommending waterproofing of additional areas on the above School and Chapel, we have just received our final report from our Superintendent, and he states that on the other walls the costs would not be so high due to the fact that there will not be as much repointing necessary, and only a few bricks to be replaced. We can, therefore, quote you a price of fifteen cents per square foot .....$0.15 per sq.ft. for these areas.

This work could not be commenced until next spring, but we think you would be very well advised in having this work done early next summer.

Yours very truly,

WESTERN WATERPROOFING COMPANY

Indian Residential School,
Shubenacadie, N.S.
November 20th, 1936.

DEPT. OF INDIAN AFFAIRS
NOV 23 1936

Dear Sir:-

I beg to submit the following concerning the fire which we had here on November 19, 1936.

About 11.45 A.M., a Sister came to my room at the time I was in the bath-room, and shouted to me that there was a fire in the boiler room. Within a very short time I was in the boiler room, the place was full of smoke, and I could see flames behind the boiler near the outside wall. I got the hose off the rack and ran with it to the garage to get away from the smoke. By that time, Father Brown, Stewart Cooper and some of the bigger boys were there. Asking them to get the water turned on, I left to come up to the office, telephoned to the Central Office and asked her to get us what help she could. I went back to the boiler room but they could not get water through the hose. We found out afterwards that any sharp bend in the hose would prevent the water from coming through. Seeing that we were not getting anywhere with that hose, I came back to the first floor and put the hose from that rack out the window in order to get at the fire, which was greatest in the corner made by the Chapel wall and roof of the coal bin. In the meantime, McLeod had gone to the pump house, started the second pump, and stepped up the pressure. We got very little water from the hose on the first floor - no pressure. (Found out afterwards that the bushing that the valve stem turns through was cracked and would allow stem to turn without opening plunger.

While this was going on, a great crowd had arrived from the village, including the two members of the R.C.M.P., and all the buckets in the house and other utensils were used. It was not very long before the fire in the boiler room was just smoldering. But the fire had made its way up alongside the small crack between the sheet metal covering of the boiler room, at a point where the sheet metal meets the I beam, and worked its way along the I beam into the two-by-six which rest on edge on the I beam. The only way we could get at it was from above, on account of the sheet metal being nailed to the two-by-six, and this necessitated cutting into the floor of the Chapel. By one o'clock it was a matter of locating those places between floors which were slowly burning.

The fire wood was put in the boiler room sometime during the month of June, when there was no fire in the boiler, and there is no doubt but that what was left of it, should have been removed when the

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

fire was started in the boiler. Nevertheless, there has been wood in the same place year after year and no fire. There are some things which lead me to believe that the fire was not started from any spark from the boilers. It has always been a problem to prevent boys from making their way to the boiler room, in order to have a smoke, and it has happened that whatever they should be smoking, would be thrown away, should anyone come along.

As far as we can find out at this time, Gilbert Francis was told to shake up the fire about ten forty-five. At eleven o'clock, Ed McLeod, carpenter-engineer, went to the entrance of the boiler room to get the boy, but he was not there and he did not notice any fire at the time. Gilbert Francis was the only boy who was supposed to be in the boiler room that morning. There were a few boys at the barn, but as yet I have not had time to check up on them.

Before closing I wish to express my sincere thanks to the men of Shubenacadie for the ready response and for their strenuous efforts to help us out of a most serious situation.

Yours truly,

Rev. J. P. MacKay

Indian Residential School,
Shubenacadie, N.S.
November 23rd, 1936.

Mr. E. Gurney Orr, Architect,
Dept. of Indian Affairs,
Ottawa

Dear Mr. Orr:-

As for the work on the boys' end of the building, we got the bricklayer, Addison Miller, started on the 31st of October. Mr. Thompson, the other bricklayer, was working and we could not obtain his services. With only one bricklayer at work, the progress was slow. So I got in touch with Mr. Purdy, M.P., and he told me that he would get two men for me. They did not arrive at the time ~~they~~ stated they would, but he telephoned to say that they would be along the first of the next week. Something must have happened for they did not come. The Western Waterproofing people had two bricklayers among their men, and as the weather was such that they could not work outside, I took the liberty of employing them at the rate of pay they were receiving from the Company, viz., fifty-five cents an hour.

With the exception of some trimming up by McLeod, the work was finished on November 19th, the day of the fire. I think we have had a good job done, although the cost will be in excess of what I thought it would be. Perhaps we here can absorb the wages and help out a little, roughly about $150.00. I am hoping that you will come to look over the fire damage and see the other work also.

Yours very truly,

Rev. J. P. MacKay

Leaks from Faulty Joints and Oth

The main cause of the disintegration of concrete and masonry is water penetration, which washes out the salts from the masonry and causes fracture from frost action, and corrosive action from the acids in the air. Also, in the case of reinforced concrete structures, the water corrodes the reinforcing steel resulting in swelling of the steel and consequent fracture.

18% to 20% of a brick wall surface consists of joints

It follows then that faulty workmanship, shrinkage and disintegration of mortar cause about 75% of all cases of leaky walls, and it is no wonder when as much as 20% of the surface is subject to mortar shrinkage and disintegration.

Rain finds easy entrance, for even during a gentle shower there is a measurable film of water constantly flowing over an exposed wall. But when driven by a strong wind, the flow of water into the cracks is almost as if the water flowed over a horizontal surface.

In dry cold weather the heat loss through the openings in brick joints is a very serious factor. In wet weather the walls lose a large part of their insulating value.

THE PURPOSE OF RESTO-CRETE

It is the purpose of Resto-Crete Material and Service to make walls a "uniformly dense face of masonry," impervious to the entrance of moisture, but permitting of wall "breathing," mentioned later.

If the material of the defective masonry wall is dense and highly resistant against moisture, then a treatment of the **joints only** will be necessary.

If the bricks, stone or other material are soft, porous and show noticeable signs of flaking, checking, or other evidence of water penetration and disruption by freezing or other disintegration, then an **over-all treatment** is advisable.

All concrete and masonry structures show some disintegration in the course of years. This may be very slow for a great many years, then suddenly accelerate. The location of the cause of disintegration and determination of the cure is the work of a specially trained organization.

Thorough examination is of first and vital importance.

WHAT WE DEMANDED OF RESTO-CRETE

Any material and method of restoring disintegrated masonry, to be efficient, must conform to the specifications, laid down more than 75 years ago by a group of scientists, for the requirements of waterproofing materials:

1. The material must penetrate easily into the masonry surface and remain there on drying.
2. The material must not concentrate on the surface so as to form a hard crust, but at the same time it must harden the surface sufficiently to resist erosion. (It must densify the surface by filling the holes and must subsequently become hard).
3. The material must prevent the penetration of moisture, and at the same time allow moisture to escape. This is possible because water as liquid will not penetrate where as vapor it will escape. Furthermore it is possible for a wall to absorb a proper amount of moisture without admitting seepage. This "breathing" of a wall is necessary to prevent disintegration or rotting of the material internally. This is probably the most important consideration of a waterproofing.
4. The material must not discolor or in any way alter the original appearance of the surface.
5. The material must expand and contract uniformly with the surrounding surface so as not to cause flaking.
6. The material must be non-corrosive and harmless in use.
7. The material should retain its preservation effect indefinitely.

Resto-Crete Embraces ALL the Requirements of a Satisfactory Job

When the foregoing specifications for waterproofing materials were laid down, the scientists went beyond the available materials of their day. Some materials accomplished a part of the specifications but none accomplished ALL of them. It was only by making a long study of the merits and demerits of various materials that a compound of materials was discovered that fulfilled ALL the specifications.

RESTO-CRETE MATERIAL and

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 4)

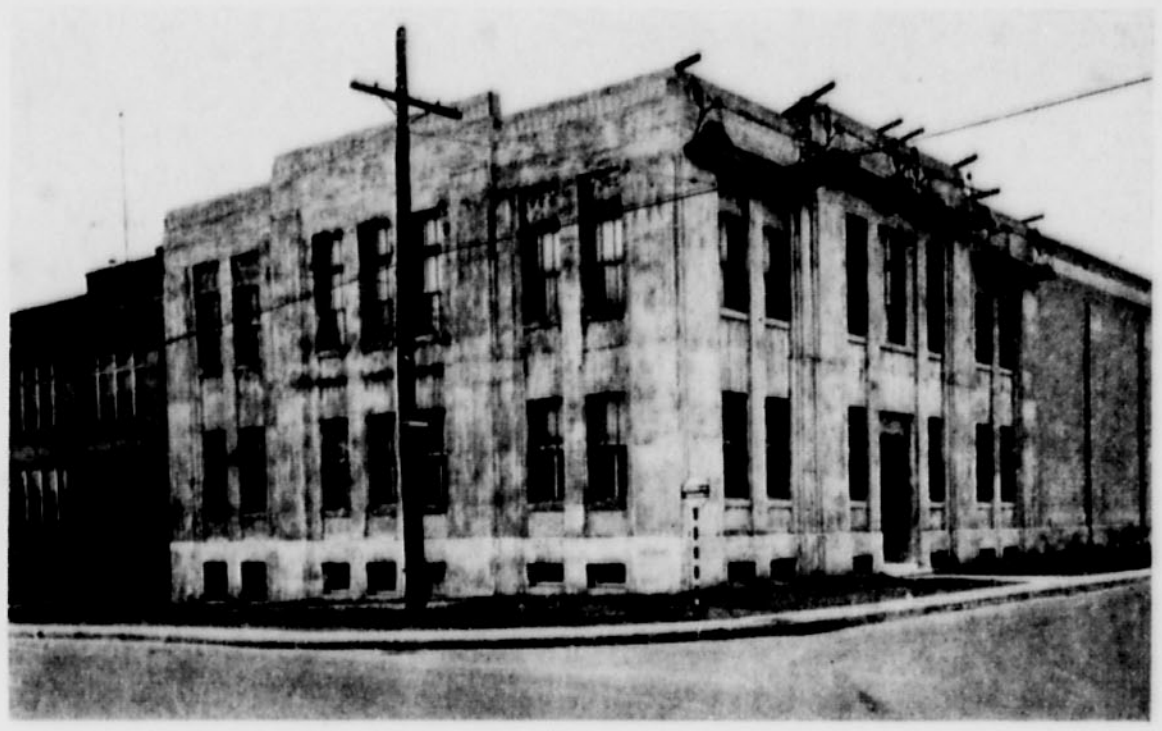
PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

...er Causes Stopped Permanently

Resto-Crete Material is guaranteed to accomplish ALL the requirements of a satisfactory job.

Resto-Crete Material penetrates without concentrating on the surface. It is impervious to seepage but sufficiently receptive to permit the required ingress of air and egress of vapors to insure proper wall breathing. It not only will not discolor a wall, but it perfectly identifies itself with the material of the wall in color and texture, and adds density and permanence. Its coefficient of expansion is made identical with the wall in which it is incorporated, when properly handled. It forms no skin or crust to crack, no oil to dry out is used, no shrinkage of mortar. Resto-Crete does not mar but actually improves the appearance of a building.

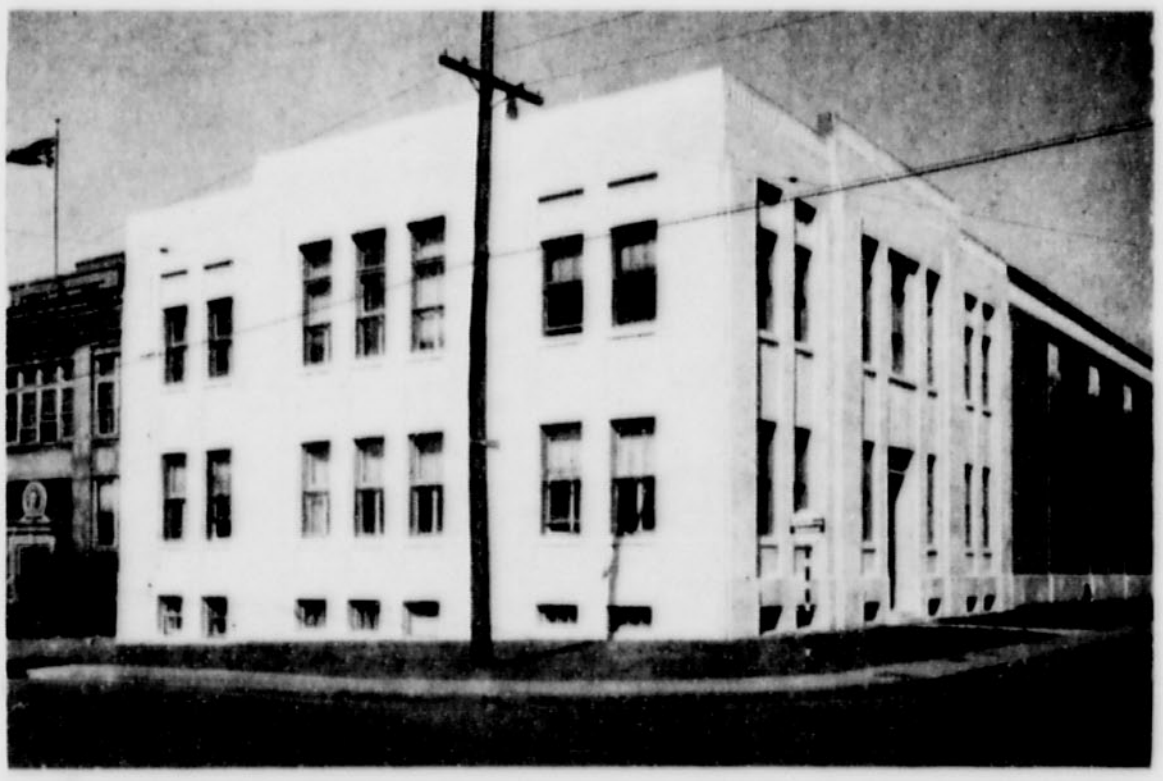


BEFORE TREATMENT — Associated Screen News Building, Montreal.

RESTO-CRETE SERVICE

The Western Waterproofing Company for twenty-one years has maintained an organization of specially trained men who have devoted their lives to the solving of all types of waterproofing problems. It was only after Resto-Crete was thoroughly time-tested that it was offered to the public.

The Western Waterproofing Company's Service is found not only in its material, but in its trained men. They are available for a thorough analysis of your water problems. They are capable of correcting the faults efficiently and permanently by the Resto-Crete Method.



AFTER TREATMENT — Beauty, protection and permanence given monolithic reinforced concrete structure without added plaster or skin coat. Building designed by the Engineering Staff of the Canadian Pacific Ry. Co.

FOR PRESERVATION AS WELL AS RESTORATION

Many architects insure themselves against water troubles that too often discredit a splendid job, by specifying Western Waterproofing Company's RESTO-CRETE treatment for the exterior walls, before the building is turned over to owners.

Efficiency is best served by using that system which meets **ALL the requirements of a perfect job.**

Kinds of Structures

Resto-Crete is applicable to brick, stone of all kinds, concrete, stucco, concrete block, Haydite block, etc., The Resto-Crete Material comes in eight standard colors and in white and black.

No temporary calking, pointing or painting can approximate the lifelong satisfaction to the owner of a building waterproofed by Resto Crete. **Once done, it is permanent.**

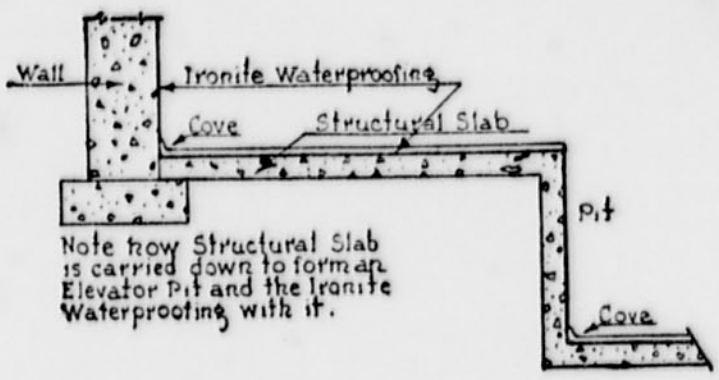
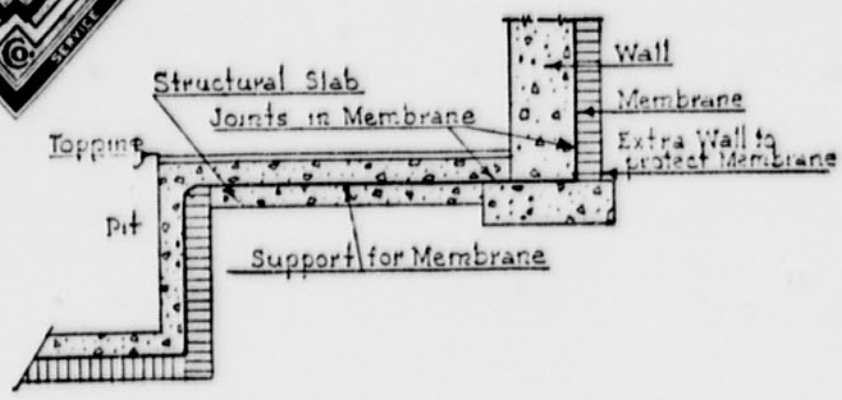
A Comparison of Waterproofing Methods

Showing the

Real Economy of the Western Waterproofing Company's System Using Ironite





With Ironite

No Joints or Seams.

Ironite Coating Can Be Punctured and Easily Repaired.

A Leak Can Be Immediately Seen and Remedied.

No Protecting Wall Required.

No Extra Excavating or No Back Filling Required.

No Supporting Floor Slab to Carry Waterproofing Required.

Can Brace Outside Forms from Inside. This (in Some Instances) Effecting Large Economies.

Can Be Applied to Wet Surface and Under-Water Condition.

Ironite Applied in One Operation After Walls and Floors Are in Place—Thus Avoiding Any Delays in Construction. Applied Exclusively by Our Own Experienced Mechanics.

With Membrane

Many Joints Which Have to Be Carefully Made.

A Punctured Membrane Is Difficult to Repair.

If Leaks Develop There Is No Telling Where They Come From.

A Protecting Wall Is Required.

Extra Excavation and Back Filling Is Required.

Necessary to Lay Floor Slab to Support Membrane.

Impractical with Membrane System.

Impractical with Membrane System.

Membrane Applied in Three Operations: (1) Footings; (2) Walls; (3) Floors—Thus Necessitating Some Delay in Construction Applied by Any Roofer Often Inexperienced as to Waterproofing.

Are Not the Odds Greatly in Favor of Western Waterproofing Co.'s System?

Entirely Aside From Cost of Actual Waterproofing, Is There Not a Large Saving in Construction Costs?

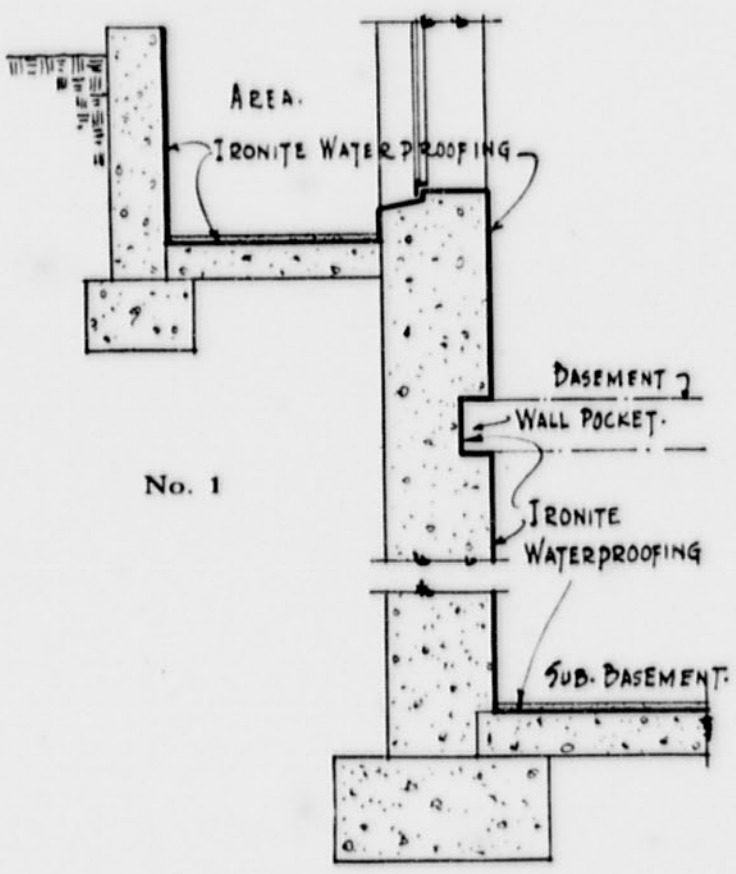
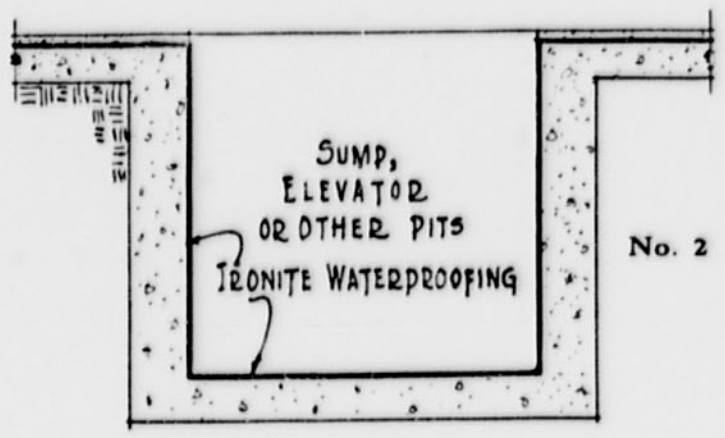
WATERPROOFING DETAILS

A few details of special problems common to waterproofing are shown here diagrammatically, but there are many others too numerous to cover: For example, waterproofing under interior columns; designing watertight vibration joints for a press foundation in a newspaper building; waterproofing cable pits with fibre ducts; suspended slabs as in sidewalks and roofs; expansion joints; these and many more. It is our hope that you will communicate with us on any problems whether more or less involved than these, that we may put our experience at your disposal. Due to the great number and variety of our installations, we have successfully overcome almost every type of waterproofing problem.

Diagram No. 1 shows the manner of carrying the waterproofing into the wall pocket for the basement floor on a multi-basement building. It also indicates how the waterproofing is made continuous when areaways and areaway windows are encountered.



No. 1



No. 2

No. 2 is a typical pit waterproofed. Note here that the floor of the pit has no topping over the waterproofing, as no wearing occurs here. On the main floor level, however, the topping appears and is needed for wear.

No. 3

No. 3 shows the best way for waterproofing interior stairs by carrying the treatment under and behind the stairs. If necessary the treatment could be applied to the treads and risers of the stairs, but for economy and best results we recommend doing the waterproofing as shown.

Services

All work is done exclusively under contract and guaranteed to be and remain watertight. We sell no materials. Each office has a corps of trained mechanics working under the supervision of an engineer.

Contracts are taken for Treating Structures of Concrete, Brick or other Masonry, either old or new. Architects or engineers are invited to call our Waterproofing Engineers in for consultation to assist them in the solution of problems involving Waterproofing, Dampproofing, Oilproofing, Restoring Disintegrated Concrete, etc.

Method Used

This system involves the use of Ironite Waterproofing, which is a finely pulverized gray iron containing chemicals. Upon brushing this on the walls with the addition of water, the particles are lodged in the surface pores. Due to the chemicals, rapid oxidation of the iron takes place with the resultant expansion of the iron particles. This swelling completely fills the surface pores and seals them against leakage. Sufficient coatings are applied to thoroughly fill all pores. The early coats make a filling or stuffing for the surface pores, and the succeeding coats form a highly oxidized iron filament. This iron oxide surface is extremely dense and impervious, not alone to the action of water, but also to oils, dilute acids, etc.

The treatment is applied on either the pressure side or the side opposite. In the latter case it is impossible to force the waterproofing away from the wall as the particles inside the surface pores have expanded therein and are an integral part of the structure.

Is Useful for

BASEMENTS, PITS, TUNNELS, SWIMMING POOLS, WATER TANKS.

❖

OIL TANKS; PROTECTING CONCRETE from GREASE, FATS, ETC.

❖

RESTORING DISINTEGRATED CONCRETE; FOR PRESERVING CONCRETE FROM DISINTEGRATION

Advantages of This Method

Our system is a positive one, requiring no assistance from integral compounds in the concrete. The bond secured between the waterproofing and the structure is so perfect that it will resist any hydrostatic pressure the structure is capable of withstanding. See comparison shown on front page and note the large saving in construction cost.

Character of Work

WATERPROOFING — Basement walls, floors, tunnels, powerhouses, subways, pits, swimming pools, reservoirs, dams, retaining walls, viaducts, etc.

TREATMENT—Fuel oil tanks, gasoline and lighter oil tanks, molasses tanks, pickling vats, unusual oil containers, etc.

ACIDPROOFING—To resist soaps, greases, fats, etc. Treating floors and walls of packing houses, soap factories, tanneries, dairies and other structures, requiring protection against dilute acids.

RESTO CRETE—A process for restoring disintegrated concrete and preserving it from further disintegration.

Specifications

It is our preference to write a separate specification for each specific job. As a general specification the following may be used:

BASEMENTS, TUNNELS, PITS, ETC.—All enclosing walls and floors and other surfaces in contact with the earth are to be waterproofed on the inside surfaces by the WESTERN WATERPROOFING COMPANY (fill in here street and town address of nearest office) according to their system of waterproofing (using Ironite), and to be covered by their written guarantee.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

SPECIFICATIONS

ALL SURFACES coming in contact with the earth shall be Waterproofed on the inside by the Western Waterproofing Company; the Waterproofing must be applied by their mechanics and under their supervision. All surfaces Waterproofed shall be guaranteed by the Western Waterproofing Company to remain waterproof and watertight for a period of five years from date of completion.

Concrete Walls

All outside walls and areas shall be waterproofed in accordance with the Western Waterproofing Company's method—on the inside surfaces from floor level to one foot above outside finished grade level. This work shall be done before partitions or other obstructions are installed.

Inside walls and column footings extending through the basement slab shall be waterproofed or dampproofed as may be required—upon both sides from the top of the footings to the finished basement level.

Brick and Stone Walls

All outside walls and areas shall be waterproofed according to the Western Waterproofing Company's System, on the inside surface and over this shall be applied a plaster coat of thickness as required. This plaster coat shall contain no lime. All partition walls placed on top of basement floor slab shall have the waterproofing applied to this basement floor slab before walls are placed.

Floor Waterproofing

After the rough slab has been poured and sufficiently set it shall be thoroughly cleaned and waterproofed, according to the Western Waterproofing Company's

Floor Waterproofing—*Continued*

System and finished with a bonding coat for surface topping.

"Immediately before the topping is applied wash this surface well and apply a bonding coat of two parts cement and one part IRONITE mixed to a consistency of a thin whitewash and thoroughly brushed into the slab. Apply finish under Western Waterproofing Company's supervision."

Concrete Swimming Pools, Tanks, Reservoirs, Etc.

After walls and floor have been poured and are sufficiently set, the entire surface shall be waterproofed in accordance with the Western Waterproofing Company's System of waterproofing.

Tunnels

After all forms are removed, all inside surfaces shall be waterproofed in accordance with the Western Waterproofing Company's System of waterproofing.

Pits for Elevators, Engines, Pumps, Etc.

After all forms are removed the inside surfaces shall be waterproofed in accordance with the Western Waterproofing Company's System of waterproofing.

A Few of the Installations made by the Western Waterproofing Company

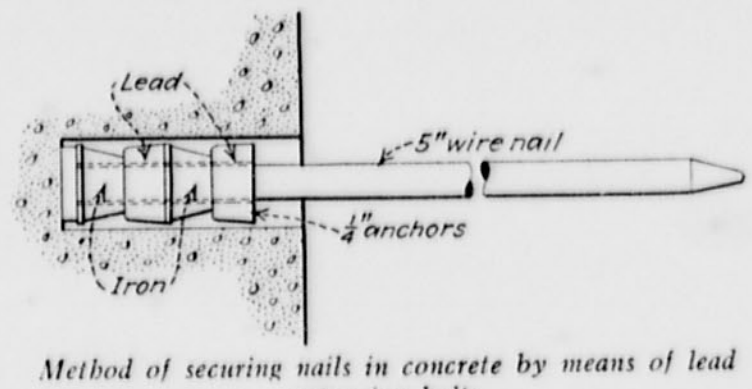
Lead Expansion Bolts for Montreal Dock Repairs

LEAD expansion bolts have been used in an interesting new way by The Western Waterproofing Co., Montreal, Canada, on work just completed for the Harbor Commissioners of Montreal. The harbor dock walls of the Bickerdike Pier had become badly cracked and broken up through years of wear and tear of shipping and action of the elements. It was decided to repair the dock by completely resurfacing with Gunite and in this operation "Cinch" Expansion Bolt-Anchors played an important part.

All soft, loose and defective concrete was first cleared from the wall face by cutting away with pneumatic hammers and wire-brushing. A clean, solid, toothed concrete surface resulted, to form a sound base for and a solid bond with the Gunite. The amount of defective material removed varied, 2 in. being the minimum. The roughened surface was then given a coating of powdered cast iron mixed with water and an oxidizing agent to prevent the rusting of wire mesh and anchor-bolts by the penetration of dampness or water from the upper dock surfaces, and to bond the Gunite to the structure.

Holes 2 in. deep and ½ in. in diameter were then drilled in the surface 20 in. apart and staggered. A ¼ in. wire nail, secured by calking in two separate ¼ in. plain unit "Cinch" Expansion Bolt-Anchors (described in detail in LEAD, January, 1933), made and supplied by Canadian "Cinch" Anchoring Systems Limited, Montreal, was inserted in each hole with the nail ends projecting about 3 in. Steel mesh having 2 in. square mesh made of No. 10 gauge wire was placed over the nail ends which were then bent up and over, securing the mesh firmly to the wall. Gunite was then sprayed



Method of securing nails in concrete by means of lead expansion bolts.

on and before setting hard was smoothed off and corners rounded, completing a highly satisfactory and permanent repair job.

As can be seen from the sketch, lead expansion bolt-anchors utilize the principle of expanding one or more lead alloy cone rings within a hole by calking them over iron cones placed base down on the head of a bolt. The anchorage is also used to anchor the threaded end of the bolt in the hole by using the iron cone tapped with a standard machine bolt thread of any size. They are used for all types of anchorages in concrete and masonry, for installing machinery, motors, shafting, pipe lines, theatre seats, and for electrical, plumbing, heating and ventilating work.

Three steps in re-facing Montreal docks. AT LEFT, *inserting nails secured by lead expansion bolts in concrete;* CENTER, *spraying gunite over steel mesh held by nails;* RIGHT, *the new finished surface.*

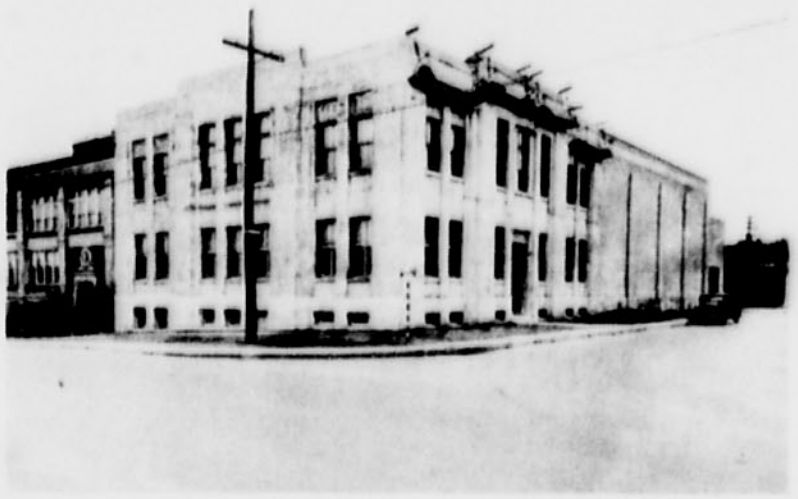
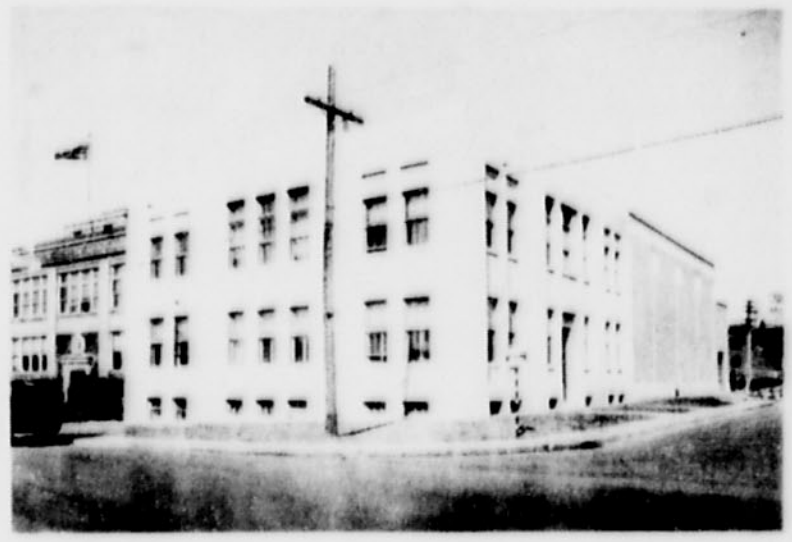
THE RESTO-CRETER

A Message From the Research Division,
Western Waterproofing Company, Detroit

Vol. 1. No. 2
Jan. 15, 1936





At first glance the two pictures above would hardly seem to show the same building, the one having the appearance of a typical concrete structure, the other suggesting the grace of a beautiful stone building. Yet they are the same; the structure being the new addition to the Associated Screen News Building, Montreal, Quebec. The Architects were J. W. Orrock and N. B. Reardon of the Canadian Pacific Railroad, and the contractors were the A. Janin Construction Company. The office in the foreground is of monolithic concrete, and was subsequently treated with a light colored RESTO-CRETE.

Monolithic construction is relatively inexpensive; further, it is admirably suited to the modern tendency in design. However, in the past, the great difficulty has been that concrete surfaces are soon pitted and corners broken off if left exposed to the weather, even when carborundum rubbed. The disintegration is due to the penetration of water, and the subsequent freezing and leaching out of necessary strength-giving constituents of the cement. Add to this the proven impossibility of preventing the ingress of water by painting the concrete with oil and cement paints, or with the so-called "liquid waterproofings", and you have one big reason why monolithic concrete has lost some favor in the past few years.

The Resto-Crete System has superseded these makeshift treatments. By its use it is now possible to insure a permanently beautiful and hard finish, for it has been distinctly designed to permit the wall to breathe and at the same time prevent the ingress of water. This is done essentially by filling the open pores with a non-capillary, yet slightly porous, hard cement material. The method is patented and applied only by Western Waterproofing Company licensees.

An even more striking example of monolithic concrete construction, with the RESTO-CRETE after treatment, is the new Court House built at Alpena, Michigan, last year. Prior to the Resto-Crete application, an Ironite bonded slush coat was applied to true up corner lines and fill surface holes. This is in contrast to the Montreal building on which the characteristic board marks were retained.

From such signs as these we are lead to prophecy renewed activity for monolithic concrete.

A Message From the Research Division,
Western Waterproofing Company, Detroit

Vol. 1 · No. 3
March 15, 1936

This picture shows the wall with cracks cut down to a solid base preparatory to repointing.

NO, THIS BUILDING did not go through an earthquake! It wasn't even improperly built or designed, according to our modern view, and no settling occurred. The condition is only an exaggerated case of what Mother Nature is doing to all buildings, starting at the time of building and continuing until the wrecker comes to haul them away, as our experience with thousands of similar failures proves.

How long is your brick building going to last? Probably not as long as you anticipated when you originally figured its depreciation at five per cent per year. For not only is it going to be preyed upon by such elemental forces as the freezing and thawing of accumulated water, and the actual dissolving out of necessary components of the masonry by water, and by atmospheric acids from coal soot but the view now commonly held is that it will crumble to pieces by unequal expansion of mortar and brick units. The building shown above has clearly encountered the force of volume expansion.

Volume expansion, as here referred to, means the actual increase in dimensions of mortar and brick from their taking up water, rather than from temperature variation. For instance, it has been shown that a rich Portland cement mortar will expand as much under a rain of a few hours' duration as it will under a temperature change of 100 degrees Fahrenheit!

Since brick won't expand this much, a shearing force results between brick and mortar, and something must give way. The bond in the above building was so good that it held and the brick broke in places. If a weaker mortar had been used, a poorer bond would have resulted and the mortar would have crumbled. But, in any event, the degree of this volume expansion would have increased during the years with the continued inflow of water.

But, you may ask, what of the numerous brick buildings built a century or two ago which are still in good condition?

Here, we answer that they were built with a mortar which did not permit the actual flow of water through the joint. They were fat mortars. As soon as their capillarity was satisfied, no more water penetrated. Again, the old lime mortars have gradually hardened by a natural chemical process which has made them more impervious.

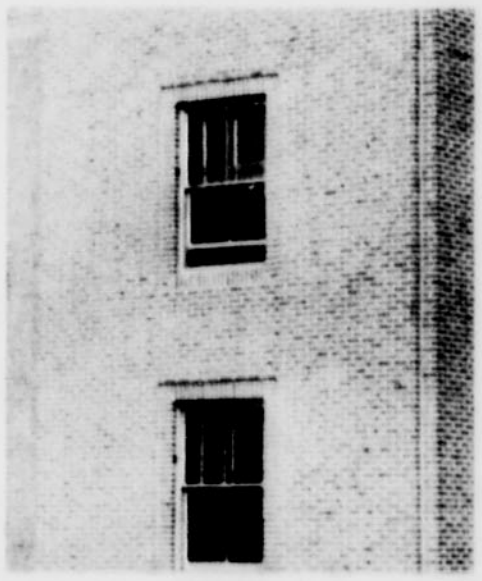
Our ancestors knew their materials by long years of working experience with them. Today, we all are suffering from the misuse of many valuable new materials.

Now look at the picture below, showing the above structure after a year's exposure following the application of the Resto-Crete restorative treatment. Notice that it looks as clean and neat as the day it was built.

What's more, the treatment is preventing ninety-nine per cent of the water that would normally enter from doing so, the other one per cent being atmospheric moisture which must be allowed to enter and leave at will for the good of the building. The masonry in this building is not going to expand further, because the protective treatment is noncapillary to water.

Years of continuous research and practice have proved to us that the Resto-Crete treatment is the answer to the perplexing disintegration problems of today. Applied to a building when first built, it will prevent the development of conditions like the above.

The same building after one year's exposure, following Resto-Crete application.



The Western Waterproofing Company and licensees apply Resto-Crete to all types of masonry structures, under a substantial guarantee. Application is made in the U.S.A. and in Canada, and is fully patented.

INTELLIGENT TREATMENT RESTORES REINFORCED CONCRETE

FOURTEEN THOUSAND pounds per square inch! No wonder concrete spalls when this great force is liberated within it by the rusting of reinforcing bars. Concrete is good for only a few hundred pounds in tension. Since steel expands in volume by at least two hundred per cent when it rusts, a tension is produced greater than concrete can withstand.

Badly Spalled

Water which entered the concrete by capillarity and rusted the reinforcing bars caused this serious damage

Restored by Resto-Crete

Here is the same column restored to its original strength and permanently protected against further ravages

This is what happened to the concrete column shown at the left. Moreover, it happens to a greater or less degree to all reinforced concrete structures. Most concrete structures over a few years old show some spalling on the surface, and at least ninety per cent of these marks of disintegration are due to the rusting of the reinforcing steel.

Steel rusts only because a combination of water and carbon dioxide from the air comes into contact with it; and these agencies can reach the imbedded steel only by passing directly through the concrete.

In other words, the disintegration of concrete from the rusting of reinforcing steel is merely another indication of the great need for adequately weatherproofing all masonry surfaces. We often fail to recognize this need because the extent of the damage does not appear on the surface until the condition becomes acute. As an example, the only visible indication of the serious condition of the column at the left was a few surface cracks.

We wish you could look through our microscope in the laboratory and watch the disintegrating forces of nature at work. You would see a drop of water placed on a masonry surface rapidly work its way through fine capillary tubes into the densest concrete. You would see water causing steel to rust; and would be amazed as you saw the fine rust tentacles pushing out from the main body, filling every crevice, and finally breaking the weaker structure and pushing it out of the way. You would see water dissolving out some of the softer structures. Or, again, you would see a water solution of the common atmospheric acid gas (sulphuric acid) rapidly eating up even the strongest crystal structures. We know that even the most nontechnical observer of these sights would conclude:

1. That the presence of water in the masonry is essential to the operation of these disintegration processes.
2. That the deep penetration of water, whether rain or dew, depends upon the capillarity of the surface through which it must enter.
3. That the successful weatherproofing of a masonry surface requires the balancing of many more forces than are usually considered.

We have discussed in other places the important disintegrating effect of volume expansion of concrete materials as they take up water,* and also the necessity for preserving an evaporating surface on the exterior of all masonry structures.** Many other forces are involved at different times. In fact, there is no single procedure that will work successfully in treating every structure of concrete or of stone or of brick.

Particularly is it true that a job of repairing spalled and broken concrete calls for special handling. It is essential in such a case that a trained engineer be on hand, for steel that is badly rusted must be replaced, the concrete surface must be properly prepared to secure a strong bond between old and new concrete, and strong concrete must be placed. A good job of patching not only gives a good appearance but also restores the original balance of stresses and strains between concrete and steel.

A glance at the right-hand picture shows the vast improvement achieved here by the Resto-Crete system. Moreover, our mechanics used a technique developed by our engineers in the restoration of this column. It is now good looking on the outside. It is solid and strong all the way through on the inside. And it is permanently protected by the Resto-Crete treatment from further ravages by excess water.

Our years of experience and all the resources of our well-equipped laboratory are available for meeting similar conditions in your buildings. Ask for our suggestions.

HOW PERMANENT IS LIMESTONE?

FIG. 1.
Indiana Limestone Surface, Mag. 20x.
Left half treated by Resto-Crete System.

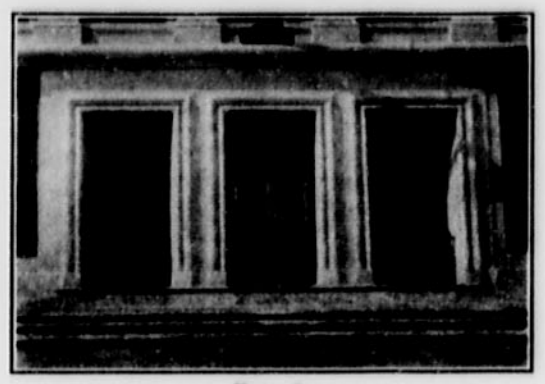

FIG. 2.
Old Limestone Entrance weatherproofed
and decorated by Resto-Crete.

HOW WOULD YOU like to stand under a shower bath of sulphuric acid for your whole life? Sounds si ly, doesn't it? Yet your building, and every other structure, road, and sidewalk, literally lives just this life.

For chemical analysis of the air in New York City alone has shown that approximately 1,000 tons of sulphuric acid gas is discharged into the air every twenty-four hours from the combustion of coal. This gas, in combination with the water vapor in the air, forms sulphuric acid, which in turn is deposited along with soot and other dirt on every square inch of exposed masonry.

Every non-ceramic building material—limestone in particular—is readily attacked by sulphuric acid. The result of this attack is quite obvious on buildings located in cities having high smoke densities as compared with those having low smoke densities. A striking example is to be observed in the numerous old world art objects of limestone, which endured for ages in their native climes, but when subjected to a few years' exposure in our city squares showed an amazingly accelerated rate of disintegration.

Sulphuric acid disintegration, like other types of disintegration in masonry, is due mainly to the penetration of water; for rain water carries acid in, then brings the dissolved salts of the acid back out, where rain washes them away. As a result the masonry becomes progressively more porous and capillary to water. Then, under proper conditions, ice crystals and crystals from dissolved salts form in the exterior surface layers and the familiar exfoliation or spalling of the surface occurs.*

Besides disintegration specifically due to sulphuric acid, a greater destructive agency is the continued inflow and outflow of water—from any source; for water itself, in large quantities, is capable of dissolving out important constituents of limestone. Fortunately, however, in the case of limestone, nature has provided a protective counterbalance: if not over-exposed to water and sulphuric acid it will gradually build up a hard, dense surface layer which becomes increasingly resistant to natural disintegrating forces. Such surfaces can be found in well-protected areas on most limestone buildings. In fact, there are many complete limestone buildings in existence today which show no disintegration whatever.

A better picture of this may be gained from the right half of Fig. 1. This section of the magnified limestone surface shows the dense, hard particles of "limestone sand" cemented together by smaller calcite particles, forming a porous, sponge-like mass. In newly quarried limestone most of these pores are filled with a loosely packed lime material, which is the basic material employed by nature in building up a resistant surface. This material, if unchanged by nature (as is the case behind the surface layers), is the most easily attacked by excess water and sulphuric acid.

Now if sandblast is used for cleaning, this protective surface is removed and many years may be required to restore it. The disintegration occurring in the meantime alone is enough to condemn it.

Since we can seldom locate our buildings under the most favorable weathering conditions, we are faced with these facts: (1) Acids in the air and water dissolve out valuable salts from the limestone; (2) Alternate wetting and drying causes volume changes in the individual stones, which tend to break down the mortar bond, thus permitting the easier entrance of moisture. Therefore, to preserve our buildings, we must apply the fundamental principles of weatherproofing by synthetically building a dense, hard, non-capillary surface, which retains breathing ability, inertness and strength.**

In the left-hand side of Fig. 1, and in Fig. 2, these principles are clearly illustrated. Note that the surface characteristics are in no way altered, but that the open pores are completely filled. No wax or paraffin has been applied to melt and collect dust, or to prevent breathing. No hard glaze has been created to invite surface spalling by the formation of interior salt crystals. The surface performs in accordance with *Natural Laws*, at the same time giving protection against the ravages of water and sulphuric acid.

These characteristics make the Resto-Crete System the only one of its kind in the field for the protection and decoration of limestone.

Vol. 1 · No. 6
JULY 15, 1936

". . . . . , AND TUCK-POINT WHERE NECESSARY."

HOW MUCH MONEY has the above specification cost owners without their having received one penny's worth of permanent protection for their buildings?

Granted that the material and workmanship that go into a good tuck-pointing job are the best (they are still no better than the original materials), and that apparently all of the work required is done, what permanent good has been accomplished?

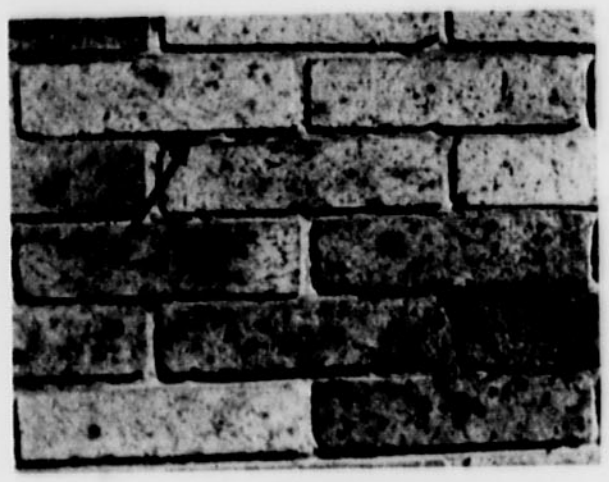

FIG. 1.
Some joints tuck-pointed. Note the extensive disintegration in untreated joint areas which should be repaired. This wall leaks.

From our knowledge of buildings and their life-expectancy, we are safe in assuming that the depreciation of exterior wall surfaces is at least three per cent. per year. This depreciation usually takes place in the mortar material, rather than in the masonry units, and it does not mean that on a building five years old, fifteen per cent. of the mortar material has fallen out. It does mean, however, that the alternate wetting and drying of the wall surfaces, with the carrying into the walls of acids from the air, cause soluble parts of the mortar to be dissolved out and washed away at an accelerating rate. Thus, the mortar is left very much depleted in strength and much more porous than it was originally.

In a tuck-pointing job, only the holes where mortar has fallen out, or is loose, are repaired. The extent of the repairs is left to the good judgment of the man on the scaffold in deciding "—where necessary." Suppose excellent judgment is used and all visible defects are repaired, the only advantage gained is that depreciation of the repaired parts must start from the beginning again, while unrepaired parts will continue to cause trouble and will require periodic repair. It would seem, therefore, that to say "—and tuck-point where necessary" means the beginning of a more or less continuous repair job.

The cost of a tuck-pointing job is mostly labor, because of the small amount of inexpensive material used. Tuck-pointing requires complete examination of all surfaces; therefore, to tuck-point repeatedly a part of the joints in a surface adds very materially to the cost of maintenance over a long period. Would it not be better to make all joints and surfaces permanently impervious to moisture in one operation, even though the first cost were slightly higher?

In previous issues of the RESTO-CRETER and in Technical Bulletin No. 3-A, we have discussed the fundamentals of weatherproofing, stressed the use of a *non-capillary* material, and have cited typical jobs. These ideas are useless unless they are read with understanding and so acted upon.

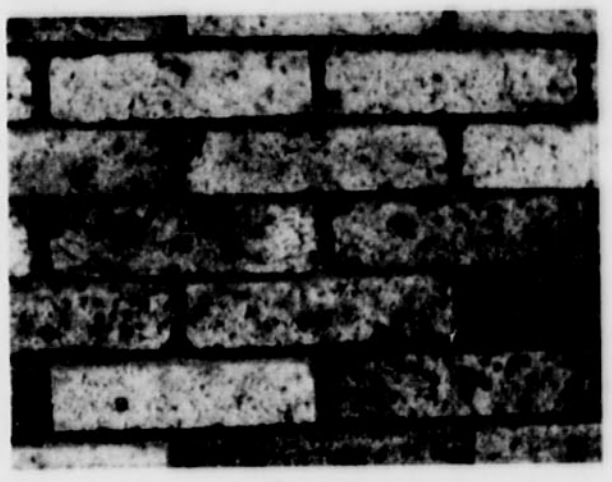

FIG. 2.
Same area as above, but every crack and hole in joints and surfaces completely weatherproofed. Wall doesn't leak.

Let us suppose you are going to have your building repaired. Are you going to write a specification for the work contemplated which leaves the determination of what you want done to the judgment of the laborer on the scaffold in permiting him to "—tuck-point where necessary?" Or are you going to be sure that the money you spend will accomplish some lasting good? This you can do by providing that every square inch of the entire exterior surface of your building is weatherproofed according to the fundamental laws for such work; that it is guaranteed to stay weatherproofed; and that the work is to be done by an organization with enough understanding of your problem to insure you an intelligently executed job.

The Western Waterproofing Co. and licensees apply Resto-Crete to all types of masonry structures, under a substantial guarantee. Application is made in the U.S.A. and in Canada and is fully patented.

Monolithic Concrete Aided by Resto-Crete Finish

Waterproof surface and permanent colour made by filling the pores with a cement mixture.

THOSE who know most about concrete are insistent on the fact that, when made perfectly, it is perfectly waterproof, and thereby weatherproof. The difficulty in practice is to get the concrete made well enough to be waterproof. There has been a great improvement in the quality of most concrete work during recent years, particularly since the importance of the water-cement ratio became generally known. But really good cement is still so much the exception that a great many concrete surfaces still require to be waterproofed.

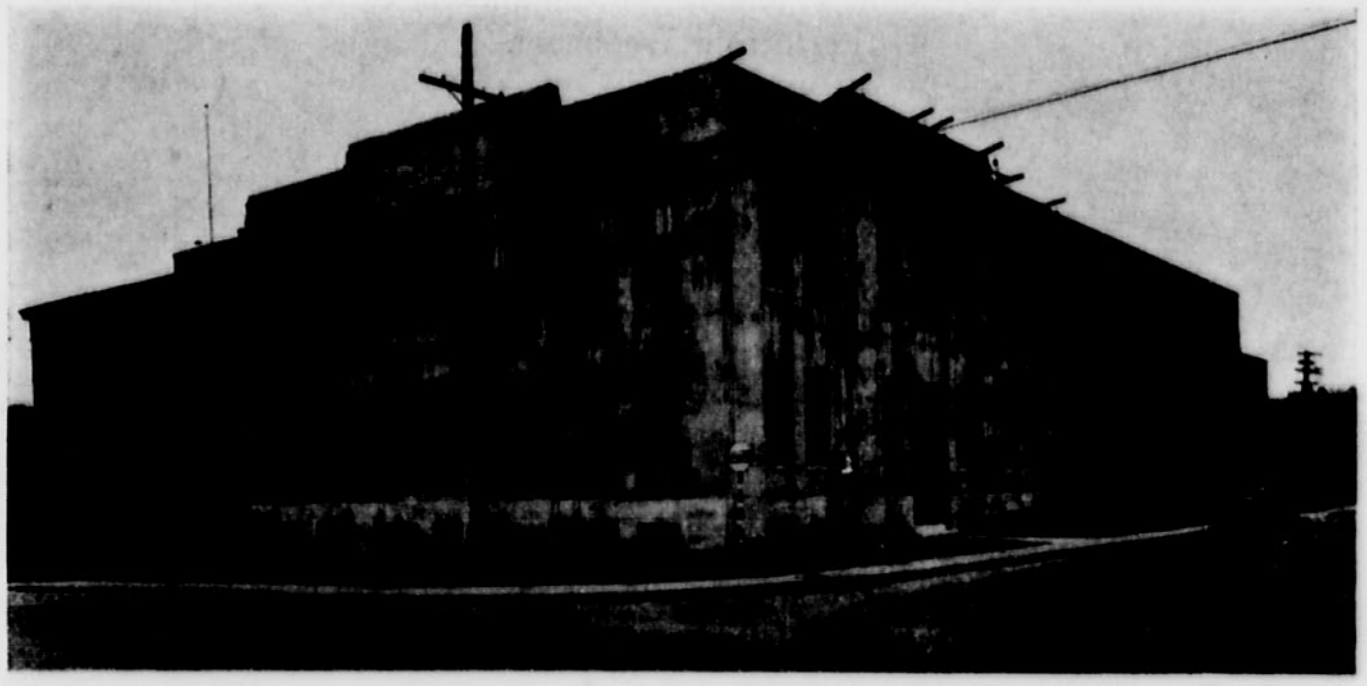
When concrete is not waterproof the reason generally is that there are voids throughout that make it porous. The obvious way of curing this condition is to fill these voids with cement. It is found, however, that cement alone does not fill the voids perfectly, so many other substances have been tried out. Substances such as oil paints and tar have been proved unsatisfactory.

One of the most satisfactory waterproofing materials so far established in use is iron oxide, which has been employed for about 30 years in foundations and other structures beneath the ground level. It is brushed on the concrete as finely ground cast-iron powder. This oxidizes rapidly and thereby swells, filling the pores of the concrete completely. In some instances a thin protective coating of cement is put over the iron. This is called the "Ironite" process of waterproofing concrete.

The dark colour of the "Ironite" waterproofing obviously makes it of little use above the ground level where appearance is an important factor. A prolonged search for a more suitable material that would give a similarly satisfactory result in filling the pores of the concrete was rewarded about five years ago with the discovery of the material now known as "Resto-Crete." Portland cement comprises the larger part of the mixture, since cement itself is obviously the best material to use, provided all the requirements are met. To the cement is added a small amount of material to make the concrete water-resistant, sufficient finely ground iron to ensure an expansion on oxidizing that will fill all the voids, and a small proportion of inert material that makes the surface appreciably more resistant to abrasion than cement alone. To this mixture is added sufficient mineral oxide pigment to give the colour tone required. It is important to notice that the same opertion that water-proofs the surface gives it a lasting colour of any intensity desired.

This combination of utility and beauty for the Resto-Crete treatment of concrete has had a rather unexpected result that is of special interest to architects. One of the disabilities of monolithic concrete design has been the difficulty of obtaining clear and lasting arrisses. This is particularly important in the modern style of architecture, in which straight lines and shadows play such an important part. The Resto-Crete treatment brings the arrisses into relief in a way that is rather startling in contrast to the untreated concrete, and compares well with those building stones most notable for a sharp arris.

A good example of monolithic concrete thus made weatherproof as well as attractive in appearance is the new building of Associated Screen News in Montreal. The former building, put up 18 years ago, is also of monolithic concrete but the dull grey of its surface has been distinctly unattractive, though eminently serviceable. In the



MONOLITHIC SURFACE BEFORE FINISHING

However well made, the concrete surface cannot present an attractive appearance without some treatment that will bring out its essential features.

CANADA

POOR COPY

new wing the same economy and enduring quality have been attained by the monolithic design, and to this has been added, at little expense, an exterior that will be permanently attractive. It is intended, by the way, to treat the old building with Resto-Crete shortly, when the present contrast in appearance of the two parts will disappear.

The new part of the Associated Screen News building on Western Avenue, Montreal, is in two sections, a monolithic concrete office and in the rear a structural steel and brick studio. The concrete structure is of conventional design with reinforced beams, columns and floors. The floors and roof (which will constitute a floor when and if the building is made higher) were cast by the removable pan system. The floor of the studio is laid directly on the ground surface.

The walls of the studio have some interesting features. The brick is faced inside with 3" hollow haydite blocks. Inside this is vertical 2" furring at 3-ft. centres, then chicken wire, and on top of the wire horizontal 2" furring at 16" centres. Over the chicken wire between the strips are laid pads of mineral wool, and over this is nailed Johns-Manville perforated Transite board, 3/16" thick. This gives the studio a perfect acoustical quality, as the sound waves, striking the transite board, are broken up by the perforations, behind which they are absorbed by the mineral wool. Mineral wool has the rare quality of "straight line" absorption, so that the sounds within the studio are neither echoed unduly from the walls nor distorted in tone. The Transite board and mineral wool constitute, of course a fireproof wall.

The concrete for the new building was supplied by Ready-Mix Concrete Ltd. to meet the architect's specifications, which were as follows, the figure in brackets being the average of the tests in each case:

Footings & walls—2000 lbs., (2250)
Beams and slabs—2500 lbs. (3000)
Columns—3000 lbs. (3560)

This firm has an inspector of the Milton Hersey Company constantly at its plant to control the mix and guarantees the performance of the concrete it supplies.

The Resto-Crete treatment was done by the Western Waterproofing Company of Montreal, which has associates in the principal cities of Canada and the United States. As it is desirable to preserve the impress of the forms, when these are made carefully with a view to the architectural effect, the surface of the concrete is cleaned by grinding very lightly with carborundum stones. This light grinding of the surface gives it a uniform rate of absorption but does not alter its natural quality of refraction. The Resto-Crete mixture, properly diluted with water, is then rubbed on, completely filling the pores of the concrete. When the mixture has hardened to the right degree, the surplus is rubbed off the surface with rags. This leaves the finished surface of the concrete composed largely of the particles as originally cast, with the minute interstices filled with the Resto-Crete material. The wall has thus been waterproofed simply by filling the pores with a material essentially the same as the original concrete.

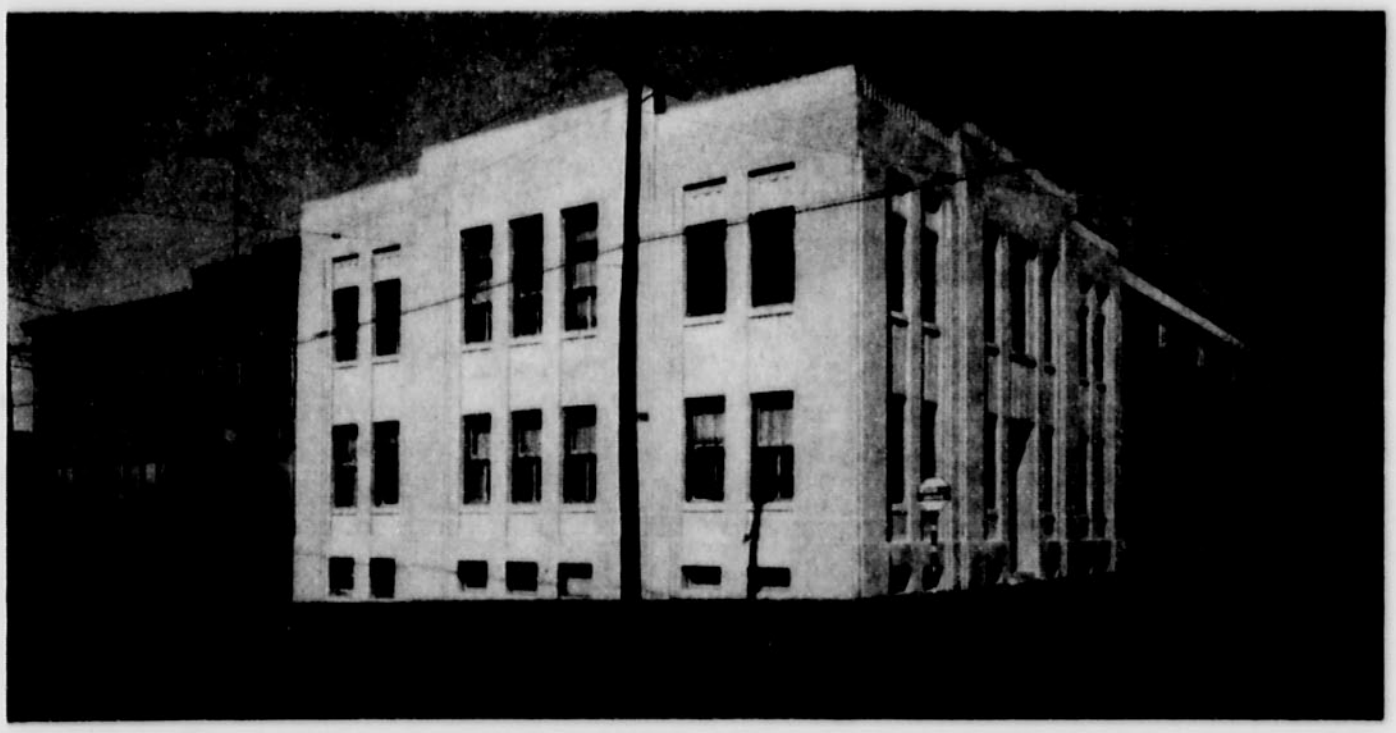
In the case of the Associated Screen News building, white cement was used and sufficient pigment added to give a colour somewhat like fresh Indiana stone.

The Resto-Crete treatment is similarly applicable to mortar joints, which leak more frequently than is commonly realized. Many old buildings and some new ones in this country have been thus treated during recent years. Resto-Crete is also used often inside a building to prevent "sweating."

Some of the prominent buildings finished with Resto-Crete recently are as follows:

C.N.R. hotels at Halifax and Charlottetown.
Neurological Building, McGill University, Montreal.
International Paper Mill, Dalhousie, N. B.
Chequers Court Apts., Montreal.

The architects for the Associated Screen News building were Messrs. J. W. Orrock and N. B. Reardon, of the C.P.R., and the contractors were the A. Janin Construction Co.



MONOLITHIC SURFACE AFTER RESTO-CRETE TREATMENT

By filling the pores of the concrete with white cement, an enduring surface is secured which brings out clearly the architectural features.

NECESSITY FOR WEATHERPROOFING

There is probably no more acute problem facing the building owner than that of weatherproofing. The reasons for this might be listed as follows:

1. The actual disintegration of the building. Offhand this may seem negligible when we think of the massive structures that are built nowadays, but the proof of the statement is witnessed by the great number of buildings showing efflorescence and spalling, and by the vast number of treatments which are offered on the market as panaceas.

2. The loss of capital investment, due to deterioration shortening the life of the building.

3. Loss of rental income, due to unattractive appearance.

4. Increase in operating cost, due to greater heat loss through increasingly porous exterior surfaces.

5. Increase in interior maintenance cost, due to damage caused by penetration of water.

Therefore from the standpoint of both the investment and the return, a good weatherproofing job is a saving rather than an expense.

THE CAUSES OF WATER PENETRATION: DISRUPTION

If it were not for the excessive penetration of water we would not be faced with this problem. The presence of any or all of three conditions cause excessive penetration of water into masonry walls.

1. Structural cracks, and disintegration cracks and holes.

2. Most mortar joints, such as brick, stone, etc.

3. Porous surfaces such as limestone, sandstone, common brick, concrete, etc.

It is at once obvious that the penetration through all except structural cracks could have been prevented and can be treated. Structural cracks, however, are usually subject to further movement, and hence the treatment cannot be absolute, though the condition may be vastly improved by the use of suitable methods.

It appears, then, that practically all masonry surfaces will absorb moisture. This is due to the fact that they are composed of many differently shaped crystals, somewhat loosely packed together, whereas metals and glass are extremely dense. Under a microscope, concrete resembles more a mass of snowflakes in density, than the familiar structural mass to which we are accustomed. The voids seem to predominate over the solid matter. Therefore from the standpoint of weatherproofness, the only conceivable type of masonry unit which would be entirely weatherproof would be one with surfaces of the density of glass, and a structure composed of such a material would have to be entirely one unit with no joints, and no structural or other cracks.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

Bearing this in mind for a moment, let us now look at the disrupting influences due to water penetration which cause deterioration of the building and which any treatment must withstand. Water causes disruption in four manners:

1. By carrying in corrosive chemicals which dissolve out important salts and deposit them on the surface, in the form of efflorescence. It is not generally considered, but air saturated with rain water carries the bases of the three most powerful acids known to chemistry, Hydrochloric, Sulphuric, and Nitric, and all will disintegrate masonry. Sulphuric acid is the most common, particularly where there is considerable coal smoke in the air. Salts of Hydrochloric acid such as common table salt are also present to some degree, particularly near salt water, and are able to generate this acid. Nitric acid is formed from the action of water upon millions of bodies of the so-called "nitrifying bacteria" which live in the air and are deposited upon masonry surfaces.

There are hundreds of other things which will also dissolve out the important salts in masonry, such as some of the mineral oils, blood, weak acids, alkalies or other chemicals in certain manufacturing processes, in the air, or perhaps in the masonry itself.

Water is the universal solvent, and consequently it is itself capable of dissolving out certain of these salts.

2. By expanding upon freezing. It is obvious that the minute water particles which are locked in a masonry mass will upon freezing exert a tremendous total pressure upon the internal structure of the mass itself; and the results are everywhere apparent as will be noted if one examines more closely the buildings around him.

3. By causing the extraneous growth of certain crystals. This is a physical process involving the addition of water to certain crystals with the resulting expansion of them. Calcium hydroxide is notable in this respect. Its crystals upon taking up water grow in one plane only, and the force released causes serious damage to concrete and other types of masonry.

4. By causing oxidation of steel reinforcing in concrete, etc.

It is interesting to note that the pressure released by crystal growth, including the formation of ice from water, may approach 14,000 Sq. In.

In addition to these types of disintegration, the use of soft aggregates in concrete in certain localities renders the building much more liable to the disrupting action of water.

SPECIFICATIONS FOR WEATHERPROOFING TREATMENTS

It is obvious, therefore, that the main objective of any weatherproofing treatment must be to permanently stop the ingress of water. It is believed that a material which will effectively accomplish this aim must fulfill the following specifications laid down more than 75 years ago by a group of scientists:

1. The material must penetrate easily into the masonry surface and remain there on drying.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

2. The material must not concentrate on the surface so as to form a hard crust, but at the same time it must harden the surface sufficiently to resist erosion. (Obviously, therefore, the material must densify the existing surface by filling the holes, and must subsequently become hard).

3. The material must prevent the penetration of moisture, and at the same time allow moisture to escape.

(This may appear paradoxical, but if condensation water from the inside of the building which is drawn to the exterior of the building by the action of the sun is not allowed to escape, rotting of the masonry immediately behind the exterior surfacewill take place. This may take the form, among other things, of a crystalline growth as explained under Method 3, p.2. Or the rotting may be due to freezing of the condensation water so collected with the results described in Method 2, p.2. In the same manner that the human body must breathe to live, so, also, masonry buildings must "breathe" to endure. It has been proven in research laboratories that air must be allowed to circulate throughout the masonry mass to prevent rotting; and what is more important, certain components of masonry must continually be exposed to the small amount of water vapor which is in the air to continue chemical processes necessary to the stability of the masonry as a whole. It was stated a while back that a material of the density of glass was the only material which would be entirely waterproof. Since it is impossible, however, to build a structure of such a material in one unit, structural cracks, cracks and holes between mortar and brick or tile, etc., and porous surfaces, are all of them bound to permit the entrance of water, and water from such sources must not be allowed to collect in the pockets, but must be allowed to evaporate freely from surfaces. Disruption due to the above conditions is usually noticed first where a water pocket has been formed by gravitation, i.e., where a great amount of water collects in the wall, such as below window sills or coping stones, at the ground level, and where other masonry masses butt into an adjoining wall).

4. The material must not discolor or in any way alter the original appearance of the surface.

5. The material must expand and contract uniformly with the surrounding surface so as not to cause flaking.

6. The material must be non-corrosive and harmless in use.

7. The material should retain its preservative effect indefinitely.

OLD WEATHERPROOFING METHODS

With the above objectives in mind let us now consider the various types of treatment on the market:

1. Oil paints, drying and non-drying oils. Oil paints commonly used have either standard fillers, or a cement filler. Common drying oils used are China Wood Oil, and Linseed Oil, or combinations of these. Non-drying oils are usually mineral oils, or a combination of a mineral paraffin oil and any number of other oils.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

The most important objection to these types of treatment is that they form a skin over the surface which does not permit water to escape from the wall, and therefore renders the structure liable to disruption of the type noted in spec. 3, p.3.

It is also true that no paint will form a perfect skin, but will leave numerous small holes and cracks visible under a microscope, which because of their physical form will allow moisture to penetrate more easily than to escape.

Most of the paints and drying oils in use are also subject to saponification due to the alkaline nature of masonry construction. Saponification causes them to "chalk", due to a chemical change in the basic oil which leaves it inelastic and rather soft (particularly in cement base paints, where free lime is present).

Paints and drying oils do not fulfill the objective from another standpoint -- they do not densify the surface but merely bridge over the voids between the pinacles of solid material. Non-drying oils will often penetrate the surface for a distance but are apt to discolor it in so doing.

Of all these types of treatment, China Wood Oil is the least harmful, since it does not collect dirt, and will not cause disintegration of the masonry, but it does not fulfill the main objective.

2. Cement, Magnesite, and other paints and plaster coatings. These are non-elastic, and since they have a difference in coefficient of expansion from that of the surface upon which they are placed, are subject to the formation of a crack between themselves and that surface, and consequently soon peel off. Cement paints are usually apt to dust and shrink, due to the use of clayey admixtures to give flowability, to the use of too much water, and to improper curing. Magnesite, gypsum, sodium silicate, and glue base paints do not have in themselves inherent structural stability for exterior use.

It is obvious that these treatments do not fulfill the objective as regards densifying the original surface.

3. Waxes and Paraffin. There are two methods of applying these treatments, first, by preheating the surface and painting on the melted paraffin, reheating, and then wiping off the excess; and second, by dissolving them in solvents such as kerosene, turpentine, etc., and applying them directly, the solvent soon evaporating and leaving only the paraffin.

The effect of sealing the surface as is required by the first method has already been discussed; and with the second it is necessary to get a perfect skin if the treatment is to endure. Otherwise dust will collect in the pores and an opening for water be established. Now when it is realized that only about 10% or less of these solutions is paraffin, it is not surprising that microscopic examination reveals many minute holes through the skin, even after a number of successive treatments.

There are hundreds of possible combinations of this latter type, and the paraffin, or beeswax treatment is the oldest remedy known. However, no paraffin treatment fulfills the main objective.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

It is obvious from the above that if any one of the various types of treatment herein enumerated completely fulfill the weatherproofing requirements, it would have dominated the market in the many years that it has been available for such use.

THE RESTO-CRETE SYSTEM

From the above discussion we may conclude that voids constitute a large part of the surface area of masonry structure. In developing a new material, therefore, the problem was to find a material which would simply fill these voids in compliance with the specifications enumerated above. After considerable research, pure Portland cement was chosen as the base, because in its hardened state its physical characteristics more nearly conformed to those of most masonry surfaces. To this was added a small amount of suitable chemicals to give waterproofness, sufficient expansion to lock the material in the voids, workability, and finally an inert material, which laboratory tests proved to be approximately 8% stronger than Portland cement alone, to resist abrasion.

The method of application on a suitably prepared surface consists of scrubbing on a regulated mixture of the material and water, and at the proper time rubbing it with clean rags to absolutely pack the material into the pores and to remove the excess. The colour of any porous masonry surface may be changed due to the fact that the largest portion of the surface area itself is voids, and to the use of high grade mineral oxide colour in the material with which these holes are to be filled. This method will not destroy physical and colour characteristics of limestone and sandstone surfaces.

The method has been developed to fit the individual requirements of all masonry surfaces which present a solid base. The list includes the surfaces of Cinder and Haydite block, concrete block, artificial stone, limestone, sandstone, porous granite, common brick, concrete, cement stucco, and gunite; and mortar joints between all types of water-absorption, brick, stone, tile and terra-cotta. In addition a method of treating Cinder and Haydite block to produce a beautifully textured imitation Briar Hill Sandstone has been developed.

The material is made in eight standard colours and white, and black, and special matching colours may be formed where necessary.

The Western Waterproofing Company is one of the oldest waterproofing companies in the country, and in their many years of service have successfully completed millions of square feet of waterproofing and weatherproofing. It is the privilege of the organization to extend the help of the Research Laboratory in the solving of all problems connected with waterproofing and allied fields.

R.T.Orr,
Architect,
Dept. of India Affairs,
Ottawa.

Dear Sir:

The writer regrets very much having missed you in Montreal. Regarding your building at Shubenacedie, if the brick is waterproof we could cure the water trouble by waterproofing the joints only. Otherwise, it would be necessary to waterproof both brick and joints. In this case the brick would be matched as closely as possible and the joints struck with grey material. Generally it is only necessary to waterproof the joints.

Our proceedure is to repoint the building where necessary, replace disintegrated brick, thoroughly clean the surfaces and waterproof by scrubbing into the surface a mixture of cement ground cast iron and certain expanding chemicals.

Exclusive of replacing the disintegrated brick and local taxes, if any, the job would run about 20¢ per square foot solid area. This would include the caulking of the window openings, cleaning, repointing where necessary, and waterproofing.

We would guarantee our work for 5 years.

We can offer as references the chief architects of the Dept of Public Works, Bell Telephone Co., Canadian National Railways and many others.

Yours very truly

No. 51 - 0 - 5

Dear Mr. Orr:-

In reply to your letter of November 30th, I have the accounts for the repair work on boys' quarters, except that of the N.S. Clay Works. They sent me an account the other day but as it was not correct, I sent it back to them.

As for the fire damage, we are just in the middle of repairs. The repairs call for five hundred feet of hard wood flooring, small amount of 2 x 6 and boards, finnish in D 4,7 in asbestos paper and sheet metal, also one day of plastering for two men. As for the labor, it is being done by the staff, except for plastering and some painting. I don't know, but I should think that less than five hundred dollars willput things in good condition.

Yours very truly,

Rev J. P. MacKay

P.S. We have had water come in at two windows in front of building. Am making note of day and place.

No. 51-0-5

Dear Sir:-

In a letter of November 17th, 1936, you gave us permission to purchase a hot water Sterilizer, at a cost of $133.00 The Sterilizer No 2411 is not made, and No. 9114 was substituted, costing $137.00

Enclosed are three copies of the accounts, one for $89.00 and the other for $48.00, Total $137.00. In a letter from Ingram and Bell, of December 3, 1936, they say that they will supply the outfit at $133.00 provided there was no duty.

Well, as far as duty is concerned, this is what happened. They shipped the apparatus in two pieces, one part costing $89.00 went to the Customs in Truro, and the other part costing $48.00 went to the Customs in Halifax. I received notice from the Customs Authorities in both places. Not wishing to make the trip into Halifax, I sent invoices, etc., to a friend of mine and asked him to look after it, and the Customs people put everything on that they could, costing him $21.26. I went to Truro to see about the other part, and paid $2.67 Excise tax, and $2.47 freight. They did not charge me any duty or sales tax. The extra cost of duty, sales tax, excise tax, and freight comes to $26.40.

Duty on $48.00 - 30%	$14.40
Sales tax	4.99
Excise on $48.00	1.87
Excise on $89.00	2.67
Freight on $89.00 article	2.47
	26.40

I'D.

Ottawa, January 6, 1937.

Reverend Sir:

I have your letter of recent date, enclosing accounts covering the cost of the supplying of a hot water sterilizer, duty, sales and excise tax, and freight, for use at the Shubenacadie Indian Residential School, together with a communication which you received from Messrs. Ingram and Bell, Toronto. It is understood that you placed the order for supplying the sterilizer through this firm.

The account, covering the cost, from the Pelton & Crane Company, Detroit, is billed to Ingram and Bell. The Department considers, as the order was placed through this last named firm, they should be responsible for payment to the Pelton-Crane Company and render you their account on their own bill heads for the equipment, to the amount of $137.00. I may say that the Department would be in difficulty in forwarding a cheque in payment to an American concern.

Regarding the duty, sales and excise tax and freight, it is necessary that you be responsible for payment of these charges, from per capita grant or other receipts of the school.

I would request that you return the account of the Pelton & Crane Company to Ingram & Bell, for this firm to settle with the Pelton & Crane Company and bill you with the cost of the sterilizer, to the amount of $137. When you receive Ingram & Bell's account, you should certify it in the usual manner and forward to the Department, when a cheque will be forwarded to the company, in settlement of the account.

Yours truly,

Philip Phelan,
Chief, Training Division.

Ottawa, February 1, 1937.

Reverend Sir:

I have your letter, requesting that recharges be supplied for five fire extinguishers for use at the Shubenacadie Indian Residential School.

In this connection I have to say our records show that, in May, 1929, the Department supplied six 1½ quart Pyrene extinguishers and nine Thermene extinguishers.

The chemical in the 1½ quart extinguishers need only be renewed should the extinguishers be used and if kept in proper condition. It would, however, be advisable to have the chemical in the Thermene extinguishers renewed approximately every year and a half. We are not aware, from the information forwarded by you, of the size and type of the extinguishers for which you request refills. Please advise the number and type of extinguishers at the school and state definitely the size of the extinguishers for which you request that refills be supplied. When we have this information the order for the refills will be placed here.

Yours truly,

Philip Phelan

Ottawa, February 13th, 1937.

Reverend Sir,-

I have your letter of the 8th instant, regarding the refills required for the fire extinguishers at the Shubenacadie Indian Residential School.

In reply I have to inform you that an order is being placed with the Pyrene Manufacturing Co. Ltd., Toronto, to ship to you, charges prepaid, refills for the 1½ quart Pyrene extinguisher and conversion units with chemical re-charges for the nine (9) Thermene extinguishers. When these units are placed in the Thermene extinguishers, it will not then be necessary to have them re-charged each year, as the chemical will last until such time as the extinguishers are used or have become damaged. Instructions will be sent on how to install the new units and it is thought that a member of your staff will be able to install the new units. You should see that these extinguishers are placed in good condition.

The account covering the cost, together with receipt for freight charges prepaid, will be sent to you. On receipt of the refills, please certify the account in the usual manner and send to the Department for payment.

Yours truly,

R. A. Hoey.

Shubenacadie Indian Residential School.

Shubenacadie, N.S.
April 9th. 1937

Dear Sir:

When you were down here we could not find a sample of clogged pipe. Today I am sending a box containing short pieces. The worst is the one inch running from the main two inch line, to the girls wash and bath rooms. The other pieces will shew you how the pipe becomes pitted and when the attempt is made to disconnect them, they brake. During the last two weeks in March, we renewed the main line from the hot water tank through the laundry, out beyound the kitchen. These pipes were replaced with galvinized iron pipe, we should have done it with copper or brass, Next we had to do the pipe leading to the boys and girls bath rooms, etc, This we are doing with copper pipe. For material only the cost has been over one hundred and fifty dollars It is only a matter of a short time till all the hot water pipes will have to be replaced.

For the past wto years we have had trouble getting hot water. Both for the girls and boys baths we had to carry hot water from the laundry. While this is an improvement over what the Indian had in his own home, nevertheless with the crowd we have it makes a messy job and takes about every day of the week to see that every child has a bath once a week.

We also had to replace the top section of the hot water Jacket. If the cost of a hot water boiler with brass tubing were not prohibit-ive, we would have discarded the hot water jacket.

Indian Affairs. (RG 10, Volume 6055, file 265-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

The jacket heaters are only garranteed to thirty five pounds pressure and that is hardly enough to carry water to the top floor.

While we are on the subject of water, I might as well let you know that the water proofing on the outside front wall was not completely satisfactory. On November 22nd, and December 3rd, water poured in through the top of three windows. I suppose these people will be back to go over those sections. Other than in these places there has been no water, but in damp weather, the plaster continues to fall. One would expect that, as in many places the plaster is just holding and that is all. I hope the plaster was included in the appropriation for this year. The other parts of the walls are just as bad as the front, and the occasional rain storm causes the windows to leak. While repairing the Chapel after the fire, we had an easterly rain storm. Where the plaster and cork board was broken you could see the water trickling down on the inside of the tile wall.

In conclusion, I hope the Department will see a way to help us with renewing the hot water line and that the plastering will be repaired this summer. We cannot do any painting with the walls in the condition they are, and yet the other walls of class rooms, etc., are certainly in need of paint.

Yours very truly,

Rev. J. P. Mackay

Dear Sirs,-

Upon instructions from this department in September last your firm waterproofed a portion of the outside walls of the Shubenacadie Indian Residential School, including the whole of the front wall of the building.

I am now in receipt of a letter from the Reverend Principal of the Shubenacadie Indian Residential School advising that the waterproofing on the outside front wall was not completely satisfactory. He states that on November 22nd and December 3rd water poured in through the top of three windows.

As I understand that the work performed was guaranteed for a period of five years, I would ask to be advised as to what arrangements it will be possible for you to make in order to have the reported unsatisfactory condition remedied.

Trusting to hear from you in the near future regarding this matter, I am,

Yours very truly,

R. Gurney Orr.
Architect for the Department.

Rev. Sir,-

In the absence of Mr. R. Gurney Orr I beg to acknowledge your letter of the 9th instant with reference to various matters pertaining to the Shubenacadie Indian Residential School.

With reference to the unsatisfactory condition of the outside front wall of the building, which was waterproofed last fall, I am today communicating with the Western Waterproofing Company who did the work, and on receipt of their reply will be pleased to further communicate with you.

I might also say that the samples of pipe have been received.

The other matters referred to in your letter will be dealt with in another communication.

Yours very truly,

R.Gurney Orr.
Architect for the Department.

April 20, 1937.

Rev. Sir,-

In reference to the plumbing and plastering repairs referred to in your letter of the 9th instant, further information regarding the extent and cost of the repairs required would be necessary before action can be taken.

Relative to the plumbing if this work can be done in sections or portions the funds available could be used for the work which would be most advantageous for the operation of the school.

Consequently, if you could furnish the department with an outline of the various necessary repairs with estimates of their cost, for both the hot water line renewal and the plastering, and recommendations as to which of the works are most important, arrangements will be made to carry out such work as can be performed with the funds available.

Yours very truly,

T.R.L. MacInnes.

File 51-0-5

Dear Sir:

Further to your letter of the 17th ultimo, our superintendent in Halifax reports that he visited the above school and found our waterproofing in perfect condition. He states that Father Mackie said he did not see any leaks himself but that the sisters saw leaking around the windows. This might easily have been condensation running down the windows. However, he found that in putting on the storm windows they had pulled the mastic loose on three of the windows. Our Superintendent doubts if this would permit leakage but in any case, as stated in our proposal, this should be looked after by the maintenance staff as it would cost less than one dollar to make the whole repair. However, we would repeat that our Superintendent is very doubtful that there is any leakage whatsoever, and would suggest that you ask Father Mackie about it.

Yours very truly,

Dear Sir,-

Your letter, addressed to Mr. R. C. Orr, Architect, has been received, and I thank you for your kind attention to our request of request of April 17th, regarding the waterproofing of the walls of the Shubenacadie School.

Rev. Father Mackay will be advised as to the contents of your letter.

Yours very truly,

TRLM

EX'D.

May 21, 1937.

Dear Father Mackay,-

With further reference to departmental letter of the 17th of April regarding the waterproofing of the walls of the Shubenacadie School, the following letter has just been received from the Western Waterproofing Company, from which you will note that the waterproofing was found to be in perfect condition.

"Further to your letter of the 17th ultimo our Superintendent in Halifax reports that he visited the above school and found our waterproofing in perfect condition. He states that Father Mackay daid he did not see any leaks himself, but that the sisters saw leaking around the windows. This might easily have been condensation running down the windows. However, he found that in putting on the storm windows they had pulled the mastic loose on three of the windows. Our Superintendent doubts if this would permit leakage, but in any case, as stated in our proposal, this should be looked after by the maintenance staff as it would cost less than one dollar to make the whole repair. However, we would repeat that our Superintendent is very doubtful that there is any leakage whatsoever, and would suggest that you ask Father Mackey about it."

Yours very truly,

Rev. Father Mackey,
Principal, Shubenacadie Indian School,
Shubenacadie, N.S.

T.R.L. MacInnes.
Secretary.

No. 51-0-5

Dear Sir:-

In reply to your letter of May 21st, No. 51-0-5 concerning the waterproofing of the walls, and the letter of the Western Waterproofing Co. to you:-

The Superintendent of the Company's Branch in Halifax, came to Shubenacadie on the train at 9.14 A.M. I was over in the village and arrived back at the school about 9.45 A.M. I told him the date and windows where the rain came in. As he was anxious to get the next train back to Halifax, he had only twenty minutes until train time. He stood on the granite base of the windows affected and looked up along the wall. Coming back inside he showed me where the mastic which he said had been disturbed by the storm windows, and said that the water could come in there. Of course that was not included in their contract. I never saw the contract and I told him I did not know anything about it, and that point should be settled between the Company and the Department. The place where the mastic was detached was near the bottom of the window and I suppose the rain would come in there, travel to the top of the window and then drop down. As for not seeing the water actually coming in, the few storms we had were during the night and I did not see the water coming in. But today we have had heavy showers with very little wind and the water came in one of the windows of the Community Room. Today on practically every window sill, the powdered plaster is falling. This may be what they would call condensation.

I suggest that you leave things for a while longer and see what happens.

Yours very truly, Rev J P Mackey

No. 51 - 0 - 5

Dear Sir:-

Concerning your letter of April 20th:- I immediately wrote to Mr. Burgess of Truro, who has done what plastering was needed during the past five years. Over a week ago he came down and looked over the building, saying that he would send me an estimate soon. So far there has been no estimate received.

In view of the anticipated controversy with the Western Waterproofing people, and my suggestion that things be left as they are for atime, the matter of an estimate for repairing the plaster becomes secondary. However, when it comes, if ever, we will send it along to you.

Relative to the plumbing - at the time of writing to you, we were compelled to make the repairs. At a cost of approximately one hundred and fifty dollars for pipes, etc., we made these repairs and hope that this will be all the repairs for at least a year. The new galvanized pipes should last that long, and we hope the copper pipe will do for years.

Yours very truly,

Rev. J. P. MacKay

Dear Sir:-

Beg to inform you that we have an estimate on the cost of repairing the plaster on the front and eastern side of the school.

The estimate is given by W.H. Burgess, Bible Hill, Truro, who has been here and has seen for himself just what is needed. His price is $185.00. Refer to your letter of April 20, 1937.

If these repairs are to be made this summer, we would like them done during vacation time.

Yours very truly,

Rev. J.P. MacKay

EX'L.

June 25th, 1937.

MEMORANDUM:

The Deputy Minister.

Considerable repairs are required to the plastering at the Shubenacadie Indian Residential School (Electoral District of Colchester-Hants).

The Principal, Reverend J. P. Mackey, has obtained a quotation of $185.00 for this work from W. H. Burgess, Bible Hill, Truro, N. S. Father Mackey states that he considers the quotation is very reasonable.

I would appreciate your advising, at the earliest possible date, if the work can be given to Mr. Burgess. The holidays at this school will commence on July 1st and it is advisable to have the plastering done soon after that date.

Mr. MacInnes.

Replying to your memorandum of the 25th ultimo with regard to repairs required to the plastering at the Shubenacadie Indian residential school, inasmuch as the price which Rev. Father Mackey obtained from Mr. W.H. Burgess of Truro, N.S., would appear to be reasonable, the work may be placed in Mr. Burgess' hands.

It might be advisable to suggest to Father Mackey that from a Departmental standpoint it would be preferable if he consulted the Department before obtaining the prices from anyone.

Dear Sir:-

In reply to your letter of July 13, 1937 concerning the painting of window frames and outside doors.

With the exception of the front doors and girls' and boys' recreation doors, there has been no painting since the building was completed in 1929.

When Mr. Orr was down last year he brought the matter to my attention and we wrote to him about the matter this spring. Apparently that letter never reached your file. We certainly think that the work should be done, so if you will send the names of persons who may give a quotation on the price, we will attend to it immediately. Needless to say we would like the work completed before September 1st.

Yours very truly,

Rev. J. P. Mackey

RECORDS

The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa.

R

Dear Sir:-

When making up your appropriation for next year's expenditures, we beg that you will consider the following:

1. Addition to the feed room, 30 X 14. When the barn was built ten years ago, there was no feed room, and a small space was taken from the implement shed for that purpose. As you know buying feed in small amounts is more costly than in carload lots. Further, the room is not rat-proof, and year after year, we have had considerable loss from these rodents. What we would like to see is space enough to handle a carload of feed, and have it lined with sheet metal to keep out mice and rats. A few years ago we managed from school funds to have such a room for flour, rolled oats, etc., and it has meant a considerable saving.

+ 500 00 / 1938/39

11. An addition to the hog house of 30 X 19, with a straw loft above. Some years ago you allowed $1000.00 for the hog house, a dairy, and an ice house. Later one hundred and Twenty-five Dollars ($125.00) was taken from that amount to do calking around the windows and doors of the school, leaving $875.00 for the two buildings. We kept within the amount but curtailed the size of the hog house. As it is now, we have no suitable place for butchering pigs, cows, etc. The last few years we have been buying our beef on the foot for the winter months. In order to butcher them, we have to take them a distance of two miles to a slaughter house. In that way we lose considerable time, and also lose valuable feed for the hogs. So if we had this addition to the hog house, it would enable us to keep more hogs, and have them and the beef butchered on the premises. The cost we estimate of such an addition, would be $450.00

The estimated cost of the addition to the feed room would not be above $275.00

Reverend Sir:-

I am in receipt of your letter of January 7th with reference to certain improvements which you wish to make at the Shubenacadie Residential School this year. Our estimates for the fiscal year 1938-39 were prepared during the month of October and therefore it is not possible at the present time to include the total amount requested in your recent letter.

For your information I may say that an amount of $500.00 was placed in our estimates for repairs and improvements at the Shubenacadie Residential School. This amount would be more than sufficient for the addition to the hog house, cost of which I note you estimate at $450.00. About April 1st you should write me again in connection with this addition and give me full particulars regarding the material that will be required. I am pleased to note that the building could be erected by the older boys under the supervision of a member of your staff.

When writing about the hog house, you might also let me have particulars regarding material required for addition to the feed room and, if funds can be secured, this work will also be authorized.

All supplies are now secured by the Purchasing Agent and, as a result, very complete information is required regarding any materials that it is intended to purchase.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa

No. 51-0-5

Dear Sir:-

In reply to your letter of January 11th, 1938, concerning improvement to farm building here: On going over the matter again and making a few changes, we estimate that the cost of the additions to the hog-house and feed room, could be done for $572.00 Since you state in your letter that you had placed $500.00 in your estimates for repairs, do you suppose the Department would allow us to exceed that amount by $72.00. If not then we would try to finance whatever was necessary over the $500.00 from school funds. The following will give you a fair idea of contemplated expenditures:

$160.00	...Lumber from E. Kerr, Shubenacadie, N.S.	
30.00	...side wall shingles, John Benjamin, Shub.	
25.00	...windows, door, stock	Spencer Bros.& Turner, Truro, N.S.
50.00	...cement	
100.00	...roofing shingles	
180.00	...galvanized tin, nails, lead, paper .....Wm. Stairs & Son, & Morrow, Halifax, N.S.	
12.00	...gravel ...anyone we could get it from at the time.	
$572.00		

A. J. Reid & Sons Shubenacadie.

As a number of the bigger boys will be leaving the last of June, if we could have permission to go ahead with the work soon, then we think the greater part of it would be completed before vacation begins. So if you can help things along, we hope you will.

Yours very truly,
Rev. J. P. MacKay

Reverend Sir:

I am in receipt of your recent letter with reference to the changes which you wish to make to certain out buildings at the Shubenacadie Indian Residential School.

As I advised you in my letter of January 11 all supplies are now secured by the Purchasing Agent and as a result specific information has to be given regarding any materials needed.

Please let me have full details regarding the lumber, shingles, windows, cement, galvanized tin, nails, lead and paper. When I have this information the Purchasing Agent will be requested to secure the material which you require. I will arrange to have these articles purchased at the earliest possible date.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Memorandum

Dr. McGill

In connection with your requisition of the 23rd ultimo, File 51-0-5, covering building material for repairs to out-buildings at the R.C. Residential School, Shubenacadie, N.S., I would suggest that, in order to facilitate the procuring of these supplies promptly as requested, the Principal of the School be authorized to secure prices from firms on the approved list. It is essential that the following two firms be asked to tender:-

Canadian Creosoting Company, Truro, N.S.
James White, General Contractor, Enfield, N.S.

The following Halifax firms are also on the approved list.

Building supplies and Milling Companies

J.MacInnes & Son Ltd.,
H.Hemming

Upon receipt of detailed information regarding the result of tenders, we could advise Rev. J.P.MacKay, by wire, as to the action to be taken. If, however, for any reason, you consider it advisable that the tenders should be called from this office, please advise me at your earliest convenience.

W.M.Bailey
Departmental Purchasing Agent.

EX'D.

Ottawa,
June 27, 1938.

Reverend Sir:

With reference to your letter of the 16th ultimo regarding certain material required for the Shubenacadie Residential School the Departmental Purchasing Agent has directed that I request you to secure prices from the following firms:

Canadian Creosoting Company, Truro, N. S.
James White, General Contractor, Enfield, N. S.

The under-mentioned Halifax firms are also on the approved list:

Building Supplies and Milling Company.
J. MacInnes & Son Ltd.
H. Hemming.

As soon as you have received tenders from these firms please let me know and I will at once take up the matter with the Purchasing Agent who will then wire you regarding the firm to whom the business is to be given.

To assist you in obtaining prices I enclose 5 copies of the list of materials mentioned in your letter of May 16.

Yours truly,

Rev. J. P. Mackey,
Principal,
Indian Residential School,
Shubenacadie, N. S.

Memorandum for file:

Mr. Pratt phoned this morning with reference to the work at Shubenacadie.

Over the phone I read to him the names of the firms from whom Mr. Bailey authorized us to secure quotations. Mr. Pratt stated that it would not be necessary to ask quotations from the three firms in Halifax and substitute for these Edward Kerr, Plumber, Shubenacadie and A. J. Reid & Sons, General Store, Shubenacadie. He directed that a telegram be sent accordingly to the Principal of the Shubenacadie School. A copy of this telegram is on this file.

Dear Sir:- No. 51-0-5

In reply to your letter of June 27th, and your telegram of July 1st, 1938 -- Before receiving the telegram, we had sent the quotation forms to the Halifax firms. We informed each concern that if we did not hear from them by this date, we would infer that they were not interested.

The only one we did not hear from was the Canadian Creosoting Company, Truro, N.S. Since the Halifax firms replied, we are enclosing their quotations.

Hoping to hear from you soon,

Yours very truly,

EX'D.

Ottawa, July 14, 1938.

Memorandum:

PURCHASING AGENT:

I desire to refer you to your memorandum of June 23rd, giving the names of the firms from whom quotations were to be received for the building material required at the Shubenacadie Indian Residential School. The Principal was written on June 27th and the names contained in your memorandum were given to him.

On July first Mr. Pratt phoned to Mr. Phelan and stated that it would not be necessary to ask quotations from the three firms in Halifax. He also directed that for the names of the Halifax firms we should substitute the name of Edward Kerr, Limited, Shubenacadie, and A. J. Reid & Sons, Shubenacadie. This information was wired to the Principal on July first.

I am in receipt of a letter dated July 10th, in which the Principal states that previous to the receipt of our telegram of July first he had already asked quotations from the Halifax firms mentioned in your memorandum of June 23rd. No quotation was received from the Canadian Creosoting Company, but the Principal did receive quotations from the other firms mentioned in your memorandum of June 23rd and also from the two firms suggested by Mr. Pratt. I enclose all these quotations for your consideration. The materials that are required for the repairs to the outbuildings at the Shubenacadie School are shown on our requisition of May 23, 1938.

As the school authorities are doing the necessary work and as they wish to do this work during the summer holidays, I should appreciate receiving, at the earliest possible date, your decision regarding the firms from whom the materials are to be purchased.

AUG 9 1938
RECORDS

Indian Residential School
Shubenacadie, N. S.
August 6, 1938.

The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa.

Dear Sir: No. 51-0-5

Received this morning copies of Purchase Order file No.21489-15-13 for 60 sheets 10' x 2½" galvanized tin 28 gauge at forty dollars. This amount was quoted by James White of Enfield, N. S.

May we point out that the width should read 2½ feet, not inches.

We have interviewed Mr. White this morning, and he will submit a price taking into consideration the fact that the width should be 2½ feet.

May we also point out that the quotations from local people were on the 2½ foot basis.

Yours truly,

Rev. J. P. McAuley

Memorandum:

MR. BAILEY

I enclose, for your information, a copy of a letter received this morning from the Principal of the Shubenacadie Indian Residential School.

This refers to our purchase requisition of May 23, 1938 and your order No. 6553 of July 29.

The information given in our purchase order regarding the 60 sheets of galvanized tin was exactly the same as contained in the request from the Principal. Apparently he must have made a mistake by asking for tin 10' x 2½" instead of tin 10' x 2½'.

R. A. Hoey.
Supt. of Welfare & Training.

Indian Affairs. (RG 10, Volume 6056, file 265-5, part 5)

EX'D.

Ottawa,
August 10, 1938.

Reverend Sir:

I have your letter of the 6th instant with reference to the 60 sheets of galvanized tin. I note that you state that the size of each sheet should be 10' x 2½'. If you refer to your letter of May 16, 1938 you will note that the last entry on Page 1 of your letter read:

"Sheet galvanized tin 10' x 2½" .... 60 sheets"

Consequently, you will note that we requested the Purchasing Agent to order exactly what you requested.

I note that Mr. White will submit a price on tin 10' x 2½'. When this is received the Purchasing Agent will no doubt compare it with the prices received from the other firms and will decide to whom the business is to be awarded.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

Dear Sir:-

Enclosed please find four copies of invoices, from A.J. Reid & Sons, Edward Kerr, and James D. White. Attached is the purchase order.

You will note that the total amount for A.J. Reid & Sons, is $25.20 greater than the purchase order calls for, and, at the same time, that the total invoice amount for Edward Kerr is $25.20 less than the purchase order calls for. Edward Kerr did not send any quotation for cement, and somehow or other, it was included in his purchase order, at the price quoted by A.J. Reid & Sons.

No. 51 - 0 - 5

Dear Sir:-

Enclosed please find four copies of invoices from Spencer Brothers and Turner, for $22.50. You instructed me to purchase this material in a letter of May 25, 1938

We have already sent you accounts for A.J.Reid & Sons, for $271.35; James D. White for $101.00; and Edward Kerr for $145.71, making a total of $540.56.

The cost of 600 bricks, the necessary gravel, four windows, extra lumber, nails and paint, were cared for from school funds. There will be no more accounts so the matter is closed.

Yours very truly,

Dear Sir:- No. 51 - 0 -5

We are very much in need of more barn space. In the cow barn we have eleven more head than we have space for, and in the horse barn we have no room for two colts. We propose to build a small barn for calves, and have it contain a couple of box stalls, either for horses or disabled cows.

Will you consider the purchase of the following material for us. Whatever other things we may need, will be purchased from school funds.

20,000 roofing shingles (240 weight) — Wedge + Hand -
12 rolls sheathing paper
4 sheets zinc 7 ft by 3 (we don't know in pounds)
150 lbs. roofing nails 1¼ inches long
2 kegs 2½ inch board nails
1 keg 4 inch spikes
1 keg 5 inch spikes
1 keg 1¼ inch galvanized shingle nails
160 bags cement
15.000 - Pine Shingles

We will be able to work at this only when farm work is not pressing. So if we may start soon, we hope to have it completed before the snow comes.

Yours very truly,

Chas. P. McKay

Ottawa,
June 15, 1939.

Dear Father Mackey:

I arrived home Sunday evening and wish to express to you my appreciation for the many kindnesses you extended to me when I visited Shubenacadie.

Your letter of the 8th instant has reached us and the Purchasing Agent is being requested to secure the articles mentioned.

The only item on the list about which they are doubtful is 20,000 roofing shingles -- 240 weight. Could you let me have more information regarding these shingles. Possibly you could let me know their size and kind and the name of the manufacturer.

With kind personal regards,

Yours sincerely,

Philip Phelan,
Chief, Training Division.

MEMORANDUM

June 19, 1939.

Department of Mines & Resources
Indian Affairs Branch.
JUN 21 1939
RECORDS

R.

THE DEPUTY MINISTER

Indian School at Shubenacadie, N.S.

Information is received that certain materials,- shingles, lumber, cement, spikes, &c., will be required in connection with work at the above school.

We have no intimation from the Branch that such work is contemplated.

Will you please have a report furnished, giving particulars of the work, if proposed, also stating what materials and also labour will be required.

W.J.F. Pratt
Private Secretary.

EX'D.

Ottawa,
June 21, 1939.

Memorandum:

DEPUTY MINISTER

I am in receipt of Mr. Pratt's memorandum of June 19 with reference to certain material required at the Indian residential school, Shubenacadie, N. S.

With regard to this inquiry I would point out that purchase requisition dated June 15 was forwarded to the Purchasing Agent.

In addition to the items mentioned on this requisition there will also be required 20,000 roofing shingles. As soon as this Branch obtains definite information regarding the size of these another requisition will be forwarded to the Purchasing Branch.

On our requisition of June 15 it was stated that the materials requested were required for the erection of an addition to the barn at the Shubenacadie residential school. The labour is being supplied by the school management without cost to the Department.

DEPARTMENT OF MINES & RESOURCES
JUN 24 1939
INDIAN AFFAIRS BRANCH

Mr. Philip Phelan,
Chief, Training Division,
Department of Mines & Resources,
Indian Affairs Branch,
Ottawa

Dear Mr. Phelan:-

In reply to that part of your letter of June 15th, concerning the roofing shingles, these shingles are about three feet long and about a foot of depth. The weight is 240 lbs. to the square, or ten foot square. They are made in three weights, and we have asked for the heaviest, on account of such high winds in this locality. They are made by Brantford, and also by Barrett. They are the same as we have on the other barn, and most outbuildings. The cost is about 8.50 - 75 per square.

Hoping that this will clear up any misunderstanding we may have caused,

Yours very truly,

J. P. Mackey

No doubt you were glad to get home again and we

The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa

Dear Sir:- No. 51 - 0 - 5

In connection with the building of an addition to the main barn, it has been brought to our attention that we neglected to ask for any boards. We had figured on 10,000 board feet, plained on one side, but in our letter of June 8th we did not include them.

It was a mistake on our part and we can offer no legitimate excuse.

Also on the list of material you sent to A.J. Reid & Sons, the item 20,000 roofing shingles, 240 lbs to the square was not included. We were wondering if this was an oversight or if you were purchasing them direct from the manufacturers.

Boards at 20.00 a thousand would be a big item for us to absorb here along with other equipment and we hope you will supply them for us.

Yours very truly,

Rev J. P Mackey

EXD

Ottawa,
July 20, 1939.

Dear Father Mackey:

I regret that there has been some delay in securing the roofing shingles and the lumber but a request for this material has now been placed before the Purchasing Branch.

I am afraid that the information in your letter; namely, 10,000 board feet, planed on one side, will hardly be sufficient for them to obtain prices. If you have additional information you might let me have it. I am requesting the Purchasing Branch to secure the two items mentioned as soon as possible. I understand that the order has already been placed for the other articles.

Yours truly,

Philip Phelan,
Chief, Training Division.

Dear Sir:- No. 51 - 0 - 5

Enclosed please find four copies of invoice covering some of the material for the new barn. This material was supplied by Edward Kerr.

We have as yet had no word about 10,000 ft. of boards, dressed on one side, or on the Brantford Roofing shingles.

Yours very truly,

Rev. J. P. Mackey

Requisition No. 29182

Order No.

July 20 19 39

To The Departmental Purchasing Agent, Ottawa,

PLEASE FURNISH THE FOLLOWING SUPPLIES FOR USE OF Shubenacadie Indian Residential School

VOTE 76 Allotment 13-491

SHIP TO Rev. J. P. Mackey, Principal, Indian Residential School, Shubenacadie, N. S.

Purpose for which required New barn

NOTE:—Requisition for non-consumable equipment, state if New Issue or Replacement.
" consumable equipment and supplies use columns 1 and 2.

Quantity		Quantity on hand (1)	Quantity used per month (2)	Unit Price		TOTAL
20,000	Roofing shingles -- 240 lbs. to the square. They are made in 3 weights and the heaviest is required on account of the high winds in the locality of the Shubenacadie school. They are made by a firm in Brantford and also by Barrett's.					
	The Principal states that the cost is about $8.50 a square.					
10,000	Board feet lumber planed on one side.					
	The Principal estimates the cost of this at approximately $30.00 a thousand.					

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

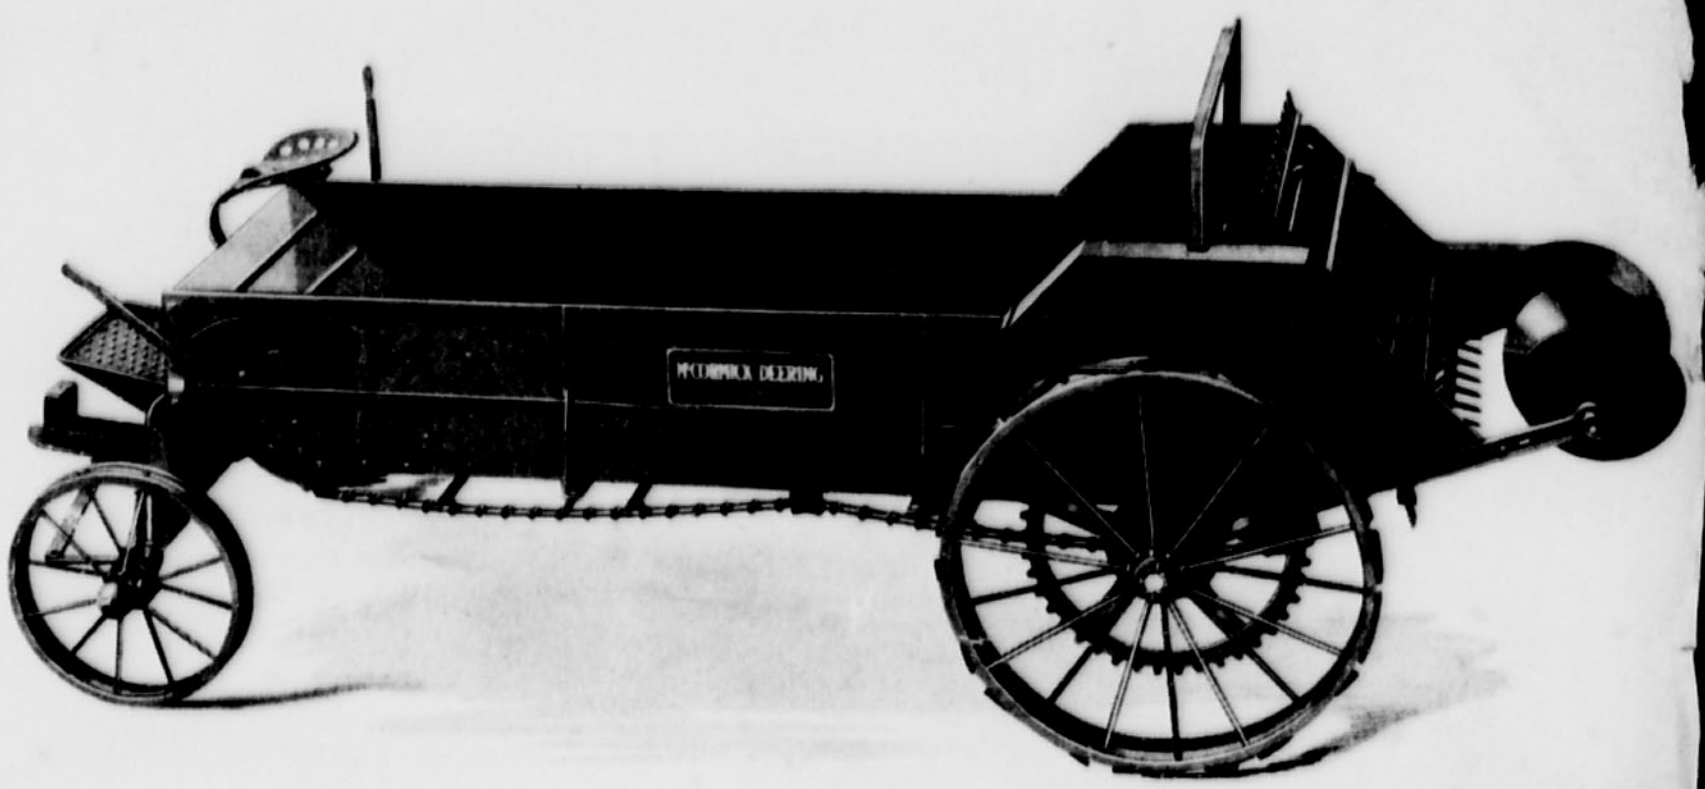
4-A
DER

Use

t



Illust. 8. The exclusive all-steel construction of the No. 4-A manure spreader makes it especially desirable for every-day use. Quality material and precision workmanship at every vital point to assure long years of satisfactory service.

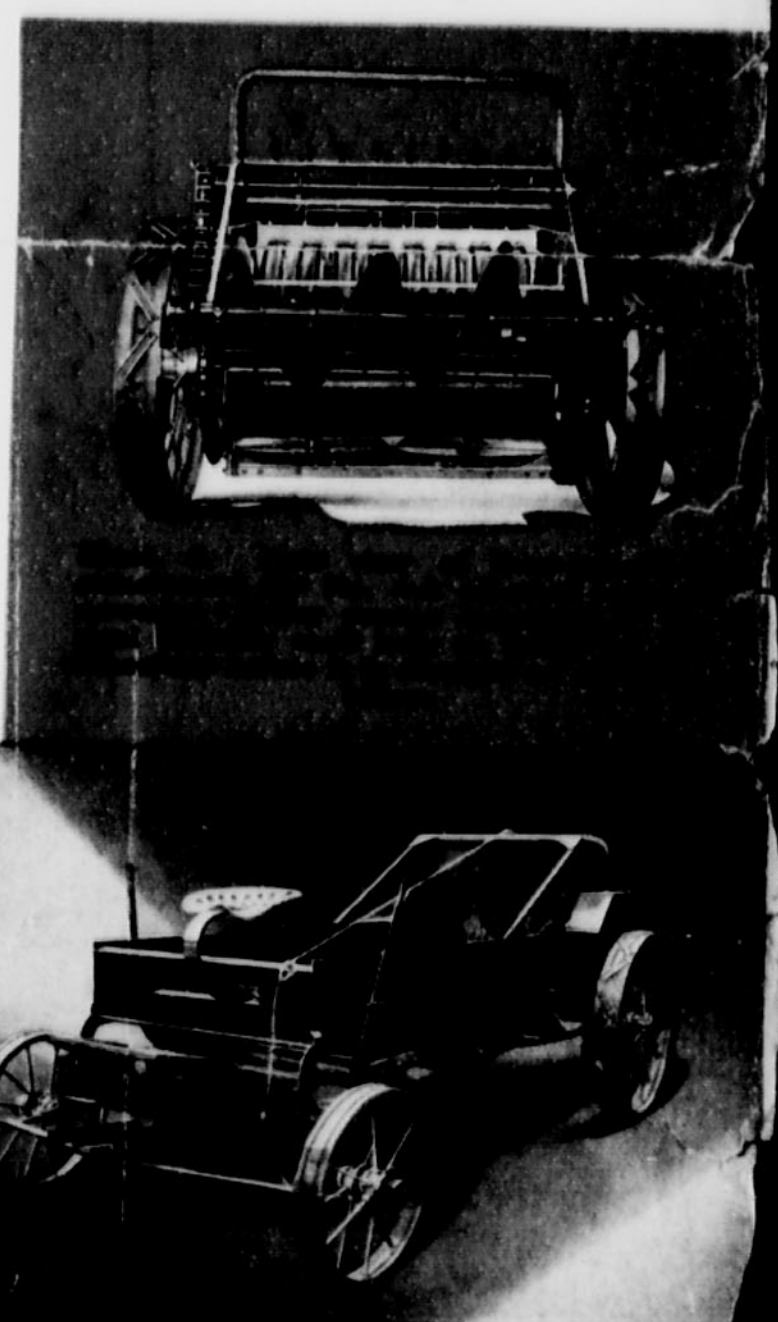
Lime-Spreading Attachment

MOST soils require an application of limestone to grow either clover or alfalfa successfully. The lime-spreading attachment built especially for the No. 4-A *all-steel* manure spreader provides an economical and convenient way to spread limestone in quantities up to 5½ tons per acre.

The lime-spreading attachment is easy to attach and just as easy to operate. There are two revolving disks with fins set side by side underneath the rear end of the spreader bottom.

When the spreader is in motion the disks rotate and spread the lime toward the rear and sides—an approximate spread of 12 feet. The steel retarder rack included as part of this attachment is placed at the rear of the spreader, and steel prongs help to break up the lime before it is dropped on the disks below.

The endgate is equipped with hangers which slip over the top of the steel retarder rack and hold the endgate in place while the lime is being hauled to the field. The No. 4-A manure spreader has a capacity of two tons of limestone per load.



Endgate Attachment for Semiliquid Manure

The liquid portion of the manure is the most valuable part and should be carefully conserved. The endgate attachment is used in hilly sections to prevent waste when hauling semiliquid manure to the fields. It can be conveniently raised from the seat while the spreader is in operation. A spreader box rear pan for catching the semiliquid manure may be used either with the endgate attachment or alone where a minimum of litter is used.

RECEIVED

The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa

No. 51 - 0 - 5

Dear Sir:-

Would it be possible for the Department to supply us with the following pieces of equipment:-

3 Sewing Machines, No. 15-38-404 at $56.10 each

1 Refrigerator, General Electric Model P.B. 690,
cost price Halifax $168.00

1 Lime -spreading Attachment for McCormack Deering
No. 4 A Manure Spreader ..list price $44.25

The old Sewing Machines, some in use for eleven years, are about done. You replaced four out of seven five years ago. Besides school work, we have done some Red Cross work:- 69 Hospital Bed Gowns; 12 prs. Pyjamas; 29 Sailors' Scarfs; 44 Soldiers' Sweaters; 27 prs. Socks; 2 prs. Wristers.

As for the Refrigerator, we have one large Kelvinator on the basement flat, and everything, meat, butter, milk, etc., have been going in that. We have been using for twelve years an ice box for refrigerator for supplies for my own table on the second flat.

As for the lime-spreader attachment to manure spreader. Early this fall we found that it would be necessary to spend at least one hundred dollars in repairs on the original manure spreader. Rather than do that and still have an old piece of machinery, we bought a new spreader at the cost of a hundred and eighty Dollars ($180.00) and hope to pay for it from school funds. The manure spreader is a McCormack Deering, and the attachment should be of the same make.

POOR COPY

T[redacted] recent storms have shown plainly that the building is not water-proof. The southern exposure which was water-proofed is leaking on the top floor. A rain storm from the North-east always causes leaks above each window, on that side of the building. This section was not water-proofed.

In the laundry, the washer, a wooden affair, in service for eleven years, will have to be replaced within the next year. If at all possible, we hope you will be able to appropriate funds for these necessary expenditures. A new metal washer would cost in the vicinity of Eighteen Hundred Dollars ($1800) and a replacement of the wooden one about Five Hundred ($500)

To water-proof the walls which so far have not been done would cost somewhere between Four and Five Thousand.

We, like everyone else, are finding that the Government taxes have greatly increased our costs. We bought our flour a short time ago, costing $826.00 and out of this amount, the Government tax was $107.00. Wool for knitting caps and mittens, costing $150.00, had a tax of $10.80. However, we are not complaining, and hope to keep out of debt.

Yours very truly,

Rev. J. P. Mackie

EXD.
A

Dear Father Mackey:

I have your letter of the 4th instant with reference to certain equipment requested for the Shubenacadie Residential School. With regard to the sewing machines I am unable to decide exactly what you require in view of the price quoted. Do you want the ordinary sewing machine or is it some special kind that you request? We can secure the ordinary machines much cheaper than the cost mentioned in your letter.

I do not think I will have any trouble arranging for the purchase of the attachment for the manure spreader.

Regarding the refrigerator I realize that it would be very advantageous but at the present time it is practically impossible to secure consent for purchase of this type of equipment. Under these circumstances I regret that it will not be possible to favourably consider your request.

It is quite possible that you will have some other requirement that you can substitute. I will await a further reply.

Yours truly,

Philip Phelan,
Chief, Training Division.

The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa

Dear Sir:- No. 51 - 0 - 5

In reply to your letter of October 9th. With regard to the Sewing Machines they are an improvement on the old machines, and as far as I understand, they have an adjustment which would do away with many little repairs, which are often necessary on the ordinary machine, sometimes even when they have been in service for only a short time. However, if you are not providing other schools with this improved machine, we would not wish to be considered as an exception, and would be very content to have the ordinary machine.

We are glad to know that there will be no difficulty about the manure Spreader. We do not know of anything to substitute for the refrigerator. We have been doing work in clay for two years, and would like to have a "kiln" but we have not as yet been able to get details of construction and cost. We would also like to have a wall and shed for the manure, but if there is no chance for the refrigerator, then there would be less chance for these other things.

Yours very truly,

Rev J. P. MacKay

Discount	$	4 65
	$	41 60

GOODS ORDERED HEREIN ARE F.O.B. Shubenacadie TOTAL - - - - - $

The undersigned agrees to receive said property on arrival, paying all freight and charges as specified above, and to settle for the same in cash on delivery or tender in cash and instalment lien note as follows:

$ cash, $ Note, payable

$ Due	19	$ Due	19	$ Due	19
$ Due	19	$ Due	19	$ Due	19
$ Due	19	$ Due	19	$ 1.41 Due	19

No $1-0-0. Authorized Nov 4th 1940 J. P Mackey

with interest at 7 per cent. after maturity.

Each new machine covered by this order is warranted as per printed warranty endorsed hereon. **No warranty whatever is given as to used or second-hand machines.**

It is agreed that the title to said property shall remain in you until the purchase price and all notes given therefor have been paid in full in cash, and further that said property shall remain personal property in whatever manner it may be annexed to real estate.

The Company is not to be responsible for loss, damage or delays in transportation after shipment, nor is it to be responsible for failure to supply any machines ordered hereunder or to ship the same on time where prevented by strikes, fires or accidents or by the season's demand exceeding the available supply or by any other causes beyond its reasonable control; and acceptance of this machine or machines shall be deemed a waiver of all claims for delay arising from any cause.

I (the purchaser) also promise and agree to furnish further security satisfactory to you, at any time, if required. If I fail to furnish such security, when demanded, or if I make any default in payment, or should I dispose or attempt to dispose of my land, or any part thereof, or of my personal property, or should I attempt to rescind (countermand) this Order, you may then declare the whole price due and payable even before other maturity by contract, note or otherwise of the same, **and suit therefor may be immediately entered, tried and finally disposed of in the Court having jurisdiction at the place where the within named BRANCH HOUSE OF INTERNATIONAL HARVESTER COMPANY OF CANADA, LIMITED,** is located, and you may retake possession of the machinery or property so sold to me without process of law, and at any time thereafter, without notice to me may sell the same at public auction or private sale, the proceeds thereof, less proper charges of retaking possession and sale, to be applied on account of the amount of the purchase price and interest then unpaid; such sale or right to sell shall in no way affect or limit my liability for the full purchase price or your right to sue for and recover from me said full purchase price and interest, except that in the event of such sale I shall receive credit on account as before provided, and shall thereafter be liable to pay the balance only. Upon such sale, if any, my right to possession and delivery before and after full payment, and all my other rights and claims thereto shall forever cease. Subject to these provisions I am to have possession and use of the machinery, etc., at my own risk of damage or destruction from any cause whatever.

This order shall not be binding upon the Company until approved by the manager of its Branch House aforesaid and no other person has any authority to add to, change, or waive any of the terms, conditions or warranties contained herein either before or after such approval. The undersigned acknowledges receipt of a true copy of this order.

Re Accident involving Shubenacadie
Residential School Car - Nash - Sedan - 1940

Dear Mr. MacInnes.

I regret to report an accident involving damage to the above car while being driven by myself.

On returning to Shubenacadie by train from New Glasgow on Feby 24th I received Head Office letter of Feby 17th requesting me to complete an inspection of the Yarmouth Agency. To reach Yarmouth by train it involved my proceeding during the evening to Halifax or Windsor Junction for overnight there getting the Yarmouth train the following morning and

Indian Affairs. (RG 10, Volume 6056, file 265-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

spendonly eleven hours before reaching there with a similar time required to return to Shubenacadie -

My business here was completed, as far as possible for the day, by noon on the 26th and rather than lose one and one half days in reaching Yarmouth, and a similar delay to return, I requested the use of the School Car from Father Mackey to which he gladly agreed.

I reached Yarmouth during the evening of the 25th completed my inspection during the 26th and until 3 p.m. on the 27th at which time I started for Shubenacadie via Shelburne and the South Shore highway. This highway was taken as the Valley highway via Kentville was blocked with snow.

We leaving Yarmouth driving conditions were good with mild weather prevailing. At a point 5 miles before reaching Liverpool at a ~~point~~ fairly sharp

ARCHIVES PUBLIQUES
CANADA

POOR COPY

turn in the road a sheet of ice caused the car to skid & swerve sharply to the right - A row of guard rails banked the highway at this turn and the right-hand side of the car was grazed heavily by one pole while a second pole was struck by the left front of the car. The impact was fairly heavy with considerable damage being done - No other cars were near at the time. The car did not leave the highway & I was not injured. I was driving alone.

I had the car towed to Thompson's Garage at Liverpool and proceeded by bus the following morning to Halifax. At Halifax I visited the Nash Auto Sales Service and instructed them to send a truck to Liverpool to tow the car to their Garage for repairs. I might add there are not any Nash Service Garages nearer than Halifax - it appeared obvious that this company at Halifax have the best equipment and mechanics to complete the necessary repairs. The Nash Service Garage at Halifax

are distributors for Nash parts for Nova Scotia and are known to Father Mackey as reliable. The car was purchased from this Company.

I have instructed this Company to immediately submit an estimate of the cost of repairs and to proceed with same having in mind that the car is required at the School and should delay ensue difficulty might be experienced securing necessary new parts.

My driving speed at time of accident was 35 to 40 miles per hour and it happened at dusk just prior to lighting head lamps. Road conditions up to the time of meeting the sheet of ice was reasonably good with highway clear of snow although in parts wet & slushy.

I much regret having to report this accident to the School Car as it is my first after many years of driving Department Cars. Yours very truly

W. D. Arneil, Inspector.

Dear Mr. Arneil:-

I have received your letter of March 4 in which you report an accident involving the Shubenacadie Residential School car. The question of the repairs to the car is being dealt with on another file.

I am sorry to learn of this accident but also very glad to know that you were not hurt in any way.

With best wishes,

Yours vincerely,

Original Signed

T.R.L. MacInnes,
Secretary.

Ottawa,
July 14, 1942.

Dear Sir:

I have a letter from the Principal of the Indian residential school at Shubenacadie, N.S., with reference to sugar requirements at the institution. At this Indian residential school there are 160 pupils and a staff of approximately 15 persons. For your information I may say that there are 77 Indian residential schools throughout Canada. Some of them have a smaller enrolment than Shubenacadie and others have a larger enrolment. I should, therefore, appreciate your forwarding to me a copy of your regulations which govern the securing of sugar at institutions of this kind.

Yours truly,

Philip Phelan,
Chief, Training Division.

MAY 6 1943
REGISTERED

The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa

Dear Sir:-

We are having a heavy rainstorm today, and on every window on the front of the school, we have pots and pans to catch, and sheets, etc., to absorb the rain that is coming in, dripping, almost running, from the tops of the windows.

Seven years ago this coming Fall, the Department had the front of the building, and part way around each corner, water-proofed. For a few years everything was fine; for the last two years a little rain has been coming in, but now it just pours in. During a storm less than a week ago, we had the same thing happen. It just means, that besides the mess, and the unpleasant smell of wet lime, that the plaster crumbles, and finally the putty coat lets go, leaving the brown undercoat.

We feel that until the war is over nothing can be done about it, not only on account of the cost, but more so the matter of obtaining the workmen to do a good water-proofing job. The flashing which goes partway under the granite coping on the top of the wall is partly to blame, but there is no doubt about it, that with a strong wind blowing the rain comes through the cement between the bricks, and also penetrates some of the soft bricks than can be found in the wall.

Seven years ago a goodly number of bricks were replaced, but apparently not all the soft ones were removed. A suggestion had been made that the copper flashing should cover completely the top of the wall.

The situation is not unusual in the Province, as practically every brick building erected in the Province for the past twenty-five years has had the same trouble.

We are calling the matter to your attention now only that it may be repaired at the convenient time.

Yours very truly,
Rev J. P. MacKay.

Re: Shubenacadie Indian Residential School, Shubenacadie, N.S.

I enclose, for your information, a copy of a letter which has just been received from the Rev. Principal. As he states in his letter, we had the front of the building water-proofed some years ago and apparently it will be necessary to have some similar procedure followed as soon as conditions permit.

As Mr. Buck will be in Nova Scotia this summer in connection with the proposed buildings on the new reserves, it would be appreciated if you could arrange to have him visit Shubenacadie and make a thorough examination of the Shubenacadie Residential School and on his return he would no doubt let us know what action he considered should be taken and at the same time supply us with an estimate of the probable cost.

Mr. Mills' recommendation concurred in. If you approve we will ask him to arrange with a waterproofing company for an estimate of cost.
7/12/43. J. M. W. J.M.W.

DEC 8 19

December 6th, 1943.

Memorandum:

Re: Shubenacadie Indian Residential School, Nova Scotia.

With reference to your notation of May 10th last on copy of Dr. McGill's memorandum of May 7th regarding the above institution, I might say that as Mr. Buck was not in the Maritimes this summer he did not make the examination requested. However, you will recall that Mr. Sparks visited the Eskasoni and Shubenacadie Reserves in connection with the water supply question, and while at Shubenacadie he undertook an examination of the Residential School.

Mr. Sparks has reported that he found the situation as regards leaks when southerly and easterly storms occurred was as described in letter from Rev. Father J.P. Mackey, Principal, to Dr. McGill under date of May 4th last, and that considerable damage is being done to plaster work throughout the building, but principally on the top floor. The roof was examined and appeared sound, and it is considered no leakage could be attributed to this source.

As pointed out by Rev. Father Mackey in his letter of May 4th, it is not unusual in coastal areas for masonry buildings to have trouble of this nature. It will be noted further that Rev. Father Mackey states that some years ago the front of the building was water proofed, and for a few years everything was fine. However for the past two years conditions have been getting worse again.

Mr. Sparks reports that all exterior wall areas and window and door openings were examined, as well as the roof parapet walls and copings. Leaks do not appear to develop under ordinary rain conditions, but only when storms occur. Under these circumstances, and in view of the conditions of the walls as noted during examination, it is Mr. Sparks' opinion that further waterproofing of walls and openings should be undertaken. He further considers that all exterior walls of the structure should be treated as considerable deterioration was noted in masonry previously untreated, as well as around window and door openings.

While Rev. Father Mackey advises he feels that until the war is over nothing can be done about repairs it would appear that much damage to the building may result if such repairs are postponed indefinitely. We therefore suggest that approval be given to arranging with a competent waterproofing company for an estimate of the cost of treating the exterior walls of the institution in order that consideration may be given to the possibility of undertaking some repair work at an early date.

T. S. Mills

Chief Engineer.

Dr. R.A. Hoey,
Acting Director, Ind Dept.,

Dear Mr Hoey

The washing machine,
with over fifteen years of continued service,
is at the end of its usefullness. The fixture
is falling apart, and you can pull strips or
pieces of the wood off with finger strength.
The Canadian Laundry Machinery Co.,
Toronto, Ont.
Serial No. 1215 1/2 (M. 7196) - were the makers.
May I ask your very early
consideration of a replacement as this fixture
will go to scrap any time.

Sincerely Yours
J. N. Brown

Ottawa,
February 7, 1944.

Dear Father Brown:

EX'D.

I have your letter of the 3rd instant, with reference to the washing machine at the Shubenacadie Residential School. To replace this equipment at the present time would involve an expenditure for which no special provision was made in the current year's appropriation. While at certain times of the fiscal year we are able to handle unforeseen expenditures, it is difficult to do so at present, due to the fact that the end of the fiscal year will soon occur and our funds at this period of each fiscal year are usually very low and all allotted.

If you had found it possible to come to Ottawa last month we could have discussed with you a number of matters with which you cannot be expected to be familiar at the present time. May I point out the following:

1. The fiscal year starts on April 1 each year and runs for a period of twelve months to the following March 31.

2. The estimates for the expenditure during each fiscal year have to be prepared several months in advance. For instance, the estimates for the fiscal year 1944-45, which begins on April 1, 1944, and ends on March 31, 1945, were prepared in October, 1943.

3. We are only allowed a very small amount to cover unexpected expenditures and, as a result, it is extremely difficult, if not impossible, to provide funds unless the expenditure has been specifically provided for in the appropriation.

Rev. J.W. Brown,
Principal, Indian Residential School,
Shubenacadie, N.S.

Indian Affairs. (RG 10, Volume 6056, file 265-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

4. We always provide the per capita allowance without any request from the school, because this is a regular expenditure each year and, without any communication from the principal, we know the pupilage for which grant is provided and the rate per capita.

5. When funds are provided for an expenditure purchase is made through our Purchasing Branch and they require very detailed information regarding the articles required, in order to make certain that they secure what is actually needed.

At the present time I cannot see my way clear to purchase a new washing machine for the Shubenacadie School and I trust that you can arrange to have minor repairs made that will keep this machine in operation for the next few months. Although we have not been previously advised regarding the condition of this machine and, therefore, have not provided any amount specifically in our 1944-45 appropriation for its replacement, we will endeavour to find funds in May or June. This will involve reducing the amount to some other residential school and such procedure always causes us considerable correspondence, if not rather strong protests.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

File 51 - 0 - 5

Dear Sir:-

Your favor of February 7th at hand. I regret that a formal application for washing machine was not made earlier.

Mr. MacLeod says that three years ago this washing machine was falling apart. In looking through the files, I find that a representation of the matter was made to the Department under date of October 4, 1940.

We will try to make the washer hold together until April. Both slats and ends are rotted out, and a bolt comes right through the pulp slats. So you see we are in a bad spot, with a thousand pieces of washing each Monday. Let's hope it holds, and if not, a wire will advise of end of this washer. Coming by freight and its placement would spoil a month. The Purchasing Branch will have gone into the merits of this washer, or a better one, so we could hope for least possible delay, if this unit goes bad beyond repair.

Sincerely yours,

J.W. Brown

Reverend Sir:

I have your letter of the 10th instant, with further reference to the washing machine at the Shubenacadie School. When you come to Ottawa next month you should have with you full particulars regarding the size and type of the washing machine at present in the school. You should also discuss with Mr. MacLeod the possibility of our securing new slats and installing them in the machine. Possibly the whole machine will have to be replaced, but we have had somewhat similar experiences in other places and when new slats were provided the machine worked satisfactorily for a further period.

Yours truly,

R.A. Hoey,
Supt. of Welfare & Training.

Indian Residential School,
Shubenacadie, N.S.
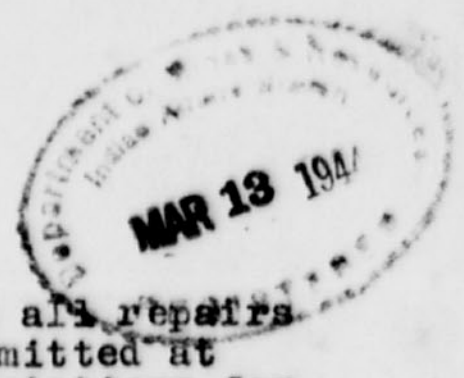
February 14, 1944.



The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa

Dear Sir:- No. 51 - 0 -5

We have been given to understand that all repairs and purchases, other than minor, must be submitted at once, to be considered in near future appropriations for school. I am therefore, submitting report of Mr. MacLeod, our carpenter-engineer.

The pumps here were installed in 1929, consisting, of
1 only 5000 gal. per hour pump, driven by 1 - 5 H.P. Motor;
1 only 2500 gal. per hour pump. driven by 1 - 3 H.P. Motor.

These pumps have been running on an average of eight to eleven hours per day, for the last fifteen years. The pumps start against direct water pressure, cut in at full speed, with no air chamber or varying speeds to cushion strain on same. It is a case of start or break, which we have had plenty of in crank shafts and piston rods. The pumps being out of date, it is impossible to get parts, and we have to revert to brazing, which is not at all satisfactory for running parts.

The Commutator on amature of 5 H.P. Motor is completely worn out, has been refaced several times; not stock enough for further refacing.

We have two pressure tanks in pump house, and the pressure is maintained by pumps. We have no storage tank or reserve supply at all. If anything goes wrong with pumps, we are out of water completely until repairs are made. The voltage is irregular here, causing heating and wear on motors.

Would suggest new pumps, and one 5 H.P. Motor; otherwise water supply is going to be some problem shortly.

Leaks in hot water pipes are continuous. The minerals in the water when heated eat right through the pipes and fittings. Some of the pipes have been replaced four times in the last fifteen years. The Only remedy here would be copper piping or water softener; the latter not satisfactory under supply conditions.

Kelvinator was condemned four years ago by reliable repair man.

All Motors and machinery are worn, which can only be expected after fifteen years.

Yours very truly.

J. M. Knowles

Recommend purchase of new pumps with motors as per letter

Dear Sir:-

In regards to repairing the washing machine, it must be understood that this is a wooden washer, and all the wood is rotten, not only the slats of cylinder, but ends also.

Where connections for drain tee and drain tee ring connect, to washer, you can push a screw driver right through the cylinder; therefore, there is nothing to work on.

This report can be verified by Mr. Arneil, who inspected the machine a short time ago.

Yours very truly,

E. Bruce Rusk.

Dear Sir:

On June 17th, we wrote to the Department of Mines and Resources Ottawa regarding payment for the laundry equipment which was shipped to you on April 6th. We have received a reply dated June 20th, Ottawa File 51-0-5 asking us to kindly forward invoices in duplicate to you so that you can certify that the merchandise has been received and forward the invoices to the Department at Ottawa for payment. Purchase Order #23361 instructed us to send four copies of the invoice to you at the time of shipment and according to our records this was done. We are now enclosing copies of our covering invoice in duplicate and we would appreciate it if you would see that these are properly certified and put in line for payment.

Attention: Reverend Father Brown.

Dear Father Brown:

Attached please find our quotation covering replacement pumps as per our conversation on the writer's recent visit.

After consulting our Engineering Department we found that Centrifugal Type Pumps would not make as good an installation as the positive displacement pump, inasmuch as the head is rather high for the quantity of water being handled. Centrifugal type pumps or turbine type would require more Horse Power and this would necessitate your having either 220 or 440 volt power.

We sincerely believe that our new style typhoon pumps will give you many years of trouble-free service.

Yours respectfully,

The Canadian FAIRBANKS-MORSE Company Ltd.

Ottawa

Dear Sir:-

In March last, I reported directly to the Department the conditions of pumps and motors, which have to do with our house and barn water supply. I was directed to have an Engineer go over the equipment, and secure plans for an improved power plant.

I am forwarding under separate cover the report of Mr. Roy A. Smith ~~John Conn~~, on the condition of motors and pumps, and the proposed replacements by Can. Fairbanks-Morse Co.

Our present plant has been in continual operation for over fifteen years, and has served its day.

May I ask that something definite be done before the cold weather of winter comes along?

Sincerely yours,

REVERAND J.W. BROWN, Principal.

Ottawa, July 12, 1944.

Reverend Sir:

The Department has carefully considered your letter of June 14, with reference to the condition of the pumps and motors operating the water supply at the Shubenacadie Residential School.

With reference to the attached quotation, the Department does not see the advantage of buying the first outfit mentioned for $620.40.

If you consider two engines are required, the second pump should be another Fairbanks-Morse #2340T.

According to the catalogue, the list price of this engine is $345.00, and there would be the further advantage that you would have two engines exactly the same and it would be easier to obtain repair parts.

The Department approves of your purchasing either one or two Fairbanks-Morse pumps No. 2340T, also the Type Z gasoline engine. This will involve an expenditure running from $648.50 to approximately $1,000.00. In view of the very strong financial position of this school, it is felt that payment for this equipment should be made from school funds. The amount specifically provided in the current year's appropriation for repairs and improvements at the Shubenacadie School has already been over-expended, due to the purchase of the washer.

Yours very truly,

Encl.

R. A. Hoey,

Dear Father Brown:

We have just received a report from the Surveys & Engineering Branch in which they estimate that an expenditure of $3000 will be involved in properly repairing the roof of the Shubenacadie Residential School. We do not have this amount provided in the current year's appropriation and it is evident from the report we have received that the work should be done at the earliest possible date. In view of the very satisfactory condition in which the finances of the Shubenacadie School are at the present time, I thought that you might agree to take an amount of $3000 from your credit balance in order that the work could be completed at the earliest possible date. Please let me hear from you by return mail.

Yours truly,

I.A.1156-4

October 21st, 1944.

Memorandum:

Re: Indian Residential School, Shubenacadie, N.S.

Further to information already furnished you on the above, you are advised that the building was inspected by a representative of Messrs. Creaghan & Archibald, Montreal, Agents for the Western Waterproofing Company, in March of this year. This firm had carried out waterproofing on portions of exterior walls and stone copings about seven years ago which eliminated leakages into the building for some time; but it has been reported by the School Principal that for the last two years water has again been finding its way into the interior of the building, and is causing extensive damage to plasterwork.

Examination of the roof by Mr. Sparks in the fall of 1943, indicated that the roof covering was intact and that walls and parapet flashings were sound, but that bed joints below, and vertical joints between the coping stones, were in most cases only filled with broken and loose mortar, permitting water to seep down through voids in the wall between the brick facing and tile backup. Mr. Sparks expressed the opinion that water is also penetrating the brick facing of the wall. The total accumulation of moisture is being expelled at the heads and jambs of doors and windows resulting in the damage referred to.

Reporting on the failure of their previous treatment of wall surfaces, Mr. T.C. Creaghan stated that, in his opinion, water admitted at the top of the wall had destroyed adhesion of the waterproofing, and that before further waterproofing would be effective the coping should be repaired. He stated further that he did not believe any asphalt pointing compound would be able to resist constant expansion and contraction, and that for permanent satisfaction, the stone coping should be metal covered. While an estimate had been requested for the work considered necessary, none was received from this firm. We concur in their opinion, however, that caulking the joints of the coping with an elastic asphalt compound, would only be a temporary improvement and would have to be repeated at intervals. We feel that permanent satisfaction could only be obtained by a metal covering being applied over the copings. The material used in the Shubenacadie area should be 16 ounce copper.

This Service contacted Mr. H.H. Foreman, Co-ordinator of Capital Equipment and Durable Goods, Wartime Prices and Trade Board, and was advised that 16 ounce copper would be released to the Contractor if it was decided to use this material.

POOR COPY

It is likely that by installing a copper covering, much of the infiltration of water would be eliminated; but some waterproofing on the brick faces of the building would still be necessary. It is felt, however, that the latter phase of the work might be deferred until the effect of the metal covering could be observed. Mr. Sparks was requested while in Nova Scotia to obtain competetive prices for the work involved, but was only able to secure a tender from one firm, namely: James Donohue, Limited, of Halifax amounting to $2,746. This firm carried out the roofing and flashing on the school building when it was built. Mr. Sparks has advised they have a good reputation, that they have the necessary stock of 16 ounce copper, and would be able to give immediate attention to the work.

No prices have yet been obtained for waterproofing brickwork; but based on the cost of work carried out at the Louisbourg Museum some years ago at a unit price of 40 cents per square foot, applying a clear waterproofing compound to the affected areas, would require an expenditure in the neighborhood of $4,000. Due to wartime labour conditions, this unit price may no longer be applicable. Confirmation from a reliable firm would be necessary before funds were allotted to this phase of the work.

While no funds have been made available, it is possible that the Indian Affairs Branch may wish to proceed with some of the work in the near future, under which circumstances, it is recommended that the tender obtained by Mr. Sparks, from James Donohue, Limited, amounting to $2,746., for applying the covering to the coping be accepted, and that $3,000. should be provided to cover the cost of the work and engineering expenses.

Instructions regarding our further action will be appreciated.

J. H. Mills

Chief Engineer.

Dr. McGill

Re: Water penetration Shubenacadie Indian Residential School, Shubenacadie, N.S.

With reference to your memoranda of May 7th and December 8th, 1943, I may say that this problem has been looked into further and for your information, I enclose copy of a memorandum from Mr. Mills, dated October 21st, which is self-explanatory.

We concur in Mr. Mills' opinion that the first step that should be undertaken is the covering of the coping with copper and would recommend the acceptance of the tender of James Donohue, Limited at $2,746.00, if funds can be made available.

Will you kindly advise if you wish this work to be proceeded with this year and if so, will you please transfer $3,000 to our Engineering and Construction Service to cover the cost thereof.

Saw him Powell was advised him I should proceed along lines indicated in letter 3/Nov/44 DDD

DIAND

51-0-5

Ottawa,
November 11, 1944.

Reverend Sir:

I desire to refer to my letter of October 31 and your telegram of November 4, with reference to repairing the roof of the Shubenacadie Residential School.

In view of the fact that you are prepared to pay the cost of these repairs from school funds, the Department feels that you should sign a contract with James Donohue Limited, Halifax, for $2746. This is the price they submitted to the Surveys & Engineering Branch to do the work that the engineers of that Branch consider required. In the contract with the firm you should have a clause reading: "Work will be subject to inspection during progress and at completion by an engineer of the Surveys & Engineering Branch and it is understood that the firm will carry out their contract to his satisfaction." We are arranging to have one of the engineers of the Surveys & Engineering Branch, likely Mr. Sparks, examine the work as it proceeds and at completion and as soon as he advises you that the firm have carried out their contract in the manner specified you should issue a cheque to the firm for the amount mentioned above. In submitting his report, Mr. Sparks expressed the opinion that water is penetrating the brick facing of the wall. To overcome this condition it is proposed to install a copper covering. Mr. Sparks stated that James Donohue Limited are a reputable firm and that they have the necessary stock of 16 ounce copper and are in a position to give immediate attention to the work.

Memorandum:

DIRECTOR

Surveys & Engineering Branch

I am in receipt of your memorandum of October 25, with reference to repairing the roof at the Shubenacadie Indian Residential School. The Chief of the Training Division interviewed Mr. Pounder, who in turn, I am informed, discussed the matter with you. Instead of transferring the funds to your Branch it has been arranged to have the Principal of the school pay for the work from school funds.

With the above in mind, we wrote to the Principal on November 11 and I enclose a copy of our letter for your information.

P.P.

NOV 17 19
RECEIVED

Dear Mr. Hoey:-

Your letter of November 11th at hand. Following an interview with Mr. Sparks, on the question of repairs, I phoned the Donohue Co., who had offered to do the work at a cost of $2,746.00, only to learn that they have no copper for the work at this time, and that it would take from ten to twelve works to procure some. Also it would be necessary to have a Priority Permit, to be obtained by the Department, before copper could be used on this job.

Mr. Donohue also advised the delaying of the work until April, '45, when the weather is more favourable. So the work is off for the winter months, and I will see to it that copper is at hand, and Priority permits arranged for in early March, so as to have no further delays - almost two years now - in this work of caring for our school building.

My thanks to Mr. Sparks for his interest and help.

Sincerely yours,

J. P. Brown

REGISTERED

The Secretary,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa

Dear Sir:-

I am enclosing a letter from Mr. Somerville, St. John Manager of International Harvester Company, of Hamilton, Ontario. This is a reply to an inquiry I made as to the chances we might have of obtaining one W-6 Tractor. This machine is heavier and stronger than the W-4, and for our farm work, because of hills, more serviceable than the lighter tractor.

I have not up to this date made application to the Department for the purchase of this Tractor. I wanted to know our chances of obtaining one, before undertaking Departmental sanction.

We need a change in our older team of horses. They have done their share of hard work, and are now so far crippled as to be no longer serviceable. A new team would cost $500.00, new harness, etc., about $200 more. The Tractor will do the work of five teams, and outlive several succeeding teams by years. It would be a good economy of about $1200 to purchase the Tractor.

Now, what can the Indian Department do towards having the required permission granted, that we may be alloted one W-6 Tractor. If they are being manufactured, then one can be spared to come East, where we need it so much for our farm.

May I hope that the Department will consider this invitation to use its influence in having one W-6 Tractor forwarded us at the very earliest moment? Thanks.

Sincerely yours,

Dear Father Brown:

I have your letter of the 20th instant, with reference to your decision to purchase a tractor from school funds. I discussed the contents of this letter with Mr. Hoey, and at the present time we do not wee what assistance we can give.

If you can obtain the tractor, we have no particular objection to your doing so. However, as pointed out in the letter from the International Harvester Company, which I am returning to you, it is extremely doubtful if you would be able to secure a new tractor during the current year. As conditions are at the present time, it would appear advisable to postpone the purchase for another year, unless it is absolutely essential that you should have it for this year.

Yours sincerely,

File 51 - 0 - 5

Dear Sir:-

In re: Proposed repairs to the Building.

James Donohue, Ltd., Halifax, N.S. were directed last November to undertake such repairs as would stop the roof leaks. For over three years, extra heavy rainstorms, from the south and east, have come through to the ground floor, damaging ceilings, walls, and floors.

Making another examination today, Mr. Donohue, and his over man, with our Mr. McLeod, declares it is no use to go on with the copper repair work, ordered last Fall. Winter storms have so destroyed the roof, making many new leaks; thus, making utterly useless the proposed repairs.

What we need at once is a complete new roof job, and then the copper placed under the coping -- not over the coping, and down on to the leaking roof. That means all the granite coping must be removed, the copper placed or set on bricks, and then run down and under the new roofing, in such measure as to turn aside any water present from our severe wind and rain storms, coping then to be replaced. In our original plans, two inches of copper was directed to go under the roofing. There may be places where such would keep out the rain, but no good, on our hill, where the winds are strong. The old roofing has done its time at seventeen years, and is no longer a fit covering, to protect the building, or health of teachers and children.

Out

The cost for proposed repairs was to have been paid from "House Money" the savings in seventeen years by Father Mackey and Sisters, for replacements in machinery within the building and on the farm.

Now, this proposition is entirely new and a much greater cost. May I suggest that it is a Capital expenditure and that our "House Money" should not be now expected. However, it is Department Money, and may be placed in its spending as the Department may direct.

Indian Affairs. (RG 10, Volume 6056, file 265-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

The Repairs to the building has been on the Order Sheet for over three years. If longer delayed it will mean a major cost for repairs to the main building.

May I ask that some very definite action be undertaken at once.

If the Department thinks an Architect should visit and investigate roof conditions, may I suggest some one who knows of our Maritime winds and rainstorms? Be that as it may, I hope for some early results, as all too hurriedly our fall storms will be our visitors.

I beg to enclose Mr. Donohue's estimate of cost for new roofing, and cost of copper work would be much less than former price submitted.

Yours very truly,

J. W. Brown

Re: Repairs to Indian Residential School,
Shubenacadie, N.S.

The Engineering and Construction Service has had the greatest difficulty in getting a satisfactory price from a contractor on the repairs to the roof and coping of the above building.

James Donohue Limited of Halifax was the only contractor who seemed interested in this matter and a firm quotation from him was delayed for some weeks because he could not obtain any price for the masonry work or secure the services of a mason.

As it is necessary that this work be completed this fall the above Service has been pressing the matter as much as possible and we hope that within the next three or four days a definite quotation will be forthcoming.

SPECIFICATION FOR

NEW FELT AND GRAVEL ROOFING, FLASHING

AND REPAIRS TO COPING AND FLASHING

INDIAN RESIDENTIAL SCHOOL

SHUBENACADIE, NOVA SCOTIA

The Contractor shall visit the site and make himself thoroughly familiar with existing conditions at the building. The work under this heading shall include all material, labour, equipment and services necessary for the proper carrying out of the work as shown and specified.

EXTENT OF WORK

The present felt and gravel roofing over the entire building is to be removed, and a new four-ply felt and gravel roof installed. The Contractor shall arrange that the roofing work be carried out in sections, so that at no time shall any portion of the roof be left unsealed. He shall arrange for the proper storage of new material and the removal of all surplus material from the present roof, and from the premises. He shall satisfy himself that the roof decking is smooth, rigid, and free from loose or rotten boards, or large cracks or knot holes. The deck boarding shall be broom clean before application of the new roofing. Any defective boarding in present roof deck shall be replaced with sound material.

The present coping stones of entire building (except over projecting higher portion at centre front) and the first outer course of brick immediately under the coping shall be removed, to allow setting of the new flashing. This work shall be done in sections, so that no unfinished portion of the wall be left exposed to the weather.

New copper flashing to be installed, running through wall under coping and outside course of brick. Existing flashings to be re-used, and additions and adjustments made to complete the work as indicated on the detail drawings. Existing flashing at chimneys, skylights, roof trap, junctions of lower roofs, ventilators, hoppers, etc. shall be repaired and adjusted as may be found necessary.

REMOVAL AND RESETTING OF GRANITE COPING AND BRICKWORK

The granite coping stones, and the outer course of brick immediately under, shall be removed to allow for setting the copper cap flashing as shown by detail drawings. This work shall be done in small sections, so that no part of the uncovered wall shall be left exposed to the weather. Clean off all loose mortar, and reset flashing, brick course, and copings in non-staining cement mortar thoroughly bedded, and all joints flushed full. Top joints of coping stones shall have raised beaded joint, and exterior joints colored and finished to match existing work. The upper five courses under coping to be repointed to match existing work.

Indian Affairs. (RG 10, Volume 6050, file 265-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

The vertical joints in raised central front portion of coping where the coping and projecting ornament has not been removed and vertical joints at rise in coping over front end bays, and at chimneys shall be raked out to a depth of 1½" and repointed with lead wool driven firmly into joints and finished flush.

FLASHING

Contractor shall supply and set all new cap flashing under coping stones and brickwork as shown by details. All new flashing and replacements to existing flashing shall be 16 ounce cold rolled copper, properly lapped and soldered according to standard practice. Face joints where copper and stone or copper and brick adjoin are to be thoroughly caulked with mastic caulking compound. At all points where roof is broken by chimneys, skylights, roof traps, junction of lower roofs with walls, ventilators, hoppers, etc., shall be repaired, adjusted, and renewed.

FELT AND GRAVEL ROOFING

Present felt and gravel roofing over all flat roofs of building shall be entirely removed, and new felt and gravel roofing installed. Contractor must arrange to carry out this work in such a manner that the interior of the building is protected at all times from the weather.

New roofing shall be four-ply built-up asphalt roofing with fifteen year guarantee bond, laid in accordance with the specification of, and inspected by an approved roofing manufacturer - Barrett Company Limited, or equal.

GUARANTEE BOND

The Contractor shall be required to furnish the Department with a 15 year Guarantee Bond, at the completion of the contract, covering material and workmanship in the installation of felt and gravel roofs.

GENERALLY

The Contractor must arrange to carry out the work [illegible] that the activities of the school may be carried on without interruption. All debris from the roof must be lowered to t[illegible] ground in chutes, or in such a way as to minimize dust. The Contractor shall make good any damage to the building or grounds caused by the alterations.

Memorandum:

September 13, 1945.

Re: Indian Residential School,
Shubenacadie, Nova Scotia.

With reference to your memorandum of the 9th ultimo, we have now received a quotation from James Donohue, Limited, Halifax, for all repair work at the above school upon which that firm was asked to tender and which reads as follows:-

"We quote you on a new Four Ply Tar and Gravel Roof, new copper wall covering, removing and replacing the granite coping to Indian School at Shubenacadie the sum of Sixty Nine Hundred and Three Dollars ($6903.00)

The Mason thinks that it would take about four or six weeks to do the mason work."

The proposed work is covered by a Specification and a sketch detail of Parapet and Flashing (blue print, Index No. 801) prepared by this Service, a copy of each of which is attached for your information.

As the price quoted by the James Donohue Company appears to be reasonable under existing conditions, it is recommended that the tender be accepted by the Indian Affairs Branch.

You will recall that these repairs were to be carried out with funds under the control of Father Brown, school Principal, and that no transfer of funds to this Service is required.

If the Indian Affairs Branch decide to proceed with the work, additional copies of the drawing and specification will be forwarded, upon request, for the use of the Indian Affairs Branch.

Mr. Hoey

Re: Repairs to Indian Residential School, Shubenacadie, N.S.

In reference to my memorandum of the 14th instant, I am now forwarding herewith a memorandum from Mr. Mills, dated September 13th, to which has been attached a specification and blueprint covering the construction of a new roof and repairs to the existing granite coping.

You will note from Mr. Mills' memorandum that the price quoted by James Donohue Limited, Halifax, for the work to be done under the plan and specification is $6,903 and that this tender is regarded as satisfactory.

It is our understanding that this work will be carried out under the direction of Father Brown, School Principal, who will make payment to the contractor from funds under his control.

As it is unlikely that any other favourable quotation would be received this year, the offer of James Donohue Limited should thus be accepted and that firm should be advised immediately.

Additional copies of the drawings and specifications will be furnished as required.

Re: Shubenacadie Indian Residential School, Shubenacadie, N.S.

With reference to your memorandum of September 18th, Father Brown is being written and directed to engage James Donohue Limited, Halifax at the price quoted in your memorandum. I am also sending Father Brown copies of the specifications and one copy of the plan.

I believe it would be advisable for you to send additional copies of the specifications and plans which I could send to Father Brown in order to make sure he will have all he requires.

OCT 5 1945

Dear Mr. Phelan:-

Your letter of the 20th at hand, with the blue print of work to be undertaken in re-roofing the Indian Residential School. I at once called upon Mr. Donohue, in Halifax. He came out here the next morning, and signed the contract, and advised that he would go to work at once.

I am not much of an Inspector, but I will do what I can to insist that a good job is done. The Department has an Inspector here now, to care for the work on the School at the Reserve. I will ask his help to get things lined up as they should be.

I beg to acknowledge receipt of your letter inquiring about increased expenditures in last financial year. I shall have this at hand within next two weeks. To go over past years costs and compare is taking more time than we thought required.

Sincerely yours,

REVEREND J. M. [illegible] Principal.

The large Tractor, purchased as a used Tractor, is also giving out, and requires continual repairs.

Now for the big one!

We have had four weeks of hardship in our home, never experienced before. Our new pumps were placed and were efficient. All went well for a week, and then we lost the water, and have had to draw it for every house service for nearly a month. It seemed that the check valve in the main intake, 5 inch pipe, had failed. Our pumps had no prime and we could get no water. We dug up about 125 feet of pipe, including that which was out in the lake. We discovered the check valve twenty feet from lake side, and made repairs. In lifting the pipe, one connection was broken, and it took three weeks to replace the pipe, and make it water tight again. We got water on again last Saturday, October 13th, which, mostly, was an answer to prayers. I am forwarding samples of small fixtures, adhering to the interior of the main pipe. In some are pea sized holes; that same sized hole is in the pipe -- chemically eaten out -- leaving our main line pipe with a million chances to eat through, -- then the air gets in and our pumps stop. If that happens before Spring, we will be in a desperate plight. We are just going to hope and pray for the best -- that it may at least last until Spring.

The pump men and others agree there is only one solution - namely, a <u>new pipe line from lake to school</u>; and -- the pumps placed at the lake, not half way up. You can <u>Push</u> water anywhere; it is most difficult to haul it up.

May I respectfully suggest that this work of replacement may simply not be set aside, cared for in the Spring, or "The Dept. has not enough funds to care for such coots" We cannot live here without water; we just must have it, and the Department will, I Hope, arrange for the work of replacement, so that it may be undertaken at any date, if it was so required.

Shubenacadie, Nova Scotia

October 18, 1945.

OCT 20 1945

Dear Mr. Phelan:-

With report of costs going along to the Department, it is a good time to report conditions over our property, and suggest one most urgent and costly repair.

Our roofing repairs are being carried on as directed. Repairs to cracks, not included in specifications, will be cared for while the men are on the job. We hope to have a waterproof building, and can begin the interior repairs to ceilings and walls brought on by years of delay in undertaking the present repairs.

In general, may I suggest that all our units are going wrong, breaking up and blowing out, at quite the same time.

In 1945 we had to renew our boiler, at a cost of $590.00 which provides hot water and steam for the laundry. It just simply quit. We forwarded it to Matheson Co., New Glasgow. No repairs possible, and I ordered a replacement. Same is on duty now.

Again, the large house storage hot water boiler just went bad. It opened up enough to make repairs impossible. The condition of the boiler plate is such that - through chemical internal destruction - the whole unit is ready to quit any moment. We had the Matheson Co., Engineer come, measure the old boiler, and I ordered a replacement at a cost of $375.00. The small boiler for house hot water is a wreck, and will have to be renewed very soon.

I wish to advise also, that thousands of feet of piping through the building, hot water or steam, is in poor condition, and should be renewed with some other more resisting pipe.

The shingles on the barn had to be renewed at a cost of $349.00 We had a garrantee of fifteen years good service. The Company replaced the shingles at a considerable reduction in cost. This just had to be cared for in July, since Mr. Parker declared it was no good to put hay in the barn with the shingles in such condition.

Mr. [redacted]rris' report on the Shubenacadie Agency dated Oct.27- Nov.I

NOV 29 1945

SHUBENACADIE RESIDENTIAL SCHOOL -

This institution is one of the best managed schools that I have yet inspected. The Sisters in charge are competent teachers. The discipline is good, the children are well-behaved, well-dressed, and well-fed. I inspected the repairs that were being done to the roof. The stone coping was being lifted and replaced on a copper sheeting that would deflect the water off the wall. The workmen were doing a good job, and I feel certain these repairs will prevent the water from seeping down the walls. The walls that were damaged will have to be replastered in some places, and then the damaged areas redecorated. Father Brown informed me that he had ordered - by express - seven lengths of 5inch Pipe, 18 feet long, to replace damaged pipes in the water system. Repairs were made without the new pipe. The seven lengths have arrived and are at the Shubenacadie Station. I am of the opinion that Father Brown was too hasty in ordering the pipe - especially asking that delivery be made by express. The cost of express, I understand, is approximately $35.00.

Father Brown has purchased, at different times, two - five acres of farm land adjoining the school property for $500.00 and $750.00, respectively, with the registering of the deeds in his own name of approximately $1,300.00. Again I must condemn Father Brown for his hasty action. I consulted Father Mackay, the former principal, on the need of this additional land. He advised that the school could undoubtedly get along for many years without the additional ten acres of farm land, but with it there would be twenty acres of land for root crops which would make it possible to raise five acres each year on a four-year rotation plan - which is necessary. Consideration should be given to the purchase of this ten acres from Father Brown. Note, vegetables have been grown on this land during the past year and, I understand that Father Brown has been paid, or expects to be paid, $75.00, for the use of the land this year.

DIRECTOR
NOV 24
SURVEYS

NOV 30

Memorandum: November 24th, 1945.

Re: Shubenacadie Indian Residential School
Water Supply.

With reference to your request of the 12th instant for an inspection and report on the above as asked for by memorandum dated October 31st addressed to you by the Director, Indian Affairs Branch, Engineer R. R. Ross, of this Service, advises that he looked over this system when he was in Shubenacadie recently in connection with the Indian Agenty Development.

The water system supplying the Residential School was installed in 1929 and consists of a 5 inch suction main approximately 1150 feet long from a lake north of the school farm to a pump-house located on the farm and a 4 inch pressure main approximately 750 feet long from two 1100 gallons Hydro Pneumatic pressure tanks in the pump-house to the school. The pump-house is about 14 feet above the level of the lake and there is an additional rise of about 15 feet to the school. Approximately 425 feet of the suction main at the lake is on property held by the adjoining land owner and the right to construct and maintain the main is covered by an agreement dated October 22nd, 1929. Besides the tanks, the equipment in the pump-house consists of two reciprocating pumps, renewed during the past summer, of capacities of 2500 and 3500 gallons per hour respectively at 100 pounds pressure. These pumps are electrically driven with a gasoline engine stand-by and are automatically controlled to maintain water under pressure in the tanks.

The piping is of galvanized steel and when dug up during the fall, to replace the foot valve in the lake, were found to be extensively pitted under tubercles on the inside. The pipe was not open when our engineer was at the site but some tubercles, with adhering flakes of metal, that had been removed were examined and these verified the description of corrosion as given by the farm foreman making the repairs. Although galvanizing was not noticed on the outside of the pipes when they were dug up, no serious exterior corrosion was found.

It appears that the corrosion of the pipe has reached a critical depth and at any time the pitting may extend through the metal which is about 1/4 inch thick. Since this is a suction main, or intake, any leakage will deprive the pumps of

POOR COPY

their prime which amounts to seven or eight hundred gallons in this length of pipe. With the pumping system out of order not only is the Residential School without water, but water under pressure is essential for the furnaces.

Under the circumstances it is recommended that the intake main from the lake to the pump-house as well as the pressure main from the pump-house to the school be renewed during the coming summer at a time when the heating system is not operating. It is considered that cast iron pipe should be used for this purpose on account of it's non-corrosive qualities. Since 4 and 6 inch sizes are standard for cast iron pipe, it is recommended that 6 inch be installed for the suction main instead of 5 inch as at present and the present size of 4 inch retained for the pressure main.

Regarding the suggestion to remove the pumps to the lake it is understood the pumps in their present location gave satisfactory service in the past until the foot valve failed through corrosion. It is felt that with an intake main without leakage the system will continue to operate satisfactorily as presently laid out. The land at the lake is not owned by the Department and the pump-house at this location would be farther from the other buildings for operation and electric service.

An estimated cost for carrying out this work is given as follows:

Materials	-	$ 2,600.00
Excavation, backfill and laying pipe	-	2,050.00
Contingencies	-	350.00
Total	-	$ 5,000.00

It is suggested that the materials be ordered at as early a date as possible in order that they may be on hand to replace the present system early in the spring should failure take place during the winter. The distances given above are only approximate and it is suggested the Reverend Principal of the school be asked to check the distance between the inlet of the main and the pumps and also between the pumps and the school before an order for pipe is placed.

Mr. Philip Phelan,
Chief, Training Division,
Dept. of Mines & Resources,
Indian Affairs Branch,
Ottawa

Dear Mr. Phelan:-

Mr. Rice, Indian Agent, is forwarding three copies of cost, for repairs to the coal bin. I did not suspect that the costs would have been so high, or I would have applied for the permission to go ahead with the work.

The necessity for this work goes back years, when the boys cut the copper covering, with the shovels, while putting in the coal. That caused a leak, and a fire in the coal bin was blamed on the coal being wet, during a very hot summer. Then two years ago, the roofing of copper blew off, and I decided it must be replaced. The enclosed snap shows the roof, the copper placed on, and the work about finished. Then to save it from harm, we placed a wooden covering over the copper, and that should make it secure from the outside for about fifty years.

I regret the cost, since I would have applied, had I known it would cost half as much. We can still pay it from our Bank money, if you so desire to have the cost protected that way.

I have not been so advised from your Department, but it seems large amounts are to be forwarded by Mr. Rice, as Agent. That was not the custom preceding my coming to the school, or up to recently. It does not make any difference to myself, yet I would like to be advised of such changes.

No word, or sign of work on the main roofing job at this time even though Donohue promised Mr. Morris he would begin last Monday.

Sincerely yours,

REVEREND J.R. BROWN, Principal

MAY 7 1946
REGISTERED

Shubenacadie, N.S.
May 23rd, 1946

Indian Affairs Branch - Ottawa, Ont.

Re Voucher #225, C.F.Cox, Truro, N.S.

Reverend Father Brown, Principal of the Shubenacadie Residential School passed me an Invoice to voucher in for the Residential School, for covering a Coal Bin adjoining the School.

This roof was blown off two years ago, and cut up by coal shovels which destroyed it. It had to be renewed on account of Fire Hazard.

The cost was much in excess of what was expected. If he had known what the cost would be, he would have asked permission from Ottawa, which he did not.

When Mr Morris was here he was advised regards this being done, and saw the job personally. I feel this was necessary and would recommend that it be paid.

Mr. H. C. Rice, Indian Agent,
Shubenacadie, Nova Scotia.

I have your letter of the 23rd instant, enclosing voucher No. 225, covering cost of labour and material for repairing the coal bin roof at the Shubenacadie Indian Residential School.

It is simply impossible to control our appropriation, if the Principals incur expenditure without first obtaining authority from the Department.

I think this account should be paid by the Principal's School Funds, and you should so inform him.

Philip Phelan,
Chief, Training Division.

Re Indian Residential School

I wish to call to your attention regards the condition of the piping in the Residential School. I went over to the school to-day while a new pressure tank was being installed over the boilers in the boiler room, and on examining pipes including 2 and 3 inch sizes found them full of corrosion so bad that hardly a lead pencil would pass through. I feel sure with the pressure increased the pipes throughout the school, which are no doubt in the same condition, will burst. I do not know whether this has ever been brought to your attention before or not, but feel that there should be an inspector brought in to examine the whole water and heating piping system, as it does not seem possible to heat this building this winter with the pipes in their present condition. Also the water pressure is very low and feel that it is on account of the corrosion in the water pipes. This must be caused from some kind of chemical substance in the water, also the water should be tested for vegetable matter, etc. Regards the building, after roof had been repaired this building still continues to leak very bad, coming through windows, also bricks as well, and ruining inside finish. I understand there is a product called Aquella that will overcome this leak on the brick, but this in turn would change the color from brick red to white. Kindly advise with respect to above.

Re Renewal Water-Line, Indian Residential School

No doubt you are aware that all pipe, fittings, etc for the new water-line at the Residential School are on hand and ready to be installed. Mr Ross of the Engineering Branch has advised that he is to inspect the Installation of this line.

Up to the present time there is no money here available for this job. I would estimate the cost of installation to be about $2500. I feel this work should be started at the earliest date possible, before the cold weather sets in.

Will you kindly advise.

Mr. H.C. Rice, Indian Agent, Shubenacadie, N.S.

I have your letter of the 28th ultimo, with reference to the renewal of the water line at the Shubenacadie Residential School.

I presume that the amount of $2500.00 mentioned in your letter is for labour and that the work will be under the direction of Mr. Ross. Arrangements will be made to send you an accountable cheque for this amount. The Department would appreciate it if you would keep in close touch with the work so as to insure that it is completed as quickly as possible and that no unnecessary expenditure is incurred.

TENDER and AGREEMENT

To: H.C.Rice - Indian Agent., Shubenacadie., N.S.

I ~~Raymond~~ H.J. MacMichael, the undersigned, agree by these presents to furnish all scaffolding, shoring, equipment and tools, and to perform all labor, to lay a cast iron pipe-line from a designated point in Snide's Lake to the existing Pump-House, thence to the boiler room of the Residential School, and to connect to the existing hydrant near the barn on the said residential school property, completely, and in accordance with the grades set by Mr R.R.Ross, the departmental engineer, in a workmanlike manner, and in accordance to the instructions of the said engineer, and to his complete satisfaction.

I hereby state that I have examined the site, and agree to make all JOINTS absolutely AIR TIGHT, and upon completion of laying pipe line from lake to pump house, and before back filling, I hereby further agree that same shall be made by me to meet the test of holding water for a period of twenty-four hours without any loss of water.

It is understood that the work will be proceeded with immediately and continued without interruption, until fully completed.

It is specifically agreed that I shall be solely responsible for all accidents and damages resulting from the execution of my work, and that I shall take all the necessary precautions as may be required, for the protection of my employees and any other persons.

PAYMENT FOR THE WORK UNDERTAKEN shall be made at the completion and acceptance of the work.

The price for which I offer to do the work above mentioned is Two Thousand Five Hundred Dollars ($2,500.00)

Re Pipe-Line Indian Residential School

This is to advise you that the contract for the installation of the Pipe-Line at the Residential School, Shubenacadie, N.S. has been let to Mr H.J.MacMichael and work started to-day, September 24th. After trying every contractor this is the only man that would consider accepting this job at the price of $2500.00 which I consider is a fair and just price. It was impossible to have this work done by days work beaause of the scarcity of man-power in this section, and the high wages demanded for this type of work. Enclosed find copy of Tender and Agreement which I trust is satisfactory to you.

MEMORANDUM:

Re: Indian Residential School,
Shubenacadie, Nova Scotia.

Further to information furnished in our memorandum of September 12th last, dealing with the domestic water service, and moisture infiltration at the above School, you are advised as follows:

Under date of September 13th this office suggested to Mr. Ross that since no estimate of cost had been included in his report, it would be well to contact a reliable plumbing and steamfitting firm and obtain an estimate of cost for the work. At the same time we advised him that we were requesting the Canadian representatives of the Western Waterproofing Company, in Montreal, to arrange for an inspection of the exterior walls by their local representative, and to furnish him with their recommendations and an estimate of cost for waterproofing treatment. We have been advised in the interim between our memorandum of September 12th and the present, by the distributors, that the introduction of Cactizona into the domestic hot water system does not eliminate the need for water softening equipment, but merely prevents solidification of deposits on the piping of chemical elements present in the water. Final consideration of the matter must, therefore include water softening equipment.

Under date of October 8th last, we received a letter from Messrs. Creaghan and Archibald, of Montreal, Canadian representatives of the Western Waterproofing Company, stating that they had inspected the School, had taken numerous photographs, and were preparing to study the problem, with a view to recommending procedure to be followed, and the preparation of an estimate of cost for the work. Mr. Ross had suggested to them that,upon completion of their study, one of their officers should visit our Chief Architect and present their proposal, with comment and their estimate of cost to Mr. Buck. In their letter Creaghan and Archibald indicated they would follow this action but, to date, this Service has not been contacted. Such work is slow and costly and we must be prepared to receive an estimate of considerable proportions. We will contact Messrs. Creaghan and Archibald regarding the matter very shortly and report their recommendations, and estimate of cost to you for transmission to the Indian Affairs Branch.

Under cover of a letter dated November 6th, Mr. Ross has furnished us with comment and a tender, resulting from an examination of the domestic hot and cold water system, by W. J. Christie, Plumber and Steamfitter, of Truro, Nova Scotia, involving an expenditure of $8,300. Mr. Christie confirms our opinion that most of the water piping is not only corroded but is also so filled with encrustation that a severe drop in pressure is occurring on the upper floor. He also recommends, however, removal of certain pieces of equipment, and replacement of many plumbing fixtures, regarding which we have had no previous complaint or report.

Our preliminary study of the mechanical services in the School indicates that some of the present equipment could be retained with advantage, but we are doubtful if any reliable opinion could be obtained without sending our Mr. Hargreaves to Shubenacadie to inspect the system and to submit a report.

In a brief discussion of the situation at this building between our Chief Architect and Mr. Phelan, in which the likelihood of an emergency developing was pointed out, the latter officer of the Indian Affairs Branch indicated that it was not likely that any funds for work on the Shubenacadie Residential School would be included in their 1947 - 48 estimates.

Under such circumstances, we do not propose taking further action, other than reporting on comment from Creaghan and Archibald, unless requested to do so.

	The sinks at present in the school are made of galvanized iron. They have been repaired repeatedly and are now beyond the soldering stage and are leaking badly. Immediate replacement is necessary.		

B'K'D.

I hereby certify that I have personal knowledge that all the above articles are required in the Department and for Departmental purposes only. The expenditure required by this requisition is strictly unavoidable and the public interest will suffer if it is not made.

Mr. H.C. Rice, Indian Agent,
Shubenacadie, N.S.

In your letter of January 13th, you requested two sinks for the Shubenacadie Residential School and we requested the Purchasing Agent to secure them.

From something that was said at the Residential School last Friday, I obtained the impression that you had made other arrangements for the sinks. Please let me know if you still want us to order the sinks requested in your letter of January 13th.

Philip Phelan,
Chief, Training Division.

CANADA
DEPARTMENT OF MINES AND RESOURCES

INDIAN AFFAIRS BRANCH

Ottawa, February 13th, 1947.

Memorandum:-

Colonel B.F. Neary
Supt. of Welfare & Training

On the occasion of my visit to the Shubenacadie Residential School on February 7th, Indian Agent Rice, Sister Superior and myself visited all parts of the building.

As you are aware from previous report, there has been considerable trouble caused by water coming into the building following rain storms. They had a very severe storm in Nova Scotia last week and as a result a very large quantity of rain came through the south wall and also through the east and north walls. The condition has become so serious that actual damage has been caused to the building to say nothing of the fact that practically all the top floor will have to be replastered.

We took up this matter with the Surveys & Engineering Branch some months ago and yesterday I phoned to the architect, Mr. Buck, who stated that he had sent experts there and has recently received their report. He promised that he would submit it to us in the near future.

It is probably going to cost in the vicinity of $15,000. to treat the walls of this building in such a way to prevent further damage by water. It seems to be a heavy expenditure but we have a good building at Shubenacadie and we must not allow this condition to continue any longer.

Philip Phelan
Chief, Training Division.

Ottawa, February 21st, 1947.

Mr. H.C. Rice, Indian Agent,
SHUBENACADIE, N.S.

With reference to Mr. Phelan's recent visit to Shubenacadie Residential School, we are advised by the Surveys and Engineering Branch that arrangements are being made to treat the outside walls in order to prevent further seepage of water. We hope to have the funds for this purpose during the fiscal year 1947-48.

Outside of the damage done by the water, Mr. Phelan considered that the building was in reasonably good condition.

It should not be necessary to erect any other out-buildings at the present time. Mr. Phelan obtained the impression that the principal was considering the erection of some other small buildings. You should make certain that he does not do so.

There also appears to be no great necessity for replacing the present school car. The Department originally purchased this car and when the time comes to replace it we will make any arrangements that are necessary. Needless to say, the car must not be replaced without obtaining the Department's approval.

Bernard F. Neary,
Supt. of Welfare & Training.

Re: Shubenacadie Residential School
Shubenacadie, Nova Scotia.
Your File I.A.1156-4-2

Attention: Mr. T. S. Mills - Chief Engineer.

Dear Sirs:

In answer to your communication of September 13/46 and with reference to interview which the writer and our Mr. Piecken had with your Mr. Buck in Ottawa on January 10th., we wish to submit the following proposal for weatherproofing all exterior walls (exclusive of stuccoed passageway) of the complete building referred to above from roof flashing down to grade on all elevations.

Scope of Work.

1. After thoroughly washing down the surfaces we would apply one coat of iron waterproofing over all surfaces of the brickwork applied by brush. This iron would form a bond between the masonry and cement coats which are later referred to and would also give a more even density of surface over the areas so that any water taken out of the cement plaster coats would be evenly distributed. This iron coat would be allowed to oxidize thoroughly before any further operation takes place.

2. The next operation would consist of the application of a base coat of cement and sand containing a small percentage of iron bonded to the iron waterproofing coat. This coat would be scratched and approximately one-quarter inch in thickness.

3. A final cement finish coat would then be applied and wood floated to true surface of a maximum thickness of one-quarter inch.

4. A further and final application would consist of brushing two coats of our Resto-Crete Weatherproofing treatment over all surfaces of a colour to suit the client. We believe that a pure white colour might be very suitable for this purpose but that is a matter of choice.

Indian Affairs. (RG 10, Volume 6050, file 265-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

Continued:

5. All stonework would be repointed and weatherproofed with Resto-Crete.

6. We also include for checking over all openings and recaulking same using mastic placed by gun.

In quoting the figures as below mentioned we assume that the owners would supply us with the necessary water to allow us to carry out these operations.

For the work as above specified we quote a lump sum price of Thirteen Thousand One Hundred Dollars ($13,100.00) and assume that if this work were to be done that same should be started and completed during good weather periods.

Guarantee: We guarantee that if, at any time, within 5 (five) years from date of completion, it should happen that leakage develops in the surfaces treated by us, due to defective work on our part, we will upon request promptly make repairs thereto at our own expense. Defects in the structure, or other causes beyond our control, resulting in fracture, are not covered by this guarantee. Roof and roof flashings to be properly maintained by others during period of guarantee.

As mentioned to your Mr. Buck, if the base coat referred to under item No. 2 was applied under pressure by the use of a gunite machine the coat would be slightly harder. This would cost an additional Fourteen Hundred Dollars ($1400.00) due namely to getting a compressor and the equipment on the job with additional use of more material.

Total 14,500

In submitting this proposal it is our belief that same would give you the best protection to overcome troubles which you are now having, although you have furnished new roofs and new flashing over the copings. We would have to fix up some of the brickwork at the main entrance before applying any plaster coats and this would be taken care of.

We trust that this proposal will receive your serious consideration and should we be favoured with your order same will have our every attention.

Yours very truly,

CREAGHAN AND ARCHIBALD LIMITED

SURVEYS & ENGINEERING

I.A.1156-4-2

March 21st, 1947.

Memorandum

Re: Water Infiltration, Indian Residential School, Shubenacadie Indian Agency, N.S.

We have had in our hands since January 22nd, 1947, a proposal submitted by Messrs. Creaghan and Archibald Ltd., of Montreal, Canadian representatives of the Western Waterproofing Co., of the United States, following a thorough inspection of the above school building carried out in company with our Mr. Ross, about October 1st, 1946.

You were advised in our memorandum of October 8th last, that Creaghan and Archibald, after a study of data assembled on the site, proposed having their Mr. Archibald visit our Chief Architect to discuss the matter before submitting a proposal. This visit and discussion took place on January 10th, 1947, following which the proposal referred to above was submitted.

As Mr. Phelan, Chief of the Indian Affairs Training Division had indicated that no funds for work on the building, were to be included in the 1947-48 estimates, we have deferred reporting on the matter until the present, when time from more pressing commitments, could be found.

In the discussion referred to, Mr. Archibald stated that the condition at the school, was not an uncommon one in coastal areas in Canada, where violent storms occur resulting in as great horizontal precipitation as vertical, & have sufficient force to drive water through brick jointing, and even through brick unless special precautions are provided for in specifications. Mr. Archibald as might be expected, recommends that mortars containing water repellants, should be employed in brickwork, which in turn should be laid by such specialist firms as themselves, who while limiting a guarantee of their own work to five years, consider such masonry construction to be completely satisfactory for the lifetime of the building. It is our opinion that this is advice well worth following, in coastal masonry construction.

Mr. Archibald stated that the brickwork at Shubenacadie appears to be as well laid as an average specification demands, and that while the cement mortar used, appears strong and hard, it gives definite evidence of shrinkage, leaving cracks at the vertical and horizontal edges of the joints. In our opinion this fault indicates a mortar containing too much cement and too little or possibly no lime. Even in cement mortar a percentage of lime paste is essential to retard moisture absorption by the brick, while the set and bond is taking place.

J.M. Wardle, Esq.,
Director,
Surveys and Engineering Branch,
Department of Mines and Resources,
O t t a w a, Ont.

...P.T.

Indian Affairs. (RG 10, Volume 6050, file 265-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

His examination, which is supported by Mr. Ross, convinced Mr. Archibald that jointing faults are so numerous over all faces of the building, that pointing work only would be very expensive and unsatisfactory, and that any applied film of transparent waterproofing would require replacement at intervals.

Mr. Archibald stated that the new built up roof on the school and the new copper flashing, which were installed by Indian Affairs, from funds under control of the Reverend Principal are well executed, and prevent water infiltration from the roof.

On the basis of his opinions, Mr. Archibald has now submitted his proposal, which includes an estimate of cost, which for the complete building amounts to:-

(a) With cement base coat applied by hand with brush $13,100.00
(b) " " " " " under pressure $14,500.00

A copy of the report is attached for transmission to Indian Affairs with this memorandum.

It is imperative that at some time in the near future, funds must be provided for the improvement of conditions at the school, if it is to be kept in operation and after a thorough analysis of the situation, we feel that no better proposal is likely to be forthcoming, than the attached.

It is quite likely that, if funds cannot be made available until the 1948-49 estimates are approved, the cost will be higher.

T. S. Mills

Chief Engineer.

Mr. Hoey

Re: Water Infiltration, Indian Residential School, Shubenacadie Indian Agency, N.S.

It will be recalled that considerable difficulty on account of water infiltrating the walls of this school which was erected in 1929, has been reported from time to time. The front of the building apparently was given a water proof treatment in 1936 and considerable repairs to the roof, including covering the coping with copper were undertaken in the fall of 1945.

As these repairs did not wholly correct the conditions complained of arrangements were made for an inspection of the school last fall by Messrs. Creaghan and Archibald Limited of Montreal, Canadian representatives of the Western Waterproofing Company.

Enclosed for your information are copies of a memorandum from Mr. Mills, dated March 21st, and of a proposal from Messrs. Creaghan and Archibald Limited, dated January 21st, which are self-explanatory.

From these reports you will note that Messrs. Creaghan and Archibald have proposed two alternative but closely similar schemes for waterproofing the walls of the school at $13,100.00 and $14,500.00 respectively.

We are of opinion that a satisfactory result as far as waterproofing is concerned and at considerably lower cost might possibly be obtained by applying one coat of concrete with a

MEMORANDUM

Re: Indian Residential School.
Shubenacadie, Nova Scotia.

In connection with your memorandum of December 2nd, 1946, to Mr. Hoey re the above, you are advised that our Mr. Hargreaves carried out an inspection of the domestic hot and cold water services on May 28th to 31st inclusive, and the following report is presented for your consideration and for the information of Indian Affairs.

Cold water from a lake is pumped into two pressure tanks located in a pump house and then pumped to the building through a 4" cast iron pipe. At the point of entry to the building this line is reduced to a 2" and is run in black steel pipe to the boiler room equipment and to the distribution system. The distribution mains are progressively reduced as they are connected to the various fixtures and risers.

Domestic hot water is heated through a below-the-water-line type of heater connected in series to both low pressure heating boilers. There is also a jacket heater, originally intended for summer service. All the foregoing equipment was installed originally. The storage tank has been replaced within the last year due to the failure of the original unit.

The water, while potable and certified by the Dominion Analyst as being satisfactory for human use, has attacked all the black and galvanized steel pipe and as a result a heavy formation of sludge which has been analyzed as containing 95% iron oxide, has almost completely clogged the lines. This has retarded the flow to a mere trickle on the upper floors and only a small amount of water percolates through to the ground floor and basement fixtures. On bath days, the pressure is raised to an abnormal level of 50 to 60 p.s.i. in order to serve bath tubs on the top floor. This is done at the risk of a major collapse of the mains and risers. On occasions, some pipes have burst, resulting in flooding of certain areas. Normal pressures not exceeding 40 p.s.i. are necessary if the fixtures and taps are to be protected against damage. Some branches have been replaced with copper pipe, and an examination showed these lines to be entirely free of sludge and scale.

The heater was disconnected and found to be completely blocked and 3" pipe connections between the heater and tank were examined and found to be plugged with sludge so badly that a pencil could hardly be inserted.

In short, it can be definitely stated that the entire distribution system within the building including risers, is in a hopeless state and is in need of complete replacement.

Non-ferrous piping should be used in the re-design, and it is recommended that type K hard drawn copper be used for the mains with streamlined copper branches and risers.

J.M.Wardle,Esq.,
Director,
Surveys and Engineering Branch,
Department of Mines and Resources,
OTTAWA, Ontario.

SURVEYS & ENGINEERING

Indian Affairs. (RG 10, Volume 6050, file 265-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

The indirect heater is of the copper tube, and cast iron shell design. The element is plugged and could not be cleaned. The shell could be cleaned and a new element inserted. This heater, while somewhat undersized, could be made to do the work for several years. In about 5 to 10 years, the present boilers will in all probability have to be replaced and at that time a new heater of a different type could be incorporated into the new arrangement.

No complaints were received about the heating. Some questionable elements of design were noted, however and will be filed away for future reference.

General observations showed that the boiler room personnel possessed only rudimentary knowledge, and this has resulted in mediocre care and maintenance, which always contributes to earlier failures of equipment.

When instructed, we will prepare a layout for a new domestic hot and cold water system as staff assignments permit.

Until a layout can be made, it is not possible to make a reasonable estimate of the cost of the work outlined. It can be assumed that an expenditure of $6500.00 will be necessary to cover this project.

Memorandum:

DIRECTOR, SURVEYS & ENGINEERING BRANCH

Re: Indian Residential School, Shubenacadie, N.S.

Reference your I.A. 1156-4-2 of June 13th.

We have read your memorandum containing the report submitted by Mr. Hargreaves on the domestic hot and cold water system at the above school. It has been noted that a complete new layout will be required at a cost of approximately $6,500.

Included in our 1947-48 estimates is the following item,-

"Shubenacadie Residential School - Renew Heating and Plumbing System - $8,000."

This amount was included upon receipt of your memorandum of similar file of November 20th. Therefore, it will be in order for you to carry out the repairs as required.

However, as you have been already informed, this will leave only $1,500. to carry out the work required at this school to prevent water infiltration, (see your memorandum of March 21st.)

It is presumed that the replacement of the domestic system is of more immediate importance than the work on the brick at this school.

Re: Food Chopper for the Indian
Residential School,
SHUBENACADIE, N.S.

The Sister Superior of the Indian Residential School, Shubenacadie, N. S., has requested that an electric food chopper be supplied for the School kitchen, as she feels that it would be a great saving in utilizing small scraps of meat, vegetables, Etc.

I wrote Toledo Scale Co., Halifax, N. S., regarding one of these food choppers, respecting which you will find letter and cut attached. The price of $310.00 seems to be an exorbitant price for one of these items. No doubt you could contact some other firm who would have a machine that would do the same job and at a much smaller initial cost.

In the past they have been using a hand grinder which could not begin to do the work with a 165 children to be fed. I feel that if at all possible this machine should be bought and receive your favourable consideration.

ESTABLISHED 1909

130 Granville St.
Halifax, N. S.

Sept. 6th. 1947,

Mr H. C. Rice
Department of Mines & Resources
Indian Affairs Branch
Shubenacadie, N. S.

Dear Sir;-

In answer to yours of the 5th. inst. we are pleased to send you herewith a leaflet illustrating and describing your Toledo Chopper No 5220, this we believe will give you very complete details concerning the machine, some of the features of this chopper are, the long neck safety cylinder, completely enclosed mechanism, stainless steel fee pan, clean cutting cylinder, due to circular flutes, etc. Capacity is 10 to 12 lbs. per minute.

This machine is priced at $310.00 F.O.B. destination, less 2% 30 days, deliveries have been running about 60 days but we hope soon to improve this.

Thanking you for your inquiry and trusting we may hear from you further, we are.

Very truly yours,

PAWilson;EH

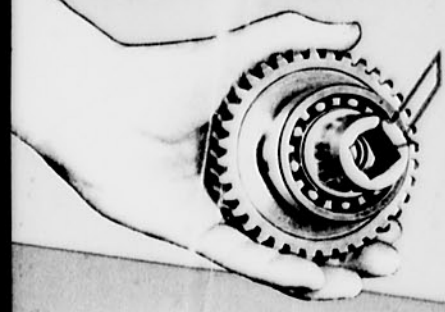
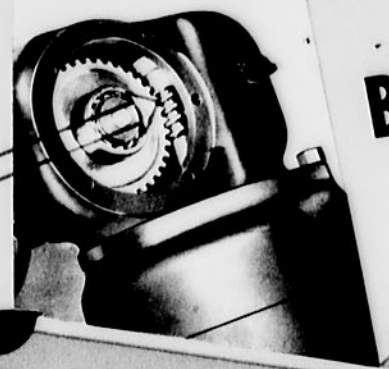
BETTER Chopped Meat FASTER.. WITH THE NEW TOLEDO



BALL BEARING THRUST— The old style, friction-producing thrust washer is banished. In a Toledo both the thrust and end bearings are high quality Ball Bearings... efficient, trouble-free.

RITE-ANGLE TRANSMISSION— The Toledo gear-and-worm transmission carries full motor power to the cutting group without needless friction loss. Dependable . . . fewer parts. Oil sealed in.



Only in a TOLEDO..

all modern features for topmost performance

CLEAN CUTTING— Here's chopping that's clean as a whistle! No mangling the meat...no wasteful residue of meat remains in the cylinder. Efficient spiral flutes.

SUPER-SIZE TRAY— Biggest working space...the stainless steel tray occupies the entire top. The cylinder opening is at the corner for faster feeding.

STAINLESS STEEL PLATES — Ground flat and true on both sides. Firmly held by a boss at the bottom of the cylinder (no pin to shear off).

EASY ASSEMBLY— The cylinder assembly is quickly installed or removed. The cam lock operates on a half-turn (no threads to wear).

Built For Your Needs Today

Toledo engineers were not handicapped by any need to work over or modify a pre-war machine. The Toledo Chopper is *new*. Its design takes full advantage of post-war methods and materials, and the practical know-how gained in more than ten years dealing directly in food store and restaurant needs. Both in its distinctive modern beauty and in its major mechanical improvements, it's the answer to the profitable merchandising of chopped meats today and for years ahead.

TOLEDO *Gravity Feed* **CHOPPER** . . *Greatest improvement in Chopper Design and Performance in 50 years!*

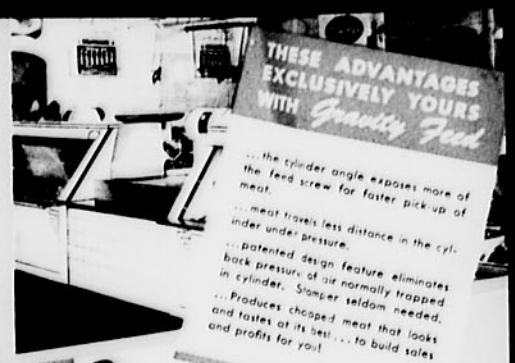
THESE ADVANTAGES EXCLUSIVELY YOURS WITH *Gravity Feed*

... the cylinder angle exposes more of the feed screw for faster pick-up of meat.

... meat travels less distance in the cylinder under pressure.

... patented design feature eliminates back pressure of air normally trapped in cylinder. Stomper seldom needed.

... Produces chopped meat that looks and tastes at its best . . . to build sales and profits for you!



YOUR CHOICE

The time-saving speed and capacity of the Model 5220 make it the ideal chopper for food stores and the larger institutional users. It chops 20 lb. per minute. Motor is ½ HP.

The model 5120 gives comparable outstanding performance for its size. The motor is ½ HP. Capacity is 12 lb. per minute.

Both are regularly equipped with safety bowl and large tray. An open bowl is optional.

For Your Profits – FORMULA BOOK

. . . Another Toledo Exclusive Plus-Value

"Formulas For Profit" gives you detailed instructions on the preparation of over a hundred varieties of chopped meat specialties with practical ideas for merchandising them. There are formulas for beef, veal, pork and lamb . . . also formulas for sausage. Chopped meat displays illustrated in full color. It is a book that shows you the way to more profit in the better merchandising of chopped meats. Available without charge to users of the Toledo Chopper.

DUPLEX—finest of food store scales. Easy to read right to the penny every time. Case-top and counter-type models.

TOLEDO
The Name Everyone Knows

The fine reputation of Toledo Scales in food stores and industry throughout the world has its origin in the engineering leadership and the high standards of precision under which they are manufactured. The Toledo Chopper is built in the same modern factory and brings you these same advantages of quality and precision for long life performance.

The nation-wide facilities of Toledo sales and service offices are also available to Toledo Chopper users. One of these 181 offices is as near as your phone.

DIRECTOR, SURVEYS and ENGINEERING BRANCH

Indian Residential School, Shubenacadie, N.S.

Reference your I.A. 1156-4-2 of June 13 -

It is understood that it will now not be possible to proceed with the work required at this school to prevent water infiltration, as specified in your memorandum of March 21, because of the lateness of the season and the shortage of cement.

Therefore, we feel that our original plan of renewing the heating and plumbing system at this school should be carried out, in accordance with Mr. Mills' memorandum of June 13.

As soon as you are able to obtain tenders for this work, could we please be advised so that we can raise the necessary encumbrance certificate in your favour.

Ottawa, October 4, 1947.

Mr. H. C. Rice, Indian Agent,
Shubenacadie, Nova Scotia.

Repairs to Shubenacadie Residential School

To carry out a reconditioning and waterproofing job on the brick walls of the above school, we are faced with two alternatives:

(a) To do a temporary waterproofing of the walls by applying special preparation at a cost of approximately $8,000.00;

(b) To do a permanent waterproofing of the walls by applying a concrete layer over the whole building at a cost of approximately $17,000.00.

Upon the recommendation of our Surveys and Engineering Branch and because of the lateness of the season and our lack of funds, it has been decided to adopt course (b) early next Spring. This sum will be included in the estimates which we will submit to the Minister's office for the 1948-49 fiscal year.

We have already requested the Surveys and Engineering Branch, therefore, to proceed with the other repair job required at the above school, namely, the repairs to the heating system. Mr. Ross should shortly be hearing from his head office regarding these repairs. It would be appreciated if you could keep us informed as to when these repairs begin and the progress made by the plumbers in carrying out the contract.

Reverend Father Brown,
Indian Residential School,
Halifax, N. S.

Dear Reverend Father:

I have for acknowledgement your letter of October 2, in which you ask the cost per bushel of potatoes, which I wish to ship for your school.

I did not know what the cost would be, as I thought arrangements had been made, or would be made at Ottawa regarding this. Potatoes, in this area at the present time are selling to shippers at $2.25 per barrel, which would be .75¢ per bushel. You state, you may not need 400 bushels, but I am afraid I would not be able to spare that many anyway. Part of my potato field was damp, and the crop there was not as good as expected. I could, however, spare you 275 or 300 bushels, but the freight on these would be very high, as they would weigh much less, than the minimum weight of freight for a car.

May I hear from you further regarding this.

Yours very truly,

Ottawa, October 14, 1947.

Mr. Edward J. Whalen, Indian Agent,
Fredericton, N.B.

We have received a copy of your letter of the 7th instant to the Reverend Principal of the Shubenacadie Residential School.

In your letter you refer to the fact that you consider arrangements should be made at Ottawa regarding the securing of potatoes for the school mentioned.

In this regard I may say that the principal of a residential school purchases the food supplies and also pays the accounts from the funds that he receives for the maintenance of the Indian pupils attending the school and, consequently there is no action this Department needs to take in this particular matter.

Re: Cooling Unit for Walk-In Refrigerator,
Indian Residential School, Shubenacadie, N.S.

I have been advised by Rev. Fr. J. W. BROWN, that the Cooling Unit for the Walk-In Refrigerator at the captionally noted School, which has been giving some trouble for the last few months has now reached the stage where it can not be operated efficiently.

This Cooling-Unit has not been satisfactory for the last few years and an expenditure of $200.00 or more had to be made annually to keep it in operation. At numerous times these break downs have resulted in the loss of perishable foods, such as meats, eggs Etc.

Rev. Fr. BROWN has contacted Goodspeed-Millard Appliances Limited, 468 Prince St., TRURO, N. S., who have made a survey of his requirements and have submitted an estimate on replacements. Their letter to Rev. Fr. BROWN is attached hereto for your information.

In conversation with Rev. Fr. BROWN last evening I learned that the motor has burned out again and temporary repairs are being made pending the decision of the Department on replacement. J. E. MORRIS, Esq., is familiar with conditions respecting this Refrigerator and further details if necessary can be obtained from him.

Ottawa, November 26, 1947.

Mr. H.C. Rice, Indian Agent,
Shubenacadie, N.S.

We have your voucher No. 1340 issued in favour of Rev. H. Boudreau covering the cost of curtains, curtain rods, etc., purchased for use of the principal's residence on the Shubenacadie Reserve.

It will be necessary for us to have a receipt from the firm from whom the articles were purchased before we can refund the amount to Father Boudreau.

Committee of the Privy Council, approved by His Excellency the Governor General on the 26 November, 1947.

The Committee of the Privy Council have had before them a report dated 13th November, 1947, from the Acting Minister of Mines and Resources, stating:

That under Vote 181 of the 1947-48 estimates of the Department of Mines and Resources, funds have been provided for repairs and replacements to the domestic hot and cold water system now installed in the Indian Residential School, at Shubenacadie, N.S.;

That tenders were invited, on the basis of drawings and specifications prepared by the Department, by an engineer of the Engineering and Construction Service of the Department;

That bona-fide lump sum tenders were received from the parties and for amounts as follows:-

W.J. Christie, Esq., Truro, N.S.	$7,250.00
Roscoe Schofield, Esq., White Rock, N.S.	8,007.00
Edwin H. Campbell, Esq., Truro, N.S.	8,132.59
J.A. Moulton, Esq., 13 Clifton,St., Halifax, N.S.	8,900.00
J.D. Barrett, Esq., Truro, N.S.	10,546.46

That the tenders were analyzed and found to be in accordance with the drawings, specifications and tendering documents prepared by the Department;

That with provision for contingencies and supervision the acceptance of the lowest tender would entail an approximate total expenditure of $8,000.

As the work is considered to be of an emergency character, the Minister recommends that he be authorized to accept the lowest tender, as submitted by W.J. Christie, Esq., Plumbing and Heating Contractor of Truro, N.S., and to enter into a contract with him for the repairs and replacements required, in accordance with drawings and specifications prepared by the Department, and the Contractor's tender of $7,250 which, with provision for contingencies and supervision will entail a total expenditure of funds to the approximate amount of $8,000, the said expenditure to be met from the appropriate Votes of the Indian Affairs Branch, Department of Mines and Resources.

The Committee concur in the foregoing recommendation and submit the same for approval.

'Sgd.' A.D.P. Heeney.

Clerk of the Privy Council.

The Honourable
The Minister of Mines and Resources.

Mr. Mills:

Re: Indian Residential School,
Shubenacadie Indian Agency, N.S.

I am attaching a copy of Order in Council P. C. 4844, dated 26th November, 1947, which authorizes the acceptance of the tender of Mr. W. J. Christie, and to enter into a contract with him for repairs and replacements to the above school, for a lump sum of $7,250.00. The authority of Council also provides for contingencies and supervision. Will you please take the necessary action. Incidentally I would refer to your memorandum of the 13th instant to which we agree that a security deposit to the amount of ten per cent of the tender price should be secured from the contractor.

Ottawa, December 19, 1947.

Memorandum:

DIRECTOR, LANDS & DEVELOPMENT SERVICES

Re: Indian Residential School, Shubenacadie, N.S.

You recently forwarded to this office a copy of your memorandum of December 4th to Mr. Mills with rerference to P.C. 4644 dated November 26th, 1947, authorizing acceptance of the tender of W.J. Christie for $7,250. for repairs and replacements at the above school.

Mr. Morris, Acting Inspector of Indian Agencies, has just returned from Nova Scotia and he was informed recently that the contractor is having difficulty in obtaining the materials he requires to carry out the work and consequently does not expect to start until some time in March. We are extremely anxious to have the work at the Shubenacadie Residential School completed at the earliest possible date, not only because the repairs are urgently required but the funds for the work are included in the current year's appropriation.

We would appreciate it very much if your Branch could give some assistance to the contractor in securing materials so that the necessary work may be completed before the end of March, 1948.

Bernard F. Neary
Supt. or Welfare & Training.

Records to file

January 5, 1948.

Dear Mr. Scully:-

In our main estimates for the fiscal year 1948-49, we are requesting funds in connection with resurfacing the exterior of the Shubenacadie Indian Residential School and also for connecting the Fort Alexander Indian Residential School with the Manitoba Hydro line.

Both of these projects appear under the heading "Repairs to Buildings" in our estimates, but as they will have to be carried out under contract, I thought it advisable to enclose schedule for each of them.

Yours sincerely,

Deputy Minister.

V.M. Scully, Esq.,
Deputy Minister,
Department of Reconstruction
and Supply,

Memorandum

Re: Indian Residential School,
Shubenacadie, Nova Scotia.

With reference to your notation dated the 23rd ultimo on the memorandum dated December 19th from Col. Neary of the Indian Affairs Branch relative to the above, it was assumed that a telephone conversation between Mr. Sinclair and our Mr. Buck covered the points raised.

Confirming what was said at that time, you are advised that there are no restrictions in effect on any materials the contractor is obligated to use in his work on the contract, and this Division can be of no assistance in expediting delivery of materials in short supply, for execution of a lump sum contract.

Our engineer who dealt with the matter when the contract was awarded contacted Christie before his return to Ottawa from Nova Scotia. From his analysis of the contractor's remarks Mr. Ross formed the opinion that the material situation has improved, and that no serious delay in obtaining materials is likely to occur.

Mr. Hoey

For your information. It would appear that the contractor is now having more success in the way of securing the required materials. You will appreciate that in cases like this when priorities are off that it is pretty well up to the contractor to look after the securing of supplies.

L. V. Mills
Chief Engineer.

R.A. Gibson, Esq.,

Ottawa, January 14, 1948.

Mr. H.C. Rice, Indian Agent,
Shubenacadie, N.S.

When Mr. Morris was in Ottawa recently he advised that he had been informed that the contractor who was doing the work at the Shubenacadie Residential School was having difficulty in securing needed materials.

We took up the matter with the Director of Lands and Development Services with a view to ascertaining if any assistance could be given to the contractor in securing materials. For your information I enclose a copy of his reply.

Bernard F. Neary

Re: Repairs to Water System -
Shubenacadie Residential School.

Reference to your letter of January 21st last respecting the captionally subject.

W. J. CHRISTIE & Company, TRURO, N. S., will not be commencing on this project before February 1st next. The scarcity of suitable material in this area has been the hold-up. Mr. CHRISTIE informed me this date that he will endeavour to start the repairs in question on or about February 2nd, 1948.

From time to time as the work progresses brief reports will be submitted.

Mr. H.C. Rice, Superintendent,
Indian Agency, Shubenacadie, N.S.

In your letter of January 26th you stated that you expected W.J. Christie & Company to begin repairs to the water system at the Shubenacadie Residential School about February 1st.

Since that time we have received no report from you. Please let me know on what date the firm commenced work and what progress they are making. As you know, the end of the fiscal year is rapidly approaching and funds for these repairs are provided in the current year's appropriation.

Re: W. J. Christie & Company,
Plumbing - Residential School,
SHUBENACADIE, N. S.

Further to previous correspondence and reference to your letter of March 8th last respecting the captionally noted subject.

Mr. Christie advises this date that he is still held up for some of the larger plumbing fittings. He has all the small pipe and fittings cut and ready to install and he has intimated that he will commence installation of these on Monday next.

He was advised of the urgency of getting this job completed before the end of the present fiscal year and he will do his best to have as much as possible completed by March 31st,1948.

A further report will reach by the M/N.,

Diary Date.

D.D.22/3/48.

(H. C. RICE) Superintendent,

Re: Indian Residential School,
SHUBENACADIE, Nova Scotia.

Further to previous correspondence and reference to your letter of March 30th last respecting plumbing at the captionally noted Residential School.

Mr. CHRISTIE commenced the work here on Thursday, April 8th, 1948. His work so far has been confined to the Boiler Room, but he is held up still for 3" couplings. All small pipe and fittings are cut and ready for installation. It is understood that he will continue to instal these items. How long a hold up there is going to be over these 3" fittings is not known, but Mr. CHRISTIE is doing everything in his power to obtain them.

A further progress report will follow.

(H. C. RICE) Superintendent,

MEMORANDUM

Re: Shubenacadie Indian Residential School.
Shubenacadie, Nova Scotia.

Further to our memorandum of January 9, 1948, you are advised that we are in receipt of a letter from H.C. Rice, Superintendent of the Shubenacadie Indian Agency, with reference to the progress of the work at the above.

Mr. Rice states that Mr. Christie the Contractor, started work on April 8th and that all small pipe and fittings are cut and on the job. He also stated that the only supplies not yet obtained, are several 3" couplings which are needed to complete piping connections at the indirect heater. Mr. Rice advises that the Contractor is doing everything possible to obtain these couplings.

We see no reason why the work should not be carried out to completion without further delay. Mr. Rice states that he will forward additional progress reports.

Upon receipt of same, you will be further advised.

Memorandum:

DIRECTOR, LANDS AND DEVELOPMENT SERVICES BRANCH

Shubenacadie Indian Residential School

As previously recommended upon your Engineer's report, an amount of $17,500.00 has been included in our Main 1948-49 Estimates for the water-proofing of the main building at the above Residential School. It is requested that steps be taken to have a contract let for this work now so that it can be carried out during the months of July and August.

As most of this work will be on the exterior of the school, arrangements can be made, if necessary, to have this work done earlier than indicated above but our preference is for the summer holidays. It is presumed that we will be hearing further from you in this regard.

Practical Formulas for Chopped Meats

The following pages introduce a variety of tried and proven chopped meat formulas that will provide additional profit to the meat retailer, and which can be prepared from various meat cuts and ends, and trimmings. It is not suggested that the retail meat dealer merchandise at one time all the different chopped meat items in this book. It would be more satisfactory to select a few formulas in line with the meats that are moving slowly and from accumulated trimmings on hand.

Every formula should be tried out from time to time and the retailer can then concentrate on the ones that prove the most popular with the trade served.

It is important to keep in mind that a profitable volume of business cannot be built up permanently, unless the buying public receives fresh, wholesome meat. Trimmings should be used only when fresh, and should not be allowed to accumulate or they may become tainted or discolored. An excellent idea to follow is every morning, or at least once each day, check the refrigerator and then plan chopped meat sales according to the cuts on hand that are available for that purpose.

The cost price of chopped meat, ready for sale, depends upon the quality of meat used, the amount of fat, and whether or not binders, seasoning, ice and water are used. The cost price should be determined at the time of making, taking into consideration the value or replacement cost of all materials used.

The formulas in this book are generally given in amounts up to 100 pounds of meat. These can be increased or decreased according to sales volume. Seasoning and binders should, of course, be used in proportion.

Where the less tender cuts, or combinations of different kinds of meat are used, best results and a more uniformly blended product will usually be obtained by chopping through the coarse plate first, then mixing thoroughly, and rechopping through the fine plate.

BINDERS

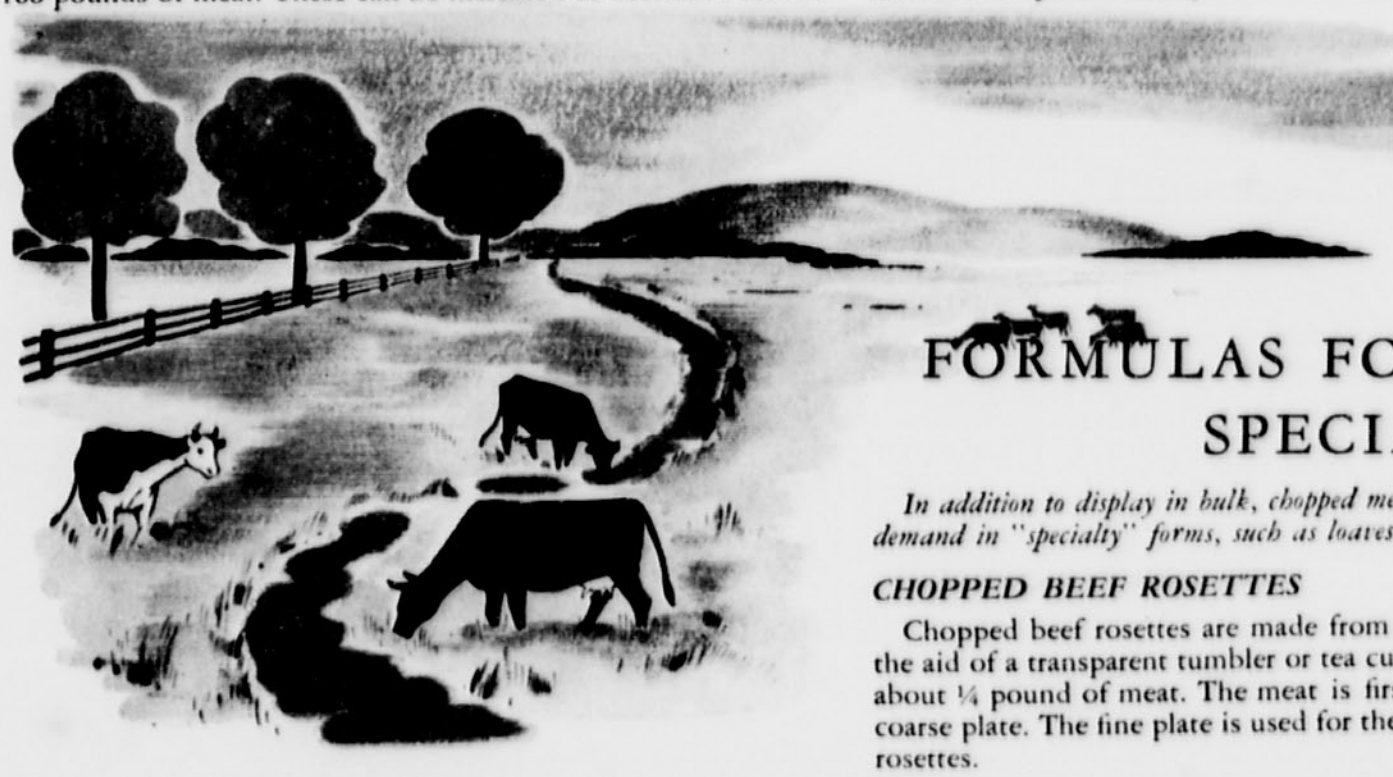
Binders (cereals or fillers) are used to bind or hold chopped meats together, and when used, enough cold water should be added to make mixing easy. They also hold the natural juices of the meat and absorb moisture. The addition of a binder improves the texture of chopped meat, making it compact yet smooth.

The principal binders in use are soya bean flour, corn flour, rice flour, potato flour, dry skim milk, crackers, dry bread, and blends of these and similar materials.

The amount of binder per 100 pounds of meat averages about 3% and is governed by state regulations.

In certain localities the use of binders is prohibited unless there is a poster displayed which reads, "sausage with cereal added." There are also weights and measures laws which govern the sale of food. In some localities, for example, it is not permissible to sell any meat by the piece; it must be sold by the pound.

Every merchant should be familiar with all such laws and regulations and operate strictly in conformance with them.



FORMULAS FOR SPECIALTIES

In addition to display in bulk, chopped meats today are in increasing demand in "specialty" forms, such as loaves, rosettes, and patties.

CHOPPED BEEF ROSETTES

Chopped beef rosettes are made from lean chopped beef with the aid of a transparent tumbler or tea cup of a size that will hold about ¼ pound of meat. The meat is first chopped through the coarse plate. The fine plate is used for the second run to make the rosettes.

Dear Mr. Phelan:-

Your letter asking for further information regarding the meat grinder, I shall reply to at once.

Mr. Harold Reid, of this town, has a grinder, bought June 25, 1947, for $310.00 from the Canadian Toledo Scale Company, of Toronto. Mr. Reid would sell this to us for $250.00

Should you decide not to take this offer, I think the heavy duty size of the enclosed Model 212 would be most acceptable.

Our gratitude for your continued interest exceeds even the need of a grinder, which is great.

Yours very truly,
Sister Mary Charles.

1	Meat Grinder. Note: This is a school with a pupilage of 160 and it is felt that a meat grinder is essential. The Principal states that a good grinder can be purchased from Mr. Harold Reid of Shubenacadie for $250.00. This particular grinder was made by the Toledo Scale Co., Toronto and originally cost $310.00. It is in excellent condition and should be serviceable for many years. We recommend purchase of this machine.

ADDRESS REPLY TO ENGINEERING AND CONSTRUCTION Division

Lands & Development Services Branch

22822

OTTAWA May 28th, 1948.

Memorandum

Re: Shubenacadie Indian Residential School
Shubenacadie, N.S.

With reference to your notation on a memorandum dated April 27th from the Director Indian Affairs Branch, it is noted an amount of $17,500 has been included in the Main 1948-49 Estimates for the water-proofing of the above building, and that Mr. Hoey would like to have the work carried out during the summer holidays.

During the fall of 1946 this office contacted the firm of Creaghan and Archibald Limited, Engineers and Contractors, Montreal, who have an office in Halifax, N.S., and after an inspection of the above building, submitted a report with a proposal and lump sum prices for carrying out the work.

Upon receipt of Mr. Hoey's memorandum, Creaghan and Archibald Limited were again written to and we are now in receipt of advice that their original proposal holds with the exception of the following:

1. Due to advanced costs their price at this time would be $15,065.00 instead of $13,100.00.

2. If the base coat of cement and sand is to be applied under pressure by the use of a gunite machine, the extra price at this time would be $1610.00 instead of an extra of $1400.00 previously quoted.

It is recommended that we be authorized to engage the firm of Creaghan and Archibald Limited to carry out the work of water-proofing of the exterior walls of the school, exclusive of stuccoed passageway, having the material applied under pressure. Adding the above figures their quoted price for doing this work by this method is now $16,675.00.

We are of the opinion that no purpose would be served by advertising this work as the firm mentioned above specialize in water-proofing buildings and other similar work and as far as we are aware, are the only firm in a position to do the required work at Shubenacadie.

PRIVY COUNCIL

CANADA

Certified to be a true copy of a Minute of a Meeting of the Committee of the Privy Council, approved by His Excellency the Governor General on the 29 JUNE 1948

Dept. of Mines & Resources OTTAWA JUL 2 1948 DEPUTY MINISTER

The Committee of the Privy Council have had before them a report dated 21st June, 1948, from the Minister of Mines and Resources, representing:

That in the 1948-49 estimates of the Indian Affairs Branch, Department of Mines and Resources, funds have been provided to carry out extensive waterproofing repairs to the existing Indian Residential School at Shubenacadie, Nova Scotia, where, due to the effect of driving Atlantic storms, moisture is penetrating the exterior masonry walls of the building;

That the serious damage resulting from the said moisture penetration is cumulative, requiring immediate remedial action which could be taken to greatest advantage during the summer vacation period;

That the Lands and Development Services Branch of the Department of Mines and Resources have carried out investigations through which it has been established that the firm of Creaghan and Archibald Limited, 1440 St. Catherine St. W., Montreal, is a reputable firm of building waterproofing specialists, who have carried out a large amount of similar work in the Maritime Provinces with success;

Dept. of Mines & Resources JUL 7 1948 REGISTERED A. Merry

That the said firm:-

(a) is equipped and staffed to carry out the work required without delay;
(b) have examined the building and have submitted a proposal to carry out complete exterior waterproofing and guarantee their work for a total cost of Sixteen Thousand Six Hundred and Seventy-five Dollars ($16,675.00);

That the cost quoted in the said proposal is fair and just; that in view of the urgency of the work, it is considered to be in the public interest to avoid the delay that would be occasioned by the invitation of competitive tenders;

That the acceptance of the said proposal after making provision for contingencies and supervision would involve an expenditure of approximately Seventeen Thousand Five Hundred Dollars ($17,500.00).

The Committee, therefore, on the recommendation of the Minister of Mines and Resources, advise that authority be granted to accept the proposal of Creaghan and Archibald Limited, and to enter into an arrangement with the said firm to carry out complete

Re: INDIAN RESIDENTIAL SCHOOL,
Shubenacadie, N. S.

The house occupied by the Resident Farmer at the captionally noted School is urgently in need of the following repairs:-

(1) Complete renewal of roof shingles.
(2) Building of new flue.

It will also be necessary to replace some rough boards and rafters in this house. It is estimated that the total cost will amount to $500.00. The lumber in connection with this repair can be supplied from the Agency Saw Mill, the account being credited to the 1948-49 Welfare Vote.

Rev. J. W. Brown, Principal, also advises that the Root Cellar is in need of a new roof. It was suggested by him that a metal roof would be most satisfactory. However, Sheet Metal Roofing is still in short supply, although there is an aluminium roofing on the market at the present time that is highly recommended. The Galvenised Sheet Metal Roofing if obtainable is listed sightly under $8.00 per square and the aluminium is listed at $12.00 per square.

Should it be the desire of the Branch to use wooden shingles on the Root Cellar, we have an excellent spruce shingle manufactured in the Agency Saw Mill which would be quite suitable. This account could also be

Re: Main Sewage-Pipe,
Indian Residential School,
SHUBENACADIE, N. S.

I have been informed by the Principal of the above noted school that the main-sewage pipe leading from the school to the Shubenacadie River has an obstruction and refuse is now packed up into the main school block. It is understood that the obstruction is located approximately 10 feet from the side of the building where all the sewer lines from building enter into the main line running into the River. Some trouble has been experienced in the past at the point and it is felt that the only solution [redacted] is to construct a manhole at this point which would eliminate the necessity of any "Y"s and "T"s.

It is proposed to construct this manhole of either concrete or brick and it is requested that the necessary authority be granted to proceed with this work at your earliest convenience.

Ottawa. August 17, 1948.

MEMORANDUM

Re: Waterproofing of Exterior Walls,
Indian Residential School.
Shubenacadie Indian Agency, Nova Scotia.

Replying to your marginal notation of August 13th on Mr. Hoey's memorandum to you under date of the 12th instant, you are advised that we were advised by the contractors on the 16th instant, that operations would continue for another ten weeks. This would bring the date of completion by Messrs Creaghan and Archibald, to approximately October 25th, next.

Mr. Hoey - For your information.

Ottawa, August 23, 1948.

Mr. H. C. Rice,
Superintendent, Indian Agency,
Shubenacadie, Nova Scotia.

Shubenacadie Indian Residential School.

We recently enquired as to the probable date of completion of the waterproofing of the exterior walls at this school.

The Chief Engineer has replied as follows:-

"You are advised that we were advised by the contractors on the 16th instant, that operations would continue for another ten weeks. This would bring the date of completion by Messrs. Creaghan and Archibald, to approximately October 25th, next."

Bernard F. Neary,
Superintendent of Education.

Ottawa, 23 September, 1948.

19505

Colonel B. F. Neary,
Superintendent Training,
Indian Affairs Branch,
Booth Building, Ottawa.

Re: Dishwashing Machine for Shubenacadie School

Dear Colonel Neary:

Confirming our telephone conversation, I wish to say that a small dishwasher would be of great benefit to this school. The actual number of persons in residence is possibly a little bit smaller than normally leads us to recommend such equipment, but from my observation of the work, I am convinced that it is not being satisfactorily done owing to the fact that the school has a larger number of smaller pupils than is usually the case.

Yours sincerely,

L. B. Pett, Ph.D., M.D.,
Chief, Nutrition Division.

Re: Shubenacadie Indian Residential School

We are in receipt of your letter of November 25th enclosing letter of the same date from Rt. Rev. J.P. Mackey, Principal of the above school, with reference to the financial situation.

Careful consideration has been given to the contents of both letters.

While we appreciate careful management, at the same time we feel that funds accumulated are intended to be used at a subsequent date for expenditures that would improve conditions for the pupils and thatare not ordinarily provided by the Department.

During the war years when our appropriations were reduced, it was necessary to expect schools which had a surplus from previous years to use the funds for expenditures that possibly would have been supplied by the Department in ordinary years.

Mr. Phelan expects to be in Shubenacadie next week and will be prepared to discuss the whole situation further with Msgr. Mackey and yourself. He will bring the accounts with him.

Bernard F. Neary
Superintendent of Education.

Re: Indian Residential School,
SHUBENACADIE, N. S.

During the recent visit of Dr. H. L. KEENLEYSIDE, Deputy Minister of Mines & Resources, the situation at the captionally noted School was brought to his attention by the Principal, Rt. Rev. J. P. Mackey and myself.

In our informal discussion the whole financial situation was brought to light, and in particular the matter of repairs to the building that was effected by using the School money. Dr. KEENLEYSIDE requested that a detailed account be submitted to you and a copy of the letter forwarded to him, in order that his memory be refreshed. This is being done and I would strongly recommend that if at all possible the School be re-imbursed for the major repairs and replacements which were made by using School funds.

When the attached receipts have served their purpose kindly return same for the Residential School records.

(H. C. RICE) Superintendent,
Shubenacadie Indian Agency.

Dear Mr. Rice:

I have for acknowledgment your letter of November 25th, enclosing copy of a letter from The Right Reverend J. P. Mackey, Principal of the Shubenacadie Indian Residential School, to Colonel Neary, Superintendent of Education, regarding the financial position of the Shubenacadie School, a matter which was discussed with Monsignor Mackey and yourself during my recent visit to your Superintendency.

The subject has been discussed with the officials of the Indian Affairs Branch since my return and a reply has been made by Colonel Neary to your letter to him of November 25th. You will also be interested to know that Mr. Philip Phelan, of the Education Division, is en route to Nova Scotia and will discuss the whole situation with Monsignor Mackey and yourself at Shubenacadie.

Yours sincerely,

Deputy Minister.

H. C. Rice, Esq.,

MEMORANDUM

Re: Shubenacadie Indian Residential School.

An inspection was recently carried out at the above school in connection with the completion of two contracts. Our inspecting officer furnishes comment on both contracts as follows:-

(a) Domestic Hot and Cold Water Revisions -

Our officer met Mr. W.J. Christie, Plumbing and Heating Contractor, who has completed revisions and additions to the Domestic hot and Cold Water System at the school, and the work was carefully examined.

The installation has been carried out in a most satisfactory and workmanlike manner, and in accordance with the plans and specifications prepared by this Division; and to the satisfaction of the school authorities and Indian Superintendent H.C. Rice.

Under the circumstances, we have accepted the work, and are returning the security deposit to the Contractor.

(b) Waterproofing Contract -

While our officer was in Shubenacadie, he inspected the waterproofing work carried out by Messrs. Creaghan and Archibald. Their Halifax representative Mr. Peitkin, under whose supervision this work was executed, reviewed all phases of the work with our officer, and explained, in detail, how the various operations included in the contract, were carried out.

The caulking around the window and door frames was carefully examined, and appeared to have been well done. The finish over the entire wall surface was put on under pressure, and it is evident that no pains were spared to make a thoroughly good job.

The colour is a medium grey, and some areas are slightly darker than the main surface. It was explained that this was due to varying weather conditions at the time the finish was being applied. The opinion was expressed, by Mr. Peitkin, that the weathering effect will ultimately result in a solid colour throughout. While the general appearance of the building is quite different from its original colour, it is not unpleasant.

Several severe rainstorms have occurred since this was completed, and there has been no evidence of any filtration of water through the walls. The Principal and Indian Superintendent H.C. Rice, both, expressed complete satisfaction, Under the circumstances, the work has been accepted and we are releasing the Contractor's security deposit.

Re: Indian Residential School,
Shubenacadie, N. S.

As you are no doubt aware, the firm of Creighton and Archibald, 1440 St. Catherine Street, West Montreal, P. Q., has recently completed a water proofing job on the captionally noted school.

During the last thirty-six hours we have had a very heavy rain accompanied with gales of wind force and as a result we find that the weather proofing job as performed by this Company is definitely not satisfactory. Along the whole western front of the building, numerous leaks appeared and it is felt that the remainder of the building is possibly in the same condition. The following telegram was dispatched to the firm in question:-

" Indian Residential School, Shubenacadie, N. S. which your firm has recently completed water proofing leaking very badly and your immediate attention is requested."

Although we have not got the contract entered into with this Company, it is felt that this is a guaranteed job for a period of five to ten years.

Re: Indian Residential School,
Shubenacadie, N. S.

Reference to the weather proofing job recently completed at the captionally noted school and further to my letter of recent date respecting same.

On Sunday last, a Representative of the firm of Creighton & Archibald visited the Indian Residential School and went over the whole building. At the time, it was impossible for him to know exactly where the leaks were originating but requested that during the next severe rain storm, he be contacted at his Halifax headquarters at which time he will proceed to Shubenacadie in an effort to trace the leaks.

It should be pointed out that at the time the leaks appeared in this building, we were experiencing one of the worst rain storms in recent years, and it is quite possible that these leaks might not show up again for some time. However, the work is definitely defective to some degree and as it is a guaranteed job for five years we will see that the situation is rectified.

Due to weather conditions during the next few months, it will be impossible to carry on any work of this nature until Spring. However, should we have a severe enough rain to call this Representative, he will mark the leaks in order that his Company can proceed with the necessary alterations in the Spring.

Re: Blanket for the Shubenacadie
Indian Residential School.

I am just in receipt of a letter from Rev. J. P. Mackey, Principal of the above noted school.

Will you kindly advise what action you wish me to take?

In checking over the blankets for the school, I find they are in very bad shape and need replacing. You are aware of the financial standing of this school, and if at all possible this charge could be made direct instead of taking it out of his per capita grant, I would recommend it.

H. C. Rice

(H. C. Rice) Superintendent.
SHUBENACADIE INDIAN AGENCY.

Ottawa, Ontario.

Dear Sir,

Paying a visit to some of the youngsters laid up with chickenpock, gave me an opportunity of inspecting the bed blankets. Needless to say thay have been in use for many years and with washing and wearing they are very thin.

Our financial position being what it is, it is impossible for us to go out and replace these blankets. We understand that Supt. Rice has a large number of blankets from the War Assets.

Would it be possible that he might allow us one hundred and thirty-five, being one for each child? If Supt. Rice is to pay for them, could we have that number at the same price he is to pay for them?

The chickenpock will clear up in a few more days.

Very truly yours,

J. P. Mackey.

Rt. Rev. J. P. Mackey.
